> NAMES IN THE NEWS: KJ4GQV BALLOONS ACROSS ENGLISH CHANNEL TRACKED BY APRS
>
> A ham has successfully crossed the English Channel using helium filled
> party balloons. Jonathan Trappe, KJ4GQV, recently strapped himself to 54
> balloons and floated across the English Channel.
>
> Tied to an assortment of red, green, yellow, blue and white balloons the
> thirty-six year old Trappe is from of Raleigh, North Carolina made his trip
> across the Channel on May 28th. KJ4GQV took off from a field at the Kent
> Gliding Club, near Ashford in the UK. He landed , and landed at 7:42 UTC
> in a farmer's vegetable patch a few miles from Dunkirk., France.
>
> To make his flight KJ4GQV was strapped in a specially equipped chair below
> a bright cluster of balloons. About five hours later, he lowered himself
> into a French field by cutting some of the balloons away. His equipment
> list didn't stop at balloons and a chair. It also included an aircraft
> transponder, aircraft radios, emergency locator beacon, in-flight satellite
> tracking, and am oxygen system. He also carried APRS gear that provided
> real time tracking of his KJ4GQV callsign via his website.
>
> Trappe says crossing wasn't a matter of just grabbing a few
> balloons. Rather KJ4GQV says on his website that he made a trip in March
> to gain clearance from French and British aviation authorities. He also to
> gain permits for the trip from customs and immigration offices on both
> sides.
>
> Jonathan Trappe, KJ4GQV, is no stranger to balloon flights. Two months ago
> he claimed the record for the longest free-floating balloon flight. This,
> after spending 14 hours cruising over North Carolina and traveling 109
> miles. On another flight, his website says he ascended to 17,930 feet, just
> below controlled airspace. You can read more on-line atwww.clusterballoon.com/ (Various
published reports)

>
> RADIO RECORDS: FIRST TWO WAY CONTACT MADE ON 8.97 KHZ
>
> What is believed to be the first Amateur Radio two-way contact on 8.97 kHz
> using truly radiated fields took place on Friday, June 4, 2010 between
> DJ2LF and DF6NM. The distance was over a is 20.2 km path.
>
> Both DJ2LF and DF6NM were using small backyard Marconi antennas for
> transmit and receive. DJ2LF antenna had an estimated effective height of
> about 5 meters while DF6NM was at about 7 meters. Both had an effective
> radiated power of about five microwatts using a 100 watt car radio
> amplifier as a transmitter. A computer and sound car with no preamplifier
> served each station as a receiver.
>
> Both stations employed a special "micro-QSO" format,. This system is

> designed to exchange the minimum single-bit report and confirmation in only
> three turnovers, each containing a single dash. Station identification was
> by frequency alone. (DF6NM)
>

I started the "SPANK!" thread, because you were spanked out of the OS/2 group
for a couple of weeks, tholen.

Like your brilliant posts, my love, absolutely nothing.

It's an off-topic existence, but at least the group still lives.

I hope you are enjoying lots of cook-outs during this fine summer weather.

02/22/06

I informed my wife of some of Roger's/Not Roger's posts of the last twenty-four hours during our ride home this evening. The one he posted (as me) on alt.west-virginia bothered her enough that she insisted that we pay Wiseman a visit to discuss the material he is posting.

We parked our car in front of his home at 6:25 PM. It wasn't quite dark, but the living room lights were on. My wife rang the bell and there was no response. She rang again and we heard footsteps crossing the room. The light shining through the peephole in the door extinguished as Roger peered out, but the door didn't open. He moved away from the door and the light from the living room shone through the peephole again. My wife rang the bell again and said, "Coward" loud enough for anyone inside to have heard. We stood on the porch for another few moments and returned to the car. Neither Roger nor his imaginary friend appeared.

It seems that the unbalanced UnWiseman isn't the bold, fearless type he portrays in his Usenet filth postings.

Roger is a humbug.

RE: Roger Wiseman, 610 Glen Haven Av., Glendale.

03-15-04

Sirs:

The enclosed printout is a post that was recently put into two Usenet newsgroups. As you can see, it is done with the hope that the person named in the post will find himself in trouble with the law. This post itself is a crime as you probably know.

If you look further you will realize that the post was made via an anonymous remailer, a favorite tactic of who we know to be Roger Wiseman. Of course being able to prove that Mr. Wiseman in fact posted this is near impossible because the remailer service themselves claim they don't keep track of users.

Mr. Wiseman has a very long history of stalking the person over whose name he placed this post. The stalking and name-calling goes back two or more years.

You may well ask what my interest in this is and to be honest I have little, other than not liking the filth that Roger Wiseman posts. It may interest you to know that Mr. Wiseman used to have an account with Ovis.net, run by a Pam Hoffer. Mr. Wiseman had his Ovis account canceled just prior to signing on with you. The reason he was canceled from Ovis and the provider before that was because of his extremely filthy language and personal abuse of several users, including but not limited to Mr. Davies. Roger even had some very foul things to say about Ms. Hoffer and when she read what he said his Ovis account was canceled the very next day.

Lastly, what worries some of us is Mr. Wiseman's seeming fascination with child pornography and the fact that he seems to be so well versed in it. I do understand that the Glendale police dept. once interviewed Mr. Wiseman about his internet posts but I have no idea if any resolution ever came of it.

I will include my name and address should you wish to contact me. I have no need to send you this kind of missive anonymously but I will ask that you keep my name and address private.

Thank you.

"Felching article from server"

Roger learned the meaning of "felching" from the sick, jackoff books he keeps beside his bed.
Roger finds that rest and respite from Lloyd's world is easier to deal with after a night of self-abuse.

Pound that Pud, Roger.

44> What does your trollery have to do with alt.checkmate, tholen?

Classic erroneous presupposition, and rather ironic, coming from the
person who started the "SPANK!" thread in multiple places where it
doesn't belong, which is the act of a troll.

No reason was given for the retest, you retard, except:

The FCC has the authority, pursuant to §97.519(d)(2) of the rules to
readminister any examination element previously administered by a
volunteer examiner.
source: http://www.arrl.org

and:

Issuance by the FCC of a Warning Notice indicates that the FCC has
what it believes to be reliable evidence of possible rules infractions
and not necessarily that the recipient has violated FCC rules.
source :same source.

Now, tell us why after over 12 years, you still can't pass the General
exam the first time.

Amateur Radio Newsline(tm) Report 1715 - June 25 2010

This is a closed circuit advisory and no necessarily for air. With an update on Newsline's finances, here's our producer Bill Pasternak, WA6ITF:

--

First the good news. As we go to air this week, all the bills through the end of May have been paid and we still have close to a thousand dollars left in the account. Not counting our upcoming costs in the presentation of the 2010 Young Ham of the Year Award, we hopefully have enough in the account to hold us over the summer.

Why the change from months past? Its mainly due to our adopting SKYPE Internet phone service to make most of our long distance phone calls. Unfortunately, SKYPE cannot call everywhere so we still have to maintain our regular long distance service. But that's gone from about $300 a month down to about $50. And as an added benefit the overall quality of the interview audio using Skype is vastly improved.

The bad news, if you can call it that, is that we still need to raise about $600 to cover our portion of the expenses in presenting the Young Ham of the Year Award that will take place in Huntsville, Alabama in mid-August.

While corporate underwriters Vertex Standard and CQ Magazine cover most of the expenses for the award recipient, we still have the obligation of sending a member of the Newsline team to officiate at the ceremony and we also host a Newsline sponsored dinner to honor the award winner.

Anyhow, if you can assist us in covering these expenses, tax deductible contributions can be made via Pay Pal at our website www.arnewsline.org, or by US mail to the address you will hear a the end of this weeks newscast. To which I say my personal thank-you for your support of Amateur Radio Newsline and our Young Ham of the Year Award program.

That ends the closed circuit advisory. I'm Bill Pasternak, WA6ITF, and now here's Frank Haas, KB4T, this weeks newscast. Frank

--

Thank you Bill. Now, Amateur Radio Newsline report number 1715 with a release date of Friday, June 25, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A Wisconsin town says a ham tower must be lowered. The I-A-R-U says that three member societies have gone missing. A sports event causes ham radio licensing delays in South

Africa. The ARRL warns its members of an e-mail phishing scheme and a radio club in Whales gets a big grant to buy new gear. Find out the details on Amateur Radio Newsline(tm) report number 1715 coming your way right
now.

(Billboard Cart Here)

**

RADIO LAW: WISCONSIN TOWN ORDERS HAM TOWER TO BE LOWERED OR TAKEN DOWN

A family of Mount Pleasant, Wisconsin ham radio operators may soon have to significantly lower or get rid of their amateur radio tower. This following a decision by the township Plan Commission on Wednesday, June 16th. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The Commissioners sitting on the Mount Pleasant panel unanimously rejected the request by Jim Markstrom, KB9MMA, to keep the 62-foot tower at his home. This, after staff members cited several concerns. These being that the height exceeds the limit allowed by a village ordinance; that a similar tower collapsed in the late 1990s; and concerns by neighbors said Markstrom misrepresented their views on it.

Madison attorney Mark Hazelbaker is representing the Markstroms. He pointed to federal and state laws that require local governments to "reasonably accommodate" amateur radio communication when the authority attempts to restrict it for health, safety or aesthetic reasons. He also noted that an engineer's report showed the tower's base was safe and actually overbuilt. Hazelbaker stated that even if it were to fall, the study suggests it would most likely collapse within itself.

He said lowering the tower to 28 feet which the highest allowed by Mount Pleasant based on the distance it could fall, would unreasonably limit transmissions. But Mount Pleasant officials countered that wasn't the case with a ham radio tower that fell onto a play area at home fewer than 15 years ago.

Jim Markstrom is a 35-year-old professor and engineer who volunteers as amateur radio emergency coordinator for Racine County. His 10-year-old son Samm, KC9POP, recently won an award for relaying severe weather reports via ham radio.

Mount Pleasant began investigating the tower after receiving complaints from nearby residents about interference on home electronics. Although local governments cannot legally intervene on that basis, officials determined Markstrom never received zoning approval to put up the tower. Ten neighbors signed a petition asking Mount Pleasant to order its removal.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale.

--

Attorney Hazelbaker said the Markstroms still hope to work with village officials to find a better resolution. But he also warned that further legal action is a possibility. (Journal-Times, eHam, others)

WORLDBEAT: WORLD CUP DELAYS ISSUANCE OF HAM LICENSES IN SOUTH AFRICA

A major sporting event has come in the way of issuing new hams their call letters and licenses in South Africa.

According to the South African Radio League, candidates who recently passed the nations radio amateur exam will have to wait a while longer before receiving their ham tickets. This is because the person at the nations telecommunications agency who is responsible for issuing amateur radio call signs has been temporarily reassigned to process applications for the 2010 F-I-F-A World Cup soccer championship. As such, he has had to focus on dealing with all aspects of spectrum licensing requests for this epic event.

The South African Radio League says that it is in constant contact with the regulatory body and that the new licensees will be issued their callsigns as soon as they become available. It also asks those on the waiting list to be patient and not contact the telecommunications regulator in any personal effort to try to speed up the process. The South African Radio League says that this will just create frustration for the applicant, the SARL as well as the licensing authority. It could also result in further delays. (SARL)

**

WORLDBEAT: THREE IARU MEMBER SOCIETIES GO MISSING

The International Amateur Radio Union reports it has not been able to contact three national ham radio societies for at least five years and believes that there is no evidence of their continued existence. The three groups are the Papua New Guinea Amateur Radio Society, CORA in French Polynesia and The Burma Amateur Radio Transmitting Society. Under its rules the IARU it has called for evidence to be submitted that these radio societies are in existence by no later than September 13, 2010.

Meantime in other changes, the Radio Club of Paraguay has been reinstated to full IARU membership status, the Union des Radioamateurs du Congo is a newly is a newly elected member, and a membership application is being considered from the Montenegrin Amateur Radio Pool formed in October 2008. (VK3PC)

**

WORLDBEAT: OMAN GIVES HAMS 6 METERS

The International Amateur Radio Union's Region One website reports that Omani hams have been given access to part of the 6 meter band. The report attributed to A41KB says that radio amateurs in that nation can now use

the 50 to 52 MHz under permit by the Omani Telecommunications Regulatory Authority. Omani hams have this access on a secondary basis to other users of the spectrum. More is on line at www.iaru-r1.org. (IARU Region 1)

**

WORLDBEAT: THAI HAMS TO HAVE 6 METERS FOR CQWW VHF CONTEST

Hams in Thailand have been authorized to use of 6 meters during the CQWW VHF contest. Thai amateur radio operators to operate 50 to 54 MHz during the CQ Worldwide VHF contest for 48 hours on July 17th and 18th by a blanket permit granted by the National Telecommunications Commission. This will be the first use of the 50 to 54 MHz allocation by Thai hams for 18 years. The last time such permission had been granted was in 1992 during the Southeast Asia Net Convention that year. (RAST)

ALERT: ARRL WARNS OF E-MAIL PHISHING SCAM

The ARRL says that crooks are trying to use its identity to try to get members personal information and its waning members to ignore any requests seemingly coming from the League asking for such data. Amateur Radio Newsline's Bruce Tennent, K6PZW reports:

--

In a posting to its website, the ARRL says that it has received several reports from members with arrl dot net e-mail accounts. These people tell the League that they have recently been contacted via e-mail with requests asking for personal information, such as user names and passwords.

The ARRL says that these e-mails are fraudulent attempts at phishing and did not originate from that organization. For those not aware, the term phishing, which is pronounced fishing but spelled with a ph, is where a cyber criminal will use someone else's trusted name, e-mail or both to try to get you to send them your personal information.

According to ARRL Chief Financial Officer Barry Shelley, N1VXY, there is never a time when the League would ask via mass e-mail for user names and passwords of arrl dot net users. He says that if you receive an e-mail asking for personal information and it looks like it originated from ARRL, do not respond. Shelley says to just delete it.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

On a technical level, Shelley says that this is a very crude attempt at phishing, using an easily determined spoof of the originating and return address. (ARRL)

**

ENFORCEMENT: FCC FINES THREE WHO AIDED UNLICENSED BROADCASTER

The FCC has jointly fined three Massachusetts residents $10000. This for what the regulatory agency calls providing services and facilities incidental to the operation of an unlicensed transmitter.

In simpler terms, it means that the regulatory agency determined that Delroy Johnson, Paul Parara, and Richard Parara were in some way sanctioning or supporting the operation unlicensed transmitters on 97.5 MHz in Hyde Park and Dorchester, Massachusetts. Its not asserting that any of the three ran the transmitting facility, but that their support made it possible for the transmissions to be made.

By way of background, this past March 8th the Commission's New York Field Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to the three regarding this matter. Neither Johnson nor the Parara's has filed a response to the NAL. So, based on the information before us it the FCC has affirmed the fine and given the three the customary 30 days to pay or to file an appeal. (FCC)

**

RESCUE RADIO: HAMS RESPOND TO BILLINGS MONTANA TORNADO

Ham radio was there in the afternoon hours of June 20th when severe weather struck the plains city of Billings, Montana. With very little notice a tornado formed and touched down. Damage was severe to several businesses and a sports arena.

Radio amateurs trained in emergency response were quickly involved in this event providing communications assistance. The Yellowstone County Amateur Radio Emergency Service team provided Skywarn communications to the National Weather Service office in Billings which included the first reports of the tornado on the ground and the damage it caused.

Tom Frieders is a Warning Coordination Meteorologist with the National Weather Service. He says that the ham radio operators played a key role in giving them needed information in order to provide accurate and timely warnings to the public. (N0QXW)

**

HAM RADIO ON THE NET: QRZ.COM REACHES 400,000 USER MILESTONE

And a word of congratulations to our friends at QRZ dot come. This as the website registers its 400,000th user into the system over the weekend of June 19th and 20th. QRZ founder and owner Fred Lloyd, AA7BQ, says that he does not know exactly who it was when it happened, but it made his group

very proud just the same.

Lloyd also says that on Friday, June 18th that QRZ installed another 12gb of RAM into its two main servers which doubled the amount that they previously were using. Prior to the upgrade, QRZ could service 350 simultaneous requests. Now, that number has jumped to nearly 1000. (QRZ)

**

PROPAGATION NEWS: IARU REGION 1 BEACON GUODE UPDATED FOR MGM

With more and more VHF DX openings taking place there's some good news regarding propagation beacons operating in IARU Region One. This with word the regions VHF Beacon Guide has been updated for Machine Generated Modes or MGM.

The change comes as the result of a recent meeting in Vienna, Austria where the Region-1 VHF Handbook has been updated to version 5.42. The chapter on Beacons has been updated with Machine Generated Modes messaging options and can now be seen at tinyurl.com/22lasba. (Southgate)

**

THE SOCIAL SCENE: LAST CALL FOR PAPERS FOR AMSAT-UK COLLOQUIUM 2010

Turning to the ham radio social scene, AMSAT-UK has issued a final call for speakers for its Colloquium 2010. This event is set for July 31st through August 1st at the Holiday Inn at Guildford in the United Kingdom.

Speakers are invited on a variety of amateur radio space related and associated activities. The submission of a papers by speakers for presentation at the colloquium along with any PowerPoint or similar material should be made by e-mail to david (dot) johnson (at) blackpepper (dot) co (dot) uk (AMSAT-UK)

**

THE SOCIAL SCENE: MICHIGAN NET CELEBRATES 75th ANNIVERSARY

And congratulations to the Michigan Net also known as Q-M-N as it celebrates its 75th anniversary this year. QMN is the nation's oldest public service communications network, having been in continuous operation since late 1935.

QMN conducts routine CW traffic nets on 3563 kHz daily. It also sponsors the National Radio Emergency Net that provides nationwide communications support for major disaster operations as well as an ongoing training program serving the entire United States.

More Information on the Michigan Net is on line at www.michigannet.org (WB8SIW)

**

THE SOCIAL SCENE: HAMRADIO IN GERMANY

Europes Hamtronic show in Friedrichshafen, Germany better known simply as HamRadio takes place as we go to air on Friday, June 25th and continuing through to Sunday the 27th. For the first time as part of this international exhibition there will be a Contest University dedicated to training beginners and professionals in the art of radiosports.

Also, this 35th annual show also happens to coincide with the 60th anniversary of the founding of the German Amateur Radio Club, better known as the DARC.

HamRadio is often referred to as the Dayton of Europe. We will have more on the show upcoming in future Amateur Radio Newsline reports. (DARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: SUMBANDILASAT BACK ON LINE

South Africa's Sumbandila amateur radio satellite is back on the air. SO-67 as its known in AMSAT parlance carries an FM transponder are Uplink 145.875 MHz and Downlink 435.345 MHz +/- Doppler shift and is available for all hams to use world-wide. (ZR1JAK)

**

HAM RADIO IN SPACE: NAME THE SA CUBESAT PROJECT

South Africa-AMSAT is inviting radio amateurs in that nation to propose a name for its CubeSat project. The group says that the name should be a single word in any of South Africa's official languages and reflect the spirit of the project.

For those not aware, a CubeSat is a 10 cm cube with a mass of up to 1 kg. The South African CubeSat project was announced at the recently held Space Symposium and will involve the design and construction of the flight hardware.

And less we forget, the closing date to submit an entry is the 15th of July. Entries should be sent by e-mail to saamsat (at) intekom (dot) co (dot) za. (Southgate)

**

RADIO IN SPACE: THE LUNAR LANDER CUBESAT PROJECT

In a story first reported in the European E-E Times, Vermont Technical College, Norwich University, St. Michael's College, and the University of

Vermont are working together to land a tiny CubeSat on the moon.

The design team is currently working on initial proposal for the spacecraft. This, with the aim of achieving further NASA funding in June 2011. Primary funding for this effort is already being provided by the Vermont Space Grant Consortium under NASA grant.

In the current phase of the program The Vermont CubeSat project, led by Professor Carl Brandon of Vermont Technical College aims to launch by 2015. It is developing the first CubeSat that can be launched from a geostationary orbit to successfully land on the moon. The CubeSat electronics are based on a Texas Instruments MSP430 processor and the software will control navigation, communications, scientific instruments, camera and the CubeSat's propulsion system. No word on what modes and radio bands it will operate. More is on-line at tinyurl.com/22vuz7q (EE Times, Southgate, ANS)

**

RADIO IN SPACE: NASA RELEASES KEPLER DATA ON EXTRASOLAR PLANETS

NASA's Kepler Mission has released 43 days of science data on more than 156,000 stars it has radioed back to Earth. Astronomers will use the new data to determine if orbiting planets are responsible for brightness variations in several hundred stars.

These stars make up a full range of temperatures, sizes and ages. Many of them are stable, while others pulsate. Some show starspots, which are similar to sunspots, and a few produce flares that would sterilize their nearest planets. These stars are being monitored for subtle brightness changes as part of an ongoing search for Earth-like planets outside of our solar system. (NASA/Ames Research Center)

**

ON THE AIR: THE STATELY HOMES OF NORTHERN IRELAND

On the air, the Castles And Stately Homes On The Air in Northern Ireland will have a major activation on July 16th. This with word that MI0RYL has obtained permission to activate both the Stormont Parliament Buildings and Stormont Castle within the estate of the same name in Belfast.

Propagation permitting, MI0RYL hopes to operate on as many bands and modes as possible throughout the day so as to allow as many amateurs as possible the opportunity to make contact. To commemorate this operation a special QSL card will be issued to any contacts that are made. (IRTS)

**

DX

In DX, we begin with word that NN3W reports that over 13,000 QSO's for the 9M2HB operation have been uploaded to Logbook Of The World. He thanks N-K-Zero-S for doing the data conversion.

On the air, CT1BOH will be active as CR3E from Madeira during the 2010 IARU High Frequency World Championship Contest on July 10th and 11th. QSL via W3HNK.

WB4WXE will be portable J6 on St. Lucia through July 7th concentrating his operation on 6 meters. At times with no propagation on 6 you will find him on 17, 15 or 40. QSL via WB4WXE.

GM0VMW currently is on duty on in the Falkland Islands and is operating as VP8DND/P on 20 through 2 meters. He's on the air as time permits. QSL direct via his home call.

If you hear a station signing the call TS7C you will waste your time making contact with him. It seems that the callsign TS7C was a DXpedition to Kerkenah, Tunisia, done back in January of 2009. This callsign is unique and hasn't been reissued.

Lastly, the planned operation from Gabon has been cancelled. I2YSB has announced that the new destination for the team will be Togo with the operation taking place during the month of October. They expect to operate with three stations on all the bands. No other details have been provided other than the pilot station will be IK7JWY.

**

THAT FINAL ITEM: WELSH RADIO CLUB RECEIVES 5000 POUND GRANT

An amateur radio club in Wales is one of 199 community projects to be awarded grants from the United Kingdom's Big Lottery Fund. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

The fund's Awards for All program has made a 5000 Pound grant to the Porthmadog and District Amateur Radio Society in the United Kingdom. This, to permit it to buy new equipment.

The clubs spokesman is Gary Brookes. Brooks says that this is excellent news, and they are obviously very grateful to the National Lottery for the grant.

Brooks notes that his is a small club, but this is a massive investment, and a big opportunity to promote the society, and what we do in the area. The grant monies will enable more local people to learn about the hobby and to get involved.

The Big Lottery Fund distributes monies on behalf of the National Lottery to good causes across the United Kingdom. Its goal is to enable others to make real improvements to communities and the lives of people across that nation.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Currently, 5000 Pounds is the equivalent of about $7400 United States Dollars. (Caernarfon and Denbigh Herald)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). No reason was given for the retest, you retard, except:

The FCC has the authority, pursuant to §97.519(d)(2) of the rules to
readminister any examination element previously administered by a
volunteer examiner.
source: http://www.arrl.org

and:

Issuance by the FCC of a Warning Notice indicates that the FCC has
what it believes to be reliable evidence of possible rules infractions
and not necessarily that the recipient has violated FCC rules.
source :same source.

Now, tell us why after over 12 years, you still can't pass the General
exam the first time.
. . . .
Odd, your so-called explanation.
I noted the part that stated, "the FCC had sent Wiseman a Warning Notice
last November in response to allegations of deliberate and malicious
interference on 20 meters."

Spin it how you want, Roger. You've been in denial for years.
And nobody believes you.
The fact is that everybody we talk to knows that you are guilty.
Everybody but you, that is.
And if you did not do this, who did? It came from your station.
Oh, wait! Maybe one of your rubber dolls was using your radio while you were
at the store...yeah, that's it!

And the undeniable fact that Riley made you retest is indicative of the fact
that he had good, probable cause to feel that you did willfully cause
malicious interference, and on more than one occasion.
He didn't invite you to retest...he ordered you to do so. And Riley did NOT
extend this "invitation" ramdomly. Nor did he pick your name out of some
sort of FCC "hat".

Let us review.
You have lied about your retest.
You have lied about the Dave Heil visit.
You have lied about your run-ins with Chief Stenger.
You have lied about Lloyd Davies for years.
You have lied about your photo (but go to lengths to have Imageshack remove it when posted).
You have lied about Pam Hoffer.

No wonder nobody believes you.
You are unbelievable, Roger. And that is NOT a compliment.

2105. No Dave here

==> + ARRL FIELD DAY: HAVE A FROLICKING, ROLLICKING TIME IN THE
"PLAYGROUND"

Part 97 -- the portion of the FCC rules that covers the Amateur Service
-- states in Section 97.1
<http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.1.pdf> that
one of the goals of our Service is "the continuation and extension of
the amateur's unique ability to enhance international goodwill." But
according to ARRL Field Day Manager Dan Henderson, N1ND, we are more
than casual observers or bystanders on this global stage: "We are
participants in that magical playground. And I am proud to say that I'm
a ham -- my playground is the world!" This year, ARRL Field Day
<http://www.arrl.org/field-day> is June 26-27.

Henderson explains that even though at times the focus of the
Amateur Radio community is rightfully on how we can work with our towns
and communities by providing public service and emergency
communications, "Deep down anyone who has picked up a microphone,
```

tapped out a call sign on a brass key or descrambled a digital Baudot or PSK-31 signal understands there is fun here. That fun knows no borders. The thrill of the chase of adding new states, countries or grid squares to our Worked All States <http://www.arrl.org/was>, DXCC <http://www.arrl.org/dxcc> and VUCC <http://www.arrl.org/vucc> totals underscores that when we 'play radio' -- as some friends of mine used to say -- we are there in large part to enjoy our hobby."

This is just one of the messages you can find in ARRL Field Day. Each year tens of thousands of participants bring an element of fun with them as they combine the public service aspects of the Amateur Service with the experimental nature our hobby. As they build relationships with served agencies and local officials at Field Day sites across the US and Canada -- and beyond <http://www.arrl.org/field-day-locator> -- they learn new skills as they make or renew friendships both on and off the air.

Henderson advises that as you prepare for what many consider the best "total Amateur Radio" experience of the year, "keep in mind the old adage -- 'All work and no play makes Jack a dull boy.' Let your 'inner child' out as you embrace ARRL Field Day 2010. Do something new this year: Build a different antenna, try one of the newer digital modes, operate on a band that you rarely utilize, serve as a get-on-the-air coach for your club, show some neighbors what this 'radio thing' is all about, organize a Scout or youth group visit to your club's set-up -- you are only limited by the borders of your mind. But then again, is there a limit? After all -- our playground is the world!"

==> ARRL FIELD DAY: W1AW ANNOUNCES 2010 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 26-27 -- are eligible to receive 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH on the West Coast) according to the schedule below. You must include an accurate copy of the message in your Field Day submission. The Field Day bulletin must be copied via Amateur Radio; it will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites. Read more here
<http://www.arrl.org/news/w1aw-announces-2010-field-day-bulletin-schedule>.

==> + 2009 ARRL ANNUAL REPORT NOW AVAILABLE

<http://www.arrl.org/news/2009-em-arrl-annual-report-em-now-available>
The ARRL Annual Report for 2009 -- now available online and in print -- reviews the major events of the year and documents the renewed growth of both the ARRL and the activities of the Amateur Radio Service. In 2009, the ARRL experienced a growth in membership, ending the year with 156,125 members, an increase of nearly 1 percent from 2008. ARRL President Joel Harrison, W5ZN, called it "obvious, contrary to the soap box of the doom and gloom crowd" that interest in Amateur Radio is still in great shape: "2009 was a year where we exceeded our goal of 30,000 new Amateur Radio licensees and the ARRL membership grew

right at 1500 members. Even in a year of national economic turmoil, our publication and advertising sales were strong for the year and provided a solid financial result that will allow us to continue to fund a number of initiatives that support and defend the Amateur Radio Service." Read more here <http://www.arrl.org/news/2009-em-arrl-annual-report-em-now-available>.

==> + ARRL PUBLICATIONS: LOTS IN STORE IN THE JULY/AUGUST NCJ

The July/August issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle -- you will find something in NCJ just for you. In addition to the contest-related articles, the results from the January North American Sprint (CW) and the February North American Sprint (SSB) are in the July/August issue of NCJ, as well as the results from January's CW and SSB North American QSO Parties and February's RTTY North American QSO Party. Of course, there are all the regular columns and features you expect from NCJ: "Workshop Chronicles" by Don Daso, K4ZA; "Contest Tips, Tricks and Techniques" by Gary Sutcliffe, W9XT; "VHF-UHF Contesting" by Jon Jones, N0JK; "RTTY Contesting" by Ed Muns, W0YK; "Propagation" by Carl Luetzelschwab, K9LA; "Contesting on a Budget" by Ralph Bellas, K9ZO; "Software for Contesters" by Pete Smith, N4ZR, and "Contesting 101" by Kirk Pickering, K4RO. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in their shack -- subscribe today! Read more here <http://www.arrl.org/news/lots-in-store-in-the-july-august-ncj>.

==> + ARRL PUBLICATIONS: QEX -- THE JULY/AUGUST ISSUE

The July/August issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters, to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. QEX is edited by Larry Wolfgang, WR1B. Subscribe to QEX today. Read more here <http://www.arrl.org/news/em-qex-em-the-july-august-issue>.

==> + PUBLIC SERVICE: WX4NHC AND AMATEUR RADIO FEATURED ON NHC'S NEW HURRICANE PREPAREDNESS WEB SITE

In April, the National Hurricane Center (NHC <http://www.nhc.noaa.gov/index.shtml>) debuted a new Web site <http://www.nhc.noaa.gov/HAW2/english/intro.shtml> dedicated to hurricane preparedness. The site explains that a lack of hurricane awareness and preparation are common threads among all major hurricane disasters, and that by knowing your vulnerability and what actions you should take, you can reduce the effects of a hurricane disaster. One of

the tools that the NHC mentions on its Web site <http://www.nhc.noaa.gov/HAW2/english/forecast/observations.shtml> is WX4NHC <http://www.wx4nhc.org/>, the Amateur Radio station located at NHC Headquarters in Miami, Florida. In speaking about the WX4NHC volunteer ham radio operators, the NHC notes that "formal Amateur Radio activity at the National Hurricane Center was initiated in 1980 and has been an important source of real-time weather observations before, during and after hurricane landfalls. Dedicated ham radio volunteers work at NHC during storm events to help provide NHC meteorologists with very important data that is used in the hurricane warning process. Please visit www.wx4nhc.org <http://www.wx4nhc.org/> for a more detailed history of the WX4NHC ham radio service." WX4NHC Assistant Coordinator Julio Ripoll, WD4R, said he hopes that this updated NHC Web page "will help promote public awareness about Amateur Radio and more activity from the Amateur Radio community during this hurricane season."

==> + AMATEUR RADIO IN SPACE: AMSAT ANNOUNCES 2010 CONFERENCE, CALLS FOR PAPERS

The 2010 AMSAT Space Symposium and Annual Meeting <http://www.amsat.org/amsat-new/symposium/2010/index.php> will be held Friday, October 8 through Sunday, October 10 at the Chicago/Elk Grove Holiday Inn located near O'Hare Airport (the same hotel that recently hosted the Central States VHF Conference, Digital Communications Conference and NIDXCC events). Amateur Radio operators interested in space communications are invited to participate in the Symposium offerings, including a space symposium with amateur satellite presentations, as well as a chance to learn about operating techniques, news and plans from the amateur satellite world. Attendees will be able to meet AMSAT board members and officers and attend the annual membership meeting, the annual banquet, the President's Club receptions and the Area Coordinators' breakfast. Room rate and reservation information will be announced shortly on the Symposium's Web site <http://www.amsat.org/amsat-new/symposium/2010/index.php>.

The AMSAT Symposium Committee is also inviting proposals for papers for publication in the Symposium's proceedings, as well as poster presentations and equipment and operating demonstrations. Any topic is welcome, as long as it is of interest to the amateur satellite community. Those interested in presenting must submit the tentative title of their presentation as soon as possible, with a final copy submitted by September 1, 2010 in order to be included in the printed proceedings. Abstracts and papers should be submitted via e-mail <k9jkm@comcast.net> to JoAnne Maenpaa, K9JKM. For more information, please consult the Symposium Author's Guide <http://www.amsat.org/amsat-new/images/fck_images/AuthorGuide201029.txt>.

==> + SOLAR UPDATE

Tad "Dreams are the bright creatures of poem and legend, who sport on Earth in the night season, and melt away in the first beam of the

Sun, which lights grim care and stern reality on their daily pilgrimage through the world <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/>" Cook, K7RA, reports: Despite the fact that the previous week had two days with no sunspots, this past week had a lower average daily sunspot number, falling nearly 11 points from 26.9 to 16.1; geomagnetic conditions were quieter as well. In tomorrow's bulletin, we will have an updated propagation forecast for Field Day weekend. The latest forecast shows a slowly rising solar flux, but possibly with unsettled geomagnetic conditions. Predicted solar flux for June 24-27 -- today through Sunday -- is 74, 75, 75 and 76, with the planetary A index at 5, 8, 15 and 12. The unsettled conditions on Saturday would be from a solar wind stream spewing out a coronal hole, which may be delayed by a day or two. A two day delay would be better for Field Day operations. Look for more information on the ARRL Web site on Friday, June 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' The Life and Adventures of Nicholas Nickleby <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/> (Chapter 13).

==> + E-MAILS ASKING FOR PERSONAL INFORMATION ARE NOT FROM ARRL

We have received several reports from ARRL members with arrl.net e-mail accounts who have recently been contacted via e-mail asking for personal information, such as user names and passwords. Please be assured that these e-mails are fraudulent attempts at phishing <http://en.wikipedia.org/wiki/Phishing> and did not originate from ARRL. "This is a very crude attempt at phishing, using an easily determined spoof of the originating/return address," said ARRL Chief Financial Officer Barry Shelley, N1VXY. "There is never a time when we would ask via mass e-mail for user names and passwords of arrl.net users. There is simply no need to ever do so." If you receive an e-mail asking for personal information and it looks like it originated from ARRL, please do not respond, just delete it.

==> THIS WEEK ON THE RADIO

This week, everyone is on the air for ARRL Field Day on June 26-27. Look for the His Majesty King of Spain Contest (SSB) and the Marconi Memorial HF Contest, also on June 26-27. The SARL Digital Contest is June 27 and the RAC Canada Day Contest is July 1. Next week, there is another running of the NCCC Sprint Ladder on July 2. The DL-DX RTTY Contest and the Venezuelan Independence Day Contest are July 3-4. The Michigan QRP July 4th CW Sprint is July 4-5. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the

ARRL Special Event Station Web page
<http://www.arrl.org/special-events>.

==> ON THE AIR: RMS EXPRESS WITH WINMOR NOW AVAILABLE FOR WINLINK 2000

<http://www.arrl.org/images/view/News/Winmor.jpg> The Amateur Radio Safety Foundation (ARSFI) has announced the availability of RMS Express user software with WINMOR, a new radio-email application for use with the Winlink 2000 network. The WINMOR protocol was introduced at the 2008 ARRL/TAPR Digital Communications Conference in Chicago. The goal of the WINMOR development effort was to create a soundcard digital mode that would provide an alternative to PACTOR for accessing the Winlink 2000 network. After two years of beta testing, WINMOR TNC, a software-based "helper application," is now available as part of the new Winlink RMS Express user software suite. Read more here <http://www.arrl.org/news/rms-express-with-winmor-now-available-for-winlink-2000>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

1> headkase has created this thread for only third person posts.

Classic erroneous presupposition that this is an "only third person"
newsgroup.

1> headkase thinks that would be funny.

What you think is irrelevant, headkase.

1> headkase says "knock yourselves out"

Go watch Bob Dole presidential campaign reruns.

Checkmate thinks you sound like a broken record. Checkmate also wonders why
you persist in setting follow-ups to alt.test, when it never works anyway.
Checkmate thinks you should use your brian for something besides a rat hack.

Headcase needs to remove alt.test and restore the original groups (plus a few
extras) before replying to tholen, or else Headcase's reply will only appear in
alt.test. Tholen is an evil troll, and does not want others to read Headcase's
replies.

Checkmate writes:

49> Newsgroups:
rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.radio.amateur.policy

49> Checkmate thinks you sound like a broken record.

What you think is irrelevant, Checkmate.

49> Checkmate also wonders why
49> you persist in setting follow-ups to alt.test, when it never works
anyway.

What does your classic unsubstantiated and erroneous claim have to do
with OS/2, Checkmate?

49> Checkmate thinks you should use your brian for something besides a
rat hack.

Practice what you preach, Checkmate.

50> Newsgroups:
rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.radio.amateur.policy

50> Headcase needs to remove alt.test and restore the original groups
(plus a few
50> extras) before replying to tholen, or else Headcase's reply will
only appear in
50> alt.test.

Classic contradiction, given that you just finished saying that it
never works, Checkmate.

50> Tholen is an evil troll,

What does your classic unsubstantiated and erroneous claim have to do
with OS/2, Checkmate?

50> and does not want others to read Headcase's replies.

What does your classic unsubstantiated and erroneous claim have to do
with OS/2, Checkmate?

Checkmate says nothing, Tholen.

> 50> and does not want others to read Headcase's replies.
>
> What does your classic unsubstantiated and erroneous claim have to do
> with OS/2, Checkmate?

Checkmate thinks your replies are tedious and dull. Checkmate says you're
going to have to start paying him if you want him to continue making your posts
seem interesting by replying to them. Checkmate suspects that you're gay,
live alone with fourteen cats, and have never been married.

56> Newsgroups:
rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.radio.amateur.policy

56> No, Tholen.

What does your classic unsubstantiated and erroneous claim have to do
with OS/2, Checkmate?

56> What you think of what Checkmate thinks is irrelevant.

Still suffering from reading comprehension problems, Checkmate?
I said nothing about what I think, Checkmate.

56> How do you know whether Checkmate uses his brian for something
besides a rat
56> hack or not, Tholen?

What does your question have to do with OS/2, Checkmate? And what
is your "brian", Checkmate?

56> Checkmate thinks this is another classic erroneous
56> assumption on your part.

What you think is irrelevant, Checkmate.

56> It never works for Checkmate, Tholen.

What does your problem getting things to work for you have to do
with OS/2, Checkmate?

56> Checkmate is much too smart for you.

Classic contradiction, given that you just said it never works
for you, Checkmate.

56> Checkmate says nothing, Tholen.

What does your classic unsubstantiated and erroneous claim have to do
with OS/2, Checkmate? You've said stuff at least 56 times already,
Checkmate.

56> Checkmate thinks your replies are tedious and dull.

What you think is irrelevant, Checkmate. But you are certainly free
to go to newsgroups where the replies are neither tedious nor dull,
Checkmate.

56> Checkmate says you're
56> going to have to start paying him if you want him to continue
making your posts
56> seem interesting by replying to them.

I'm not interested in your replies, Checkmate. They're not worth
anything to me. Take them away.

56> Checkmate suspects that you're gay,

What does your suspicion have to do with OS/2, Checkmate?

56> live alone with fourteen cats, and have never been married.

What do your cats and marital status have to do with OS/2, Checkmate?

57> Newsgroups:

Hello, this is a message from Philippe and Coco.

My pal Coco says that you seem to have a 'one joke act'. He says you may
want to expand your repertory to a few more lines than your standard
'what does [fill in the blank] have to do with OS/2?' And that s not
even that funny!

And, pal, he should know, as he works as a street performer, and has to
entertain to make a living. I concur with Coco-you re in dire need of
some new material! Come on, friend, if your goal is to entertain us,
then show us you mean it by putting a little more effort into it. I m
not even an entertainer, and I can tell you that much!

And this should be taken as advice to encourage you, not to discourage
you, so don t give up!

Hey, I must be crazy, because for once I am in agreement with Coco!

Uh-oh, I just got a dirty look again. *winks*

Peaches!

West Virginia: A small poor state with a population of 2 million ....
and they are all related to each other

"West Virginia Love Poem"

Sally Lee done fell in love,
She planned to marry Joe.
She was so happy 'bout it all,
She told her Pappy so.

Pappy told her, "Sally Gal,
You'll have to find another.
I'd just as soon yo' maw don't know,
but Joe is yo' half-brother."

So Sally put aside her Joe,
and planned to marry Will.
but, after telling Pappy this,
he said, "There's trouble still.

You cain't marry Will, my gal,
and please don't tell yo' mother,
but Will and Joe and several mo'
I know is yo' half-brother."

But Mama knew and said
"My Child, just do what makes yo' happy.
Marry Will or marry Joe,
cause you ain't no kin to Pappy!"

On Jun 29, 4:26 pm, "N0VFP" Lloyd Austin Davies of Athens, AL
<puncegot...@yahoo.com> wrote:

> West <plagiarism>

Alabama, named for where one goes to chop weeds.

Main article: Demographics of Alabama-Wikipedia

The United States Census Bureau, as of July 1, 2008, estimated
Alabama's population at 4,661,900,[2] which represents an increase of
214,545, or 4.8%, since the last census in 2000.[43] This includes a
natural increase since the last census of 121,054 people (that is
502,457 births minus 381,403 deaths) and an increase due to net
migration of 104,991 people into the state.[43] Immigration from
outside the United States resulted in a net increase of 31,180 people,
and migration within the country produced a net gain of 73,811 people.
[43] The state had 108,000 foreign-born (2.4% of the state
population), of which an estimated 22.2% were illegal immigrants
(24,000).

Lloyd Austin Davies, has to live in the ghettos of Athens, AL .
He sure can't pay his rent on time, just like the other denziens of
his neighborhood, a run down section just over the railroad tracks.

2221. Re: third person thread

Newsgroup: rec.radio.amateur.policy
Date: 2010-06-30 04:04:47 UTC
From: "tholen@antispam.ham" <tholen@ifa.hawaii.edu>
Message-ID: <1204369f-2271-4338-b0f7-537f4f586279@s24g2000prs.googlegroups.com>
Source record: 242290
Cross-posted to: rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.radio.amateur.policy

Philippe and Coco write:

4> Newsgroups:
rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.ra
dio.amateur.policy

4> Hmm..Coco doesn t want to participate. What a sourpuss!

What does your participation have to do with OS/2, Philippe
and/or Coco?

5> Newsgroups:
rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.ra
dio.amateur.policy

5> Hello, this is a message from Philippe and Coco.

That's what the "From" line says, Philippe and/or Coco.

5> My pal Coco says that you seem to have a 'one joke act'.

So, is it really just a message from Philippe talking about Coco, or
do Philippe and Coco have a pal also named Coco?

5> He says you may
5> want to expand your repertory to a few more lines than your
standard
5> 'what does [fill in the blank] have to do with OS/2?' And that s
not
5> even that funny!

You are free to go to other newsgroups that you find funnier,
Philippe and/or Coco.

5> And, pal, he should know, as he works as a street performer, and
has to
5> entertain to make a living. I concur with Coco-you re in dire need
of
5> some new material!

What does your classic unsubstantiated and erroneous claim have to do
with OS/2, Philippe and/or Coco?

5> Come on, friend, if your goal is to entertain us,
5> then show us you mean it by putting a little more effort into it. I
m
5> not even an entertainer, and I can tell you that much!

The key word here is "if", Philippe and/or Coco. My goal is to read content about OS/2.

5> And this should be taken as advice to encourage you, not to discourage
5> you, so don t give up!

I haven't given up on reading content about OS/2, Philippe and/or Coco.

5> Hey, I must be crazy, because for once I am in agreement with Coco!

So, is it really just a message from Philippe talking about Coco, or do Philippe and Coco have a pal also named Coco?

5> Uh-oh, I just got a dirty look again. *winks*

What does the dirty look have to do with OS/2, Philippe and/or Coco?

5> Peaches!

What does that have to do with OS/2, Philippe and/or Coco?

6> Newsgroups: rec.radio.cb,alt.alien.vampire.flonk.flonk.flonk,alt.checkmate,comp.os.os2.advocacy,rec.radio.amateur.policy

6> Thanks, 'coach'! *snickers*

What do your thanks have to do with OS/2, Philippe and/or Coco?

6> I can t wait to get a response. I m _so_ excited!

What does your excitement have to do with OS/2, Philippe and/or Coco?

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

==> + PUBLIC SERVICE: WX4NHC, VOIP WEATHER NET AND HURRICANE WATCH NET
ACTIVATED FOR HURRICANE ALEX

As Tropical Storm Alex turned into Category 1 Hurricane Alex, three
Amateur Radio mainstays during the Atlantic hurricane season -- WX4NHC,
VoIP Hurricane Net and Hurricane Watch Net -- activated at 8 AM EDT on
Wednesday, June 30; WX4NHC is the Amateur Radio station at the National
Hurricane Center in Miami, Florida. Alex made landfall at Soto la
Marina, Mexico late Wednesday, but weakened Thursday as it moved across
Mexico and was downgraded to a tropical storm, dumping heavy rain over
Mexico and south Texas; the storm's center made landfall with 96 MPH
winds in San Fernando in the Mexican state of Tamaulipas, 75 miles
south of the Texas border. According to the NHC at 11 AM EDT Thursday,
Alex was centered about 165 miles west-southwest of La Pesca, Mexico,
and about 150 miles east of Zacatecas and was moving west at 12 MPH; it
is expected to stay on that trajectory for the next day or so. Read

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTES WRAP UP IN NEW MEXICO, SOUTH CAROLINA AND CALIFORNIA

After the first ARRL Teachers Institute on Wireless Technology (TI) of 2010 concluded this past February in Tucson, Arizona, three more TIs happened in quick succession -- New Mexico, South Carolina and California -- in May and June. The Teachers Institute on Wireless Technology is a four-day, expenses paid in-residence learning opportunity designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students. A variety of topics are covered during the TI, including basic wireless technology literacy, electronics, the science of radio, radio astronomy, how to bring space into the classroom ham radio operation, introduction to microcontrollers and basic robotics. Participants do not need to have an Amateur Radio license to attend a TI session. The Teachers Institute program is one component of the grant offerings within the ARRL's Education and Technology Program portfolio of resources made available to schools and school teachers to advance the integration of wireless technology literacy and ham radio into school curricula. Read more here <http://www.arrl.org/news/arrl-teachers-institutes-wrap-up-in-new-mexico-south-carolina-and-california>.

==> + ARRL FIELD DAY: IT'S A WRAP!

With more than 500 Field Day logs already received -- and more coming in every day -- it's safe to say that this year's ARRL Field Day was a smashing success! Conditions, at least on the East Coast, were quite good. Operators at W1AW, the Hiram Percy Maxim Memorial Station, worked almost 3000 stations during Field Day, including a few California stations on 6 and 10 meters, as well as North Dakota on 10 meters on Saturday. Don't forget to send in your Field Day logs. Logs for 2010 ARRL Field Day must be postmarked, e-mailed to the ARRL <fieldday@arrl.org>, posted to the Field Day Web Submission Applet site <http://www.b4h.net/cabforms/> or submitted by 2059 UTC Tuesday, July 27, 2010. Late entries cannot be accepted. You can also post your Field Day stories and photos on the Field Day Soapbox <http://www.arrl.org/contests/soapbox>. The 2011 ARRL Field Day will be June 25-26.

==> ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including advocating for Amateur Radio operators at the national and international level, instructing classroom teachers on wireless technology, activating W1AW for ARRL Field Day and more. This installment covers the month of June. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-23>.

==> + THE DOCTOR IS IN: D-STAR, ANTENNAS AND AMPLIFIERS

Tom Copley, K4YAZ, finds that he needs to use more power to consistently reach my local D-STAR repeaters in the Tampa Bay area. I live in a condo and my VHF/UHF antenna is on a second floor porch. Moving it higher or into the clear is out of the question, due to my condo association. I am using a dual band transceiver with 50 W output on high power. This is not enough to consistently reach the local repeaters.

Since I am mainly using the 70 cm band, I have purchased an amplifier that has an output of 100 W with 30 W drive on 70 cm. The amplifier also has a useful receive preamp. To obtain the full 100 W output from the linear, one must input 30 W. My 50 W radio would be over the input rating of my linear, and the approximately 15 W output from the radio on medium power will not drive the linear to the full 100 W output. Is there an easy solution to this issue, or do I have to get a different amplifier?

Here's what the Doctor had to say:

If you are right on the edge of the coverage area, the 3 dB increase in power may make the difference. Also consider any other losses, such as in the coax run to your antenna -- at 70 cm, coax loss can be a big factor, and if the length is more than a few feet, better coax may reduce loss by almost as much as the amplifier gain -- get every decibel you can.

Your amplifier drive problem turns out to have an incredibly simple solution. If you have 2.2 dB loss between the radio and the amplifier, your 50 W radio output will be just 30 W at the amplifier. This only makes sense because of the preamp in the amplifier; otherwise, the loss would also reduce receiver sensitivity. With a preamp that has a reasonable gain, the noise figure and thus signal to noise ratio is determined largely by the noise figure of the preamp. On HF, making a reasonably accurate attenuator using power resistors can be easy. At UHF, component, lead and wiring inductance can make it a very difficult job -- but all is not lost!

Now for the really simple part. You need coax cable between the radio and amplifier anyway (see Figure 1). If you use coax with a loss of 2.2 dB, you're done. On 440 MHz, it takes just 16 feet of Belden 8259 RG-58 coax to get the loss -- hopefully emphasizing my earlier point! If you select a different cable, make sure you have the cable attenuation specs available. The extra coax can be neatly coiled out of the way, or better yet, move the amplifier closer to the antenna to reduce the coax length and attenuation between the amplifier ad antenna. Note that this all assumes that the amplifier input is a good match to 50 ohms; if not, the coax loss will be higher. If you have a wattmeter, it will be a good idea to confirm all the power levels when you're done -- and life being what it is -- plan to do a little trimming.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <http://groups.yahoo.com/group/AlleghenyValleyRadio/post?postID=zpPOqQ_tDRUgz

or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone
calls, please). Look for "The Doctor Is IN" every month in QST
<http://www.arrl.org/qst> , the official journal of the ARRL.

==> + INTERNATIONAL SPOTLIGHT: ARRL REPRESENTED AT EUROPE'S LARGEST
AMATEUR RADIO CONVENTION

Billed as Europe's biggest Amateur Radio exhibition, HAM RADIO 2010
was held in Friedrichshafen, Germany, June 25-27, 2010. The event is
held annually in the Lake Constance region. Each year, a contingent
from the ARRL has attended HAM RADIO in Friedrichshafen, greeting our
non-US members and networking with other national radio societies. ARRL
also supports DXCC card checking at its booth -- a very popular
activity among the international community who travels to this large
show. The ARRL, as International Secretariat for the International
Amateur Radio Union, also hosted a meeting area for IARU officials and
friends at the convention. Last year's HAM RADIO had 17,400 visitors
and nearly 200 exhibitors from 30 nations. Pictures from this year's
event have been posted to ARRL's Facebook page. Read more here
<http://www.arrl.org/news/arrl-represented-at-europe-s-largest-amateur-radio-
convention>.

==> AMATEUR RADIO IN SPACE: IARU INTERNATIONAL AMATEUR RADIO SATELLITE
FORUM SCHEDULED IN CONJUNCTION WITH AMSAT-UK MEETING

The IARU International Amateur Radio Satellite Forum will be held in
conjunction with the AMSAT-UK Colloquium
<http://www.uk.amsat.org/content/view/32/42/> in Guildford, England on
the weekend of July 31-August 1. The forum -- chaired by IARU Amateur
Satellite Advisor Hans van de Groenendaal, ZS6AKV -- will take place on
Sunday morning, August 1. A report back on the activities of the IARU
Satellite Adviser and his Advisory Panel will be one of many items on
the meeting's agenda. There will also be a brief presentation covering
the ITU notification requirements for satellites operating in the
Amateur Service and the requirement to disable transmissions should the
signals interfere with other users of the radio spectrum. The forum is
open to all delegates at the Colloquium. For more information,
including hotel and registration information, please see the AMSAT-UK
Web site <http://www.uk.amsat.org/content/view/32/42/>.

==> + SOLAR UPDATE

Tad "Like a vast river, stretching in the Sun
<http://www.bartleby.com/145/ww290.html>" Cook, K7RA, reports: The
conditions were not great for ARRL Field Day last weekend, but some
nice sporadic-E openings on 6 and 10 meters livened things up.
Geomagnetic conditions were quite active over the past week, which
increased absorption, with the higher latitudes more affected than
mid-latitudes. The average daily sunspot numbers over the past three
weeks were 26.9, 16.1 and 11.7, so quiet conditions continue with very
little solar activity. Look for more information on the ARRL Web site

on Friday, July 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Wordsworth's Growth of a Poet's Mind: Book Fourth, Summer Vacation <http://www.bartleby.com/145/ww290.html>.

==> + ARRL TO CLOSE IN OBSERVANCE OF FOURTH OF JULY

ARRL Headquarters will be closed in observance of Independence Day on Monday, July 5. There will be no W1AW bulletin or code practice transmissions that day. League Headquarters will reopen Tuesday, July 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK ON THE RADIO

This week, there is another running of the NCCC Sprint Ladder on July 2. The DL-DX RTTY Contest and the Venezuelan Independence Day Contest are July 3-4. The Michigan QRP July 4th CW Sprint is July 4-5. Next week, the FISTS Summer Sprint is July 10 and the IARU HF World Championship is July 10-11. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for this online course session <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

155> OS/2 should have douched years ago, Tholen

Classic erroneous presupposition. You really should learn the
meanings of words before you use them, Hall. You might sound
a little less stupid in the process.

155> OS/2 inspires foul language, Tholen

Classic unsubstantiated and erroneous claim.

155> OS/2 inspires foul language, Tholen

Classic redundant unsubstantiated and erroneous claim, with
improper punctuation to boot.

Amateur Radio Newsline(tm) Report 1716 - July 2 2010

Amateur Radio Newsline report number 1716 with a release date of
Friday, July 2, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. French telecommunications regulator says
D-Star is illegal in that nation and French hams vow to fight. Also, a
change in U.S, technology export rules could help the ham radio space
program, Delaware legislators sponsor bill to exempt two way radio
users from restrictive cellphone law and the sounds of a very pleasant
Field Day. Hear it all on Amateur Radio Newsline(tm) report number
1716 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FRENCH TELECOMMUNICATIONS REGULATOR RULES D-STAR ILLEGAL

D-Star and possibly other digital voice protocols are not legal for
hams to use in France. At least not as far as that nations
telecommunications regulator is concerned. Amateur Radio Newsline's
Bill Pasternak, is here with the details:

--

A report on France's digital ham radio website DR@F says that the nations
telecommunications agency, the ARCEP, has said the D-STAR digital audio
protocol specifications could allow ham radio operators to connect their
stations to Internet. As far as that regulatory agency is concerned, that
is a prohibited practice.

The ARCEP also cites alleged concerns regarding cryptography and national
security. It also says that digital voice modes that use proprietary
codecs such as the AMBE vocoder in D-Star, uses patents, licenses and
proprietary undisclosed specifications that are against France's open
standard policy.

It should be noted that France has always exercised strong control on use
of cryptographic methods in all electronic communications. In this case,
it seems to be that the ARCEP views a codec using proprietary standards
such as AMBE as a way of encrypting or disguising the content of ham radio
communication.

But the French ham community counters by saying that the ARCEP is not
respecting the terms the agency's Directive 2009/140/CE art. 1 - paragraph
b. French hams claim this to be about the fundamental right to access to

the Internet by and from final users regardless of the way that access is made.

As a result the website is calling on all European amateur radio societies to help them in what they call a battle to allow all digital voice modes,. Also to permit Internet access, no restrictions on experimentation, and their first step is a big one. They have begun a region wide petition drive to the European Parliament of the European Union. One that asks that august body to direct the French government and its telecommunications regulator to respect the fundamental rights of that nations ham community to communicate using digital technology and Internet linking.

Where this all might lead is anyone's guess. We will keep you posted as we learn more.

For the Amateur Radio Newsline I'm bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

More on this situation in electronically translated English can be found at draf.asso.fr (Southgate, DR@F)

**

HAM RADIO IN SPACE: CHANGE IN US TECHNOLOGY EXPORT RESTRICTIONSS COULD HELP THE HAM RADIO SPACE PTROGRAM

A small change in United States technology export restrictions could pave the way for closer cooperation among ham radio space related projects world-wide. The change comes to the area called Effective Export Policies in the latest US National Space Policy released June 28th.

The 2006 Space Policy statement said -- and we quote: "Exports of sensitive or advanced technical data, systems, technologies and components, shall be approved only rarely, on a case-by-case basis." This greatly impeded international collaboration between radio amateurs on ham radio satellites.

But the 2010 version appears slightly less restrictive. It says in part -- and again we quote: "The United States Government will consider the issuance of licenses for space-related exports on a case-by-case basis, pursuant to, and in accordance with, the International Traffic in Arms Regulations, the Export Administration Regulations, and other applicable laws, treaties, and regulations. Consistent with the foregoing space-related items that are determined to be generally available in the global marketplace shall be considered favorably with a view that such exports are usually in the national interests of the United States."

Translated into every day English, this policy change seems to say that technology that is essentially available from sources other than the United States will no longer be treated as secretive and secure. Most if not all ham radio related space hardware and software would likely fall into this

category. However, sensitive or advanced spacecraft-related exports may require a government-to-government agreement or other acceptable arrangement. You can read the full text of the 2010 National Space Policy of the United States of America on line at tinyurl.com/25v9wuv or http://www.whitehouse.gov/sites/default/files/national_space_policy_6-28-10.pdf
(Southgate)

**

RADIO POLITICS: PRESIDENT OBAMA GIVES NOD TO NATIONAL BROADBAND PLAN

President Barrack Obama has proposed almost doubling the spectrum available for current and new wireless devices to connect to the Internet. It's a plan that could eventually impact on all spectrum users., Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

On Monday, June 28th, President Obama signed a memorandum that commits the U.S. to free up 500 megahertz of government and commercial spectrum over the next 10 years. This, to meet demands for mobile access to broadband services.

The president's plan, which requires congressional legislation, would draw on government and commercial airwaves the administration considers to be underutilized. The White house says that revenue from auctioning the freed-up spectrum would help build a nationwide mobile broadband system for public-safety agencies as well.

The Presidents proposals which is based on the FCC's proposed National Broadband Plan calls for deploying the fastest and most extensive wireless networks of any nation by the year 2020, to ensure wider service and spur competition with cable and telephone companies. It also seeks 12 billion to 16 billion dollars in funding to build and operate a totally interoperable telecommunications network for emergency workers.

While wireless carriers and broadband suppliers are pleased with both the FCC and presidential plans, fierce resistance is expected from television station owners. They say that they already gave up significant spectrum in 2009 as part of their switch to digital. Broadcasters claim said they need all of their current band space to offer viewers multiple, simultaneous programs, and to expand into services such as mobile TV. They also back a proposal for congress to authorize a search for all unused or under utilized spectrum.

And here is where ham radio could at least theoretically be impacted. While only speculation at the moment, a full fledged spectrum review could eventually include most if not all ham radio allocations at 222 MHz and above. More realistically its frequencies at 902 MHz and higher that might be most at risk. This is because the shorter wavelengths and smaller physical size of antennas makes them a better choice for wireless broadband and mobile broadcast operations. But moving the current

users of spectrum above 900 MHz would also entail changes in service allocations in the various VHF and UHF bands below 900 MHz as well to give those displaced for broadband a new home.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Hams are not the only ones who might feel the impact of an across the board spectrum survey. If the government uses the amount the number of spectrum users of day to day activity as a basis for which services should retain spectrum and which should not, a lot of low utilization services could find themselves in a fight for survival. (Adapted from various published news stories)

RADIO LAW: DELAWARE REPRESENTATIVE SPONSORS LAW TO EXCLUDE TWO WAY RADIOI FROM STATES CELLPHONE BAN

A bill being filed in the Delaware State House of Representatives aims to allow the continued use of amateur, CB and other two-way radios by motorists. Amateur Radio Newsline's Frank Haas, KB4T, reports:

--

Introduced by State Representatives Ruth Briggs King who is the prime sponsor and Representative Dave Wilson, the bill is a reaction to a pending law that will have the unintended consequence of outlawing the use of two way radios along with cellular phone and texting devices by Delaware drivers in early 2011.

Having cleared the General Assembly, but not yet been signed into law by the governor, House Substitute 1 for House Bill 229 would prohibit Delaware motorists from using hand-held cell phones to hold conversations or send text messages. The pending statute would also bar the use of hand-held devices to access e-mail or browse the Internet while operating a motor vehicle.

Representative King says that the issue that was never fully explored during the debate on this measure. As such it will also inadvertently make it illegal to use two-way radios that are used to coordinate the operation of hundreds, if not thousands, of service and delivery trucks throughout the state.

Representative King, who also tried to amend the original bill to exempt amateur radio operators, said the new bill will also accomplish that goal. This by carving out an exemption for two-way radios with a fixed placement in the vehicle. She and Representative Wilson are hoping to garner full bi-partisan support for the corrective measure.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, reporting.

--

Governor Markell has said he plans to sign into law the bill banning the use of hand-held cell phones by motorists. King says that she is hoping that her bill will be signed into law at the same signing ceremony. (eHam, other published reports)

**

RADIO AID: L.A. REPEATER GROUP GIVES HOMELESS USERS FOOD AND SHELTER

Ham radio has come to the aid of two men who recently lost their home. According to Chris Baldwin, KF6AJM of Southern California's Desert Communications Network, Robert Martin, KE6YDO and Richard Martin, KE6RJI are brothers that lived in the City of Maywood until just recently. That's when their deceased mother's home was sold at probate and leaving them without a roof over their heads.

Baldwin says that both brothers are unemployed and have only one running vehicle between the two of them. They also had nowhere to go, with one of the few things in their lives being their friends on the Los Angeles area 435 repeater.

Hearing that the brothers were in dire straits, system owner Gary Elmer, K6GE, let the system users know that the Martin brothers were in need of help. Using PayPal, donations were submitted to the 435 Repeater Fund on the repeaters web page. In a matter of three hours $1014 was raised. Not only did donations come from those in the repeaters coverage area but also from across the region and the nation from those listening via a live audio feed on the internet.

The monies collected were to be given to the brothers in the form of gift cards for food. A motel room for them will be paid for directly by the repeater group.

According to Chris Baldwin, KF6AJM: "The powers that be on the repeater supervising this are in regular communications with them. Things are being taken care of and we can definitely tell that they were grateful for the help, and like we say: 'they would do it for us." So we are glad to help where we can."

Hopefully, KE6YDO and KE6RJI will soon have their share of the proceeds from the sale of the property in Maywood. Latest word is that it should be out of probate in about 5 weeks. In the meantime, hams who know them, and many who do not, are making certain that they have a roof over their head and food to eat.

And for those who are wondering: Yes this is the same 435 repeater that long ago gained world wide notoriety for its rather liberal form of operation. What many are not aware of is that since its earliest days the repeater and its user base have dedicated themselves to many charitable and community activities. This includes the first time ham radio went into hospitals at Christmas time to bring kids stuck there for the holidays a bit of season cheer. That was the original Operation Santa Claus that dates back in the early 1970's. (KF6AJM)

ENFORCEMENT: FCC ISSUES WARNING NOTICE FOR SAN FRAN UNLICENSED STATION

The FCC's San Francisco office has issued Notice of Unlicensed Operation the FCC has Phillip N. Reiker of Watsonville, California. This, regarding an unlicensed broadcast station operating from property that he owns in the city of Santa Cruz.

According to the June 3rd notice, the San Francisco FCC Office had received information that an unlicensed broadcast radio station on 101.1 MHz was allegedly operating in Santa Cruz. This past March 19th agents from this office confirmed that radio signal was coming from property that public records show Reiker as owning.

Reiker was told that he must immediately cease operation of the unlicensed transmitter. He was also given ten days to explain his activities to the FCC. That date has now past. (FCC)

**

RADIO RULES: 700 MHz BAND NOW OFF LIMITS TO WIRELESS MICS

The FCC has issued an Enforcement Advisory stating that as of June 12th that wireless microphones and similar devices are now prohibited from operation between 698 to 806 MHz. These devices include wireless intercoms, wireless in-ear monitors, wireless audio instrument links, and wireless cueing equipment.

By way of background, when some models of wireless microphones were originally designed, the frequencies they used were located between the frequencies utilized by television stations to broadcast programs. With the completion of the Digital TV transition on June 12, 2009, television stations no longer use the frequencies in the band in and adjacent to 700 MHz. These frequencies are now being used by commercial providers of wireless broadband and by public safety entities such as police, fire, and emergency response services. More is on line at tinyurl.com/2ez4rxb (FCC)

**

RADIO LAW: UK REGULATOR TURNS TVI INVESTIGATIONS TO THE BBC

United Kingdom Telecommunications regulator Ofcom is transferring responsibility for investigating radio and television interference complaints to the British Broadcasting Company.

As of June 30th all outstanding cases with Ofcom will be passed to the BBC for action from that date. On and after July 1st all UK residents will be required to file complaints to the BBC.

If, following the investigation by the BBC, there is evidence of interference caused by something outside the publics control and which is unlawful, the BBC may refer your case back to Ofcom for possible enforcement action. More on this is on-line at tinyurl.com/2adwckj. (Southgate)

HAM RADIO ON THE WEB: NCDXF INTRODUCES REDESIGNED WEBSITE

A newly re-designed website has been introduced by the Northern California DX Foundation. The redesigned cyberspace home of the NCDXF is intended to enable those interested to follow past and future DXpeditions that NCDXF has sponsored. There are resources on the worldwide Beacon system, an online store for NCDXF supplies, information about the foundations scholarship program, a video library and other information means. You can see the new offering on line at www.ncdxf.org (W&#65533;GJ)

**

RADIO ON THE WEB: NEW RADIO ASTRONOMY GROUP WEBSITE OPENED

The British Astronomical Association Radio Astronomy Group new website is now live. The aim of these web-pages is to show that there are aspects of radio astronomy that can be observed using relatively simple equipment. Also, that observations of scientific merit can be achieved by modest observatories that can be accommodated in an average-sized back garden. The website carries a short URL and is in cyberspace at www.britastro.org/radio, (BAA Radio Astronomy Group)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WITH NEWSLINE: WHAT IS TINY URL

Have you noticed a slight change here on Newsline? In case you have not noticed, about a month ago we began giving web addresses using a shorthand called Tiny URL. But what is Tiny URL you ask? Well it's a method of taking a very large and complex web address and making it really -- well -- tiny.

Tiny URL is a free web based service located in cyberspace at www dot tinyurl dot com. All you need do is cut and past in a long URL, click the box marked "Make Tiny URL" and the program that runs the website will created the shorthand version and display it on a new page.

By way of example. I was just reading a story about the FCC's ban on 700 MHz wireless mics and other devices. Its actually found in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-1053A1.pdf. Talk about a mouth full. But by plugging that in at TinyURL.com the result is http://tinyurl.com/2ez4rxb. Since all modern web browsers automatically insert the http:// all we need to give you is tinyurl.com/2ez4rxb to get to the website.

Anyhow, if your clubs website suffers from one of those longer than long Internet addresses because you are the guest on someone else's server, you might want to try shortening it using TinyURL.com. After all, it's the shortest URL's like ARRL.org, ARNewsline.org or even tinyurl.com that are the easiest to remember.

And less we forget: Our thanks to Bob Gonsett, W6VR, over at the C-G-C Communicator newsletter for putting us onto TinyURL.com. Its made things a lot easier for those of us who anchor these reports to give you a web address that short and easy to jot down. (ARNewsline, CGC)

**

WORLDBEAT: IARU REGION 1 NEWSLETTER 63 AVAILABLE

IARU-R1 High Frequency Committee Newsletter Number 63 is now available for free download. Among the subjects covered are Internet Gateways & remote Linking for H-F Operation, vandalism on our High Frequency Bands, the 40 meter band situation, the and of coarse WRC-12.

IARU Region 1 is the federation of national ham radio associations from Europe, Africa, Middle East and Northern Asia. The newsletter can be downloaded in PDF format at tinyurl.com/285wryy

(IARU Region 1)

**

HAM RADIO IN SPACE: GENERAL CONTACTS FROM THE ISS IS AN ON-ORBIT DECISION

Charlie Sufana, AJ9N, says that its up to the ham radio operators on board the International Space Station to decide if they do or do not want to make general ham radio contacts or just chat with kids in schools.

In a posting to the SAREX remailer, Sufana, who is one of the ARISS Mentors, notes that lately there have been some comments on the various Internet bulletin boards about having general contacts or leaving the packet or crossband repeater on. In response to those hams critical of the lack of time that the licensed astronauts and cosmonauts are devoting to contacts with the general ham public, Sufana says that as with anything in society, the International Space Station crew have many different interests and a very heavy work load. He notes that some have been ham radio

operators for many years before going on-orbit and may want to make a random contacts. Others have had next to no experience with the hobby and get on only sporadically. And notes Sufana, there have been quite a few who have gotten their license shortly before going up to the I-S-S and often times they only get on for the scheduled school contacts. And notes AJ9N, if they had not gotten their licenses then even the school contact list would have suffered because on some expeditions there would be no hams scheduled to fly.

Sufana says that after every school contact, the crew is told how to configure the radio. If the crew does not set up the radios for general usage, then there is not much ARISS can do about it other than to remind them. He also advises all of us that that ARISS is a guest onboard the International Space Station and if the crew elects to not turn something on or to operate, then that is their decision. AJ9N says that ARISS can only suggest; it can never demand. (ARNewsline(tm) from SAREX Remailer)

**

DX

In DX, RV3ACA will be active from Jersey Island as GJ2A during the RSGB Islands on the Air Contest on July 24th and 25th. as a Single-Operator SSB or Mixed Mode entry. She will be active outside of the contest between July 21st and the 26th. QSL via RV3ACA.

YU1YV is active portable 4 Zero from Montenegro, possibly as 4O3A. He likes 75 and 80, but will be active mostly on 6, 10, 15 and 20 meters. He will also be in the IARU HF Contest July 10th and 11th as a Single-Op/All-Band entry. QSL as directed on the air

I1FQH will be operational as 5V7DX from Kpalime Village in central Togo between July 15th and the 30th. His activity will be on 20 through 10 meters using a Spiderbeam and on 40 and 30 meters using a homebrew vertical. QSL via Logbook of the World, via his home callsign direct with a self addressed stamped envelope or by the bureau. He plans to put pictures and video of his operation on YouTube once he arrives home.

Lastly down the log a bit plan for S79K to be active from Mahe in the Seychelles during the CQ World Wide DX SSB Contest on October 30th and 31st. QSL via G3NKC.

(Above from various DX news sources)

**

THAT FINAL ITEM: A VERY PLEASANT FIELD DAY 2010

If there's one word we had to choose to describe Field Day 2010, that word might be pleasant. And while the underlying spirit of contesting was still there, it seemed like everyone taking part was enjoying the moment:

--

Actual Field Day Audio from Chicago

--

That's how Field Day sounded in the hamshack and studio of Hap Holly, KC9RP
in the Chicago suburb of Des Planes, Illinois. 1900 miles to the West, the fun of Field Day was just as prevalent:

--

Actual Field Day Audio from Los Angeles

--

And for those who were smart enough to include a 6 meter station, we can only say that the propagation gods seemed to be shining on that band. That's because one of the truly rarest states on that band is Wyoming and the operators at WY7U seemed to have a Field Day pipeline to the west coast:

--

Actual Audio of WY7U working N6RW

--

In all, Field Day 2010 sounded like everyone taking part was enjoying the moment and the contacts on the pleasant moments that they spent on the air. And we can't think of a nicer way to end this weeks newscast.

(ARNewsline(tm) with some audio supplied by KC9RP)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Fred Vobbe, W8HDU, saying 73 from Lima, Ohio, and we thank you for listening.

64> operating? perhaps the froup closed down and noone shut it off?

What do your questions have to do with OS/2, kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
2 days (Jul 6, 3:12 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

comp.os.os2.advocacy

156> What does improper punctuation' : ; have to & do with $ OS/2,
Tholen?

You should know, Hall, given that you posted three consecutive
improperly punctuated sentences to an OS/2 newsgroup.

157> Newsgroups:
alt.alien.vampire.flonk.flonk.flonk,alt.usenet.kooks,rec.radio.amateur.policy,alt.fan.bob,
comp.os.os2.advocacy

157> With improper punctuation?

What does your question have to do with OS/2, Hall?

157> No wonder the OS never became popular

Classic erroneous presupposition.

Roger is one of only three Glendale residents who have been accused of having syphilis.
The Health Department confiscated four rubber dolls from his residence and the dolls are undergoing further tests.
Roger is claiming that the vinyl sweeties (two females, one male and one little boy) are clean and pure and that he "almost" contracted syphilis from Lloyd Davies, a claim that Mr. Davies vehemently denies.
The Health Department is also interviewing several of the patrons of the Shipwreck Lounge, a known hangout that Wiseman frequents.
Roger is loudly proclaiming his innocence and said, "You can't get syphilis from jacking off with your own hands, Lardass."

I happened to be traveling through Huntsville, Alabama early this morning, I deceided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him

that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

He lacks originality and copies the ideas of others because he is incapable of having an original, creative thought.

Lacking liveliness, charm, or surprise: arid, aseptic, colorless, drab, dry, dull, earthbound, flat, flavorless, lackluster, lifeless, lusterless, matter-of-fact, pedestrian, prosaic, spiritless, sterile, stodgy, uninspired. See excite/bore/interest.

Ooo I'm big on that now.

Now all I need is one that does Howard's show like that (free) in the
mornings and I'm set.
```

Roger....about those wet dreams you have of Lloyd...
Do you change your enderwear after every episode?
Or do you simply let it "cake up' and get crusty?

No thanks, I'm not gay, and I don't take advantage of the mentally
retarded :-p

Seriously though, are you gay(?), 'cause that's acceptable these days.
It's just all these homosexual references aren't appropriate even if you
are gay.

Look if you really want someone to touch you I could arrange a date with
my brother, he's gay... a bit snippity, but I think you'd get on well,
and maybe you'd stop being such an ass(donkey).

Maybe you wouldn't hide behind so many aliases.

Regards Charles

Why not, he's not doing anything productive here, he might as well go
out an have a good time.

Regards Charles

He jumped on that like a pig on a truffle. I was actually trolling for Dave,
but Davie seems to have taken a spank for the moment.

You know I sometimes talk to you to try to figure you out, because I'm polite.

But as it was earlier mentioned you associate with known child molesters/ sex offenders, which doesn't seem to bother you, and I guess talking to you puts me at risk of investigation.

So don't worry I wont talk for much longer, the threat of child molesters are taken very seriously in Australia, and I don't want to get caught up in an investigation concerning you.

Regards Charles

2384. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2010-07-07 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1278482701@panix.com>
Source record: 242453
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

***YH-Knives was a private "moderated group" that Chuckles the Klown
(Chilla) and Steve Kombat Kramer (Pinkie) started at Yahoo to try and
break away from the Trolls...We infiltrated the Group and needless to
say there wasn't much going on...Like watching paint dry...Chuckles

talking about his sharpening stone slurry and Pinkie discussing his tools used for "slashing" and kicking ass...We got past "security" as Chuckles was desperate for "customers"...Personally I had 3-4 sock puppet user i.d's to Troll the group, I think all the Trolls were there in some capacity...It lasted less than 6-8 weeks before Chuckles closed it down...BooooHooo...:-)

02/22/06

I informed my wife of some of Roger's/Not Roger's posts of the last twenty-four hours during our ride home this evening. The one he posted (as me) on alt.west-virginia bothered her enough that she insisted that we pay Wiseman a visit to discuss the material he is posting.

We parked our car in front of his home at 6:25 PM. It wasn't quite dark, but the living room lights were on. My wife rang the bell and there was no response. She rang again and we heard footsteps crossing the room. The light shining through the peephole in the door extinguished as Roger peered out, but the door didn't open. He moved away from the door and the light from the living room shone through the peephole again. My wife rang the bell again and said, "Coward" loud enough for anyone inside to have heard. We stood on the porch for another few moments and returned to the car. Neither Roger nor his imaginary friend appeared.

It seems that the unbalanced UnWiseman isn't the bold, fearless type he portrays in his Usenet filth postings.

Roger is a humbug.

Dave K8MN

Maybe it's a "swear meter"? Like in that movie where the main character
would swear at a machine to get toilet paper...

rec.knives used to be a busy place. It was inhabited by people who
discussed the making of knives and the collecting of knives and laughed
at the silliness of macho "knives".

(BTW, what's your address?)

Are we still talking about addresses?

==> + CAN I HAVE AMATEUR RADIO FOR $1000, ALEX?: YOUNG AMATEUR MAKES
HER MARK ON JEOPARDY!

For hams who are fans of the television quiz show Jeopardy! -- where
contestants have to answer in the form of a question -- the July 6 show
was a real treat: Andrea Salt, KE7OPV, of Gilbert, Arizona, was a
contestant. But what makes Andrea's time on Jeopardy even more special
is that she is only 13. All this week, Jeopardy! is hosting their
annual Kids' Week. To be eligible to participate in Kids' Week, all
contestants must be between the ages of 10-13 and pass an online test
consisting of 30 questions. The questions cover a variety of categories
and the kids must answer each question within 20 seconds. And yes,
spelling does count! Read more here
<http://www.arrl.org/news/can-i-amateur-radio-for-1000-alex-young-amateur-mak
es-her-mark-on-jeopardy>.

==> + ON THE AIR: ARRL'S 500 KHZ EXPERIMENT SHOWS SLIGHT GROWTH

<http://www.arrl.org/images/view/News/WD2XSH_Map0310-0510.JPG> In
the quarterly report for the ARRL's 500 kHz Experimental Station for
```

the period ending May 2010, Experiment Coordinator Fritz Raab, W1FR, reported that since the experiment began in late 2006, 20 of the 32 participating stations are currently active. The FCC's Office of Engineering and Technology granted the WD2XSH experimental license to the ARRL in September of that year. "Our present license grant expires on August 1," Raab said. "We are planning to do an 'as-is' renewal this month." Raab said that during the quarter, one additional QSO was made, bringing the total number of WD2XSH contacts to 405. The WD2XSH Web site has received 511 reports since the end of February, bringing the total number of reports to 11,234 since the beginning of the issuance of the experimental license. Raab said more than 60,000 hours of activity has been logged on the Web site since September 2006. Stations do not have to be members of the experimental team to post reception reports. Read more here <http://www.arrl.org/news/arrl-s-500-khz-experiment-shows-small-growth>.

==> + ARRL NOW ON FACEBOOK!

With more than 400 million active users, Facebook <http://www.facebook.com/> is the most popular social network site on the Internet. And since radio amateurs are generally a social bunch, many hams are active on Facebook. Thanks to Herman May, KE5HYW, the ARRL has its own Facebook page <http://www.facebook.com/?ref=logo#%21/pages/ARRL-the-National-Association-for-Amateur-Radio/20069212407?ref=ts>.
Check out the page to see a lot of features you won't find anywhere else, such as pictures from ARRL events and interactive status updates. We invite hams to "like" the ARRL Facebook page and leave productive comments. Joining Facebook is free, and you just might be surprised at who you'll find on the site.

==> + COMING UP IN QST : CHECK OUT THE AUGUST ISSUE OF QST

The August issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including April's EME event from the Arecibo Observatory at the National Astronomical and Ionospheric Center in Puerto Rico -- the upcoming issue of QST has something for just about everyone.

One of the joys of Amateur Radio is building your own equipment; there's nothing like putting something on the air that you've built with your own two hands -- and a little solder and sweat. Not only is it fun, it's a good way to not spend a lot of money. In his article "Build a Two Finger Key," Burt VanderClute, N4ERM, explains how he put together an effective dual-lever paddle at practically no cost using only common household tools. In the television series Star Trek, Captain Kirk was always asking Scotty for more power (and Scotty usually replied that he was utilizing all the power available). Many hams like using power, too, but what if we got rid of some of that power? Phil Salas, AD5X, finds that sometimes throwing away power is better than trying to reduce it in his article "Simplify Transceiver to

Amplifier Interfacing with an In-Line Attenuator."

Proving that you don't have to be a big gun with big antennas on a big lot to work top band, Greg Crossman, WE0D, shows it can be done. In his article "Earning 160 Meters WAS in 117 Days," Crossman relates how he was able to work all 50 US states on topband from a lot with limited space in a community with antenna restrictions. QST Editor Steve Ford, WB8IMY, takes a look at how to make connections for your iPhone, iTouch, iPod and iPad in his monthly column "Eclectic Technology." This month, he builds on his April 2010 column that discussed Amateur Radio apps for these devices. Now he explains how to make the proper connections between your "iDevice" and your transceiver.

<http://www.arrl.org/multimedia> QST Technical Editor Joel Hallas, W1ZR, takes a look at accessories for the Elecraft K3 HF/VHF modular transceiver in this month's Product Review. "The K144XV internal 2 meter transverter, KDVR3 voice recorder and KAT3 internal automatic antenna tuner integrate seamlessly and add even more functionality to the versatile K3," he reports. Hallas also checked out a pair of Mirage 2 meter amplifiers for use with the K3. "Either the Mirage B-310-G or the slightly larger B-2518-G can follow the K3 with its internal transverter and deliver 75 W PEP SSB with reasonable distortion," he said. "The smaller unit can also provide 100 W on CW or FM. The latter can do better with a transverter that can put out a bit more power, such as the external Elecraft XV144, delivering up to 110 W PEP on SSB and 160 W on CW or FM. The preamps will only help with the K3 if you have considerable line loss between amplifier and radio."

The results from February's ARRL DX CW Contest are also in the August issue. There were a few upsets, as well as some new records set in this ever-popular contest. Speaking of contests, you will also find official announcements for the 2010 ARRL International EME Competition, the ARRL August Rookie Roundup, the ARRL 10 GHz and Up Contest and the 2010 ARRL September VHF QSO Party. You will also find the results from the 2010 ARRL Photo Contest spread out over three pages in the August QST.

Of course, there are the usual columns you know and expect in the August QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your August issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + SOLAR UPDATE

Tad "Till the broad Sun withdraws his lessening ray <http://www.english.upenn.edu/Projects/knarf/Byron/charold2.html>" Cook, K7RA, reports: The average daily sunspot numbers for this week rose from 11.7 to 16, back to the level that we saw two weeks ago. The geomagnetic indices have quieted down, with average mid-latitude A index dropping more than five points from the previous week. The latest

NOAA/USAF forecast shows a rising solar flux for July 8-10 of 74, 75 and 76 and then 78 for July 11. This is accompanied by a low planetary A index of 5 on July 8, 8 on July 9, followed by 5 for July 10-13 and then 8, 15, 8 and 5 for July 14-17. Look for more information, including some 6 meter double-hop sporadic-E reports, on the ARRL Web site on Friday, July 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by George Gordon, Lord Byron's Childe Harold's Pilgrimage <http://www.english.upenn.edu/Projects/knarf/Byron/charoldt.html> (Canto II <http://www.english.upenn.edu/Projects/knarf/Byron/charold2.html>, Verse XX).

==> + SILENT KEY: FORMER ARRL STAFFER MIKE KACZYNSKI, W1OD (SK)

Michael B. Kaczynski, W1OD, of Bristol Connecticut, died unexpectedly on Tuesday, July 6, 2010 at Bristol Hospital. He was 51. An ARRL Life Member, Kaczynski worked at ARRL Headquarters from 1979-1987 starting off at the DXCC Desk, then becoming a Communications Assistant, Technical Information Specialist, Lab Technician and eventually an Assistant Technical Editor and Contest Manager; at the time of his death, he was employed at ESPN. While at the ARRL, he authored almost 50 articles in QST, including contest results and product reviews. He was also President of the Newington Amateur Radio League (NARL <http://www.narl.net/>) from 1991-1992 and a member of the ARRL's A-1 Operator Club <http://www.arrl.org/a-1-op>. Kaczynski enjoyed and was a member of many organizations related to bowling, sport shooting, model airplanes, astronomy and geocaching. He also held a private pilot's license. Funeral services will be held on Saturday, July 10 at 10:30 AM at Funk Funeral Home in Bristol, followed by a Mass of Christian Burial at St Stanislaus Church. Relatives and friends may call at the funeral home on Friday between 4-8 PM. In lieu of flowers, memorial donations may be made to the Kaczynski Scholarship Fund, c/o St Stanislaus Church, 510 West St, Bristol, CT 06010 or to Special Olympics, 2666 State St, Suite 1, Hamden, CT 06517-2232. Kaczynski's family has set up a memorial Web site <http://www.funkfuneralhome.com/obituaries/Michael-B.-Kaczynski1811410971/> where friends may leave condolences.

==> THIS WEEK ON THE RADIO

This week, the FISTS Summer Sprint is July 10 and the IARU HF World Championship is July 10-11. Next week, North American QSO Party (RTTY), the DMC RTTY Contest and the CQ Worldwide VHF Contest are July 17-18. The Run for the Bacon QRP Contest is July 19. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more

info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Yes you are right, it is time for YOU to move along and take your
Riff-
Raff, such as Mark Morgan with you. I bet if Mark did not post here,
hijack every thread, and turn every subject into an opportunity to
satisfy his desperate plea for attention, the group would calm down.
But Mark has irritated so many, for so long, with his constant cross
posting and hijacking of every thread. I don't know where he gets off
thinking he can hijack every thread knowing that it is inappropriate.
Imagine your at a amateur radio club meeting sitting at a table
talking among several members, and then Mark sits down rudely butts
into your conversation (thread) and starts talking about something
way
off topic. So you get up go to another table and start another
converstation and here comes Mark again butting into your
conversation
(thread) and once again he changes the topic. So you tell Mark, I
don't want you butting into my conversation and changing the topic,
then he turns it all around and accuses you of stalking him. You
would
probably think he is mental. So you get up move once again, start
another conversation, and here comes Mark again, and again, and
again,
you can't escape this asshole if you want to use the NG. My question
is when was this group every peaceful, in 1996 or 97 perhaps? Most of
you who are whining on Mark's side wasn't even posting here then, so
you don't even know what the group was like BMC (before Mark Morgan)?
Most people that were on this group before Mark showed up don't want
to deal with or talk to Mark Morgan because of his behavior and he
has
very little knowledge and can't really add anything to the
conversation, but he won't go away, and he insists on hijacking every
thread. He thinks just because he obtained a ham license he somehow
gained some special right to hijack practically every thread on the
NG. If you don't want me and others like me posting here that are
critical of Mark, then stop Mark Morgan from post 300 times a day,
changing the names of threads that he didn't start, and hijacking
everythread. Mark seems to think he is the first to act this way, but
LLoyd Davies was here pulling his garbage way before Mark even
thought
about amateur radio. Now Mark will say "I have a right to post",
which he does, but he dosen't have the right to hijack threads and
change the topic to suit him, on threads he did not even start.

That's just rude, but typical Mark Morgan behavior. If this was a physical world, somebody probably would have already slapped the shit out of Mark by now and stopped him, but because it is not, he acts accordingly. That's why I say, thank god for the Moderated Group an area free of Mark Morgan.

Amateur Radio Newsline(tm) Report 1717 - July 19 2010

Amateur Radio Newsline report number 1717 with a release date of
Friday, July 9, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. New Zealand's telecommunications regulator questions the legality of Internet connected ham radio. The 2010 World Radiosports Competition takes place in Russia. The FCC to host a big meeting regarding wireless medical electronics. Delaware exempts ham radio from its new cellphone law and a new Cube-Sat will investigate interference to High Frequency communications. Find out the details on Amateur Radio Newsline(tm) report number 1717 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: NEW ZEALAND REGULATOR VOICES CONCERNS OVER INTERNET CONNECT HAMRADIO

New Zealand is the latest nation to look at Internet linked ham radio operation and question its legality. Jim Meachen, ZL2BHF, is in Auckland with more:

--

New Zealand's Ministry of Economic Development -- the MED -- which acts as the nations telecommunications regulator has raised some concerns with the New Zealand Amateur Radio Transmitters or NZART. This, over Internet connected ham radio operations such as IRLP, D-Star, Echolink, APRS and all similar unattended transmitter supervision. This is because they do not appear to fit within the nations current ham radio license conditions.

Among the concerns raised by the MED, is the use of unattended transmitters and unlicensed digipeaters for APRS. They are also concerned over the possibility of overseas radio amateurs operating a New Zealand based amateur station without specific MED sanction to do so.

The NZART Administration Liaison Officer is Don Wallace, ZL2TLL. He is currently putting together a paper on this topic and would appreciate input from all interested New Zealand amateurs.

And from down-under in Auckland, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

The concern voiced by New Zealand's Ministry of Economic Development comes closely on the heels of France banning ham radio use of D-Star and possibly other digital voice modes because they use codecs based on proprietary software and algorithms. As reported here on Amateur Radio Newsline last week, Frances telecommunications regulator ARCEP says that this is a violation of that nations open standard policy. The ARCEP also cites alleged concerns regarding cryptography and national security. (ARNewsline(tm), Southgate))

**

RESTRUCTURING: NEW ZEALAND RESTRUCTURES THE 806 TO 960 MHz BAND

Still down-under, word that Minister for Communications and Information Technology Steven Joyce has just announced details of the changes planned for the 806 to 960 MHz radio spectrum band. The parts of the decision that affect New Zealand amateurs are adding 915 to 920 MHz and giving hams access to all of 915 to 928 MHz over 5 year lead-time.

On the down side, hams will loose access to 928 to 929 MHz. They will also have to accept a shared sub-band 920 to 926 MHz with RFID tags capable of running up to 4 watts power out.

These changes were to be published in the July 15th New Zealand government NZ Gazette. Most will be effective immediately, except for the removal of the 928 to 929 MHz frequencies from the Amateur service which will not come into force until August 12th. (NZART News)

**

RADIOSPORTS: WRTC 2010 HELD IN RUSSIA

The Ham Radio Olympics are on. This as the World Radiosport Team Championship for 2010 is getting under way as we go to air.

This year the games are being hosted by the Russian national amateur radio society and taking place near Moscow. 50 teams from all over the world are competing. The contest was scheduled to begin at 1200 U-T-C on July 10th and end at 1200 U-T-C on July 11th. More is on-line at www.wrtc2010.ru (WRTC)

**

WORLDBEAT: INCREASED CONTEST POWER IN IRELAND UPDATE

The Irish Radio Transmitters Society which is Irelands national ham radio society is continuing to pursue with Ireland's regulator ComReg. This, regarding its request to secure increased power for Irish hams during a list of international HF and VHF contests still to be finalized.

At this point ComReg says that it wants to get a list of licensed amateurs in Ireland who would be interested in getting permission to operate with increased power for the contests. Hams in Ireland who wish to have their name included should e mail the Irish Radio Transmitters Society contest manager Thos Caffrey`, EI2JD to contestmanager (at) irts (dot) ie. (IRTS)

**

HAM RADIO IN SPACE: NEW SA CUBESAT TO INVESTIGATE HF INTERFERENCE

The world of amateur radio may soon have greater insight into sources of interference on the High Frequency bands. This with word that an important mission of the upcoming South Africa AMSAT CubeSat will be to measure the High Frequency noise levels over South Africa and report this information back to Earth for analysis and action to reduce these unwanted signals.

S-A Amsat's Hans van de Groenendaal, ZS6AKV, will be giving a presentation on South Africa's first CubeSat at the AMSAT-UK Colloquium in Guildford, England, that runs from July 31st through August 1st. According to ZS6AKV the information from the tiny satellite will identify the areas where the H-F frequency polluters are situated and will help in reducing or eliminating the source. It is also hoped to include a 30 kHz linear transponder and an Automatic Packet Reporting System in the CubeSat.

More on this interference detection experiment from space is on-line at www.uk.amsat.org/colloquium We will have more ham radio space related news later on ion this weeks Amateur Radio Newsline report. (ANS, AMSAT-SA)

**

RESCUE RADIO: FCC AND FDA TO HOST JOINT MEETING ON WIRELESS MEDICAL ELECTRONICS

An important meeting dealing with wireless broadband and medical electronics is skated for Washington DC later this month. Fred Vobbe, W8HDU, has the details:

--

The Federal Communications Commission and Food and Drug Administration will be seeking comment on converged communications and health care devices impact on regulation. This, at a public meeting to discuss topics related to this issue is scheduled for July 26 and 27th.

According to a joint news release there have been significant developments in recent years in medical and health care devices using radio technology to monitor various body functions and conditions. These include including critical care elements as well as those used to deliver treatment and therapy. Examples of the latest implant or body-worn monitoring, therapeutic, and treatment technologies include blood glucose monitors and automated insulin pumps, heart monitors, pacemakers, defibrillators, and neural pathway replacements that stimulate muscle movement. There has also been an increasing proliferation of devices using established commercial communications networks, including those providing Internet connectivity to communicate with care providers.

The FCC and FDA say that they both recognize the need to work with all providers and users of these devices to identify pathways and strive to improve processes that will help continue to spur innovation in these areas while maintaining safety and effectiveness and promoting public health. Therefore the objective of this meeting is to gather information

and to better understand issues and perspectives so the agencies can identify potential areas where each agency's jurisdiction can be identified
and clarified for affected parties. Also to gauge how the collection and assessment of each agency's respectively appropriate information can be improved, expertise can be shared, and regulatory approval can be coordinated and simplified.

Im Fred Vobbe, W8HDU.

--

The public meeting will be held July 26 and 27th from 8:00 a.m. to 5:30 p.m Eastern Daylight time at the FCC Commission Meeting Room, 445 12th St., SW, Washington, DC. Those interested in attending or participating in the meeting must register by 5 p.m. on July 19th . (FCC)

**

RADIO LAW: DELAWARE EXEMPTS HAMS FRON MOBILE CELLPHONE BAN

A big win for mobile ham radio operations in Delaware. This with word that in a unanimous vote, both houses of that states legislature passed an amendment to a Delaware house bill that outlaws mobile use of "two-way communication" devices, but now specifically allows amateur radio use.

As reported last week, the original wording of the states cellphone law would have also banned all sorts of two-way radio operations as well. But State Representatives Ruth Briggs King and Dave Wilson recognized the deficiencies in the wording and introduced an amendment to correct them. It then became the work of the Delaware ham community to assure its passage.

According to a public posting by Dennis Karol, KB3MJ, on the QRZed.com website, some 15 Delaware amateurs not only wrote, called and emailed to their state Representatives and Senators, but actually spent endless hours at Legislative Hall in Dover on Tuesday and Wednesday nights. They spent that time educating legislators about radio communications in general and amateur radio in particular. In the end, the amendment passed with yes votes from 100% of the Representatives and Senators who were present in both Houses. (KB3MJ via QRZ.com)

**

ENFORCEMENT: FCC ISSUES WARNING NOTICE FOR SAN FRAN UNLICENSED STATION

The FCC's San Francisco office has issued Notice of Unlicensed Operation the FCC has Phillip N. Reiker of Watsonville, California. This, regarding an unlicensed broadcast station operating from property that he owns in the city of Santa Cruz.

According to the June 3rd notice, the San Francisco FCC Office had received information that an unlicensed broadcast radio station on 101.1 MHz was allegedly operating in Santa Cruz. This past March 19th agents from this office confirmed that radio signal was coming from property that public records show Reiker as owning.

Reiker was told that he must immediately cease operation of the unlicensed transmitter. He was also given ten days to explain his activities to the FCC. That date has now past. (FCC)

**

ENFORCEMENT: YOU CANT CLOSE THOSE SHUTTERS WITH A NON CERTIFIED TRANSMITTER

The FCC has issued an official Citation to the USA Shutter Company, LLC, doing business as MaestroShield of Naples, Florida for allegedly marketing unauthorized radio frequency devices in the United States. This, in violation of Section 302(b) of the Communications Act and Sections 2.803 and 15.201 of the Commission's Rules.

According to the FCC, back in 2009 it received a complaint alleging that USA Shutter was selling unauthorized wireless remote control transmitters used to control window shutters. On December 3, 2009 a Letter of Inquiry to USA Shutter regarding this matter. In its response on December 18th, USA Shutter replied stating that it do not manufacture remote control transmitters but did admit to importing and marketing four models of these devices beginning in January of 2007 and another model later on. It also admitted that these wireless remote control transmitter models are not FCC certified.

In the Citation the FCC told USA Shutter that intentional radiators such as the wireless remote control transmitters are required by Section 15.201 of the Rules to be approved through the certification procedures prior to marketing within the United States. Since these devices have not received FCC certification, USA Shutter was warned to cease selling them. If the company continues to do so it can be fined up to $16,000 for each such violation or each day of a continuing violation.

USA Shutter was given the customary 30 days from the June 21st issuance date of the Citation to respond and to specify the actions that it has taken to ensure that it does do not violate the Commission's rules governing the marketing of radio frequency equipment in the future. (FCC)

RESCUE RADIO: HAMS PRIOVIDE EMERGENCY RESPONSE AT NORTH CAROLINA BARBACUE

Hams in North Carolina were ready when the heat of the day took its toll on a woman attending the regions Hog Day barbecue. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the rest of the story:

--

On June 19th, members of the Orange County Radio Amateurs and Orange County ARES had been on duty at the annual street fair in Hillsborough , North Carolina, known as "Hog Day," since about 8:00AM. The hams were providing backup communications for the event when at about 12:40 in the afternoon when a woman came into an exhibitor's booth and collapsed. She was able to tell onlookers that she was feeling weak from the 90 degree heat.

At just about the same time two ham radio operators happened to be at the same booth. One of them, Lad Carrington, W4ORD, immediately radioed the situation to net control Ken Kauffmann, KR4FM. Kaufmann in turn dispatched paramedics from Orange County Emergency Services.

The call over the repeater was also heard by Woody Woodward, K3VSA, whose assignment was to shadow David Hunt, the chief judge for the event's barbecue cookoff. Hunt is also a volunteer fireman immediately made for the location with a bottle of chilled water. When Woodard and Hunt arrived on the scene woman was slumped down in a camp chair. Hunt used some of the cold water to apply a compress to the back of her neck.

And the bottom line: Another time when emergency trained ham radio operators were in the right place at the right time.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The paramedics arrived just moments later to provide emergency care and transport the victim further inside an air conditioned space. (K3VSA)

**

NAMES IN THE NEWS: VK7TBM HONORED FOR CREATING COAST RADIO NETWORK

Tasmanian radio engineer Barry McCann, VK7TBM, has received international recognition in the Queens Birthday honors. This, for his contribution to maritime communications.

VK7TBM was the co-founder of what has become Australia's largest marine radio network known as Coast Radio. This is radio communications system manned by volunteers that provides radio services to commercial fishers and recreational boaters.

The Coast Radio Network covers a large stretch of water from the South Australian Victorian border, to 300 nautical miles south of Tasmania, and up to the New South Wales Victorian border. The idea for the marine radio network came about after Barry spent an unplanned night at sea in the mid 1970's, after the engine in his boat failed. (WIA)

**

NAMES IN THE NEWS: VE2KHC APPOINTED RAC DIRECTOR FOR QUEBEC

Congratulations to James Keep, VE2KHC who was recently appointed as the Radio Amateurs of Canada Director for the Quebec. This, for the remainder of a two year term which started June 24, 2010 ending December 31, 2012. VE2KHC is a Certified Emergency Coordinator, has trained with the S&#65533;curit&#65533; Civil Quebec and is also a registered Radio Amateurs of Quebec member. (RAC)

**

NAMES IN THE NEWS: MARSHALL RADIO CLUB REACTIVATED

And a radio club that assisted in the 1980's video Amateur Radio's Newest Frontier has recently been reactivated. This with word that the George C. Marshall Radio Club in Huntsville, Alabama has come bact to active status after being dormant for many years.

On July 1st, one of the first meetings of the club was held with eight in attendance. Leaders say that there are many items that need to address as a club, but they have high hopes of bringing this club back to its formal glory.

Back in the early 1980's it was members of this radio club that made possible the taping of segments of Amateur Radio's Newest Frontier dealing with the European Space Agency's Spacelab that was carried to orbit by the United States Space Shuttle. (Via e-mail)

EMERGING TECHNOLOGY: NEW PC FOR THE ELDERLY

A new desktop P-C aimed at people aged over 60 who are unfamiliar with Personal Computers and the internet has been unveiled in the United Kingdom. Called Simplicity, the simplified desktop has only six buttons directing users to basic tasks such as e-mail and chat.

The Simplicity computer has no log-in screen when it starts up, contains no drop-down menus and comes pre-loaded with 17 video tutorials. The operating system is a version of Linux that can be customized by users.

So far the SimplicITy computer system is only available in the Europe. According to the BBC story introducing it, more than 6 million people in the UK over the age of 65 have never used the internet, according to British government figures. (Science OnLine)

**

EMERGING TECHNOLOGY: NEW TERAHERTZ RECEIVER DEVELOPED

Sandia National Laboratories researchers in Albuquerque, New Mexico have taken the first steps toward reducing the size and enhancing the functionality of devices in the terahertz frequency spectrum. This, by combining a detector and laser on the same chip to make a compact receiver.

Researchers say that this development has rendered unnecessary the precision alignment of optical components formerly needed to couple the laser to the detector. The new solid-state system puts to use the so-called "neglected middle child" frequency range between the microwave and infrared parts of the electromagnetic spectrum.

Terahertz radiation is of interest because some frequencies can be used to "see through" certain materials. Potentially they could be used in dental
or skin cancer imaging to distinguish different tissue types. They also permit improved nondestructive testing of materials during production monitoring. Other frequencies could be used to penetrate clothing, and possibly identify chemical or biological weapons and narcotics. More is on line at tinyurl.com/33o2n2j (Sandia National Labs Press Release)

HAM RADIO IN SPACE: EASA COLUMBUS AIS SYSYEM ANTENNA BUILT BY HAM

SpaceDaily.com reports that the European Space Agency's Columbus module maritime Automatic Identification System or AIS aboard the International Space Station was switched on. The A-I-S antenna, mounted externally on the Columbus module, was fabricated by AMSAT and ARISS member Lou McFadin, W5DID and the United States ARISS team. The group has also constructed a nearly
identical amateur band antenna for ARISS operations that will be used when the Ericsson amateur radio gear is activated in early 2011.

And how well does the new antenna work? The European Space Agency reports receiving more than 90,000 Class A AIS messages during a 14 hour test between 1900 GMT on June 2nd and 0900 GMT on June 3rd. This generated a global view of maritime traffic as the ISS orbit crosses all major shipping lanes. (ANS)

**

RADIO IN SPACE: A POSSIBLE BONUS SHUTTLE MISSION

The July 2 UniverseToday.com newsletter reports that NASA announced new target dates for the final two or maybe three shuttle missions. STS-133 is now aiming for November 1 at approximately 4:33 p.m. EDT for the final flight of shuttle Discovery,. STS-134 will happen on February 26, 2011 at around 4:19 p.m. EST for shuttle Endeavour's last launch.

However there's now word for the potential of a bonus mission titled STS-135. If approved by Congress, it would launch sometime in August 2011. The latest word on that was that NASA officials hope the decision on whether or not to fly STS-135 would be made sometime this month. (ANS,

Universe Today)

**

HAM RADIO NEAR SPACE: STUDENTS TO BUILD PAYLOAD FOR SUTH AFRICAN HABEX BALLOON

Students assisted by area hams will be building the payload for the South African High Altitude Balloon Experiment or HABEX project. This for the ZS6SCI SciBono Discovery Center in association with the Gauteng Department of Education.

The objective is to involve schools in Gauteng in the entire process of developing and building a payload that will be launched using an unmanned meteorological balloon.

SciBono approved a budget for the building of HABEX. A team of radio amateurs who are engineers and designers are assisting the schools in developing the payload. Approval has been obtained from authorities for the launch of HABEX which is currently slated now for July 24th from nearby Klerksdorp Airfield. At airtime its not known what type of ham radio gear will be on board at liftoff.

HABEX was inspired by the United States BACAR or Balloon Carrying Amateur Radio project. (SARL)

DX

In DX, word that F5IRO is headed to Djibouti and will be active as J28RO beginning July 6th and is expected to stay for 2 years. Activity will be on the HF bands using CW, SSB and the Digital modes mainly on the weekends and during the afternoons and evenings starting between 1200 to 1300 UTC. His QSL Manager is F8DFP.

The KL7RRC 2010 Alaska tour will take to the air from Kodiak Island from July 19th to the 21st . This will b e followed by an operation from uninhabited Chirikof Island beginning July 22nd and running through August 1st or 2nd with a final swing back to Kodiak Island on August 3rd and 4th. QSL via UA9OBA or N7RO.

JF1OKX, will be active as 9J2KK from Lusaka, Zambia beginning through the end of September 2011. Operation will be on 80 through 6 meters concentrating on the Digital modes such as PSK, WSJT and RTTY, but there may be time for some SSB and CW as well. QSL via JK1NSR.

YL2PN operating portable ES0 will be on from Ruhnu Island, Estonia, during the RSGB Islands on the Air Contest on July 24th and 25th. He will be a Single-Operator/Low-Power/All-Band/Mixed entry. If you work him QSL via his home callsign.

Lastly, JI1LET, will be on the air stroke JD1 from Chichijima Island between July 24th through the 30th. His activity will be on 40 through 6 meters using CW, SSB and RTTY. QSL to JI1LET direct or via the JARL Bureau.

(Above from various DX News Sources)

THAT FINAL ITEM: MILITARY SURPLUS AND THE FREE ENTERPRISE SYSTEM

And finally this week, we all know that after World War 2 a lot of United States military surplus began showing up in the marketplace. This was especially true of two way radio equipment such as the famed ARC 5

receivers and transmitters. These units cost the government thousands of dollars but hams in the 1950's and 1960's could by as many as they wanted for under ten bucks. But not every country disposed of its military surplus on the open market. The United Kingdom was one of those that took a different approach that did not always work as we hear from Jim Linton, VK3PC.

--

At the end of World War II, with peace declared, huge quantities of equipment were simply dumped.

A story published in Signal, the magazine of the Vintage Military & Amateur Radio Society, concerns reports of Royal Air Force radio gear being tipped down dis-used coal mine shafts in Staffordshire.

A local farmer Thomas Weston retrieved thousands of these units and through an associate George Eyre sold them on the open market to make a tidy profit.

Everything was going well until the farmer's local member raised a question in the British Parliament about this disgraceful waste of resources occurring at a time the nation was undergoing tough post-war financial restraint.

That caused a political storm and the farmer was threatened with legal action by the Coal Commission on the grounds that he was trespassing when entering the mines.

But in the following year 1947 the farmer got under their guard by buying land containing two old mine shafts and without restriction restarted his enterprise.

It seems that other things were dumped after the war too. Rumors include items ranging from old mess hall cutlery through to boxed unassembled aircraft.

I'm Jim Linton VK3PC.

--

More proof that in the end the free enterprise system works best, even if its takes going through the proverbial back door to make it happen. (WIA)

Mark tried it...so did Roger.

Mark just wanted a few extra bucks.
Roger wanted a few extra coins for another vinyl cohort...

Part of Gav's ramblings are below, in her words.

"Stones have energies that many witches learn to work with, myself among them. That is not to say that I'm an expert by any means but I do have my favorites. I learned very young about the energies of stones;"

Yeah, you Kook. Stones DO have "energy"....when you throw them at Mark.

135> i will no longer be replying to you directly, dave, because you
are so
135> very boring.

Who is "dave", kachina? There is nobody in this newsgroup using
that alias. And what is it about this "dave" that makes you a
poltroon, kachina?

135> i will, however, be adding the os/2 group to all of my
135> posts, everytime i remember, indefinitely.

What do all of your posts have to do with OS/2, kachina?

135> have a nice troll party.

So, you admit to being a troll, eh kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
19 hours (Jul 13, 12:40 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Hi N0VFP, Lardassed Lloyd Austin Davies!

I happened to be traveling through Huntsville, Alabama early this morning, I deceided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

26> Davie-Boi ?

Who is "Davie-Boi", kb9rqz? There is nobody in this newsgroup using
that alias. And what university resources are allegedly being wasted,
kb9rqz?

26> This is Dave:

Classic illogic, given that there are thousands of Daves out
there, kb9qrz. The fact remains that nobody in this newsgroup
is using that alias.

<snip>

And of course Roger is lying yet again.

I have personally been in contact with Oris Grim in years past, and the man
is incapable of spelling correctly. Oris once even made an apology for not
being able to spell correctly and admitted that he has a problem with that.
Oris even emailed me photos of his radio shack.

Roger...where did Oris set his "shack' up and how many radios did he have?
Where were his antennas and how many did he have?
What was Oris' physical setting, such as the landscape, etc.?

The bottom line is, Roger, that you are lying. Oris did NOT author that bit
if misinformation that you keep posting as being from him.
Hell, I doubt even that YOU authored it since you have spelling problems of
your own.

Examples:
Stgop" Roger's version of Stop."Fahter's" He meant Father's Day."fserting"
Festering?"poists" Roger meant "posts"."snadwich" As in peanut butter and
jelly?"regualr" Wagon Wheel rendition of "regular"."aftrer" After? Aftrer
what?"soory" Sorry, Roger fucks up again."didnb't" He didn't?"whoile" He ate
the whoile thing?"Woamn" Woman? Man? It's all the same to Woger."prrof" And
he can prove it, too."beforfe" Was that before he larnt to spell?"yoiuy"
Roger's version of "y'all"."illerate" Only illiterate Roger can spell like
this."haeart" Aw, how heartless of me to laugh!

> <restore>

I happened to be traveling through Huntsville, Alabama early this
morning, I deceided to stop in Athens and see just how tough Lloyd
Davies was going to act when he saw me in person.
Many of you know that a few years ago, Lloyd got smart with several
people in the Deja Newsgroup (now Google) and I issued a challenge to
him. I told him I would be attending the Dalton, Ga. Hamfest if he
wanted to continue the conversation. He said he would be there and he
was going to kick my ass.
Well, Lloyd was a no-show and continued the verbal assault on the
newsgroups. He always talks tough behind his keyboard. And, I
understand he is now doing the same sort of thing on the NIM Busters
Board.
Well, about 8.35 this morning (December 23, 2004) I located his
apartment in a nasty looking section of town. I'm a pretty good sized
man, but I put my gun in my back waistband after exiting the car. I
located his apartment and knocked on the door. The doorbell was
missing and bare wires were sticking out of the wall. I heard someone
say I'm coming and shortly the door opened with a safety chain lock
still engaged. He asked what I wanted and I introduced myself and
asked if we could have a conversation. He turned white as a sheet and
attempted to slam the door, but I already had a foot wedged in the
opening. He started shaking uncontrollably and was shouting leave me
alone, leave me alone! I told him he didn't seem so tough now face to
face and then noticed a putrid odor of urine and he was pissing his
pants and crying like a baby. Please leave me alone Oris he said, I
was just having fun and meant no harm, please leave, please. I could
see the filthy floor of this apartment and the dirty floors and the
stench of a grown man pissing on himself were almost enough to make
me
want to vomit, and I don't have a queasy stomach. Upon telling him
that this time he would escape a ass kicking and not to ever get a
smart mouth with me again and a verbal yes from him, I departed. That
apartment complex looked like a crackhouse, niggers everywhere,
filthy
grounds and stairwells. Junk cars everywhere and garbage overflowing
the garbage cans.
This Lloyd is nothing more than white trash that delivers pizzas and
could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted
to post it for everyone to see just what kind of chickenshit asshole
this Davies really is.

Oris Grim

Posted on Dec 23, 2004, 9:42 PM

>
> And of course Lloyd Austin Davies is lying yet again.
>
> I have

You have never ben in contact with Oris, Fatty, you ran your fat mouth
and hid from him at Dalton and at your HUD apartment.
Oris still lives on Jot em' Down Road in Danielsville, Georgia.
His "shack" was/is an outbuilding in back of his house.
Go to his page on qrz.com and count his radios, you'll have to take
your smelly shoes off, though.

And you are no spelling expert:

"breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation
session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also
"forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies" too
bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of
hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd
deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead
in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in
the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the
dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame
Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole
axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere

"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters
"enfighting" - Lloyd's two brain cells are infighting for control of his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?

Chilla writes:

2> Newsgroups:
alt.alien.vampire.flonk.flonk.flonk,alt.usenet.kooks,rec.knives,comp.os.os2.advocacy,rec.r
adio.amateur.policy

2> Seriously Dude, these fantasies about guys giving head, just send
him
2> some chocolates, flowers and take him to dinner... you might get
lucky :-D

What does your recommendation have to do with OS/2, Chilla?

3> Newsgroups:
alt.alien.vampire.flonk.flonk.flonk,alt.usenet.kooks,rec.knives,comp.os.os2.advocacy,rec.r
adio.amateur.policy

3> No thanks, I'm not gay, and I don't take advantage of the mentally
3> retarded :-p

What does Checkmate's mental retardation have to do with OS/2,
Chilla?

3> Seriously though, are you gay(?), 'cause that's acceptable these
days.
3> It's just all these homosexual references aren't appropriate even
if you
3> are gay.

What does Checkmate's inappropriateness have to do with OS/2,
Chilla?

3> Look if you really want someone to touch you I could arrange a date
with
3> my brother, he's gay... a bit snippity, but I think you'd get on
well,
3> and maybe you'd stop being such an ass(donkey).

What does your brother have to do with OS/2, Chilla?

3> Maybe you wouldn't hide behind so many aliases.

What does Checkmate's alias have to do with OS/2, Chilla?
Hmm, isn't "Chilla" an alias that you're hiding behind,
Chilla?

4> Newsgroups:
alt.alien.vampire.flonk.flonk.flonk,alt.usenet.kooks,rec.knives,comp.os.os2.advocacy,rec.radio.amateur.policy

4> Why not, he's not doing anything productive here, he might as well
go
4> out an have a good time.

What does Checkmate's lack of productivity have to do with OS/2,
Chilla? Ironically, you're not doing anything productive here
either, Chilla.

5> Newsgroups:

1> "Yes, I'm Gay"
1> (sung to the tune of "Yesterday")
1> (Rusty Volvo / Paul McCartney / John Lennon)
1> **

1> Yes I'm Gay, my toobe with handles will soon broadcast away,
1> And tell the world my discovery for today,
1> Oh, I decree that Yes I'm Gay.

1> Homosexuality, now I know it's just the thing for me,
1> A weathered fencepost taught me who I need to be,
1> Oh, homosexuality came painfully.

1> Why I didn't know,
1> I don't know, I couldn't say.
1> Why it took so long,
1> To find out that Yes I'm Gay.

1> Yes I'm Gay, no more Sophie for me to lay,
1> Tell your big tit daughters to go away,
1> Oh, I decree that Yes I'm Gay.

1> How many men I'll blow,
1> I don't know, I couldn't say.
1> There's a database on QRZ,
1> I dooo believe I'll start today.

1> Yes I'm Gay, from a hamfest booth I will earn my pay,
1> In my hovel, I won't need to hide away,
1> Oh, I decree that Yes I'm Gay.

1> Mm-mm-mm-mm-mm-mm-mm.

What do your lyrics have to do with OS/2, MorGoon?

1> Imagine
1> (UF / R. Xemblinosky / J. Lennon)

1> **

1> Imagine Marky Morgoon
1> It's not so hard to do
1> Kneeling in the boys' room
1> Slurping down some spoo
1> Imagine all the Cub Scouts
1> He has done this to!

1> Imagine Houghton County
1> A breeding ground for hicks
1> When they hear how Marky
1> Gets his seedy kicks
1> Imagining Marky Morgoon
1> Gumming winos' dicks!

1> Imagine Copper Country
1> Contagious miner's lung
1> No more ore to shovel
1> So Marky gets by with his tongue
1> Imagine him paying rent
1> With free shots at his bung!

1> We all know Morgoon is a reamer
1> But he's useful just the same
1> Where else would Brian find a patsy
1> Half as sad or half as lame?

What do your lyrics have to do with OS/2, VE7/KB9RQZ?

>
> And of course Lloyd Austin Davies is lying yet again.
>
> I have

You have never ben in contact with Oris, Fatty, you ran your fat mouth
and hid from him at Dalton and at your HUD apartment.
Oris still lives on Jot em' Down Road in Danielsville, Georgia.
His "shack" was/is an outbuilding in back of his house.
Go to his page on qrz.com and count his radios, you'll have to take
your smelly shoes off, though.

.....

You are correct. I have never "ben" in contact with Oris.
(your spelling is shining through yet again)
I have "been" in contact with him on numerous occasions in years past,
Woger.
I've never been to his QRZ page. I DO have photos of his gear that he
emailed to me, however.
Oris, while a seemingly nice enough guy, could not author a single sentence
without a series of gross misspellings.
Oris' emails were so poorly spelled that one almost had to interpret what he
was trying to say.
Oris even once apologized to me for his poor spelling and was (unlike you)
quite up front about it.

So, Roger...your post concerning Oris' alleged letter about his visit to
Lloyd is, and I will call you on this, a total, fabricated lie. Simply put,
Oris did NOT write that. In fact, I doubt that you wrote it, either.

2534. Go to bed, Roger

2543. FCC says Emergency Comms OK for Ham Employees

Newsgroup: rec.radio.amateur.policy
Date: 2010-07-15 19:08:09 UTC

http://nimbusters.org/hams/read.php?board=1&id=146506

Here's some actual ham content for the board, instead of the routine, brain-dead kiddy porn from Markie Mularkie, Toad, and the Karol crowd.

According to RM-10-124, the FCC will allow us to operate during emergencies, even if we're employess of the 'served agency.'

Employees are not being paid to operate an Amateur Radio station per se, rather they are employees operating an Amateur Radio station incidental to an emergency preparedness drill (or bonafide emergency, for that matter) while in a paid status at work.

eg: I happen to be an ER Nurse (really!)..I have my HT with me...We get hit by a tornado and the lights go out and the phones are dead. I am in a paid status, using my Amateur Radio license and facilities to effect emergency communications. It's no longer 'illegal' for me to do that, not that I ever expected the FCC would have tried to cite me (or anyone else, for that matter) in those circumstances anyway!!

Perhaps some delineation needed to be made by the FCC, but I think the entire NPRM / R&O was a stick-and-pony show for the nit-pickers and the Chicken Little crowd over this strawman argument about our bands being 'taken over' for 'routine' EmComm uses.

We routine you now to the regular homosexual bickering of Mark and Toad.

73

Steve, K4YZ

==>
+ FCC RULES THAT AMATEURS MAY PARTICIPATE IN NON-GOVERNMENT-SPONSORED
DRILLS BY EMPLOYERS

In a Report and Order (R&O
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.pdf>)
released Wednesday, July 14, the FCC stated that under new guidelines,
amateurs employed by non-governmental agencies, such as hospitals, may
participate and operate in drills sponsored by their employer.
Specifically, the FCC will now permit Amateur Radio operators "to
transmit messages, under certain limited circumstances, during either
government-sponsored or non-government sponsored emergency and disaster
preparedness drills, regardless of whether the operators are employees
of entities participating in the drill." More information will be
posted on the ARRL Web site.

==> + ARRL BOARD OF DIRECTORS HOLDS SECOND 2010 MEETING THIS WEEKEND
```

The ARRL Board of Directors will hold its 2010 Second Meeting July 16-17 in Windsor, Connecticut. Directors, Vice Directors and ARRL Board Officers will be in attendance, including three Vice Directors who will be at their first Board meeting: Rod Blocksome, K0DAS, of the Midwest Division, Kent Olson, KA0LDG, of the Dakota Division and Grant Hopper, KB7WSD, of the Northwestern Division. The Board will also be welcoming Rod Stafford, W6ROD, in his new capacity as IARU Secretary, as well as Radio Amateurs of Canada President Geoff Bawden, VE4BAW.

The meeting will be preceded on Thursday, July 15 with meetings of the Administration and Finance Committee and the Programs and Services Committee. The Administration and Finance Committee is chaired by Northwestern Division Director Jim Fenstermaker, K9JF. This committee studies, advises and makes recommendations for all administration and financial matters of the League, including recommending the annual budget to the Board, making recommendations in regard to staff management and monitoring investment of ARRL funds. The Programs and Services Committee, headed by Atlantic Division Director Bill Edgar, N3LLR, studies, advises and makes recommendations for all programs and services the League provides, including operating activities and the Field Organization.

At its January 2010 meeting, the ARRL Board of Directors decided to make the agendas of Board and Executive Committee meetings available on the ARRL Web site. The agenda for the 2010 Second Meeting is available here <http://www.arrl.org/files/media/News/July%202010%20agenda.pdf>. Per the Articles of Association <http://www.arrl.org/arrl-articles-of-association>, the ARRL Board of Directors meets twice a year, in January and July.

==> + ARRL WEST GULF DIVISION VICE DIRECTOR JOHN THOMASON, WB5SYT, RESIGNS POSITION

On Sunday, July 11, ARRL West Gulf Division Vice Director John Thomason, WB5SYT, of Edmond, Oklahoma, submitted his resignation to ARRL President Kay Craigie, N3KN. Thomason told President Craigie that by resigning, he will be able to "devote my energy to serve my family, employer and health." Craigie accepted the resignation with regret and then informed West Gulf Director Dr David Woolweaver, K5RAV. Previously the Oklahoma Section Manager, Thomason was appointed Vice Director in January 2009 <http://www.arrl.org/news/j-john-thomason-wb5syt-appointed-west-gulf-division-vice-director> after Dr Woolweaver moved up to the Director position upon the retirement of Division Director Coy Day, N5OK <http://www.arrl.org/news/coy-day-n5ok-resigns-from-arrl-board-of-directors>. The Director and Vice Director positions in the West Gulf Division -- as well as the Pacific, Rocky Mountain, Southeastern and Southwestern Divisions -- are up for election this year.

==> + FIRST HALF OF 2010 SEES UPSWING IN NEW AMATEUR RADIO LICENSEES

With more than 18,000 new Amateur Radio licenses issued in the first half of this year -- 18,270 to be exact -- 2010 is shaping up to be a banner year for Amateur Radio. So far, the number of new licenses issued by the FCC in 2010 is outpacing the January-June 2009 totals by almost 8.5 percent; at this time last year, the FCC had issued 16,844 new licenses. As of June 30, 2010, there are 694,346 licensed Amateur Radio operators in the US, an almost 1 percent rise over all of calendar year 2009. Broken down by license class at the end of June 2010, there were 16,299 Novices, 342,064 Technicians, 154,284 Generals, 60,059 Advanced and 121,640 Amateur Extra licensees . Read more here <http://www.arrl.org/news/first-half-of-2010-sees-upswing-in-new-amateur-radio-licenses>.

==> + ARRL RECOGNIZES: FRED FISH MEMORIAL AWARD #2 GOES TO TEXAS HAM

Llewellyn "Pat" Rose, W5OZI, of Junction, Texas, is the recipient of the Fred Fish Memorial Award (FFMA) #2. Thanks to a recent Grid DXpedition by Russ Dwarshius, KB8U, of Ann Arbor, Michigan, Rose earned FFMA #2; FFMA #1 was awarded posthumously to Fred Fish, W5FF, himself. The ARRL Awards Branch received and approved Rose's QSL for his last-needed grid -- CM79 in California -- on July 8, 2010.

The Fred Fish Memorial Award was created in honor of Fish, a legendary VHF+ operator who became the first amateur to work and confirm all 488 Maidenhead grid squares within the 48 contiguous United States on 6 meters. Rose is the first amateur to duplicate Fish's feat. The FFMA will be awarded to any amateur who can duplicate Fish's accomplishment. Read more here <http://www.arrl.org/news/fred-fish-memorial-award-2-goes-to-texas-ham>.

==> + HONORING THE BEST: THE ARRL'S A-1 OPERATOR CLUB

First organized in May 1933, the ARRL's A-1 Operator Club has a proud history and occupies an important place in Amateur Radio tradition. By early 1934, the roster of recognized A-1 operators had swelled to more than 400; by the end of 1938, to 1000. As of mid-2010 there are more than 6000 members of this special club! Then, as now, nominations were not made lightly; through the years, recognition as an A-1 Operator has represented an unsolicited acknowledgment of one's high standing among one's peers. Read more here <http://www.arrl.org/news/honoring-the-best-the-arrl-s-a-1-operator-club>.

==> INTERNATIONAL PERSPECTIVE: WRTC 2010 WINNERS ANNOUNCED

Broadcast live over the Internet on Monday, July 12, WRTC Judge David Sumner, K1ZZ -- on behalf of Chief Judge Mike Klokov, UA9PM, and the Judging Committee that included Nodir Tursoon-Zadeh, EY8MM, Roger Western, G3SXW, and Don Field, G3XTT -- announced the winners of the 2010 World Radiosport Team Championships (WRTC <http://www.wrtc2010.ru/>) in Moscow, Russia:

- Gold Medal (First Place): The R32F Team, consisting of Vladimir Aksenov RW1AC, and Alexey Mikhailov, RA1AIP, of Russia, with 4,098,162 points.

- Silver Medal (Second Place): The R33A Team, consisting of Tonno Vahk, ES5TV, and Toivo Hallikivi, ES2RR, from Estonia, with 4,084,889 points.
- Bronze Medal (Third Place): The R33M Team, consisting of Dan Craig, N6MJ, and Chris Hurlbut, KL9A, of the United States, with 3,942,904 points
- Best SSB score: The R33A Team. At least 35 percent of their contacts must have been on CW.
- Best CW score: The R33L Team, consisting of Yuri Onipko, VE3DZ, and Yury Romanov, VE3XB, of Canada. At least 35 percent of their contacts must have been on SSB.
- Highest multiplier: The R33A Team with 389 multipliers.

Congratulations to all 48 WRTC teams! A complete list of teams and their scores can be found here <http://www.arrl.org/attachments/view/News/53255>. According to WRTC officials, the location of the 2014 WRTC will be announced shortly; groups in two countries -- the United States and Bulgaria -- have submitted letters of interest to host the 2014 event.

==> INTERNATIONAL PERSPECTIVE: SPAIN EXTENDS AMATEUR PRIVILEGES ON 70 MHZ

The Union de Radioaficionados Espanoles -- Spain's IARU Member-Society -- announced that the Secretar&#65533;a de Estado de Telecomunicaciones y para la Sociedad de la Informaci&#65533;n (Spain's equivalent to the FCC) has extended temporary privileges on the 70 MHz band (4 meters) to hams in that country. In 2008, hams in Spain were granted 70 MHz privileges for six months. Spanish amateurs may now use 70.150-70.200 MHz, with a maximum of 10 W; the average power of emission outside the authorized band should not exceed 25 microwatts. Read more here <http://www.arrl.org/news/spain-extends-amateur-privileges-on-70-mhz>.

==> + SOLAR UPDATE

Tad "The river glistened like a path of diamonds in the Sun <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/>" Cook, K7RA, reports: Two new sunspot groups this week provided increased solar activity. The average daily sunspot numbers this week rose 2.9 points to 18.9, and the average daily solar flux was up 6.4 points to 79.2. The predicted solar flux for July 15-21 is 80 on each day. The predicted planetary A index for July 18 is 8, followed by 5 for each day through July 22. The next rise in the planetary A index is July 23-25, when it is predicted to be 18, 12 and 10. On Wednesday, July 14, there was an interruption at in the portion of the STEREO image that faces Earth <http://stereo.gsfc.nasa.gov/>, but by early Thursday morning it was restored. Due to movement of the STEREO craft, as the gap closes on the far side, a new one facing Earth will begin in January 2011. Eventually, the two spacecraft will work their way around the Sun and return to their original position by 2024. Currently, the outlook for the near term looks good for HF propagation, with low

geomagnetic indices and some moderate solar activity. Look for more information on the ARRL Web site on Friday, July 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' The Life and Adventures of Nicholas Nickleby <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/> (Chapter 6).

==> THIS WEEK ON THE RADIO

This week, the North American QSO Party (RTTY), the DMC RTTY Contest and the CQ Worldwide VHF Contest are July 17-18. The Run for the Bacon QRP Contest is July 19. Next week, there is another running of the NCCC Sprint Ladder on July 23. The RSGB Islands on the Air (IOTA) Contest is July 24-25 and the SKCC Sprint July 28. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for this online course session <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1718 - July 16 2010

Amateur Radio Newsline report number 1718 with a release date of
Friday, July 16, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. An appeals court strikes down the FCC's 2004
ban on indecent language broadcast on the airwaves, rule 97.113 changed
to allow employees in emcomm drills, the next Global Amateur Radio
Emergency Conference to take place this fall on the island of Curaco,
hams in Spain get called out in back to back emergency communications
exercises and Amateur Radio Newsline announces the 2010 Young Ham of
the Year. Find out whom it is on an expanded Amateur Radio
Newsline(tm) report number 1718 coming your way right now.

(Billboard Cart Here)

RADIO LAW: APPEALS COURT RULES FCC POLICY ON BROADCAST INDECENCY
UNCONSTITUTIONAL

A federal appeals court has struck down a Federal Communications
Commission policy on broadcast indecency saying that regulations
barring the use of fleeting expletives on radio and television
violated the First Amendment of the United States Constitution. This,
because they were vague and could inhibit free speech. Bill
Pasternak, WA6ITF, has the details:

--

In a unanimous decision delivered on Tuesday, July 12th the three-judge
Court of Appeals for the Second Circuit in New York said that the FCC's
current policy created a chilling effect. One that goes far beyond the
fleeting expletives at issue because it left broadcasters without a
reliable guide to what the commission would find offensive.

The appeals court emphasized that it was not precluding federal regulation
of broadcast standards. It specifically stated that it was not suggesting
that the FCC could not create a policy that was constitutional but that the
regulatory agency's current policy fails constitutional scrutiny.

The stricter policy enacted by the FCC followed several incidents that lead
to widespread public complaints. This included singer Janet Jackson's
breast baring episode during the 2004 Super Bowl Half-Time Show and
repeated instances of on the air fleeting profanity by celebrities,
including Cher, Paris Hilton and Bono. This, during the live broadcasts of

awards programs.

The Janet Jackson incident did not involve speech but it drew wide public outrage that spurred a crackdown by the FCC.

The decision against the FCC stems from a challenge by Fox, CBS and other broadcasters to the agency's decision in 2004 to begin enforcing a stricter standard of what kind of language is allowed on free, over-the-air television. Prior to 2004, the FCC consistently held that occasional, spontaneous use of certain words that were otherwise prohibited did not violate its indecency standards.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

What affect this ruling might have on ham radio and other personal service cases involving indecent language broadcast over the airwaves is hard to assess. In years past, the FCC has applied its broadcast indecency standard in personal communications matters involving ongoing violations of various rules regarding language used on the air. That said, to date no ham, CB'er or other private radio operator has ever been cited for an inadvertent one time slip of the tongue. (Adapted from published news reports)

**

RADIO LAW: FCC TO ALLOW EMPLOYEES TO PARTICIPATE IN EMCOMM TRAINING DRILLS

The FCC has adopted a Report and Order on Docket RM 10-124 that contains new and less stringent rules regarding employee participation in emergency communications training drills.

Specifically, the FCC has amend the Part 97.113 of its rules to permit amateur radio operators to transmit messages for their employers under certain limited circumstances. This includes both government or non-government sponsored emergency and disaster preparedness drills, regardless of whether the operators are employees of entities participating in an exercise.

Under the newly modified 97.113, the amount of time employees are now allowed to participate in government sponsored drills is essentially unlimited. In the case of non government sponsored drills the limitation is one hour a week and two drill sessions of up to 72 hours per year.

In making its decision, the FCC categorically refuted all comments against the rules modification. The FCC essentially stated that improvement in the public's welfare by allowing such participation in emergency training outweighs any concern within the ham community that such a rules change would erode the non pecuniary interest and not for profit status of the amateur radio service.

The Report and order was released on July 14th. It should become effective 30 days after publication in the Federal Register. The full document is on the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.pdf or http://fjallfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.doc (FCC, AH6RH)

**

RESCUE RADIO: GAREC 2010 ON CURACO IN OCTOBER

The 2010 Global Amateur Radio Emergency Conference or GAREC will be held on October 11th and 12th. The venue is the Hilton Curaco on the island of Curaco in the Netherlands Antilles.

The missions of the conference are to get amateur radio operators better prepared for emergency communications. This, by creating what can best be called universal operating practices at both national and international levels. The conference is also a place to exchange information and experiences between amateur radio operators and groups that are interested in emergency communications.

The planning for the event is progressing with the first draft program of events available from the GAREC website at www.garec.net. The program will continue to change as speakers and activities are confirmed in coming months. Registration and hotel information can also be found at the Website. (IARU)

RESCUE RADIO: HAMS IN SPAIN CALLED OUT IN TWIN READYNESS EXERECISES

Amateurs radio operators in Spain have been involved with two major emergency communications exercises giving them the ability to polish their operating skills while showing authorities what they can do. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

According to G0DUB, in the first of the two exercises, several teams of the Spanish Emergency Radio Network participated in the international exercise PRES EU 2010, which took place at the Madrid Barajas International Airport on June 26th. The exercise simulated an accident resulting from a plane leaving the runway on landing and crashing into a building in which radioactive substances for hospital use were stored.

This drill simulated the possibility of a large number of victims of different nationalities with differing languages and needs. It also showed the results of the activation of the corresponding Civil Protection plans in an environment of simulated radiological contamination. More than 600 Spanish emergency technicians were deployed as were several teams from eight European countries.

In the second exercise on June 27th, the Grupo de Radio Transpirenaico or G-R-T brought together radio amateurs from Spain, France and

Andorra. This, in an emergency communications exercise to demonstrate a network spanning the Pyrenees without using any existing infrastructure.

During the exercise, a chain of more than 60 amateur radio stations was established from the eastern to the western Pyrenees, alternating radio links between France and Spain in the amateur radio bands. The point to point VHF radio links were used to send and receive messages from the Mediterranean Sea to the Atlantic Ocean. The same messages were then relayed back to the starting point in a single hop using stations operating on the High Frequency bands.

The overall exercise showed how ham radio H-F and VHF links can work side by side in a communications emergency and proving that that ham radio is a very powerful alternative emergency communications asset for the first responders and other authorities.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--

The first exercise was funded as part of European Union Project called Rapid Response Capability 7. The Spanish Emergency Radio Network also known as Red Radio de Emergencia is a group of 4000 amateur radio operators which is integrated in the Spanish General Directorate of Civil Protection and Emergencies.

YHOTY: CODY ANDERSON, KI4FUV, NAMED AMATEUR RADIO NEWSLINE 2010 YOUNG HAM OF THE YEAR

A 17 year old Tennessee ham generally credited with saving the life of a downed runner in a marathon has been selected as the 2010 Amateur Radio Newsline Young Ham of the Year. Mark Abramovich, NT3V, is here with the story of Cody Anderson, KI4FUV:

--

"Cody, KI4FUV, you are the 2010 Young Ham of the Year award recipient from the Amateur Radio Newsline."

"I'm really excited. Somehow I can't wait to tell everybody here."

And that was the reaction of Cody Anderson of Harriman, Tennessee when he got the news the judges had selected him for the recognition.

Cody, 17, is the son of Benny Anderson and Jane Ann Edwards. He is an honors graduate of Rockwood High School in nearby Rockwood.

Phillip Newman, KE4LSH, president of the Roane County Amateur Radio Club, based about 30 miles west of Knoxville, nominated Cody for the award.

Cody serves as vice president of the club as well as net manager and webmaster for KE4RX.org.

"I'm really involved with the ARES portion of it," Cody says. "ARES is really strong here within Roane County.

"I would be more active on HF, although I just don't have a way to get an HF antenna up. I'm pretty active on 2-meters on the local club repeater."

Cody's nomination rose to the top of the Young Ham of the Year award committee's nominee list because of a life-changing event which occurred in this young ham's life.
It was May 30, 2009 and Cody says he was manning a checkpoint at the "Run for the Child" event in Roane County.

"It was about 20 or 25 minutes in," Cody recalls. "One of the runners had went past me and I noticed he fell. I waited just a second or two, you know, to see if he got back up. Maybe he just tripped.

"And, then I noticed he didn't get back up, so I went over to him and by the time I got to him he had quit breathing and went into cardiac arrest.

"After I radioed it in, me and another one of the runners that had stopped started CPR."
Cody says he had completed that CPR training through the club just months earlier and put his knowledge to work, doing mouth-to-mouth resuscitation while the runner did the chest compressions.

Cody recalls it all happened so fast and he just reacted instinctively.

"You know it's a fairly short race and the checkpoint I was working at was one of the earlier ones," Cody says. "I actually got done before the race was over. And, I went back and as I got back to the command post, I heard over the public safety radio they were bringing in a helicopter and flying him out to another hospital."

Cody says the man survived and although his heroic actions got some attention, the experience really didn't change him.

"I don't think that fazed me at all because I believed I was just doing what was right and I wasn't in it for the recognition," Cody recalls.

First licensed in 2004, Cody is a General Class operator who, although he is not a Boy Scout himself, has been helping the Radio Club of Knoxville teach two merit badges offered each summer at the Buck Toms Scout Camp run by the Great Smoky Mountain Council.

"They get two merit badges - they get the Radio and Electronics - and we help them build a TenTec shortwave receiver kit and help them understand how it works, what the components do," Cody says. "We let them operate the radios if they want to."

Cody is heading on to Roan State Community College this fall where he's planning to get some core courses completed. He says he's then planning to enroll at Tennessee Tech where he'll major in computer science.

As to his future in ham radio, Cody says there's always room for that.

"I hope to stay as active as I am now or become more active," Cody says. "Tennesee Tech actually has a radio club.

"I believe that ham radio is what's helped me learn a lot of my technical knowledge now and even computer skills and things like that, working with digital modes and other things.

"I really hope that I can stay as active as I am now and continue to learn with it."

Once again, congratulations to Cody Anderson, KI4FUV, Amateur Radio Newsline's Young Ham of the Year.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Cody Anderson, KI4FUV, will receive his award at the 2010 Huntsville Hamfest slated for the weekend of August 21st and 22nd at the Von Braun Center in Huntsville, Alabama. We hope to see many of you there. (ARNewsline(tm))

**

ENFORCEMENT: UNLICENSED FLORIDA BROADCASTER ISSUED $10000 NAL

The FCC has issued a $10,000 Notice of Apparent Liability to Christopher M. Myers of Lauderhill, Florida. This, for apparently willfully and repeatedly violating Section 301 of the Communications Act by operating an unlicensed radio transmitter on the frequency 95.9 MHz.

According to an FCC release, back on August 14, 2008, the Enforcement Bureau's Miami Office issued a
Notice of Unlicensed Operation to Myers for operating an FM broadcast station from his residence on 91.7 MHz without a license. The notice warned him that continued operation could subject him to further enforcement action.

On July 21, 2009, in response to a complaint that Myers was now operating an unlicensed station at his residence in Lauderhill, Florida, agents from the Miami Office used direction-finding to locate the source of broadcast transmissions on the frequency 95.9 MHz. It was traced to the same building from which Myers previously operated an unlicensed radio station on 91.7 MHz. In the ensuing months the FCC says it received continued complaints regarding this operation.

On March 7, 2010, the agents from the Miami Office inspected the unlicensed station, which was located in a condominium unit owned Myers. The agents observed a coaxial cable that connected a roof-mounted antenna on the condominium building to an FM radio transmitter operating on the frequency 95.9 MHz located inside Myers's condominium unit. The agents also observed
that Christopher Myers was the only person present inside his unit at the time of the Commission's inspection.

Now, based on the evidence before it, the FCC finds that's Christopher M. Myers apparently willfully and repeatedly violated Section 301 of the Act by operating radio transmission equipment on 95.9 MHz without Commission authorization. Therefore he is being assessed $10,000 which is payable within 30 days of the July 12th release of the order. Myers also has the option to file an appeal. (FCC)

**

EMERGING TECHNOLOGY: WORKEDGRIDS FREEWARE AP FOR GRID SQUARE CHASERS

WorkedGrids is a freeware Windows application that displays a map showing Amateur Radio grid squares contacted and logged using a third-party logging program. The app was developed by VE2ZAZ, and uses colors to display information on a per-band basis. Up to four bands can be displayed concurrently. For its input, the program reads the plain-text ASCII log files generated by most logging programs. The file is read at a set interval and the worked grid squares on the map are updated in a dynamic way as the contest progresses and the log file is periodically saved. WorkedGrids can be downloaded from tinyurl.com/24okrtm. (VHF Reflector)

**

THE SOCIAL SCENE: QUARTZFEST TESTING DATE CORRECTION

The organizers of the 2011 Quartzfest in Quartzsite Arizona say that a ham radio exam session listed on the ARRL Website for Saturday, July 17, 2010 is a mistake. Posting to QRZ.com, Steve, KO4QT, and Linda, KI6JUD, Weed say that Quartzfest 2011 is scheduled to take place this coming January from the 23rd to the 29th. Exam dates are the morning of January 24th for the Commercial Radio Telephone and Telegraph test. Amateur radio exams will be administered will take place the morning of January 25th. The Weed's say that they have contacted the ARRL and there should be a correction at the ARRL website, likely by the time this newscast goes to air. More on the 2011 Quartzfest is on-line at www.quartzfest.org. (QRZ.com)

**

NAMES IN THE NEWS: JOHN THOMPSON, WB5SYT, RESIGNS AS WEST GULF ARRL VICE DIRECTOR

Some names in the news. First up is ARRL West Gulf Division Vice Director John Thomason, WB5SYT, of Edmond, Oklahoma, who has submitted his

resignation to ARRL President Kay Craigie, N3KN. In his July 11th letter, Thomason told Craigie that by resigning, he will be able to devote his energy to serve his family, employer and health.

Former ARRL President Joel Harrison, W5ZN, appointed Thomason in January 2009 as Vice Director. This, after David Woolweaver, K5RAV, moved up to the Director position upon the retirement of then Division Director Coy Day, N5OK.

The Director and Vice Director positions in the West Gulf Division along with those in the Pacific, Rocky Mountain, Southeastern and Southwestern Divisions are up for election this November. (ARRL)

**

NAMES IN THE NEWS: 5B4AHJ CELEBRATES 50 YEARS IN HAM RADIO

Alan Jubb, 5B4AHJ, will celebrate his 50th anniversary as a licensed radio amateur on October 25th. To commemorate the event, he will use the special Cypress call 5B50J beginning this October 25th and continuing for a year. Listen out for him on CW and SSB. QSL via 5B4AHJ, direct or via Logbook of the World. (Various)

HAM RADIO IN SPACE: ISS RANDOM CONTACTS BACK

After a seemingly long period when the astronaut and cosmonaut hams on board the International Space Station seemed only to be making pre-planned contacts with schools, random contacts are back. For several days last week, Colonel Doug Wheelock, KF5BOC, took to the air from the orbital outpost to talk to hams around the globe. Here's a time compressed sample as supplied to us by Scott Avery, WA6LIE:

--

Actual contact audio from NA1SS - Hear it in the MP3 version of this weeks newscast available for download from www.arnewsline.org.

--

That recording was made on July 11th. Among the other stations Wheelock is known to have worked are since activating ISS station NA1SS were KD5DCB and PD0RKC to name only a few. (ARNewsline(tm) with audio from WA6LIE)

**

WORLDBEAT: IARU REGION 1 UPDATING PUBLISHED BANDPLAN DATA

Region 1 of the International Amateur Radio Union is looking for help to keep their records up to date. They have asked that member societies update or verify the spectrum privileges, especially for 600, 60, 6 and 4 meters. This based on the recent ham radio allocation changes that have taken place in some nations.

The currently published spectrum privileges each country in Region 1 is on line at www.iaru-r1.org. To see them simply click on Spectrum and Band Plans on the left hand side of the page (GB2RS)

**

WORLDBEAT: IRELAND ISSUES NEW CALLS TO AMATEUR RADIO EMERGENCY NETWORK

Ireland's telecommunications regulator ComReg has issued a new set of call signs for use by that nations Amateur Radio Emergency Network. The three calls are EI0AC, EI0EC, and EI0NC and supersede any callsigns issued in the past. The new calls are available for use during training and emergency nets as directed by Ireland's National Coordinator. (IRTS)

**

TECHNICAL CORNER: ARRL & TAPR DCC CALL FOR PAPERS

Technical papers are solicited for presentation at the 29th Annual ARRL and Tucson Amateur Packet Radio Digital Communications Conference to be held September 24th to the 26th near Portland, Oregon. Papers will be published exactly as submitted and authors will retain all rights. The submission deadline is July 31st and you do not need to attend the conference to have your paper included in the Proceedings. Papers go to Maty Weinberg, in care of the ARRL, 225 Main Street, Newington, Connecticut, 06111or by e-mail to Maty (at) arrl (dot) org. (WB8IMY)

**

HAM RADIO IN SPACE: INDIA LAUNCHES TWIN HAM RADIO SATELLITES

Two more ham radio satellites are in space and on-orbit. VU2WMY reports that StudSat and TISat were launched successfully early Monday morning, July 12th. StudSat and TISat were aboard the Indian Space Research Organization's Polar Satellite Launch Vehicle PSLV C15. They were successfully separated from it and are in a 640 Km orbit. Their respective beacons frequencies are 437.861 and 437.305 MHz. Video of the launch is on line at tinyurl.com/29ukc4l (Southgate)

**

HAM RADIO IN SPACE: SO-67 OPERATIONS SUSPENDED DUE TO COMPUTER GLITCH

Meantime some on-orbit problems for South Africa's Sumbandilasat SO-67 ham radio bird. Due to the erratic operation of the onboard computer, operations of SO-67 have been suspended while the ground station

investigates the problem. Speculation is that recent changes in the software that operates the amateur payload could be the cause. South Africa Amsat says that it will advise the world amateur radio community when SO-67 operation will be resumed. (SA AMSAT)

**

ON THE AIR: PORTUGAL

On the air, word from Portugal comes word that special event station CS29MR will operate from July 12th to the 18th. This to celebrate the 29th International Motorcycle Concentration Faro. Operations will be on 80 through 6 meters using CW, SSB and RTTY. More information can be found on QRZ.com. (Southgate)

**

ON THA AIR: CROATIA

On the air, keep an ear open for Croatian special event station 9A10P to be active through the end of the year. This, to celebrate the anniversary of the city of Djurdjevac. A special QSL will be issued, and all QSOs will be confirmed automatically via the bureau. (OPDX)

**

ON THE AIR: DEMOCRATIC REPUBLIC OF CONGO

And if you missed working ON4HIL as 9Q50ON, I the Democratic Republic of the Congo, don't worry. Patrick will help the locals in Kinshasa get their club station on the air and assist them in making their first QSOs as 9Q50AR. This is another special event call sign to celebrate the 50th anniversary of the
independence of the Democratic Republic Congo and will be used by different local operators until the end of the year. A QSL Manager is expected to be announced shortly. (OPDX)

**

DX

In DX, members of the Czech and Slovak OM0C Contest Crew have announced another DXpedition to Gambia to take place between November 18th and December 1st. They plan to renew the callsigns from their previous 2007 operation as C50C or C52C. The special call sign C5A has been reserved for use during the CQ World Wide DX CW Contest. For more details and updates, visit their Website at tinyurl.com/334e79q

F4DBJ, will be active as 5R8HT from Madagascar between September 5th and November 28th. Operations will be on 80 through 10 meters. QSL via his home call sign.

DL4HG and DL5XAT will be active from Gozo Island between November 23rd and the 30th. They plan to be active as 9H3TX during the CQ World Wide DX CW Contest as a Multi-2 entry. QSL via DL5XAT.

F2JD is back to Manilla for the next 5 months or so and is now signing portable DU1. He plans to be active on all bands and modes during his stay. He will also try to activate some Islands on the Air while there. QSL via F6AJA.

Lastly, F5RBB and F0FRL will be active stroke TK between September 12th and the 25th. F5RBB will operate on 80 through 10 meters using SSB and some of the digital modes, while F0FRL will be on 2 meters using SSB. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: A GENDERLESS BATTERY YOU VCANT PUT IN WRONG

And finally this week, ever put a new battery into a radio or flashlight and wonder why it does not work. So you take it out and realize you have it in backward? Well that might not be a problem much longer as we hear from Jim Linton, VK3PC

--

Just how hard can it be to load batteries into devices and get the polarity correct?

Well, apparently this very simple task is just beyond some people, who we will describe as being Polarity-Agnostic, or call a spade a spade, they're battery bunglers.

So prevalent is this lack of skill that Microsoft and Duracell have identified it as an untapped market, and created batteries that have both positive, you know that's the one with the plus sign, and negative or hyphen, at both ends.

This bipolar set-up of terminals is subject to a patent entitled 'Eliminating Incorrect Battery Placement'.

The InstaLoad technology is a brilliant, basic mechanical solution without electronic components or circuitry. Already it has found application in hearing aids, torches and soon to follow will be a host of gadgets presumably the Duracell Energizer Bunny.

I'm Jim Linton VK3PC.

--

Microsoft has already been granted a patent on the new gender-less battery terminal configuration. More about how it works is on line at tinyurl.com/2g9onmc (WIA News)

CODY ANDERSON, KI4FUV, NAMED RECIPIENT OF THE 25TH AMATEUR RADIO NEWSLINE "YOUNG HAM OF THE YEAR" AWARD

Cody Anderson, KI4FUV, A 17 year old radio amateur from Harriman, Tennessee, whose quick thinking likely saved the life of a downed runner in a 2009 marathon, has been named as the 2010 Amateur Radio Newsline Young Ham of the Year. This marks the 25th anniversary of the Young Ham of the Year Award program.

Cody is the son of Benny Anderson and Jane Ann Edwards. He is an honors graduate of Rockwood High School in nearby Rockwood, Tennessee.

At age 11, Cody became interested in radio communications after hearing a VHF ham QSO on a scanner. He was encouraged by his grandparents and stepfather to pursue this interest, and was directed to an Oak Ridge, Tennessee club where he first tested for his Technician ticket in June 2004. He upgraded to General in June 2007 at the Buck Toms Scout Camp run by the Great Smoky Mountain Council.

Since his earliest days as ham, Cody has been an ambassador of and a mentor within amateur radio, and has used it in public service most of his teen years. Phillip Newman, KE4LSH, president of the Roane County Amateur Radio Club, based about 30 miles west of Knoxville, nominated Cody for the award. He says that Cody serves as Vice President of the club as well as Net Manager and Webmaster for the club's cyberspace home located at www.KE4RX.org.

"I'm really involved with the ARES portion of it," Cody says. "ARES is really strong here within Roane County.

"I would be more active on HF, although I just don't have a way to get an HF antenna up. I'm pretty active on 2-meters on the local club repeater."

Cody's nomination rose to the top of the Young Ham of the Year Award committee's nominee list because of a life-changing event which occurred in this young ham's life.

It was May 30, 2009 and Cody says he was manning a checkpoint at the "Run for the Child" event in Roane County. Cody recalls that it was about 20 or 25 minutes into the race when a runner suddenly went down:

"One of the runners had went past me and I noticed he fell. I waited just a second or two, you know, to see if he got back up. Maybe he just tripped.

"I noticed he didn't get back up, said Cody. So I went over to him and by the time I got to him he had quit breathing and went into cardiac arrest.

"After I radioed it in, me and another one of the runners that had stopped started CPR."

Cody says he had completed that CPR training through the club just months earlier and put his knowledge to work, doing mouth-to-mouth resuscitation while the runner did the chest compressions.

Cody recalls it all happened so fast and he just reacted instinctively.

"You know it's a fairly short race and the checkpoint I was working at was one of the earlier ones," Cody says. "I actually got done before the race was over. And, I went back and as I got back to the command post, I heard over the public safety radio they were bringing in a helicopter and flying him out to another hospital."

Cody says the man survived and although his heroic actions got some attention, the experience really didn't change him.

"I don't think that fazed me at all because I believed I was just doing what was right and I wasn't in it for the recognition," Cody recalls.

In addition to public service events like the "Run for the Child" marathon, Cody has also responded to ARES activations for numerous shelter openings in the Roane County area. He has also helped provide emergency communications during such disasters as the Tennessee Valley Authority Ash Spill that gained national attention in 2008.

Cody has been helping the Radio Club of Knoxville teach two Scouting merit badges offered each summer at Camp Buck Toms:

"They get two merit badges - they get the Radio and Electronics - and we help them build a TenTec short-wave receiver kit and help them understand how it works, what the components do," Cody says. "We let them operate the radios if they want to."

Cody has also assisted with Information Technology projects for his radio club and ARES group. This includes a link to a D-Star gateway during ARRL Field Day and during local events. It is also available to prepare for the use of digital communications in a real emergency.

Cody is heading on to Roan State Community College this fall where he's planning to get some core courses completed. He says he's then planning to enroll at Tennessee Tech where he'll major in computer science.

As to his future in ham radio, Cody says there's always room for that:

"I hope to stay as active as I am now or become more active," Cody says. "Tennessee Tech actually has a radio club.

"I believe that ham radio is what's helped me learn a lot of my technical knowledge now and even computer skills and things like that, working with digital modes and other things.

"I really hope that I can stay as active as I am now and continue to learn with it."

Award Ceremony

The 2010 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented to Cody Anderson, KI4FUV, on Saturday, August 21st at the Huntsville Hamfest in Huntsville, Alabama. As the 2010 "Young Ham of the Year," Cody will receive -- courtesy of Vertex-Standard -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat him to an expense-paid week at Spacecamp Huntsville, and will present Cody with a variety of CQ products. Amateur Radio Newsline(tm) will provide Cody with a commemorative plaque at the award ceremony. Once again, the cost of year's plaque has been underwritten by Dave Bell (W6AQ), President of DBA Entertainment Inc., Hollywood, California. Heil Sound Ltd. will also be presenting Cody with a ham radio related gift.

The presentation of the award as a regular feature of the Huntsville Hamfest has been made possible through the generosity and kindness of the event's Planning Committee and the good offices of Huntsville Hamfest Association Vice President Charlie Emerson, N4OKL. (See http://www.hamfest.org)

This year's award ceremony will be hosted by Bill Pasternak, WA6ITF and Don Wilbanks, AE5DW, of Amateur Radio Newsline(tm) along with representatives of corporate underwriters Vertex-Standard and CQ Communications, Inc.

Award Program Background

The Amateur Radio Newsline(tm) "Young Ham of the Year" award (formerly the Westlink Report Young Ham of the Year Award) has been presented annually for the past 25 years to a licensed radio amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the

art in communications through the Amateur Radio hobby/service. A website with full information on the award program and background material is located at http://www.arnewsline.org.

Award Sponsors

The award program is jointly sponsored by the Los Angeles, California-based Amateur Radio Newsline(tm) with corporate support from Vertex-Standard Corporation of Cerritos, California and CQ Magazine of Hicksville, NY.

Since 1976, the Southern California-based Amateur Radio Newsline(tm) and its predecessor, the Westlink Radio Network, have been providing radio amateurs around the world with up-to-the-minute news at no cost to them. Amateur Radio Newsline(tm) also co-sponsors with the Quarter Century Wireless Association the "Roy Neal, K6DUE, Amateur Radio Mentoring Project" that serves as a clearinghouse to match radio amateurs in need of educational assistance on the hobby with those able to aid them. (See http://www.arnewsline.org)

The award's two major corporate underwriters are world leaders in their respective areas of Amateur Radio product support.

Vertex-Standard Corporation, which has been a corporate underwriter since the inception of the award program in 1986 is considered the trailblazer in the design, manufacture and distribution of high quality Vertex-Standard commercial two-way radio, monitoring and air-band communications equipment along with its Standard Horizon marine electronics line and Yaesu brand Amateur Radio equipment. The Yaesu name is known world-wide among ham radio aficionados and is synonymous with premium quality ham radio gear. (See http://www.vertexstandard.com)

CQ magazine and its sister publications, CQ VHF, Popular Communications and WorldRadio Online, are published by CQ Communications, Inc., and are considered the trend-setting publications serving today's modern radio amateur. (See http://www.cq-amateur-radio.com)

Past Recipients

Past recipients of the "ARNewsline Young Ham of the Year Award" include Shawn Alan Wakefield, WK5P, of Bartlesville, OK (1986); David Rosenman, KA9PMK, of Muncie, IN (1987); Jonathan Binstock, NK3D, of Potomac, MD (1988); Erin McGinnis, KAOWTE, of Topeka, KS (1989); Mary Alestra, KB2IGG, of Staten Island, NY (1990); Richard S. "Sammy" Garrett, AAOCR, of St. Louis, MO (1991); Angela (Angie) Fischer, KBOHXY, also of St. Louis (1992); Kevin Boudreaux, N5XMH, of New Orleans, LA (1993); Allison Daneen Zettwoch, KD4CKP, of Louisville KY (1994); Adam Weyhaupt, N9MEZ, of Alton IL (1995); Toby Metz, KB7UIM, of Boise ID (1996); Brian Mileshosky, N5ZGT, of Albuquerque NM (1997); Richard Paczkowski, Jr., KF4BIA, of Edgewater, FL (1998); Michelle Swann, KE4EZI, of Warner-Robins, GA (1999); Christopher Arthur, KT4XA, of Russelville, AL (2000); Patrick Clark, KC8BFD, of Elkwood, WV (2001);

Josh Abramowicz, KB3GWY, of Reading, PA (2002); Jay Thompson, W6JAY, of Santa Ana, CA (2003); Andrea Hartlage, KB4IUM, of Grayson, GA (2004), Rebekah Dorff, WG4Y, of Hoover, AL (2005), Catherine Ferry, NC8F, of Streetville, OH. (2006), Grant Morine, W4GHM, of Wilmington, NC (2007), Emily Stewart, KC0PTL, of Leavenworth, KS. (2008), Andrew Koenig, KE5GDB of Houston, TX. (2009).

Interesting to see you identify yourself as a troll, kachina, but
what does your question have to do with OS/2?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
5 days (Jul 22, 4:41 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Where do you get the idea from based upon this article?
Nothing in the articke said anything about getting busted for driving a
look alike cop car, marked or not.
No judge in his right mind would make a person pay a fine for that
bullshit.

Hell, I had my 1963 Plymouth Belvidere decked out with rear deck lights,
overhead lights and antennas and people thought I was a city detective

because their cars were similar. Not once got pulled over by a cop for it.

A friend of mine bought a county cruiser at an auction. He never repainted it. He had more antennas on his car than the county cop cars did. Nobody ever pulled him for it.

Ignore the Troll.
The young dude was arrested because he had a weapon(s) in the very near
proximity of the President, not because of what his car looked like.

This man has gone so far as to use the name (and post over it) of the daughter of an Amateur Radio operator who held his disabled, beloved, five year old daughter as she breathed her last while her father was holding her. (this is an aside, but shows the mindset of the spammer) Such cruelty is unforgivable and inhumane, though not necessarily a ToS violation of your policy. He uses her name as Tayleor Robesin.

Searches have determined that the abuser is indeed one Mark Morgan from Chassell, Michigan. He posts via Hughes.net.

2561. Mark's ramblings...Arson or Imagination?

Newsgroup: rec.radio.amateur.policy

On December 31, 2007 you said," by local wit an email from some one in the ng as I have answered many time someone on anyof the Rec radios groups? What are the police doing about it some 2 or 5 years later? police finaly jail the torch but no action against the guy from the NG claiming I was a pedo

On March 03, 2007 you said, "I choose the path of resistance after the escalating filth result inthe posting of the address of another man mark mrak morgan as mine and

his home being burned down"

On November 07, 2008 you said, (on Ham Island) "the cycle will go on the only question is how I tried leaving the web in 2000 the threats went offline into the real wrold with email to everyone around til they/he found someone unstable enough o believe an anonomous email and BURN my home becuase someone said I was X.

my home of those days is bruned out shell those that were getting the harrasing email are in jail the persp who are the same folks now as then are still at, still haven't manged to settle heh insurance on that matter

On February 14, 2008 you said in RRAP, "they deleyed for some time but are finaly nogating for setlement but they delayed the settle ment in part because you or people like youhave cominacated the unsopprted allegation 9 anbd the unsupertablesinc i could establisgh my wherabout that I did the deed, but twith an arson it always takes for ever to settle

So, Mark. To date your lies are difficult to keep up with. How did this happen, if it even DID happen?

You have said somebody else's house was burned down, someone with the same name as you. Then you claim that a neighbor burned your house down after receiving an email that you are a pedophile. The question comes to mind is, how did somebody find out your alleged neighbor's email address? Why not was the email traced?

You go on to say that your whereabouts on the night of the alleged fire were questioned and that you had to establish an alibi. This sounds to me as if you were or are a prime suspect in the alleged arson.

Your comment that the "torch" is now languishing behind bars is also very highly suspect. As one who has had experience investigating an arson or two, Mark, your story is odd to say the least.

You say that the insurance company is just now negotiating with you over a settlement, after several years since the alleged incident. What does not

ring true here, Mark, is that if the alleged arsonist is indeed incarcerated and, by extrapolation, either confessed or has been found guilty in a Court of Law, then the insurance company would have long ago settled with you.

The fact that you claim a settlement is just now being negotiated leads me to believe that you are lying yet again. In fact, if it has taken years to even come close to an insurance settlement, I would have to speak from past experience that the insurance company still considers you to be a prime suspect even though they cannot prove it.

Yes, insurance settlements, in arson cases, CAN take years, but ONLY when the insurance company suspects the homeowner of being the arsonist. Why? Because in most cases the insurance companies refuse to pay full value and thereby "reward" the homeowner who was looking for a fast buck.

So. You are either lying about the entire alleged arson so as to garner pity as being a poor "victim" or you are lying about the person who you claim is the responsible party. You've told so many convoluted tales about this alleged arson over the years that you simply cannot be believed.

I suspect that this arson story is a result of your kooky imagination and if it is indeed fact, then you better get your stories straight.

Whose house was it? Yours or somebody else with your same name?

Don't answer. You will only spin some more lies.

And now we see that Gav's blog tells quite a different tale, blames it on "Coders" but since the two of you are Kooks nobody believes either of you. http://gav-jewitch.blogspot.com/2009/06/terror-in-usa.html

She says, "To the best of our knowledge the house was unoccupied at the time."

She said, "We had sold it previously at auction."

And of course she indicated that you had been long gone and were off the Title when this alleged deed occurred when she said, "We had heard the house had been burned down but this picture, which was posted as a taunt to a forum my husband monitors this past week, was the first confirmation of the rumors that we have had."

Note that she said nothing at all about the "wrong" Mark Morgan suffering an arson as you alleged.

Better get your lies straight, Mark.

2562. Re: Mark's ramblings...Arson or Imagination?

Something stinks here.
Markie said the ins. co. was arguing about a settlement with him.
Gav said they sold the house at an auction and the arson happened AFTER they sold it.
Ergo Mark is a liar.
The insurance company would have to settle with the party who bought the house. Not with Mark.
The house didn't belong to the Morgans and as such Mark has no claim to any insurance settlement.
Maybe one of Gav's unhappy rocks caught fire and burned the house down after they fled to Michigan.

He did. More than once.

His problem is that he hasn't the mental acquity to realize it.

Radio Guy is way off base again.
I drove a 2006 Taurus for four years. It had three antennas on it.
One was a VHF antenna...it was for our Sheriff Dept.
The other was a UHF antenna...that was for our MDTs.
The third was for the silly CB bands.

And my Taurus had red/blue lights in the upper, darkened area of the windshield. They were hidden by the tint.
It also had red/blue LED lights behind the grill. They were also hidden, as was the siren.

I drove this Taurus for years, in many jurisdictions, and never once had any officers do a traffic stop because this Taurus "looked" like a police car...which it was.

And Radio Guy? Even when I was out of my jurisdiction...even in a neighboring state, if I saw a brother officer in need of assistance I would activate my emergency lights and assist the officer.
I never once had a brother officer refuse my assistance or tell me that I was out of my jurisdiction.

We stick together. It is part of the brotherhood.

Julius Cheeser <pontifex@maximus.com> writes:

1> Newsgroups: comp.os.os2.advocacy

1> What do ANY of your responses have to do with amateur policy
Tholen?

Take it up with "Roger Wiseman", who added the comp.os.os2.advocacy newsgroup to the distribution of his response to kb9qrz. But why are you asking a non-OS/2-related question in only an OS/2 newsgroup, Cheeser?

1> If you want to do battle with OT invaders of the
comp.os.os2.advocacy
1> group then great... more power to you. But, when you reply to each
and
1> every troll without trimming the unrelated newgroups from your
headers,

Which are the "unrelated newsgroups", Cheeser? Do you somehow know which troll is reading which newsgroup, Cheeser? Ironically, you fall into the category of being an OT invader, Cheeser.

1> then you are doing nothing more than increasing the noise level
and
1> wasting bandwidth.

Take it up with "Roger Wiseman", who added the comp.os.os2.advocacy newsgroup to the distribution of his response to kb9qrz. As for bandwidth, compare the bandwidth consumed by a single high-definition video stream with a couple of kilobytes posted to a newsgroup and then propagated to a bunch of other news servers.

1> That's no better than what the trolls themselves do.

What does your classic unsubstantiated and erroneous claim have to do with OS/2, Cheeser?

1> Surely you of all people should know better.

I obviously understand the situation better than you do, Cheeser.

==> + PUBLIC SERVICE: FCC MODIFIES RULES TO ALLOW LIMITED EMPLOYEE
PARTICIPATION IN DISASTER AND EMERGENCY DRILLS

In a Report and Order (R&O) released Wednesday, July 14, the FCC
amended Part 97.113 to allow amateurs to participate without an FCC
waiver in government-sponsored disaster preparedness drills on behalf
of their employers participating in the exercise. The FCC also has
amended the rules to allow employees to participate in non-government
drills and exercises up to one hour per week and up to two 72 hour
periods during the year. The effective date of the R&O is to be
determined and will be 30 days after its publication in the Federal
Register. Read more here
<http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-i
n-disaster-and-emergency-drills-on-behalf-of-an-e>.

==> + ARRL BOARD OF DIRECTORS HOLDS SECOND 2010 MEETING

The ARRL Board of Directors held its Second Meeting of 2010 July
16-17 in Windsor, Connecticut, under the chairmanship of President Kay
Craigie, N3KN. The Board considered and acted on a number of
```

organizational, regulatory and operating issues, including the following: Approved a campaign to celebrate the 75th anniversary of ARES® that is designed to promote and increase awareness of this valuable program; allowed candidates for Division Director and Division Vice Director to submit petitions via e-mail or facsimile; clarified the VHF rules to allow monochromatic sources (such as laser or LED) to count for contest credit, as long as the laser power is less than 5 mW; voted in favor of allowing the Montenegrin Amateur Radio Pool (MARP) to join the IARU as that country's Member-Society, and acknowledged those ARRL staff members who also serve as Volunteer Examiners. The Board also received reports from committees and individuals on a wide range of subjects, and conferred several awards on deserving nominees. A more in-depth report on the Board's actions, including the official Meeting Minutes, will be posted in the coming days.

==> ARRL CEO PRESENTED WITH "BPL SPOILS" AWARD

During the Friday morning portion of the July 2010 ARRL Board meeting, ARRL Chief Executive Officer Dave Sumner, K1ZZ, received a surprise plaque from the Amateur Radio Research and Development Corporation (AMRAD <http://www.amrad.org/>). Titled "BPL Spoils," the plaque featured a discarded BPL <http://www.arrl.org/broadband-over-powerline-bpl> modem that was rescued from surplus equipment belonging to a manufacturer that had decided to exit the BPL business. ARRL Chief Technology Officer Brennan Price, N4QX, presented the plaque to Sumner in recognition of his and the ARRL staff's tireless work against radio interference generated by BPL systems.

==> + FCC: VANITY CALL SIGN FEES TO DECREASE AUGUST 17

On July 19, the FCC announced via the Federal Register <http://edocket.access.gpo.gov/2010/pdf/2010-17331.pdf> that the cost of a 10 year Amateur Radio vanity call sign will decrease 10 cents, from $13.40 to $13.30. The new fees take effect 30 days after publication, making August 17, 2010, the first day the new fee is in effect. In FY2010, the FCC anticipates granting 14,800 vanity call signs, bringing in $196,840 from the vanity call sign program. Earlier this year, the FCC released <http://www.arrl.org/news/fcc-looks-to-lower-fees-for-vanity-call-signs> a Notice of Proposed Rule Making and Order (NPRM <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-51A1.pdf>), seeking to lower the fee for Amateur Radio vanity call signs. The notice in the July 19, 2010 edition of the Federal Register -- entitled "Assessment and Collection of Regulatory Fees for Fiscal Year 2010; Final Rule" -- includes all FCC regulatory fees; these fees are expected to recover a total of $336,712,213 during FY2010, encompassing all the Services the FCC regulates. The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity

call sign, but also upon renewing a vanity call sign for a new 10 year term.

==> + SPOTLIGHT ON SCOUTING: CONNECT WITH THE NATIONAL SCOUT JAMBOREE VIA AMATEUR RADIO

The National Scout Jamboree takes place July 26-August 4 at Fort AP Hill, Caroline County, Virginia. A myriad of exhibits and activities await the close to 40,000 Scouts, leaders and staff. Coming from all 50 states -- and even territories and foreign countries -- they will have the opportunity to live, work and play together in an atmosphere of Scouting fellowship. And just like the National Scout Jamborees in 1973, 1981, 1985, 1989, 1993, 1997, 2001 and 2005, the 2010 event will feature Amateur Radio.

<http://www.arrl.org/images/view/News/k2bsa-layout-ants.JPG> A team of 17 Scouters and two Scouts will activate K2BSA as a demonstration station at the Jamboree. According to K2BSA Staff Member Larry Wolfgang, WR1B, they will be demonstrating various operating modes to the visiting Scouts, with activity primarily on HF, around the published Scout frequencies. Wolfgang is the ARRL Liaison to the National Scout Jamboree. Another group of 17 Scouters and one Scout will assist other Scouts in earning the Radio merit badge, while seven Scouters will be offering classes and will help administer Amateur Radio licensing exams. Read more here <http://www.arrl.org/news/connect-with-the-national-scout-jamboree-via-amateur-radio>.

==> 2010 MARKS NINTH YEAR FOR ARRL PARTICIPATION IN COMBINED FEDERAL CAMPAIGN

For the ninth year running, the US Office of Personnel Management has designated the ARRL to participate in the 2010 Combined Federal Campaign (CFC). In the past, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $140,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's effort to represent its members and all radio amateurs. Read more here <http://www.arrl.org/news/2010-marks-ninth-year-for-arrl-participation-in-combined-federal-campaign>.

==> + QUICKSTATS TO DEBUT ON WEB AND QST

Member polls have returned to the ARRL Web, but with a twist. Rather than a single weekly poll, the new QuickStats page at http://www.arrl.org/quickstats offers several polls at once with new questions every 30 days. The results will be published in QST beginning with the October issue. Start by visiting the QuickStats page <http://www.arrl.org/quickstats> now. Be sure to bookmark it in your browser! Watch for poll results in the special QST QuickStats page in the rear advertising section of the magazine. Along with monthly poll

results, QST QuickStats offers colorful charts and graphs that
highlight interesting Amateur Radio statistics.

==> + SOLAR UPDATE

Tad "The moon gazed on my midnight labours, while, with unrelaxed
and breathless eagerness, I pursued nature to her hiding-places
<http://www.literature.org/authors/shelley-mary/frankenstein/chapter-04.html>
"
Cook, K7RA, reports: Increasing sunspot activity has dominated the past
few days. Sunspot group 1087 has been visible for 13 days, but the size
has gradually decreased. Over the past seven days, in millionths of a
solar hemisphere, it was 60, 50, 20, 10, 10, 10 and 10. On July 19, new
sunspot group 1089 appeared quite strongly over the eastern horizon,
with an expanding relative size of 130, 150 and 310 for July 19-21. The
predicted solar flux is 90 on each day from July 22-28, which is quite
strong, considering that the average daily solar flux for each of the
past four weeks was 73.9, 72.8, 79.2 and 80.6. There is a slight
predicted rise in geomagnetic activity, with a predicted planetary A
index of 8, 10, 10, 8, 8, 10 and 10 from July 22-28. Look for more
information -- including updated predictions, 6 and 10 meter news and
an item from NASA about the collapsing thermosphere during this
extended solar minimum -- on the ARRL Web site on Friday, July 23. For
more information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" -- in honor of the 41st anniversary of the Apollo 11 moon
landing -- is brought to you by Mary Shelley's Frankenstein
<http://www.literature.org/authors/shelley-mary/frankenstein/index.html>
(Chapter 4).

==> THIS WEEK ON THE RADIO

This week, there is a running of the NCCC Sprint Ladder on July 23. The
RSGB Islands on the Air (IOTA) Contest is July 24-25 and the SKCC
Sprint July 28. Next week, there is another running of the NCCC Sprint
Ladder on July 30. The SARL HF Phone Contest is August 1. The ARS
Spartan Sprint is August 3 and the QRP Fox Hunt is August 4. All dates,
unless otherwise stated, are UTC. See the ARRL Contest Branch page
<http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for this
online course session <http://www.arrl.org/online-course-registration>
beginning on Friday, August 6, 2010: Amateur Radio Emergency
Communications Level 1. To learn more, visit the CEP Course Listing

page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1719 - July 23 2010

Amateur Radio Newsline report number 1719 with a release date of
Friday, July 23, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Europe gets set to host a major ham radio
emergency communications meeting, more on the FCC action to permit hams
to take part in emergency training drills sponsored by their employers,
the ARRL says amateur radio is growing in the United States, an $8000
do it yourself ham radio satellite is detailed in the MAKE Magazine
blog and ham radio honors one of the early pioneers of manned space
flight. Find out more on Amateur Radio Newsline(tm) report number
1719 coming your way right now.

RESCUE RADIO: EUROPEAN EMCOMM CONFERENCE SEPT 25 TO 26

Europe will be hosting a ham radio emergency communications conference
this fall. RSGB newsman Jeremy Boot, G4NJH has the details:

--

A European Emergency Radio Conference is being organised in the German town
of Gross-Gerau for the weekend of 24th to 26th September.

Known as EuREC-DL, the conference aims to bring together radio amateurs and
emergency services to show how the two groups can work together to increase
the resilience of their communications.

I'm Jeramy Boot, G4NJH and you are listening to the Amateur Radio Newsline.

--

The conference is supported by the German Red Cross. More information can
be found at www.EUREC-DL.de. (GB2RS)

**

RESCUE RADIO LAW: FCC SAYS PUBLIC GOOD OUTWEIGHS CONCERNS OF HAM COMMUNITY
IN THE AREA OF DISASTER PREPAREDNESS

More this week regarding the Federal Communications Commission report and
order changing the amateur radio service rules to allow hams to transmit
messages in certain circumstances during disaster drills. This, regardless
of whether the ham is an employee of the organizations participating in the

drill. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with some background on the decision and the view taken by the FCC in making it:

--

In issuing its Report and Order on Docket RM 10-124, the FCC acknowledged the role that amateurs can play before and during emergencies. It noted that many governments and safety organizations make hams a part of their emergency planning. As such, the commission agreed that Part 97 rules, as written and codified, had in essence prohibited communications in which an operator has a pecuniary interest. This included communications on behalf of an employer, even when that employer was serving the needs and welfare of the American public.

Until about a year ago, the FCC had unofficially turned its back when hams employed by cities, townships, emergency response groups, hospitals and the like provided services during drills and other training exercises. But that changed when one ham who had provided such a noble service posted about his work on an Internet website. In turn, other hams who oppose ham radio involvement in anything that might even remotely be construed as business related reported the posting to Laura Smith at the FCC. This lead to the FCC contacting the ham about the matter. This was followed by what many construed as a warning from the FCC issued by its rules man Bill Cross, W3TN, at the 2009 Dayton Hamvention:

--

Bill Cross, W3TN: "No communications on behalf of an employer means just that. There's no exception for the 15 minutes you are on a break. There's no exception for -gee it's the weekend. Or, there's no exception
because
you want to do it. If its your employer, you cannot transmit
communications on their behalf. That is a commercial communications."

--

In the real world, this edict meant that hams who work for public safety agencies and hospitals could not participate in tests and exercises even though these same operators would be expected to be ready in time of a real life emergency situation. This satisfied those hams opposed to any business communications and other groups who are anti ham radio being involved in emergency communications. It also brought with it an out-cry from those hams who have devoted their lives to emergency preparedness as well as from a number of emergency communications groups and responders that have traditionally utilized the services of ham radio volunteers.

A few months later, the FCC bowed to public pressure and agreed to issue waivers on a case by case basis to permit ham radio operators to participate in training exercises and drills sponsored by government agencies and those that a government entity might appoint to oversee a practice session. In the meantime, several petitions were filed to change 97.113 to in effect codify into the Amateur Service rules what hams have been doing for almost a century.

Public safety agencies and other first responders generally supported such a rule change. Several ham groups also argued the change would help improve the skills of employees who might have to act during disasters. Others felt it could increase the usefulness of programs such as ARES, RACES and even MARS.

Those who opposed the change felt that it would erode the not for profit amateur status of the service They called the proposal an essential change for the worse in the characteristic of United States Amateur Radio service.
.

Others felt a more liberal rules change might encourage hospitals or public safety agencies to replace commercially available commercial mobile radio service equipment with ham gear, or that ham bandwidth might become de facto emergency service spectrum. There was even commentary that such a change could lead to employees being coerced into using their ham privileges, possibly in prohibited ways.

But in rendering its decision, the FCC categorically refuted all comments that had been filed against the rules modification. It stated that such a change would not erode amateur radio because it says the new exception is narrowly crafted. That it is essentially is limited to a given drill or exercise, and that ham radio communications are only one component of test activities. But to negate concerns that non-government entities like private hospitals could use this rule to pressure employees to get ham licenses or engage in questionable practices, the regulators included a time cap to have hams participate in such drills. For non-gpvernmemt entities it is one hour a week and only two drill sessions of up to 72 hours per year. No time limit was placed on ham radio participation in drills sponsored by government entities.

The FCC also dismissed other objections, including the coercion for employees to get licenses argument. In regard to the latter the regulatory agency said that it did not expect that employer over-reaching is likely to be a problem. This, given that the amended rules reflect a spirit of cooperation among the public safety and amateur communities.

In the end the FCC stated that its decision reflects the practical reality that a large number of agencies and organizations at the state and local levels coordinate with their local volunteer amateur radio operators. This, to conduct emergency drills and exercises in concert with other modes of communication, such as land mobile radio. It called such activities as essential to allow for a practiced response on the part of the first responder community.

For the Amateur Radio Newsline I'm Bruce Tennant, K6PZW, in Los Angeles

--

What the FCC appears to be saying is that the needs of the general public in time of disaster outweigh any concerns that members of the ham radio community might have expressed. Its also saying that the only way the ham community can be prepared for real disaster situations is through education and practice, and that's what permitting radio amateurs on the clock to

take part in training exercises is really what this is all about.

You can read the report and order, which includes the new rule language from a link at our website at www dot arnewsline dot org. (ARNewsline(tm) from FCC release. Audio from ARNewsline(tm) archive)

MAKE MAGAZINE BLOG PRESENTS $8,000 DIY HAM SATELLITE KIT

If you have ever wanted your own personal ham radio satellite but thought it was financially out of reach, the Make Magazine blog carries a short item on a satellite that can be yours for just $8,000.

Called a TubeSat, the magazine says that the kit for a tiny bird from Interorbital Systems that is designed to function as a basic satellite bus or as a simple stand-alone satellite. Included are the satellite's structural components, printed circuit board. electronic components, solar cells, and everything needed to build the satellite. Also included are the required programming tools.

Make's blog says that with these components alone, the builder can construct a satellite that puts out enough power to be picked up on the ground by a hand-held amateur radio receiver. It says that simple applications include broadcasting a repeating message from orbit or programming the satellite to function as a private orbital amateur radio relay station.

Interorbital Systems says it can deploy 32 of these tiny satellites simultaneously on a Neptune 30 launcher from the Pacific island of Tonga. The first launch is slated for the end of the year. These satellite will go into a very low Earth orbit and would probably have a lifetime of only a few months.

If you have an extra $8000 and want to be the first with his or her own personal ham radio satellite you can read more about the concept on line in the MAKE magazine blog at tinyurl.com/personalbird.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report.

(Southgate, MAKE Blog)

HAM NUMBERS: FIRST HALF OF 2010 SEES UPSWING IN NEW AMATEUR RADIO LICENSEES

The ARRL says that with 18,270 new Amateur Radio licenses issued in the first half of this year 2010 is shaping up to be a banner year for growth in amateur radio.

The League reports that so far, the number of new licenses issued by the FCC in 2010 is outpacing the January to June 2009 totals by almost 8.5 percent. That breaks down to 16,844 new licenses in the same time period last year verses the 18,270 new hams so fat in 2010.

As of June 30, this year, there are 694,346 licensed amateur radio operators in the United States. Broken down by license class at the end of June 2010, there were 16,299 Novices, 342,064 Technicians, 154,284 Generals, 60,059 Advanced and 121,640 Amateur Extra licensees. Not to shabby for a hobby that was listed on the July 17, 2008 Walletpop blog as one of the 25 things predicted that would soon disappear in America. (ARRL)

**

RADIO RECOGNITION: OMB NAMES FCC MOST IMPROVED FEDERAL AGENCY

The White House's Office of Management and Budget says that the Federal Communications Commission is the most improved federal agency in the area of employee satisfaction. This. based on the results of a study titled the 2010 OPM Viewpoint Employee Satisfaction Survey made public on Monday, July 12th.

According to the Washington insider newsletter The Hill, FCC Chairman Julius Genachowski credits new opportunities for employees to provide feedback, the improvement of internal communication, and efforts toward leadership development for achieving this position. He also credited Democratic Commissioner Michael Copps for his work as acting chairman before his tenure began. (The Hill, other published reports)

**

FAILING TECHNOLOGY - THE PEACOCK UNEXPECTEDLY ON THE EYEBALL

You might call this next story a case of failing technology. It happened on Friday, July 9th when audio from NBC Nightly News was heard on the competing CBS Evening News, and it all happened live.

According to the website TVNewser.com, when CBS anchor Katie Couric tossed to correspondent Mark Strassman who was doing a live report from Louisiana on the latest on the oil spill. But instead of hearing Strassman, CBS viewers heard the audio from NBC Nightly News reporter Martin Fletcher. Fletcher was across the big Atlantic pond live from London on the spy swap story.

When CBS News realized what was going on, it quickly ran Strassman's pre-produced version of the story in its place. There was no mention of the audio snafu when Strassman tossed back to Couric.

What caused the problem is anyone's guess. One engineer who has spent 30 years in the technical side of TV news thinks that it was likely a problem outside the direct control of the two networks. Rather he believes it was most likely at the switching hub of one of the companies that the various news organizations with contract long haul satellite and fiber optic feeds. But adds our expert, that's only a guess on his part.

If you want to see and hear this broadcast snafu for yourself, as we write this report its on-line at tinyurl.com/2bm89dy (TVNewser.com)

**

ELECTRONIC LAW: CEASE AND DECIST ORDER ON LIGHT SABER SOLD ON EBAY

Now here's a strange story involving electronics law. It seems that LucasFilm Ltd. recently served a manufacturer of a handheld laser with a cease-and-desist letter. This, for selling an item it claimed was too close in resemblance to its trademark light sabers from "Star Wars."

But the Hong Kong firm decided to use the force of eBay to score some revenge. This by putting the cease-and-desist letter up for auction.

According the Hollywood Reporter entertainment industry newspaper, the letter was not signed by George Lucas himself. Rather the company marketed the legal document as an opportunity for those to win a piece of LucasFilm history as well as contribute to the company's battle with the giant film maker. (HR)

**

HAM HAPPENINGS: AMSAT-UK SPACE COLLOQUIUM TO BE WEBCAST

If you cant make it to the 2010 AMSAT U-K Space Colloquium, then you will still be able to take part vicariously by watching it on your PC or Mac. This with the announcement that the British Amateur Television Club will again be provided over the Colloquium weekend.

The event takes place July 31st to August 1st at the Holiday Inn in Guildford, England. Live web streaming begins on Saturday the 31st at 09:00 UTC. To tune in, just go to www (dot) batc (dot) tv and click on the words Live Events. (AMSAT-UK)

**

RADIO ON THE NET: NEW EASY TO NAVIGATE POPCOMM WEBSITE LAUNCHED

Popular Communications magazine has launched what it calls a new and easier-to-navigate website. The updated site features a clean new look and a streamlined user interface to make it quicker and easier for visitors to find what they are looking for.

Current issue highlights include sample pages in full-color layout, to give prospective readers the ability to see what the magazine itself looks like in print. Live links to Internet sites mentioned in upcoming issues' editorial content will help users further explore topics of interest to them.

Highlights of back issues remain on the website with easier access than in the past. The site also includes contact information for editors and columnists, direct links to advertisers' websites, other CQ Communications publications and an extensive collection of hobby radio links and radio club information. In addition, a direct link to the magazine's Facebook page makes it simple for readers to provide feedback and connect with other hobbyists.

The new Popular Communications website is in cyberspace at www.popular-communications.com. (PopComm)

**

THE SOCIAL SCENE: TOKYO HAM FAIR 2010 AUGUST 21 - 22

The ham radio social season continues with word that the giant Tokyo Ham Fair for 2010 is slated for August 21st and 22nd at the Tokyo Big Sight arena.

Ham Fair is sponsored by the Japan Amateur Radio League and is one of the largest gatherings of radio amateurs from across the Pacific Rim. Its also where many Pacific Rim ham radio manufacturers give a first glance at the products that they plan to introduce world-wide in the coming year.

You can see more about the Tokyo Ham Fair in English at tinyurl.com/334jzb8. If you are interested in visiting the Tokyo Ham Fair you can e-mail the planners to intl (at) jarl (dot) or (dot) jp for information and assistance. (JARL)

**

NAMES IN THE NEWS: WRTC 2010 WINNERS ANNOUNCECD

Some names in the news. We begin with word that the winners of the 2010 World Radiosport Team Championship have been announced. Taking the Gold medal was the Russian R32F Team of Vladimir Aksenov RW1AC, and Alexey Mikhailov, RA1AIP. The Silver medal was garnered by the Estonia R33A Team of Tonno Vahk, ES5TV, and Toivo Hallikivi, ES2RR. Third place or Bronze went to the R33M Team of Dan Craig, N6MJ, and Chris Hurlbut, KL9A, of the United States.

The World Radiosport Team championship takes place every few years in a different country. Teams use the same power and identical antennas. The stations are also geographically close to each other in an attempt to level the playing field as much as possible, so that the winners can truly be said to be the best contesters in the world.

The 2010 World Radiosport Team Championship was held near Moscow Russia. This year 48 pairs of participants from around the world took part. (WRTC)

**

NAMES IN THE NEWS: WA4HYJ TO RECEIVE 2010 MC GAN SILVER ANTENNA AWARD

The ARRL has announced that Norm Lauterette, WA4HYJ, is to be the recipient of the 2010 Philip J. McGan Silver Antenna Award. According to the announcement, Lauterette of Casselberry, Florida has been an ARRL Public Information Officer for two decades. In that time he has demonstrated outstanding volunteer public relations success on behalf of amateur radio at both the local and regional levels. His numerous published articles both within and outside of the amateur radio community have enhanced overall support of the hobby. At the same time his effective use of local political and police relationships he has fostered an environment that significantly increased regional public awareness of amateur radio. (ARRL)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: TWISTING CRYSTALS

Chemists in the United States and Russia have created crystals that can twist and untwist. This they say points to a much more varied process of crystal growth than previously thought and could pave the way for new electronic products. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Crystal growth has traditionally been viewed as a collection of individual atoms, molecules, or small clusters adding to a larger block that remains in a fixed translational relationship to the rest. But the New York University and St. Petersburg State University chemists have discovered a wholly new phenomenon for growth in a crystal structure that continually changes its shape as it grows.

To do this, the researchers focused on crystals from hippuric acid which is a derivative of the amino acid glycine. As molecules were added to the end of fine crystalline needles, stresses built up at the tips of the crystals and resulted in a helical twist. The process was reversed when crystals thickened from the opposite end of the growing tip thereby undoing the twisted formations.

The researchers work, which appears in the latest issue of the Journal of the American Chemical Society, may explain some of the properties of high-polymers These are used in clothing and liquid crystal displays, among other consumer and telecommunications products.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

You can read more on this fascinating scientific breakthrough on-line at tinyurl.com/crystaltwist. (Science Daily)

**

EMERGING TECHNOLOGY: THE END OF R-O-S

It may well be the end of the road of the road for amateur radio version of the digital mode R-O-S. It is, if you accept an Internet posting by its creator Jos&#65533; Alberto Nieto Ros.

Writing on his website, the software's author says that R-O-S version 1.0 released on July 11th will be the last. He says that he came to this decision after reading what he terms as too many derogatory comments directed towards him in Digital Group and on the R-O-S Digital Modem Group. Based on this, Jos&#65533; Ros says that its simply not worth it to him to work further to evolve this software.

It should be noted that R-O-S is still not a legal transmit mode in the United States. (ZL2TZE)

**

WORLDBEAT: SARL STREAMLINES SA HAM RADIO TESTING PROCESS

The Council of the South African Radio League has put in place some strict rules regarding ham radio testing in that nation. This in the hope of streamlining the South African Radio Amateur Examination process so as to deliver the results and call signs to successful candidates faster.

Effective immediately, candidates can only apply for one examination. In other words applicants can take only the for the class A or Class B at a single session and it will no longer be possible to sit for both examinations at the same time. Also, the closing date to apply will be strictly adhered to a d no late entries will be accepted. A candidate who's Registration is incomplete by the closing date will not be able to take the examination and will not receive an examination number.

According to a spokesperson for the South African Radio League, while it may sound harsh, the reality is that it is the few candidates who do not comply with the guidelines who delay the call sign and licensing process of all the others. Insuring that all documentation is received by the entry deadline will also assist the nations telecommunications regulator in speeding up the licensing process. (SARL, Southgate)

**

WORLDBEAT: SPAIN EXTENDS 70 MHz ALLOCATION THROUH JULY 1 2011

Spanish Radio Amateurs have received an extension allowing them to use the 70 MHz band until July 1, 2011. The Spanish Department of Post and Telecommunications first announced the temporary authorization of 70.150 to 70.200 MHz back in October of 2008. (EA3BRA)

**

HAM RADIO IN SPACE: NEW DISTANCE RECORD ON THE AGEING AO-7 HAMSAT

A new ham radio in space record on one of the hobbies oldest birds. At 2226 UTC onn July 15th, PY5LF in Curitiba, Brazil worked Josef Spandler, K3SZH, via AMSAT OSCAR 7 and achieved a new DX record for that bird of 7843 km which equates to 4898 miles.

What makes this contact all the more amazing is that AMSAT OSCAR 7 was launched some 36 years ago on November 15th, 1974 from Vandenberg Air Force Base, Lompoc, California. A Oh 7 still continues to provide limited service even though its batteries failed years ago and it is only operational when its solar panels are in sunlight. (Southgate, ARNewsline (tm))

**

HAM RADIO IN SPACE: AMSAT CALLS FOR PAPERS FOR 2010 SPACE SYMPOSIUM

The September 1st deadline of the call for papers for the 2010 AMSAT Space Symposium and Annual Meeting is rapidly approaching. AMSAT requests that those submitting papers send them the tentative title and abstract of your presentation as soon as possible. The abstract does not require any special format. Simply send an e-mail to the Proceedings Editor to k9jkm (at) comcast (dot) net with the basic information. This would include the author name, callsign, and a few sentences that describe your proposed topic. (ANS)

**

ON THE AIR: PUERTO RICO CONSTITUTION DAY SPECIAL EVENT

On the air, members of the Movimiento de Radioaficionados de Puerto Rico will sponsor a special event station on July 25th. This, to commemorate 58th anniversary of the Constitution of the Commonwealth of Puerto Rico. They will use the call WP4NPC on SSB and digital modes and operate from 10 to 40 meters in a DXpedition style operation from 1400 to 2300 UTC. QSL via WP4NPC, PO Box 3484, Bayamou, Puerto Rico, 00958. (Via e-mail)

**

ON THE AIR: CELEBRATING LASSEN VOLCANIC NATIONBAL PARK

And from August 7th to the 14th listen out for special event station N6L, to be active from California's Lassen Volcanic National Park. This will be a Multi operator portable and mobile operation with activity on the High Frequency, WARC and VHF bands. A QSL and certificate is available. QSL via K6LSN. (Via e-mail)

**

DX

In DX, PA4N operating portable MU is operating from Guernsey Island mostly on CW but also some RTTY and SSB on 160 through 6 meters. QSL via the

bureau to his home call.

And listen out for PG4DX operating portable P4 from Aruba through August 6th. Most operations are near the IOTA frequencies. QSL via bureau or direct to his home call.

I1FQH is operational as 5V7DX from Kpalime Village in central Togo through July 30th. He uses a Spiderbeam on 20 through 10 meters and a homebrew vertical on 40 and 30 meters. QSL via bureau or direct or Logbook of the World or to his home call.

Lastly, F5NVF, will be active portable 6W from Zsenegal between October 25th and November 1st. His operation will be on CW on the High Frequency bands. No other are yet known other than to QSL to his home call sign.

(Above from various DX news sources)

**

THAT FINAL ITEM: CELEBRATING SPACE PIONEER ASTRONAUT GUS GRISSOM SPECIAL EVENT STATION

And finally this week, a special ham radio link will allow visitors to the Gus Grissom Memorial in Mitchell, Indiana's Spring Mill State Park to talk with the Johnson Space Center in Houston, Texas on Gus Grissom Day. Jack Parker, W8ISH, is in Indianapolis and has the details:

--

The Gus Grissom Memorial at Spring Mill State Park honors the astronaut who was America's second man in space. Virgil I. "Gus" Grissom made that sub
orbital flight in the Mercury 7 Liberty Bell capsule. Grissom grew up in Mitchell, Indiana near the state park. He learned to fly as a boy and flew fighter jets in Korea.

The memorial tells about Grissom's life and contributions to the space program. Grissom and two other astronauts died in January 1967 when their Apollo One command module caught fire on the launch pad at the Kennedy Space Center. Museum artifacts include Grissom's space suit, one of the space capsules he flew in and personal items from his youth and adulthood.

During the day long event visitors can talk to the Johnson Space Center in Houston through a special ham radio link set up by the Hoosier Hills Amateur Radio Club. They will be operating on 40 and 20 meters. The southern Indiana hams have planned a mini fox hunt for the kids and will provide a worksheet for kids tospell out their name in Morse Code. They will use a straight key and oscillator to finish the code sending exercise.

The Amateur Radio special event station will be on the air from late morning until the park closes at 11PM.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH

--

Amateur radio honoring one of the pioneers of the United States space program who lead the way to help conquer the final frontier. (W8ISH, Hoosier Hills Amateur ARC)

advocacy

162> yup, yer a troll.

What does your classic unsubstantiated and erroneous claim have to
do with OS/2, kachina? Rather ironic, coming from a troll like you,
kachina.

162> must be fun going to alt.test checking to see whose in
162> there.

Speaking from first-hand experience, kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
5 days (Jul 29, 4:29 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Yawn... can't ya do better than THAT????

> Knowing what
> the Romans were into, you KNOW he took it up the ass before they nailed him
> up!

Now all ya have to do is post proof that Jesus was "malnourished" and
"took it up
the ass" which of course you won't do because you're as full of shit
as a Christmas
turkey. pedophiles are craven liars and you represent your depraved
kind perfectly.

163> i fixed it.

What does your classic erroneous presupposition have to do with OS/2,
kachina?

163> yer welcome.

What does your classic erroneous presupposition have to do with OS/2,
kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
6 days (Aug 1, 12:45 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

I happened to be traveling through Huntsville, Alabama early this morning, I deceided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

What does the nonexistence of your penis have to do with OS/2,
kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
6 days (Aug 2, 3:14 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Don't get me wrong, I don't _blame_ niggers and spics for being
inferior. I understand from my readings that their are biologicial
reasons, like they have smaller brains and genes that make them steal
and murder.

I'm just saying that Whites are the superior race based on the
science. And I am proud to be White, which is why I participate in
groups that support Caucasion causes.

Here is a short video of me at a KKK rally, http://www.youtube.com/watch?v=sDuPfVV_T5A

and here is my wife Sarah, whom I am very proud of, wearing her KKK
garb, http://tinyurl.com/MrsKennethEhrett

Nothing wrong with my reading comprehension. I checked. It was you who
changed the subject to say that Kachina has a tiny penis.

> 35> I asked her if this is true.
>
> What does your classic erroneous presupposition have to do with
> OS/2, Karlsson?

Nothing "erroneous" about it. I did ask her if your claim was true.
Somehow I suspect that she knows more about that subject than you do.

> 35> She said she does not have a tiny penis.
>
> What does kachina's penis size have to do with OS/2, Karlsson?

It has to do with the subject of the thread (well, the subject at the
time, it seems to have changed again). A subject which you set.

> 35> I conclude that you, tholen, a.k.a. spam bot,
>
> What does your hallucination have to do with OS/2, Karlsson?

>
> What does your illogical conclusion have to do with OS/2,
> Karlsson?

You said Kachina has a small penis. I asked her if this is true. She
said that no, she does not have a small penis. Therefore I conclude that
you, tholen, a.k.a. spam bot, are a liar who makes things up.

Makes note: spam bot does not understand logic.

37> Nothing wrong with my reading comprehension. I checked. It was you
who
37> changed the subject to say that Kachina has a tiny penis.

What does your ongoing reading comprehension problem have to do
with OS/2, Karlsson?

37> Nothing "erroneous" about it. I did ask her if your claim was
true.
37> Somehow I suspect that she knows more about that subject than you
do.

What does your ongoing erroneous presupposition have to do with
OS/2, Karlsson?

37> It has to do with the subject of the thread (well, the subject at
the
37> time, it seems to have changed again). A subject which you set.

What does your ongoing erroneous presupposition have to do with
OS/2, Karlsson?

37> Makes note: spam bot does not know what spam is.

Who is "spam bot", Karlsson? There is nobody in this newsgroup
using that alias. And what does your notation have to do with
OS/2, Karlsson?

37> You said Kachina has a small penis. I asked her if this is true.
She
37> said that no, she does not have a small penis. Therefore I
conclude that
37> you, tholen, a.k.a. spam bot, are a liar who makes things up.

What does your illogical conclusion have to do with OS/2,
Karlsson?

37> Makes note: spam bot does not understand logic.

Who is "spam bot", Karlsson? There is nobody in this newsgroup
using that alias. And what does your notation have to do with

OS/2, Karlsson?

37> > <snip>

I didn't write that, Karlsson, so why did you attribute it to me?

38> Newsgroups:
alt.test,alt.alien.vampire.flonk.flonk.flonk,alt.usenet.kooks,comp.os.os2.advocacy,rec.radio.amateur.policy,alt.romath

38> Makes note: spam bot does not understand attributions.

Who is "spam bot", Karlsson? There is nobody in this newsgroup
using that alias. And what does your notation have to do with
OS/2, Karlsson? Rather ironic, coming from someone like you,
Karlsson, who has misattributed text several times recently.

183> amazingly boring that many of us are no longer reading them.

What does your classic illogic have to do with OS/2, kachina?
How could you know how each response was crafted without reading
them, kachina? But more importantly, why are you still posting
replies to articles that you're supposedly no longer reading,
kachina?

183> ISTJ with delusions.

What does your ambiguity have to do with OS/2, kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
6 days (Aug 4, 6:07 pm)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

What does that have to do with OS/2, kachina?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
6 days (Aug 5, 2:06 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Standard reference to the Heisenberg Penis Uncertainty Principal, and the
inability to know the position and velocity of Tholen's micropenis at the same
time.

==> + ARRL IN ACTION: ARRL ARGUES THAT OKLAHOMA TOWN'S RFI ORDINANCE IS
"NULL AND VOID"

Saying that only the Federal Communications Commission is empowered
to regulate radio frequency interference (RFI), the ARRL has notified
Midwest City, Oklahoma, that its local ordinance 27-3(9), seeking to
regulate radio transmissions and RFI, is "null and void." Midwest City
is in the Oklahoma City metropolitan area. The ordinance reads: "In
addition to other public nuisances declared by other sections of this
Code or law, the following [is] hereby declared to be [a] public
nuisance: Operating or using any electrical apparatus or machine which
materially and unduly interferes with radio or television reception by
others."

On July 21, ARRL General Counsel Chris Imlay, W3KD, wrote to Midwest
City Assistant City Manager Dave Ballew, City Attorney Katherine Bolles
and Director of Code Enforcement Mike Stroh, informing them that the

ARRL had been provided with a copy of the ordinance by amateurs in that community. "We are also aware that a notice was sent by Mr Stroh on behalf of the City to one of ARRL's members who resides in Midwest City asserting that the FCC-licensed radio amateur to whom the letter was addressed was in violation of the ordinance as the result of radio frequency interference appearing in a neighbor/complainant's home electronic equipment," the letter read. "The licensed radio amateur was ordered to remedy the problem in one day, under penalty of a sanction assessed against the real property of the radio amateur." Read more here <http://www.arrl.org/news/arrl-argues-that-oklahoma-town-s-rfi-ordinance-is-null-and-void>.

==> + JOHN ROBERT STRATTON, KE5ISX, APPOINTED WEST GULF DIVISION VICE DIRECTOR

After review of eligibility by the ARRL Ethics and Elections Committee, President Kay Craigie, N3KN, has appointed John Robert Stratton, KE5ISX, an attorney in Austin, Texas, to serve as Vice Director of the ARRL West Gulf Division for the remainder of the current term that expires January 1, 2011. Stratton, an attorney, fills the vacancy created when John Thomason, WB5SYT, resigned the position earlier this month <http://www.arrl.org/news/arrl-west-gulf-division-vice-director-john-thomason-wb5syt-resigns-position>.
"John Robert Stratton has the training, experience, time and motivation to be a great Vice Director," said ARRL West Gulf Division Director Dr David Woolweaver, K5RAV. "His addition to the West Gulf Division's team will enhance its ability to provide the quality of service the membership deserves."

A General class licensee, Stratton has been licensed and an ARRL member since 2006. In February 2007, Stratton became active in League affairs after learning about the new cell phone bills that were introduced in the 2007 Texas Legislative Session, and he volunteered to help work against the bills. He was put in touch with Dr Woolweaver, who was then the West Gulf Division Vice Director and was leading the West Gulf legislative efforts. "Initially just a volunteer, I was selected to lead the West Gulf legislative team," Stratton said. "We were successful in defeating the cell phone bills that would have made mobile Amateur Radio operation illegal. With the help of some smart and dedicated hams, we were also successful in obtaining passage of new laws that protected those state employees who were hams [so they could operate] when they deployed in emergencies." Read more here <http://www.arrl.org/news/john-robert-stratton-ke5isx-appointed-west-gulf-division-vice-director>.

==> COMING SOON: MORE ARRL 2010 FIELD DAY PINS

After a higher than expected run on pins for Field Day this year, the ARRL has ordered more and expects them to arrive next month. "The pins were in stock until just before Field Day, but due to some

exceptionally high interest, we were unable to fulfill a few final orders," said ARRL Product Marketing Specialist Jackie Ferreira, KB1PWB. "We have reordered the pins, as many hams enjoy collecting these annual pins; lots of ARRL-affiliated radio clubs also like to hand these out to their members who participate in Field Day each year." The 2010 Field Day pins may be ordered from the ARRL online store <http://www.arrl.org/shop/Field-Day-2010-Pin/> or by telephoning 888-277-5289 in the US, Monday-Friday from 8 AM-5 PM Eastern Time (outside the US, please call 860-594-0355). Pins will begin shipping in mid-August.

==> + THE BANDS "HEAT UP" FOR THE 2010 ARRL UHF CONTEST

VHF/UHF weak-signal operators across North America are making the final tests on their stations in preparation for the ARRL UHF Contest, coming up the weekend of August 7-8. Most VHF+ weak-signal operation takes place on the two lowest-frequency bands of the VHF spectrum -- 6 and 2 meters; however, a lot of activity takes place above 144 MHz in the UHF portion of the radio spectrum and beyond. This contest focuses on 222 MHz and above; there will be lots of activity, and hopefully lots of propagation, too! Read more here <http://www.arrl.org/news/the-bands-heat-up-for-the-2010-arrl-uhf-contest>.

==> ARDF UPDATE: RADIO FOXHUNTERS FIND THEIR CHAMPIONS IN OHIO

By ARRL ARDF Coordinator Joe Moell, K0OV

They came from 15 states and four foreign countries. In their suitcases were radio sets, antennas, sun block and running shoes, but they left some room in hopes of taking home a medal or two. They were the hams and future hams -- ranging from age 12 to older than 70 -- who went to Southwest Ohio in the third week of May for the 10th Annual USA Championships of Amateur Radio Direction Finding (ARDF). ARDF is done on 80 meter CW and 2 meter AM in separate events, each with five "fox" transmitters. A course is typically three miles from start to each of the five transmitters (in optimum order) and then to the finish. Your mission is to find your assigned three, four or all five foxes, depending on which of the 11 age/gender categories you are in. Each transmitter is on for one minute at a time in a five-fox cycle that repeats. You must find your way on foot with just your direction-finding gear, the map you're given and your compass. GPS help is not allowed. Read more here <http://www.arrl.org/news/ardf-update-radio-foxhunters-find-their-champions-in-ohio>.

==> + GOVERNMENT AGENCIES INTRODUCE USER-FRIENDLY FEDERAL REGISTER

<http://www.arrl.org/images/view/News/ARRL_FederalRegister.JPG>
While the Federal Register may be the ultimate record of the business of the USA's Executive Branch, it can be difficult to navigate. The Register publishes approximately 80,000 pages of documents each year in the form of Notices, Proposed Rules, Rules and Official Documents; this

is where all new and amended rules to Part 97, the Amateur Radio Service, must be published before they go into effect. On Monday, July 27 -- in an effort to make things a bit easier on the thousands of people who access the Federal Register each day -- the US Government Printing Office and the National Archives' Office of the Federal Register launched a new and improved online Register. Named Federal Register 2.0, it is an outgrowth of President Obama's first executive order that mandated greater federal government transparency. The launch of the new site coincided with the 75th anniversary of the Federal Register Act, which became law on July 26, 1935. Read more here <http://www.arrl.org/news/government-agencies-introduce-user-friendly-em-federal-register-em>.

==> + FCC LAUNCHES CONSUMER HELP CENTER

Beginning July 28, those who have dealings with the FCC will have a new tool that the FCC claims will put them "within one click of all the information they want" from the Commission: a new "easy-to-use" Consumer Help Center. "Our new Consumer Help Center makes it easy for consumers to learn about our work and take action," said FCC Chief of the Consumer and Governmental Affairs Bureau Joel Gurin in a press release. "Here, in one place, consumers can do a number of things, such as read about consumer issues, get practical advice for avoiding problems, file a complaint, comment on our rulemakings, or read what our FCC experts are saying in our Consumer Blog." Read more here <http://www.arrl.org/news/fcc-launches-consumer-help-center>.

==> + SOLAR UPDATE

Tad "Somewhere in this favored land the Sun is shining bright <http://www.baseball-almanac.com/poetry/po_case.shtml>" Cook, K7RA, reports: We've seen increasing solar activity all this week, with average the daily sunspot numbers rising nearly 14 points to 35.6, and the average daily solar flux rising nearly 5 points to 85.3. Sunspot group 1089 has grown, shrunk and is now growing again; as of Wednesday, it has been visible a total of 10 days. Three more sunspot groups appeared this week, with the latest -- group 1092 -- rapidly appearing on Wednesday with a relative size of 180 millionths of a solar hemisphere. The relative size of group 1089 for July 19-28 was 130, 150, 310, 240, 200, 160, 140, 100, 70 and 90. The predicted solar flux (as of Wednesday) for July 29 is 85, 87 for July 30-August 1 and 85 for August 2-4. The predicted planetary A index for those days is 15 for July 29, 10 on July 30-31, 8 on August 1-2 and 6 on August 3-4. Along with increased solar activity, we have seen higher geomagnetic indicators, all due to a stiff solar wind. Both the planetary and mid-latitude A indices nearly doubled for the week. Look for more information -- including a look at sunspot activity and predictions, as well as 6 meter activity now compared to the 2000-2001 sporadic-E seasons -- on the ARRL Web site on Friday, July 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page

<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Ernest L. Thayer's Casey at the Bat <http://www.baseball-almanac.com/poetry/po_case.shtml>.

==> THIS WEEK ON THE RADIO

This week:

- July 30 -- NCCC Sprint Ladder
- August 1 -- SARL HF Phone Contest
- August 3 -- ARS Spartan Sprint
- August 4 -- QRP Fox Hunt

Next week:

- August 6 -- NCCC Sprint Ladder
- August 7 -- TARA Grid Dip Shindig
- August 7-8 -- ARRL UHF Contest <http://www.arrl.org/august-uhf>; North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 8 -- SKCC Weekend Sprint
- August 11 -- NAQCC Straight Key/Bug Sprint; QRP Fox Hunt
- August 11-12 -- CWops Mini-CWT Tests

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event Station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1720 - July 30 2010

Amateur Radio Newsline report number 1720 with a release date of
Friday, July 30, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL tells an Oklahoma City that it has
no legal ground to try to control R-F-I, San Francisco sued over its
new cellphone radiation label law, the Florida Repeater Council
releases a proposal to narrow-band the 2 meter and 70 Centimeter
repeater subbands and ham radio helps celebrate 100 years of Scouting
in America. A live report by Mark Abramowicz, NT3V, from the 2010 Boy
Scouts of America Jamboree on this weeks Amateur Radio Newsline(tm)
report number 1720 coming your way right now.

RADIO LAW: ARRL TELLS MIDWEST CITY THAT ITS RFI ORDENANCE IS ILLEGAL
AND ORDERS IT BE RESCINDED

The ARRL has told an Oklahoma city that it has no jurisdiction over
radio frequency interference. Amateur Radio Newsline's Bruce Tennant,
K6PZW, has more:

--

Saying that the Federal Communications Commission is the only entity
empowered to regulate radio frequency interference, the ARRL has notified
Midwest City, Oklahoma, that its local ordinance 27-3(9), seeking to
regulate radio transmissions and RFI, is in the League's words, "null and
void."

Midwest City is located in the Oklahoma City metropolitan area. On July
21st, ARRL General Counsel Christopher D. Imlay, W3KD, wrote to Midwest
City Assistant City Manager Dave Ballew, City Attorney Katherine Bolles and
Director of Code Enforcement Mike Stroh. In his letter he informed them
that the ARRL had been provided with a copy of the ordinance by radio
amateurs in that community. Imlay also stated that the League was aware
that a notice was sent by Stroh on behalf of the city to one of ARRL's
members who resides in Midwest City. In it, the city asserted that the FCC
licensed radio amateur to whom the letter was addressed was in violation of
the ordinance as the result of radio frequency interference appearing in a
neighbor complainant's home electronic equipment. That radio amateur was
ordered to remedy the problem in one day, under penalty of a sanction
assessed against his real property.

Imlay then stated categorically that the city had absolutely no legal ground on which to enact or enforce its ordinance. His letter explained in detail to the city officials that the FCC is the only entity empowered to regulate RFI and that Radio Frequency Interference is not a matter subject for municipal regulation by Midwest City. He went on to state that Midwest City's ordinance 27-3(9), which purports to regulate RFI is preempted on its face by federal oversight and is therefore the city's ordinance is null and void.

In his note, attorney Imlay expressed his hope that it will not be necessary to submit the Midwest City ordinance to the FCC by way of a Request for a Declaratory Ruling. But warned W3KD, that would be the ARRL's planned course of action unless the ordinance is rescinded. He also says that the letter from Director of Code Enforcement Stroh to the radio amateur in Midwest City must be retracted immediately.

Reporting for the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

In his letter to the leadership of Midwest City, Attorney Imlay noted that the radio amateur in question has the full support of ARRL in any action he may choose to take in this matter. (ARRL, K5DBX, QRZ.com)

**

RADIO LAW: CTIA SUES SAN FRANCISCO OVER CELLPHONE LABEL LAW

The Cellular Telecommunications Industry Association has gone to court to stop a recently passed San Francisco, California law. One that would require retail stores to disclose radiation levels for the mobile phones they sell. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the Newsroom with the details:

--

In a lawsuit filed Friday, July 23rd, the trade organization, that's better known by its initials CTIA, says that the San Francisco ordinance attempts to unlawfully regulate emissions from cell phones which is a duty reserved exclusively by the FCC. The suit, filed in the U.S. District Court for the Northern District of California, seeks to block the ordinance, which was passed last month and requires retailers to post information about the Specific Absorption Rate for the phones they sell.

Specific Absorption Rate or SAR is a measurement of cellular telephone radiation. The FCC has established a Specific Absorption Rate limit for all mobile phones sold in the United States and the CTIA argues that the ordinance unlawfully interferes with the Federal Communications Commission's authority over such telecommunications devices. The also CTIA claims that the San Francisco ordinance conflicts with federal law by challenging the FCC's determination that all FCC complaint handsets are safe.

This is an important case for ham radio to follow because if implemented it could eventually be expanded to cover all types of two way radio gear used

within the city limits of San Francisco including amateur radio stations. And if left standing, it would also undermine the federal governments preemptive role in the area of governing anything to do with the transmission of radio frequency energy.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

FM AND REPEATERS: FLORIDA REPEATER COUNCIL RELEASES VHF AND UHF NARROWBANDING PROPOSAL

The Florida Repeater Council has officially posted it's proposed narrow-banding recommendation for 2 meters and 70 centimeters on its website. The concept adopted by the Florida Repeater Council leadership basically follows the narrow-banding in the Part 90 VHF and UHF commercial services. Its also based on the knowledge that most if not all of the newer amateur radio FM equipment available on the market today in the 144 to148 MHz and 430 to 450 MHz range is capable of using 6.25 KHz channels if deviation is set at 2.5 KHz deviation.

Since the use of these new technology systems usually requires the purchase of new radios which are compatible with the new technology systems, by allocating narrow band channels for only newer technology systems there should be a minimal impact on existing wide band repeaters and their users.

While 12.5 and 6.25 KHz channel spacing has been used on the UHF commercial and amateur bands for some time, the VHF bands have used 15 KHz spacing for decades. Since the legacy spacing of VHF commercial and the 146 to 148 MHz amateur service bands do not permit the use of 12.5 or 6.25 KHz spacing without a complete and disruptive re-farming of the entire band, the Florida Repeater Council is proposing to follow the FCC's VHF plan for Part 90. This will allow use of 7.5 KHz spacing between the legacy 15 KHz channels in the 146 to 148 MHz subband 2 meter and 10 kHz spacing between the existing 144.5 to 145.5 MHz channels in the lower subband.

The Florida repeater council says that most newer amateur radio equipment evaluated can program to the 7.5 or 10 KHz spacing without difficulty. However in some case the scanning or stepping functions of some radios may require software or firmware updates to properly scan these new channels in a given radios VFO mode.

The proposed changes will create 71 new frequency pairs for narrow band repeaters on 2 meters. It would also significantly expand the number of UHF narrow band channel pairs available as well. This says the council should provide the needed spectrum for experimentation and development of the newer technology systems that utilize narrow band emission such as

D-Star and P-25 digital audio relay services.

The Florida Repeater Council will be looking for public comment on its proposal by e-mail to narrowbandcomments (at) florida-repeaters (dot) org or at the Melborne Hamfest this coming October. More on this proposed band change is on-line at www.florida-repeaters.org. (KS4VT, FRC)

**

RADIO LAW: SPANISH FISHING INTRUDERS ON THE HAM BANDS

The IARU Region 1 website reports that Spanish fishermen are now being heard daily on most of the High Frequency bands. Frequencies mentioned include 3.500, 3.510, 3.550, 3.590, 7.000, 14.000, 21.000, 21.222 and 21.395 MHz.

All operations are on upper sideband. DK2OM says that the operators often use a voice scrambler but when decoded, they only use private names. No ship names or other identification is given. DK2OM adds that talking to them is wasted time as they only react with obscenities.

If you hear them, you can log reports of these intruders online at tinyurl.com/spanish-fishing
(IARU Region 1)

HAM RADIO IN SPACE: ISS TO CELEBRATE 100 YEARS OF US SCOUTING WITH ISS CONTACT

A special Amateur Radio on the International Space Station contact with the 100th anniversary of Scouting Jamboree is scheduled to take place at about 18:20 UTC on Saturday, October 31st. At the time of the contact the I-S-S will be in a 56 degree elevation pass over the National Boy Scout Jamboree at Fort A. P. Hill, Virginia. That's where some 43,000 scouts and leaders will join 8,000 volunteers to celebrate this milestone event for the scouting movement. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at the Jamboree and will have a report on ham radios part in this years Jamboree later on in this weeks Amateur Radio Newsline report.

ENFORCEMENT: SOUTH AFRICA TELECOM REGULATOR REMOVES UNLICENSED REPEATER FROM THE 70 CM BAND

An unlicensed repeater has been removed from the 70 centimeter band in South Africa. Following a report by the South African Radio League to the Independent Communications Authority of South Africa about the unlicensed machine operating in the ham radio band, the South African regulator investigated the intrusion. It located the system and instructed the owner, who was providing services for his local community watch, to shut down the repeater. At first the systems owner refused the regulatory agency's representatives access to his premises to seal the repeater from further operation. The person soon relented and the repeater is now off and out of the 70 centimeter South African amateur radio band. (SARL)

**

ENFORCEMENT: UNLICENSED BROADCASTER ORDERED TO PAY $10,000 FINE

The United States FCC has affirmed a $10,000 Forfeiture Order issued to Dexter Blake of Mt. Vernon, New York. This, for willfully and repeatedly violating Section 301 of the Communications Act of 1934 by operating an unlicensed radio transmitter on the frequency 101.5 MHz in the Mt. Vernon area.

Back on March 3, 2009, the Commission's New York Field Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Blake. To date, Blake has not filed a response to the NAL or paid the proposed forfeiture. Therefore, based on the information the FCC had before it, the regulatory agency on July 22nd affirmed the forfeiture and has issued Blake an order to pay the fine. (FCC)

**

RADIO LAW: FCC TO REDUCE VANITY FEE BY A DIME

The cost of getting a ham radio vanity call sign is about to go down a dime. On July 19th, the Federal Communications Commission announced via the Federal Register that the cost of an Amateur Radio vanity call sign will decrease 10 cents to $13.30. The new charge takes effect 30 days after publication, making August 17th the first day the new fee is in effect. (FCC, ARRL)

**

RADIO EDUCATION: RSGB PRESENTS MUSICAL MORSE TRAINING

The RSGB newcomers web page has an MP3 designed to encourage learning Morse Code. With a musical backing track, it gives the entire Morse alphabet including numbers and punctuation. We cant bring it to you because of the FCC's ban on music on the ham bands, but you can hear it on-line at tinyurl.com/morsemusic. Just click the 'Play' button to listen. (GB2RS)

RADIO AND THE MILITARY: NETHERLANDS TERMINATES URUGZANFM ON JULY 30

Uruzgan FM, the special program for Dutch forces in Afghanistan made its final transmission on July 30th. This, as the Dutch mission in Afghanistan ends on August 1st.

Uruzgan FM was produced by the Dutch domestic network 3FM. It was broadcast via Radio Netherlands Worldwide heard Monday through Friday at 1400 UTC on local FM transmitters in Afghanistan fed by satellite and via the website at www dot uruzgan dot fm. It was also broadcast on local stations in the Netherlands in areas around the military bases.

Uruzgan FM was launched in August 2006 at the start of the Dutch mission in Afghanistan. The Uruzgan FM team along with various Dutch artists has visited the Dutch bases in Afghanistan three times. (Media Network)

RADIO BUSINESS: IOWA'S HAMKITT STORE CLOSING ITS DOORS

Some sad news in the ham radio business world. This with word that the HAMKITT store in Des Moines, Iowa is closing it's doors due to poor sales.

According to Terry Graves, K7FE, who is the Chief Editor, QRZ dot com, Joe Leto, W0IW, opened the Des Moines, Iowa retail business with the intent to provide local hams an amateur radio store to visit. He also had a web site providing online sales.

The ham store void in the area was an attraction for Joe to start his business. While it was well received by the locals, the poor economy caused reduced sales and made the venture unprofitable. According to W0IW the remaining inventory is still for sale and will be until he closes the door. To find out if he has what you need you can e-mail Joe to info (at) hamkitt (dot) com

For those not aware, Joe Leto, W0IW, hosts the The Iowa Wireless Contesting Station. (K7FE, QRZ.com)

**

ON THE AIR: KINGS COUNTY REPEATER ASSOCIATION TO COMMEMORATE 911

New York City's Kings County Repeater Association's annual 9/11 Memorial Event will operate special event station KC2RA on Friday, September 10th from 1300 to 2300 UTC. The operation will take place only a short walk from Ground Zero with SSB operations on 7.250 and 14.295, PSK31 on 14.070 plus D-Star on reflector REF020B and Echolink node 64300. RF participants who send card with S-A-S-E will receive a commemorative QSL. Send yours to KC2RA, Post Office Box 280288, Brooklyn, New York, 11228. For more information see www.kc2ra.org on the World Wide Web. (KCRA)

**

ON THE AIR: INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

A tide of registrations for the International Lighthouse and Lightship Weekend. There are 340 lighthouses, some lightships and one time-ball tower registered so far for the International Lighthouse and Lightship Weekend on the 21st and 22nd of August.

The event now in its 11th year was begun by the Ayr Radio Club of Scotland. Now there are radio amateurs and lighthouses in some 30

countries involved.

The 300th registration this year came from Rainer Kledtke DO7RKL for the Westerheversand lighthouse in the northernmost part of Germany. A most famous landmark it stands 41-metres tall on a peninsula between the North and the Baltic seas.

Australia has been a strong supporter of this fun event celebrating the history of lighthouses. It has 53 registrations, just ahead of Germany on 50 and the United States some 40 lighthouses.

There's still lots of lonely lighthouses looking for the company of friendly radio hams to bring radio gear to them for the International Lighthouse and Lightship Weekend. To learn more or register a lighthouse visit the website at www.illw.net. (VK3PC)

NAMES IN THE NEWS: KE5ISX APPOINTED NEW WEST GULF ARRL VICE DIRECTOR

Some names in the news. First up is John Robert Stratton, KE5ISX, of Austin Texas. He has been appointed by ARRL President Kay Craigie, N3KN, to serve as Vice Director of the Leagues West Gulf Division for the remainder of the current term that expires January 1, 2011.

A General class licensee, Stratton has been licensed and an ARRL member since 2006, but said he has wanted to be a ham since he was a Boy Scout in high school. In February 2007 he became active in League affairs after learning about the new cell phone bills that were introduced in the Texas Legislative Session and volunteered to help work against those measures. Due to his success with that legislation, Stratton became the ex-officio West Gulf Legal Counsel and in 2009. He was then appointed Assistant Director and Division Legislative Action Chair.

Stratton, an attorney by profession, fills the vacancy created when John Thomason, WB5SYT, resigned the position earlier this month. (ARRL)

**

NAMES IN THE NEWS: VK3DQ NAMED FIRST RECIPIENT OF WIA CENTENARY AWARD

John Fisher, VK3DQ, is the first ham to qualify for the Wireless Institute of Australia's WIA Centenary Award. The award to Fisher was based on his three contacts with 100th anniversary WIA commemorative station VK100WIA. One contact was made with the WIA during May. Fisher then made contact with the Wagga and Midland Amateur Radio Clubs operation of VK100WIA in June. He also worked 14 WIA members to tally up the required 100 points. Fisher received his award in a surprise visit to his home by Wireless Institute of Australia's President, Michael Owen VK3KI. (WIA News)

**

NAMES IN THE NEWS: TWO ASTRONAUTS TAKE PART IN SIMULATED ISS CONTACTS

Astronauts Ron Garan, KF5GPO, and Mike Fossum, KF5AQG, have each successfully completed a simulated Amateur Radio on the International Space Station contact with the Challenger Learning Center of Indianapolis on Thursday, July 22. Garan and Fossum answered 14 and 22 questions respectively during the training exercise. These practice sessions are terrestrial based amateur radio contacts using the same type of ham gear that the astronauts will be using when they are on board the International Space Station. (ANS)

**

NAMES IN THE NEWS: ARRL SAYS APOLLO 11 HEARD BY HAM

The ARRL reports that a ham received signals from the Apollo 11 lunar astronauts 41 years ago. According to the League, in July of 1969, Larry Baysinger, W4EJA, independently detected radio transmissions from the Apollo 11 astronauts on the lunar surface.

Baysinger was both a radio amateur and an amateur radio-astronomer. His accomplishments were reportded by Louisville Courier-Journal reporter Glenn Rutherford in an article titled Lunar Eavesdropping: Louisvillians Hear Moon Walk Talk On Homemade Equipment. You can read more at www.arrl.org/eavesdropping-on-apollo-11. (ARRL)

THE CHANGING OF THE GUARD: DAVID WARREN - INVENTOR OF "BLACK BOX RECORDER - S.K.

An Australian scientist who invented the "black box" flight data recorder, has died. Jim Linton, VK3PC, reports on the life of inventor David Warren:

--

The death of Dr David Warren brought to the close a very interesting life of a man who developed the black box that has played a crucial role in improving aviation worldwide.

He was born in 1925 at a remote mission station on Groote Eylandt in the Gulf of Carpentaria, North Australia, and the first European child to be born on that Aboriginal settlement.

His father was killed in one of Australia's earliest air disasters in Bass Strait between the states of Victoria and Tasmania, and the last gift received from his dad was a crystal set.

That encouraged the young David in boarding school to build radio receivers and enroll to sit for his ham ticket, hoping to become Australia's youngest radio amateur. But this ambition was thwarted when the government imposed a ban on amateur radio with the outbreak of World War II. However his schoolboy knowledge of electronics led him to later to build the world's first flight data recorder.

Being involved in the accident investigation of the world's first jet-power aircraft, the Comet, in 1953, led him to advocate that there be a cockpit recorder as a means of solving otherwise unexplainable aircraft crashes.

The idea initially raised little interest, so while the Principal Research Scientist, Aeronautical Research Laboratories in Melbourne, he designed and built an experimental unit that could record four hours of speech as well as flight instrument readings.

The idea took five years to be finally accepted. Dr David Warren died aged 85

For the Amateur Radio Newsline, I'm Jim Linton, VK3PC.

--

A variation on Warren's invention is now being included in more and more new cars, trucks and other vehicles. (VK3PC)

**

WORLDBEAT: UK'S BBC BROADCAST HOUSE GETTING FORTIFICATIONS

Call this one a sign of the times. The British Broadcasting Corporation has been given the final go ahead to build a fortress-style parapet around Broadcasting House to defend it from terrorist attack. Under the 5 million pound plan, which has been endorsed by British Security Service MI5, what is described as an imposing ring of steel consisting of hydraulic rising pylons and concrete planters is being erected around the landmark building in London's Portland Place. Work is due to be completed by November. More is on-line at tinyurl.com/2d7kxpf (West End Extra)

**

HAM RADIO IN SPACE: SO-67 AGAIN RETURNING TO SERVICE

South Africa AMSAT reports on their web page that operations are slowly being resumed on its Sumbandilsat SO-67 bird. According to the announcement the satellites ground control station will observe the amateur payload to ensure the it remains stable and then gradually add more operating time. You can follow the progress on-line at www.amsatsa.org.za. (ANS)

**

RADIO IN SPACE: PLANETARY SOCIETY SAYS YES TO LIGHTSAIL-1

LightSail-1, the Planetary Society's new ultra-light Cubesat-based solar sail spacecraft, has passed its Critical Design Review. At a two-day meeting in Pasadena, California, a team including Jet Propulsion Labs project veterans Glenn Cunningham, WA6TPT, Bud Schurmeier, Viktor Kerzhanovich, and Aerospace Corporation's Dave Bearden gave the thumbs up to proceed with building the spacecraft's hardware and software. LightSat-1will demonstrate that sunlight alone can propel a spacecraft in Earth orbit. More information is on-line at tinyurl.com/ycnsqmc (LightSail-1)

**

PROPAGATION STUDY: NEW 6 METER BEACON IN KYRGYZSTAN

EX1SIX is a new 6 meter propagation beacon that has come on the air from Kyrgyzstan. It transmits on 50.026 MHz with 60 watts out to a vertical groundplane from grid square MN82sd. That's near the village Tamga on the southern coast of lake Issyk Kul.

According to Oleg Ivin, EX8MLT, the beacon's installation was made possible thanks to the help of David Krejg, N3DB. Ivin says that N3DB is the leader in the installation of a project to install 6 meter beacons world wide. More is on line at tinyurl.com/propbeacon. (UN Ham Radio News)

DX

In DX, word that planning is well underway for the upcoming Saint Maarten DXpedition. Co-leaders W8GEX and K9CT were recently there and have secured property for the CW and SSB stations to be located on the east and west sides of the island. These locations have clear shots to Europe and North America. ICOM is providing IC7600 transceivers and Alpha will be providing their amplifiers for this DXpedition. Four stations will be on continuously and manned by a 12 person team of experienced international operators. The plan is to be on the air starting on October 10th and continuing for 10 days.

VE2XB, will be active as portable 4X from Israel for one month or so having started operation around July 26th. Activity will be on all bands including 6 meters using CW and SSB. QSL via his home callsign on QRZ.com.

IZ2DPX will be active stroke 5Z4 from Malindi Kenya between August 4th to the 17th. Operations will be on 40, 20, 17, 15, 12 and 10 meters. QSL via IZ2DUW direct or by the bureau to IZ2DPX.

IK2NCJ will once again be on the air as D-4-C from Sao Vicente Island between August 5th to the 26th. Activity will include the WAE DX CW Contest on August 14th and 15th as a single operator all band entry. QSL via Logbook of the World or CT1ESV by the bureau.

Lastly, DK2TUX, will be active portable EA8 from the Canary Islands between August 16th to the
20th. Operations will be on will be on 40 through 15 meters. QSL via DK2TUX.

(Above from various DX News Sources)

**

THAT FINAL ITEM: HAM RADIO AT THE 100th ANNIVERSARY BSA JAMBOREE

And finally, the Boy Scouts of America have been holding their Jamboree at Ft. A.P. Hill in Virginia and ham radio was a major part of the action. The theme is 100 years of scouting. Amateur Radio Newsline's Mark Abramowicz, NT3V, is live on the scene with this report:

--

It has been an incredibly busy time here at the 2010 Boy Scouts of America National Jamboree where operations of K2BSA have been a critical part of the program.

Brian Mileshosky, N5ZGT, is the chairman and coordinator for K2BSA operations here at Fort AP Hill, just outside of Bowling Green, Virginia.

"Ive got a staff that works under me and we're in charge of the demonstrating of ham radio to the Scouts, Mileshosky explains.

"That is getting them on the air, conducting the space station contact, things like that while the other staff is off doing other complementary things like the Radio merit badge and doing the licensing classes, the VE exams and basically wrapping up the whole picture of demonstrating and providing ham radio to the participants here."

Mileshosky says more than 40-thousand Scouts and leaders are on the jamboree site and thousands have been stopping by the check out ham radio. "

To my knowledge, I think to date this could probably be considered the largest on-site amateur radio demonstration to youth in the world to date," Mileshosky says. "And that's just a fantastic thing to be behind."

And, Mileshosky says there's something far more important in the mission of K2BSA here at the jamboree.

"Wer'e targeting ham radio's legacy," Mileshosky says. "And that no matter how you look at it, whether if you look at ham radio as a hobby or as a service or both, we got to have blood in it for it to continue and that blood has got to be young."

Larry Wolfgang, WR1B, is acting as the American Radio Relay League's connection to K2BSA operations.

"The board of directors has voted strong support for the Scouting program," Wolfgang says. "And so that support starts right from the top. At the headquarters level, the support is great because I get to come here and represent the league, be a liaison and kind of help out in every way possible with the operation."

That includes technical support for set-up of the antenna array and radio gear as well as all ARRL license manuals and other publications, maps, frequency charts and even pins. Wolfgang says the one of the keys to the K2BSA operation's success is the Radio merit badge which Scouts can earn in a little over three hours.

"A lot of Scouts really like the idea they can complete the merit badge," Wolfgang says.

"And they may not know about radio to start with, but by the time they're done, they have a pretty good idea of what we do as amateur radio operators.

"And quite a few of them want to take the license class and move on to get a license."

A huge supporter of this year's K2BSA operation at the jamboree is ICOM. Ray Novak, N9JA, is division manager for amateur and receiver products at ICOM America. He stopped by to visit the jamboree operation and see how things were going.

"A couple of stations that we have are running 7600s," Novak says. "We've also worked with the local amateur radio group that has the D-star repeater in Stafford, Virginia, using the WS4VA repeater to do D-star from two locations here and, a couple of other radios as well.

"We're helping with radios for the fox hunt. We're just trying to show all different aspects of where ICOM helps out with the ham radio community."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the 2010 Boy Scouts of America National Jamboree in Fort AP Hill, VA.

--

The Jamboree runs from July 26th through August 4th. More with Mark from this very special scouting event next week. (NT3V, ARNewsline(tm))

Who is "trollen", kachina? There is nobody in this newsgroup using
that alias.

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
6 days (Aug 6, 5:20 pm)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Little Roger came home from school with a smile on his face and told his mother, "Mark Morgan showed me his weenie today at the playground!"

Before the mother could raise a concern, Roger went on to say, "It reminded me of a peanut."

Relaxing with a hidden smile, Roger's Mom asked, "Really small, was it?"

"No.", Roger replied. "It was salty."

2781. Little Roger

Newsgroup: rec.radio.amateur.policy
Date: 2010-08-01 03:46:14 UTC
From: Steve Tunder <---@3>
Message-ID: <3uvg79.j47.19.1@news.alt.net>
Source record: 242850
Cross-posted to: alt.binaries.pictures.erotica.gaymen.ab8mq,alt.cocksucker.roger-wiseman,rec.radio.amateur.policy,rec.radio.cb

Little Roger came running into the house and asked, "Mommy, can little boys have babies?"

"No," said his mom, "of course not."

Little Roger ran back outside and his mom heard him yell to his friends, "It's okay, we can play that game again!"

Research Description
Pluto has long been a research interest of mine. From 1984 to 1991, I obtained an extensive set of photometric observations of Pluto while Charon's orbit was sufficiently close to being seen edge-on from Earth such that the bodies occulted and eclipsed each other. Those observations led to the first reliable diameter measurements and density determination for Pluto and Charon. In the early 1990s, I served on NASA's Outer Planets Science Working Group that recommended a spacecraft mission to Pluto as a high priority for outer Solar System science. That committee's efforts finally paid off with the 2006 January launch of NASA's New Horizons spacecraft bound for Pluto, scheduled to arrive in 2015. In 1992 and 1993, shortly after the Hubble Space Telescope began operations, Marc Buie (Lowell Observatory) and I acquired a set of 60 images of Pluto and Charon that we used to refine the orbit of Charon (see figure below). An unexpected result was the non-zero eccentricity of Charon's orbit around Pluto. Following the discovery of two more satellites of Pluto in 2005, Buie and I, along with Will Grundy (also at Lowell Observatory) have been awarded time on the Hubble Space Telescope to acquired additional astrometric and photometric data of the Pluto system. These observations are scheduled to commence in early 2007, so we expect to have exciting new information about the new satellites soon.

Other dynamical work involves the Jovian and Saturnian satellites. For the purpose of improving the satellite ephemerides in advance of the Cassini spacecraft encounter, I observed satellite-satellite mutual

events for the latter during the ring-plane crossing of 1995. I also observed similar events involving Jupiter's Galilean satellites in 1997 to measure Io's secular acceleration and compare the energy dissipation with heat flow measurements.

During graduate school, I worked on a colorimetric survey of the asteroids, and my doctoral dissertation presented a new asteroid taxonomy, which continues in wide use to this day. During that survey, we took every opportunity to observe what were then rather rare appearances by near-Earth asteroids. Following the realization that these objects represent an impact hazard to the Earth, in 1991 I was asked to serve on two NASA committees to deal with the questions of how to detect near-Earth asteroids and how to deflect any asteroid that appeared to be on a collision course with the Earth. Since that time, NASA has funded several sky surveys designed to find near-Earth asteroids, though they have concentrated on finding asteroids beyond the orbit of the Earth.

Recently, I have started tackling the difficult problem of finding near-Earth asteroids with orbits whose aphelion (greatest distance from the Sun) coincides with the Earth's orbit. Such objects could impact the Earth, but they would never be found by the other near-Earth object search efforts, which examine near-Earth space at distances greater than the Earth's distance from the Sun. The difficulty is caused by the extremely high phase angle of the objects being sought (a crescent Moon is considerably fainter than a nearly full Moon, to use an appropriate analogy) and the brief amount of time the required portion of the sky can be imaged shortly after sunset and before sunrise. The first such object to be discovered is 1998 DK36, which my thesis student, Robert Whiteley, and I found on February 23. Other near-Earth asteroid discoveries credited to this project include the Apollo-type asteroids 1997 QK1 and 1998 DV9, both of which are considered potentially hazardous objects. Our largest discovery is 1999 OW3, estimated to be nearly 5 km in diameter. Our most famous discovery is 2004 MN4, now known as (99942) Apophis, which will make an extremely close approach to the Earth on 2029 April 13.

I am on the science team for the Japanese Hayabusa spacecraft mission to the near-Earth asteroid (25143) Itokawa, which was intended to be the world's first sample return mission to an asteroid. The rendezvous occurred between 2005 September and November. The timeline called for the spacecraft delivering its samples to Earth in mid-2007; however, a thruster anomaly delayed the journey home. Fortunately, the orbital geometry repeats every three years, so we're now hopeful for the sample return occurring in mid-2010.

I also work on the Small Bodies Node of the Planetary Data System, which archives planetary data related to asteroids, comets, and dust. In connection with that activity, I supplied software to the 2MASS infrared sky-survey project to predict which asteroids, comets, and planets might appear in each of the 2MASS scans. Over the course of

the multi-year project, we extracted a homogeneous set of infrared JHK magnitudes for thousands of asteroids. That same software will soon be adapted for use with the upcoming WISE spacecraft mission.

The orbit of Charon. The dots represent the observations, and the solid curve represents the fitted orbit. To minimize the scatter produced by the varying sub-Earth latitude and topocentric distance during the fifteen months spanned by the observations, the data have been corrected to the single orbit interval centered on the epoch 1993 February 22. The orbital angular momentum vector points roughly toward the west, and the eastern portion of the orbit passes on the near side of Pluto.

Collaborative Work
Pluto-Charon research is being carried out in collaboration with Marc Buie, Lowell Observatory. Satellite mutual event analysis is being done with Kaare Aksnes, Institute of Theoretical Astrophysics, University of Oslo, Norway.

Honors and Awards
Asteroid number 3255 was named Tholen in recognition of my contributions to the field of planetary science, 1987

Harold C. Urey Prize, 1990 (presented by the Division of Planetary Sciences of the American Astronomical Society for outstanding achievements in planetary research)

Associate Editor, Icarus, 1991-present

NASA Group Achievement Award, 1994 (asteroid ephemeris development team for Galileo's Gaspra and Ida encounters)

NASA Group Achievement Award, 2005 (awarded for exceptional contributions to the Wild 2 encounter operations of the Stardust spacecraft)

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Social workers are called the "nice police" by UK existential
psychotherapists.

Some people forget that they are agents for the state,
not for the individual.

==> + ARRL LEADERSHIP: ARRL BOARD MEETS IN CONNECTICUT FOR ITS 2010
SECOND MEETING

The ARRL Board of Directors held its Second Meeting of 2010 July
16-17 in Windsor, Connecticut, under the chairmanship of President Kay
Craigie, N3KN. International Amateur Radio Union Secretary Rod
Stafford, W6ROD, and Radio Amateurs of Canada President Geoff Bawden,
VE4BAW, were guests of the Board. At the two-day meeting, the Board
considered a number of reports and acted on several recommendations and
Directors' motions. Read more here
<http://www.arrl.org/news/arrl-board-of-directors-meets-in-connecticut-for-20
10-second-meeting>.

==> + PUBLIC SERVICE: FCC TO ALLOW GOVERNMENT DRILLS WITHOUT A WAIVER
AS OF SEPTEMBER 3
```

In July, the FCC released a Report and Order
<http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-in-disaster-and-emergency-drills-on-behalf-of-an-e>
(R&O
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-124A1.pdf>)
that amended Part 97 -- more specifically Section 97.113
<http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.117.pdf> --
stating that government entities sponsoring disaster and emergency
drills will no longer need to apply for a waiver to hold these drills.
Additionally, employees who wish to participate in
non-government-sponsored drills and exercises may do so under certain
conditions. Part 97 is the portion of the Commission's rules that
govern the Amateur Radio Service. In the August 4 edition of the
Federal Register, the FCC issued a summary of the R&O entitled
Amendment of the Commission's Rules Regarding Amateur Radio Service
Communications During Government Disaster Drills --noting that the
effective date of these new rules will be September 3, 2010
<http://edocket.access.gpo.gov/2010/pdf/2010-19198.pdf>.

==> + IT'S A BIRD, IT'S A PLANE! NO, IT'S AN ASTEROID -- ASTEROID
(31531) ARRL, TO BE EXACT!

<http://www.arrl.org/images/view/News/31531%20ARRL_3.JPG> John,
Paul, George and Ringo are on the list. Mozart, Bach, Beethoven and
Brahms -- even Frank Zappa and Elvis (but not Madonna). Of course
Asimov and Sagan made the cut, Mr Spock, too, but not Captain Kirk. And
now ARRL -- more precisely, (31531) ARRL -- joins this prestigious
company as one of more than 16,000 named minor planets in our solar
system. A minor planet -- such as an asteroid -- is an astronomical
object in direct orbit around the Sun that is neither a dominant planet
-- such as Mercury, Saturn and Neptune -- nor a comet. The first minor
planet -- named Ceres -- was discovered in 1801. Since then, more than
200,000 minor planets have been discovered, most of them lying in the
asteroid belt. But as of July 27, 2010, only 16,005 had been named.
Read more here
<http://www.arrl.org/news/it-s-a-bird-it-s-a-plane-no-it-s-an-asteroid-asteroid-31531-arrl-to-be-exact>.

==> + ARRL FACEBOOK PAGE TOPS 10,500 FANS

With more than 10,500 fans on Facebook, the ARRL page is the number
one spot for hams on the Internet's most popular social networking
site. Not only is the ARRL page the most popular Amateur Radio page on
Facebook, it is attracting young -- and not-so-young -- hams to share
their opinions and ham radio-related news with other hams. Read more
here <http://www.arrl.org/news/arrl-facebook-page-tops-10-300-fans>.

==> + ACTIVE SUN PUTS ON DISPLAY FOR EARTH

Last weekend was quite a busy time for our Sun. During the late
hours of Friday, July 30, a magnificent coronal mass ejection (CME)
billowed away from the eastern limb of the Sun; the source of the blast
was apparently sunspot 1092. On Sunday, August 1 at approximately 0855

UTC, Earth-orbiting satellites detected a C3-class solar flare, and again, the blast came from sunspot 1092. At about the same time as the solar flare, an enormous magnetic filament erupted, stretching across the Sun's northern hemisphere, a complex global eruption involving almost the entire Earth-facing side of the Sun.

"This eruption is directed right at us and is expected to get here early in the day on August 4," said Leon Golub <http://www.cfa.harvard.edu/news/2010/pr201011.html>, Senior Astrophysicist with the Solar and Stellar X-Ray Group in the High Energy Astrophysics Division of the Harvard-Smithsonian Center for Astrophysics. "It's the first major Earth-directed eruption in quite some time. We got a beautiful view of this eruption, and there might be more beautiful views to come if it triggers aurorae." Read more here <http://www.arrl.org/news/active-sun-puts-on-display-for-earth>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things that ARRL is doing on behalf of its members. This installment covers the month of July. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-24>.

==> + SWISS HAMS SET NEW WORLD RECORD ON 10 GHZ

A group of six Swiss hams have set a new record for the longest contact (based on GPS coordinates) made on 10 GHz using SSB -- 2696 km (1675 miles): from Ilha do Sal <http://en.wikipedia.org/wiki/Sal,_Cape_Verde> (one of the northern Cape Verde islands) to Portugal. Using a 20 W transmitter -- with a 90 cm parabolic reflector with 35 dB gain -- these hams, part of the Hyperatlantica 2010 DXpedition <http://www.hyperatlantica.ch/>, were able to contact Portugal on the morning of July 10 for almost 25 minutes. The original record of 2070 km (1286 miles) -- set in 2000 by Armin Martsch, DL4AM, and Adalbert Kaufmann, DJ3KM -- was broken by the Swiss group earlier that same day, with a contact between Ilha do Sol and Tangier, Morocco at a distance of 2200 km (1367 miles).

==> + SOLAR UPDATE

Tad "There lands the Fiend, a spot like which perhaps Astronomer in the Sun's lucent Orbe through his glaz'd Optic Tube yet never saw <http://www.dartmouth.edu/%7Emilton/reading_room/pl/book_3/index.shtml>" Cook, K7RA, reports: Both the sunspot numbers and solar flux declined this week, with the average daily sunspot numbers down more than 15 points to 20.3 and the average daily solar flux down nearly 4 points to 81.4. A new sunspot group emerged Wednesday, and two more may be coming on Thursday. Geomagnetic activity was high, due to a coronal mass ejection that sent Wednesday's planetary A index to 42; a second CME may hit earth Thursday. The predicted planetary A index for August 5-9 is 35, 15, 7, 5 and 5. Look for more information -- including a look at

the three-month moving average of daily sunspot numbers that rose more than four points to 20.4, as well as the outlook for the near term -- on the ARRL Web site on Friday, August 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Milton's Paradise Lost <http://www.dartmouth.edu/%7Emilton/reading_room/pl/book_1/index.shtml> (Book 3 <http://www.dartmouth.edu/%7Emilton/reading_room/pl/book_3/index.shtml>, lines 588-590).

==> THIS WEEK ON THE RADIO

This week:

- August 6 -- NCCC Sprint Ladder
- August 7 -- TARA Grid Dip Shindig
- August 7-8 -- ARRL UHF Contest <http://www.arrl.org/august-uhf>; North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 8 -- SKCC Weekend Sprint
- August 11 -- NAQCC Straight Key/Bug Sprint; QRP Fox Hunt
- August 11-12 -- CWops Mini-CWT Tests

Next week:

- August 13 -- NCCC Sprint Ladder
- August 14 -- Feld Hell Sprint
- August 14-15 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 15 -- ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup>
- August 16 -- Run for the Bacon QRP Contest
- August 18 -- QRP Fox Hunt

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1721 - August 6 2010

Amateur Radio Newsline report number 1721 with a release date of
Friday, August 6 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio, Scouting and the ISS combine at
the 2010 Boy Scouts of America Jamboree. We take you to the scene.
Also, a major flare-up on the sun causes propagation changes on Earth
and the FCC's new national emergency radio system proposal draws a
negative response from those who will have to use it. Find out the
details on Amateur Radio Newsline(tm) report number 1721 coming your
way right now.

HAM RADIO IN SPACE: ISS TO SCOUTING JAMBOREE CONTACT SUCCESS

A very successful contact was made on Saturday, July 31st between six
Scouts at the 2010 National Boy Scout Jamboree and Astronaut Doug
Wheelock, KF5BOC on board the International Space Station. This years
Jamboree was held to celebrate the 100th birthday of Scouting in
America. Amateur Radio Newsline's Mark Abramowicz, NT3V, reports from
Fort A.P. Hill, Virginia:

--

K2BSA: "NA1SS, NA1SS. This is K2BSA, K-2 Boy Scouts of America."

NA1SS: "K2BSA, we've got you loud and clear aboard the International Space
Station. This is Col. Doug Wheelock and on behalf of my crew I wanted to
wish you all a great day down there and we're looking forward to talking to
you."

--

And that's how it started here on the K2BSA site on a pleasant Saturday
afternoon as youth staff member Andrew Koenig, KE5GDB, who is Amateur Radio
Newsline's 2009 Young Ham of the Year, initiated the biggest contact of the
jamboree. The six Scouts representing Georgia, North Carolina,
Pennsylvania, and Wisconsin, all got a chance to take part in a truly
out-of-this-world experience they won't soon forget. Each got to ask
astronaut Wheelock a question, some relating to Scouting and the space
program.

Fritzi, a 15-year-old life Scout from Devon, Pennsylvania, asked Wheelock whether Scouting could have a positive effect on space exploration. The answer: Scouting has the right stuff for the astronauts.

"Flying in space is much like Scouting," Wheelock says. "And much like a lot of things in life that are difficult to accomplish with one person. But, you need good team building skills and good leadership skills to be an astronaut. The same skills that are key to be a good Scout."

Fritzi was impressed: "They're in space," Fritzi says. "They're in zero gravity and we're down here on Earth just sort of going through a normal day."

Mark, a 12-year-old First Class Scout from Charlotte, N.C., says this was a first for him.

"I've talked to one astronaut on Earth before but I've never talked to someone in space and I think that's cool and I don't think I ever expected to do that," Mark says.

Jonathan, a Star Scout from Reading, Pennsylvania, asked Wheelock whether astronauts, like Scouts, are trained to improvise, especially when equipment fails.

"That's the second most important thing that you learn in Scouting that you need to have as an astronaut and that's the skill of problem solving," Wheelock responds.

"To be able to look at a problem because things are going to break if you're working with machinery things are going to break and you have to use what you can, what tools you have and what knowledge you have about that system to fix it."

Jonathan says he was happy to be chosen to play a role in the event.

"No, I never expected this," he says. "On a scale of 1 to 10, with one being the worst and 10 being the best, I'd give it a 10."

Connor, a 13-year-old Scout from Buchanan, Georgia, agreed: "It was amazing," he says.

David, a 15-year-old life Scout from Fort McCoy, Wisconsin, echoed the sentiment. "It was really cool talking to someone who was in space and it was just an amazing experience," David says.

For Quinn, an Eagle Scout from Carrollton, Georgia, the experience will stay with him. "Personally, I think it's amazing because I'm talking to someone who's representing the pinnacle of humanity's hopes and dreams because he is you know reaching out into the unknown," Quinn says. "He's helping our species go out and explore and change the way we live."

And, Quinn confided, the contact with Wheelock helped cement in his mind, the kind of profession he'd like to pursue.

"When I was told not to be nervous I said: Oh no, I'm not going to be nervous because hopefully, one day, I'll be on the other end of the radio.

I'll be the person talking to Boy Scouts or other people back on Earth from the space station or from space in general."

Wheelock clearly enjoyed the brief exchange and the Scouts say it's a memory they'll cherish for a lifetime.

From the 100th anniversary celebration of the founding of the Boy Scouts of America, here at the National Jamboree at Fort A.P. Hill in Virginia, I'm Mark Abramowicz, NT3V.

--

Amateur Radio Newsline has obtained exclusive rights to air the entire contact between the Scouts at the Jamboree and Doug Wheelock on board the ISS. Its available right now at our website, arnewsline.org. And Mark will be back a bit later in this weeks newscast with a wrap-up on the ham events at this years Scouting Jamboree. (NT3V, ARNewsline(tm))

**

PROPAGATION: SUN EMITS CME TOWARD EARTH

If you noticed some strange propagation or lack of it this past week, there is a reason. During the early hours of August 1st a complex eruption on the sun sent a coronal mass ejection or C-M-E toward Earth. NASA's Solar Dynamics Observatory recorded a complex global disturbance on the Earth-facing side of the sun. Most of the sun's northern hemisphere was involved in the event, which included a long-duration class C 3 solar flare and a massive filament eruption. As a result of these blasts, the coronal mass ejection was sent out into space with Earth as one of its targets. This means that high latitude geomagnetic storms and auroras were possible when the cloud arrived at our planet. More information is on-line at spaceweather.com. (VHF Reflector, Spaceweather, others)

**

RADIO INTRIGUE: LEBANON REPORTEDLY ARRESTS GERMAN HAM

Lebanese army intelligence has reportedly arrested a German engineer and amateur radio operator in eastern Lebanon on suspicion of spying for Israel. This, according to several on-line media reports on Tuesday, August 3rd.

The Nahar Daily said that the army raided the "Liban Light" cheese factory in the town of Talya and arrested an individual named Manfred Peter H. He was identified in several reports as the engineer in charge of maintenance of the factory's machines. The reports says that the army is questioning the 58 year old over his use of radio transmitters.

According to several other postings the actual identity of the person reportedly detained may be Manfred Peter Haug DL6SN. Haug works at the factory, has an OD5 guest license and government permission to operate in Lebanon, but no source has yet confirmed if Manfred Peter H and DL6SM are one in the same or if the person taken into custody is still being

detained. One source tells us that the ham in question has been released but there has not been any second source confirmation of this, as we go to air.

The German newspaper Spiegel Online has a story on this at tinyurl.com/2whspw2. But beware that it a Google English automated translation making it rather hard to understand. (Spiegel OnLine, Nahar Daily, other sources)

**

RADIO LAW: FCC PROPOSES REALLOCATING 90 MHz OF MSS SPECTRUM TO TERRESTRIAL BROADBAND

The Federal Communications Commission has begun the process required to make additional spectrum available for new investment in mobile broadband networks. This by exploring the reallocation of spectrum currently designated to the Mobile Satellite Service in the 2 GHz band, the Big L-E-O band and L-band.

In its news release the FCC says that such an allocation modification would set the stage for more flexible uses of the band by terrestrial services. As such, it also proposes to expand existing secondary market policies and rules to address transactions involving the use of Mobile Satellite Service bands for terrestrial services. This says the FCC would create greater predictability in bands licensed for terrestrial mobile broadband service. (FCC, CGC)

**

RESCUE RADIO: DUTCH HAMS SUPPORT ARMY E-MAIL EXERCISE

The Dutch Amateur Radio Emergency Service or DARES recently took part in an emergency preparedness exercise known as Civil Challenge. This, in collaboration with the Dutch Army.

From June 22nd to the 24th DARES task was to establish an e-mail link between the locations of the Army in Vught and Budel with an additional LAN network provided at Budel for the number of users there. To accomplish the e-mail link, a Winlink system using existing, new or temporary RMS Packet Gateway stations was used for this exercise. Six tactical email accounts, 1 in Vught and 5 in Budel were created to support the exercise.

DARES also took the opportunity to organise 3 Master Classes, in which the operation and use of the VHF / UHF Winlink system was explained and demonstrated to the participants. For DARES members it was also an opportunity to test all their new TNC-X modems under simulated emergency conditions. (IARU Region 1)

**

RADIO LAW: 97.113 REVISION ON EMPLOYEE HAMS IN DRILLS TAKE EFFECT SEPTEMBER 3

The effective date that the need for waiver from the FCC to use employee hams in government sponsored training exercises goes away is September 3rd. In the August 4th edition of the Federal Register, the FCC issued a summary of the Report and Order on this matter. The revised rules take effect 30 days after publication in the Federal Register making the effective date September 3rd. (ARRL, FCC)

**

RADIO LAW: LATEST FCC PROPOSAL FOR INTEROPERABLE DISASTER RADIO SYSTEM DRAWS NEGATIVE REVIEWS FROM FIRST RESPONDERS

Another stumbling block for the FCC in the creation of a new, 700 MHz, inter-operable emergency communications system has emerged to oppose the FCC's latest plan. This, as emergency service providers and first responders voice their opposition the latest proposal from the regulatory agency. Amateur Radio Newsline's Frank Haas, KB4T, has the details:

--

Two years ago, the Federal Communications Commission tried to create a nationwide wireless broadband network for police, firefighters and other first responders. Its plan was to auction off part of the 700 MHz band with the proviso that telecommunications providers purchasing the spectrum also build and maintain the emergency service network. Those conditions proved too burdensome, and the auction failed to attract any serious bidders.

Now the agency is hoping to rework the plan, which relies on the use of a slice of 700 MHz called the D Block. But many public safety officials say the FCC is again taking the wrong approach and they are voicing strong the opposition to the plan in the public media.

The latest idea from the FCC is to auction off the D Block to wireless carriers and use the proceeds to help pay for a public safety network on a separate slice of spectrum already set aside for first responder broadband use. In terms of spectrum, the existing 700 MHz public safety bands are adjacent to the D Block frequencies.

The FCC contends that the existing public safety block provides adequate capacity for day-to-day emergency response operations. The agency adds that in an emergency its latest proposal would give public safety users priority access to the D Block and other spectrum from the digital transition while fulfilling the Congressional mandate to insure public safety benefits from

the latest wireless technology.

But the FCC proposal has run into vehement resistance from public safety agencies. They warn that their current spectrum allocations are not big enough to meet their needs. They are also very cautious of relying on commercial broadband providers, particularly in emergencies. As such, they are calling on the government to give the D Block to them so they can combine it with the adjacent band space to double the amount of spectrum dedicated to public safety broadband operations.

But House Commerce Committee leaders are drafting legislation based on the FCC plan. And they are being pushed along by the other large wireless providers such as T-Mobile who are eager for more spectrum and in turn support the FCC proposal.

But not so fast say some leaders in the first response community. Among them is Charles Dowd who is the Deputy Chief in the Communications Division of the New York City Police Department. Dowd has stated his opinion that commercial networks are just not reliable enough for first responders who deal with life and death matters.

And Richard Mirgon, the president of the Association of Public Safety Communications Officials International, says that in a mass emergency, commercial networks are often already overwhelmed.

With the dispute now heading to Congress, the current focus is on funding. If Congress fails to approve the monies needed for the FCC's plan, the proposal could be dead in the water before it ever sees the light of day.

And for the foreseeable future, it appears as if ham radio operators and only ham radio operators who will remain the singular emergency response communicators capable of interfacing with every emergency response and relief team. This through the simple expedient of assigning volunteers with HT's and mobiles to shadow official response personnel and provide for their inter-agency communications needs.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, reporting from Holly Hill, Florida.

--

The deficiencies of the current first response and disaster relief radio networks became apparent after the 911 attacks in New York and Washington D.C. as well as and Hurricane Katrina along the gulf coast. In both cases, police, fire fighters and other responders could not talk to one another because they were using incompatible radio systems. Some were early digital and others were using analog FM. Each had its own set of designated frequencies and no way to directly communicate with any other service. In both instances it was ham radio volunteers who filled the communications gaps left when all else failed. (Published news reports)

**

RADIO LAW: IARUMS TO CONCENTRATE ON CLEANING UP 40 METRES

The South African Radio Leagues deligate for the International Amateur Radio Union Monitoring System, Fred Scheepers, ZS1FCS, is inviting all radio amateurs and shortwave listeners to join a campaign. This, to remove non amateur stations from the 40 meter amateur band.

Scheepers says that it requires many people to monitor the band from 7 to 7 point 200 MHz for intruders and document details such as the station ID, the frequency and time. According to Scheepers, many intruder broadcast stations will give their ID on the hour and half hour.

If you cannot understand the language the station is broadcasting you might consider recording it as an mp3 or wave file and add it to your report. Those reports go to the International Amateur Radio Union Monitoring System coordinator in your nation. (SARL)

**

RADIO LAW: ITALY'S PTT TAKES ILLEGAL BROADCASTER OFF 20 METERS

A pirate broadcaster is no longer bothering ham radio operations on 20 meters. The IARU Region 1 website reports that the illegal daily AM transmissions from Naples on 14.000 MHz have ended. According to DK2OM, the Italian Department of Post and Telecommunications appears to have located the source of the transmission and has shut it down. (IARU)

**

RADIO RECORDS: NEW DISTANCE RECORD FOR 10 GHz

The Radio Society of Great Britain reports that a new world distance record on 10GHz has been established between the Cape Verde islands and southern Portugal. At 10:46 UTC on July 10th the standing record was smashed by a SSB QSO ranging 2696 kilometers during the Hyperatlantica 2010 DXpedition. The previous distance record on this band had been 2070 kilometers. The Hyperatlantica operators eclipsed that by some 626 additional kilometers. (GB2RS)

**

NAMES IN THE NEWS: AA7A APPOINTED TO DXAC

Some names in the news. First up is Ned Stearns, AA7A, of Scottsdale, Arizona. He has been appointed to fill the Southwestern Division DX Advisory Committee vacancy created with the passing of Vince Thompson, K5VT.

Stearns, who is an electrical engineer has 11-band DXCC and is possibly the only person to have achieved this. A past ARRL Vice Director, Stearns has first hand knowledge and experience from operations on many DX-peditions.

In the 1990's Stearns was a frequent co-host of Len Winkler. KB7LPW, nationally syndicated talk show "Ham Radio and More." That show was originated from the studios of KFNN radio in Phoenix, Arizona, and was carried live on the Bloomberg Radio Network. (ARRL SW Division Communicator, ARNewsline(tm))

**

NAMES IN THE NEWS: ARMAD FOUNDER KB9IBW RECEIVES ACTIVIST OF THE YEAR AWARD

And congratulations to Amateur Radio Military Appreciation Day founder Emery McClendon, KB9IBW. This, on his being named recipient of the "Activist of the Year" award from The Americans For Prosperity Foundation. McClendon was presented the honor on July 23rd at the Rightonline Conference in Las Vegas, Nevada in recognition of his leadership in advancing economic freedom and liberty through the modern media. (ARMAD, Southgate)

**

THE SOCIAL SCENE: DAYTON HAMVENTION ANNOUNCES 2010 THEME

The theme for the 2011 Dayton Hamvention will be two words that hold a lot of meaning in the hobby: "Global Friendship." According to Michael Kalter, W8CI, General Chairman for nest years event, the selection of these two simple words as the theme emphasizes how the technology continues to bond amateur radio operator's from all over the world. Hamvention 2011 is scheduled for May 20th to the 22nd. More information is on-line at hamvention.org or by e-mail to media (at) hamvention (dot) org. (Hamvention®)

PUBLIC SERVICE: HAMS NEEDED TO SUPPORT USAF MARATHON

At least 20 more hams are needed to support United States Air Force Marathon now slated for September 18th in Dayton Ohio. The race begins and ends on then grounds of the National Museum of the United States Air Force located on Wright-Patterson Air Force Base located only a few miles East of downtown Dayton. If you are a ham living in the Dayton area or will be in the area on the date of the race, you can volunteer on-line at www.usafmarathon.com and the follow the link that says "Become a Volunteer." Then Fill in the form, find the section Race-Day Opportunities and mark the box "Amateur Radio Operator." Please be sure to enter your call sign in the comment box. Questions and comments go by e-mail to Mike Crawford at kc8gle (at) earthlink (dot) net. (KI4KWW)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO POLITICS: EGYPT FORMS NATIONAL HAM RADIO SOCIETY

The Egyptian Radio Amateurs Society for Development or ERASD has been established as the new national official representative body for radio amateurs in Egypt. According to the IARU Region One website, even though amateur radio has been present in Egypt since the early 1920's, there was no officially recognized society to represent radio amateurs in that nation for nearly the past eight decades. Now, thanks to the earnest efforts by a steering group composed of SU1GS, SU1SK, SU1AO, SU1HM and SU1SA, such a body has been formed. More about it is on-line at www.qsl.net/eara (IARU)

**

HAM TECHNOLOGY: ROS DEVELOPMENT WILL CONTINUE

It appears that the author of the new amateur radio digital mode software R-O-S has had a change of heart, and has reversed his earlier decision to discontinue development work on the project.

According to the Radio Society of Great Britain's news service, the software's author, Jose Alberto Nieto Ros, told GB2RS that he will be implementing new modes and enhanced facilities. He says that the most recent development is an auto reporting system linked into the PSK-Reporter system

The latest version of R-O-S is available for download at www.rosmodem.wordpress.com. Unfortunately, R-O-S still appears to be illegal to transmit by United States hams, but rumors about that its supporters may soon petition the FCC to legalize the mode which is growing in popularity world-wide. (GB2RS, Southgate)

**

HAM RADIO NEAR SPACE: TWIN HAM BALLOONS TO LAUNCH AUGUST 7

A pair of high altitude balloon for Scouts carrying fast scan amateur television repeaters and digital beacons were to be launched on Saturday, August 7th. This, as part of the Scouts Space Jam Technology Merit Badge Workshop. Both balloons were scheduled to be launched from DePauw University flight range in from Rantoul, Illinois with the first one lofting at 8 a.m. Central U-S time and the second a half hpur later at 8:30 a.m. On-line tracking of both flights will be available on-line at tinyurl.com/2ed2u85. More information on Space Jam is on the web at spacejamboree.com. (N9QGS, QRZ.com)

**

ON THE AIR: 6 METER AM NET ESTABLISHED IN MICHIGAN

6 meter AM lives again. This with the announcement that stations in Michigan, North-West Ohio and North-East Illinois are invited to check out the Classic Radio Roundtable which starts every Sunday evening at 7:30 Central time on 50.4 MHz. The net control station is Gary Franklin, K8BKB, who is located in the city of Kalamazoo, Michigan. Most stations are running classic 1960's era vintage gear but all hams with any form of AM capability are invited to tune in and take part. (W9DZ, VHF Reflector)

**

ON THE AIR: OMAN GIVES ITS HAMS 6 METER PRIVILEGES

Still with 6 meter news, the Radio Society of Great Britain reports via its GB2RS news service that the Omani Telecommunications Regulatory Authority has allocated 50 to 52 MHz to that nations amateur service. This, on a secondary user basis. No other information is available as we go to air. (GB2RS)

**

ON THE AIR: THE NETHERLANDS, SPECIAL EVENT STATION

On the air, PA0FAW will use the callsign PA10WSF through August 30th to mark the World Statues Festival in Arnhem taking place on Aug 28th and 29th. Fred will be operating mainly CW and several digital modes. A special QSL is available via PA0FAW, via bureau, direct or eQSL. More on the festival itself is in cyberspace at www.worldstatues.nl. (Via e-mail)

**

ON THE AIR - AUSTRIA SPECIAL EVENT STATION

The Austrian station OE1XJA stroke 3 of the TELESCOUT club will be activate through August 12th to celebrate "100 years of scouting in Austria. The station will take to the air from the scout camp in Laxenburg near Vienna. Operation will be on all bands except 160 meters using all modes. QSLs via the O E bureau. More information on this event is on-line at www.telescout.org. (QRZ-DX)

**

ON THE AIR - UK SPECIAL EVENT STATION

And GB50RN will be operating August 6 to 8 from Coventry in the United Kingdom. This to celebrate the 50th anniversary of the Royal Naval Amateur Radio Society. Operations will be world-wide on CW and SSB on 80 through 10 meters. Local area operations will take place on FM on 2 meters and 70 centimeters as well. (GB2RS)

**

DX

In DX, I0PNM, is operational portable IM0 from Isola San Pietro Sardinia using SSB and RTTY on 20 through 10 meters through August 22nd. He also plans to activate the lighthouse at Capo Sandalo. QSL as directed on the air.

OZ5DL has been heard as OX3DL on from Greenland operating holiday style. His preferred frequency is 14.018 MHz. QSL via OV5A, either direct or via bureau.

DB5MH is reported on from Disko Island operating QRP with an FT-817 and groundplane antenna. Listen out for him on or near 14.310 MHz every day

around 0000 UTC. QSL via DJ9KH.

JT1CS who is the secretary of the Mongolian Radio Sport Federation reports that JT1NOC does not have a valid license. He did not renew his old license so his current operation is assumed to be illegal.

Lastly, VE2XB is currently in the mid-East traveling through Israel. He will be there four weeks and will operate portable 4X using Morse and SSB on all bands including 6 meters. QSL direct to VE2XB.

(Above from various DX news sources)

**

THAT FINAL ITEM: HAM RADIO AND THE BEST SCOUTING JAMBOREE EVER

And finally this week, thousands were exposed to amateur radio thanks to the efforts of the K2BSA staff during the 2010 National Boy Scout Jamboree recognizing the 100th birthday of Scouting in America. Amateur Newsline's Mark Abramowicz, NT3V, is on the K2BSA staff and has the wrap-up:

--

Its now official. The K2BSA staff has wrapped operations at the 2010 Boy Scout Jamboree at Fort A.P. Hill, Virginia.

In all, more than 5,000 people toured the K2BSA demonstration station a feat that rivaled most of the exhibits and displays at the jamboree.

Brian Mileshosky, N5ZGT, was the K2BSA station coordinator. He says the operation met all of his expectations.

"We had approximately 13 percent of the total jamboree population which was about 43,000 and a half people here at the jamboree," Mileshosky says. "Thirteen percent of that population came through our exhibit and was exposed to ham radio, got to touch and feel radios get on the air themselves meet people on the other side of the country and the world and learn about a fascinating hobby and service."

He offers high praise, too, to those amateurs who found K2BSA on the HF bands and offered to speak with Scouts who were visiting the station and many of whom were working on Radio merit badge.

"What was very fascinating is about three out of every five contacts were from Scouts present or past - remarking on their time in Scouting or the fact that they have a relative or friend who is here at the jamboree or that they got Eagle Scout or that they still regret not getting Eagle Scout when they were a youth," Mileshosky says. "Especially for the boys that we put on the air, that made their time on the airways much more comfortable because they had an instant connection with everybody they were talking to."

Although the statistics were being finalized as we leave the jamboree, here are some of the impressive numbers:

More than 200 Scouts earned the Radio Merit Badge.

More than 130 people most of them Scouts passed their Technician license exams and many of themm sat through the one-day classes to earn their license. And those were packed.

And, even the garrison commander of Fort A.P. Hill, Maj. John Haefner took his Tech test and on the finall day of the jamboree passed his General. So, the major got promoted to General in a short span of time.

Congratulations to all who came through K2BSA and to our new licensees.
Hope you&#65533;(tm)ll be getting on the air soon.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the National Boy Scout Jamboree in Fort A.P. Hill, Virginia.

--

Don't forget to check out an Amateur Radio Newsline Exclusive, the audio of the International Space Station contact with K2BSA during the jamboree. It's at our website, arnewsline.org as a downloadable MP3 file. Just scroll down until you see " K2BSA contact with the International Space Station" and right click on the word "here" to save it to your computer. (NT3V, ARNewsline)

2852. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2010-08-07 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1281161101@panix.com>
Source record: 242921
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

2853. Roger Wiseman suspected of window peeping...

Newsgroup: rec.radio.amateur.policy
Date: 2010-08-07 09:04:46 UTC
From: Wally <hhh@noLloyd>
Message-ID: <3vft4h.q6l.17.1@news.alt.net>
Source record: 242922

One of his neighbors said that there has been a "creepy looking", white male prowling about beneath the bedroom window of his teenage daughter in the wee hours.
The neighbor, who lives just yards from Roger Wiseman, suspects that he knows who the creep is.

The Glendale Police have been alerted and Chief Stenger said that they have a "person of interest" in mind.

The neighbor has recently set up a series of security cameras around his home.

Roger, being the good neighbor that he is, told Chief Stenger that the prowler was most likely "Fatass" Lloyd Davies.
Roger even went so far as to provide the Chief with Lloyd's home address...just as Roger has done dozens of times on the Web.

Incorrect.

>OS/2 would be at the same place as without you, dizzy.

You don't feel that you've done anything for OS/2, tholen? Perhaps
you feel that your kooky tholing has mitigated any good you've done?

>Why did you feel a need to ask a question with
>such an obvious answer, dizzy?

The only thing obvious was that your answer would be kooky, tholen.

2867. Re: Roger Wiseman suspected of window peeping...

What was allegedly endured while writing, dizzy?

1444> Incorrect.

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, dizzy?

1444> You don't feel that you've done anything for OS/2, tholen?

Non sequitur. Your question was about where OS/2 would be, dizzy,
not about whether I've done anything for it. Having memory
problems, dizzy?

1444> Perhaps you feel that your kooky tholing has mitigated any
1444> good you've done?

Just because I've endured your kooky postings doesn't mitigate
anything, dizzy.

1444> The only thing obvious was that your answer would be kooky,
1444> tholen.

Interesting that you recognize that your effect on where OS/2
would be is "kooky", dizzy.

I'll tell ya what your hot mouth has to do with OS/2, Tholen ! I'm
gonna use OS/2 to make our date to meet in the faculty restroom to
shove my cock into your hot, waiting mouth !

Nothing erroneous at all, Tholen. You're going to suck me off because
you crave cock.

Then, if you suck it extra nice and slow, I'll slip it deep into your
shitter ! Just like you want it ! Your anal presupposition better
include preparation H !

==> + ARRL IN ACTION: OKLAHOMA TOWN AGREES RFI ORDINANCE DOES NOT APPLY
TO HAMS

Acting on behalf of an ARRL member in Midwest City, Oklahoma -- who
had been sent a notice by the town asserting that he was in violation
of a town ordinance regarding radio frequency interference -- the ARRL
notified Midwest City officials that only the FCC is empowered to
regulate such matters. On August 4 -- two weeks after ARRL General
Counsel Chris Imlay, W3KD, sent the letter to town officials -- Midwest
City Assistant City Attorney Randal D. Homburg sent an e-mail to the
ham to let him know "the previously delivered notice is hereby
rescinded. There will be no citations issued and thus, the issue is
moot." Midwest City is in the Oklahoma City metropolitan area. Read

o-hams>.

==> SPECTRUM DEFENSE MATTERS -- TO EVERYONE

In July 2010, the ARRL launched a newsletter called Spectrum Defense
Matters to keep its members informed on issues related to the
protection of Amateur Radio frequencies. This newsletter -- published
on the ARRL Web site a few times each year -- will cover both domestic
and international topics. Your financial support is vital to support
ARRL's work to protect your operating privileges by contributing
generously to the ARRL Spectrum Defense Fund.

Saying that ARRL volunteers and staff work tirelessly every day to
protect our spectrum access, ARRL Chief Executive Officer David Sumner,
K1ZZ, notes that the ARRL is in partnership "with radio amateurs
throughout the world, coordinating our efforts through the
International Amateur Radio Union. In future issues of this newsletter
we plan to report to you on the status of those efforts as we prepare
for the 2012 World Radiocommunication Conference and as we meet other
challenges."

"You can take an important step right now to support ARRL's commitment
to defending the Amateur Radio Spectrum," Sumner explained. "Please
make a generous contribution to the Spectrum Defense Fund by mail, on
the Web or by phone. Perhaps you'll consider a very easy way to
contribute by pledging $10 or $20 or $100 a month. Your financial
commitment, over and above your annual dues, will ensure that ARRL has
the resources to represent you and protect your operating frequencies."
Read more here
<http://www.arrl.org/news/spectrum-defense-matters-to-everyone>.

==> + FCC: ARRL FILES PETITION WITH FCC TO DENY APPLICATIONS WITH
RECONROBOTICS

On August 4, 2010, the ARRL filed a Petition to Deny Applications
with the FCC to deny 68 pending Public Safety Pool license applications
associated with the ReconRobotics Video and Audio Surveillance System.
Each license application is accompanied by a waiver request to permit
operation of the devices in the 433-445 MHz band. The applications were
coordinated by APCO International Inc Licensing Services -- the
frequency coordinator for the public safety land mobile radio services
-- and would allow the use of the Recon Scout product currently being
marketed by ReconRobotics pursuant to an FCC waiver. Read more here
<http://www.arrl.org/news/arrl-files-petition-with-fcc-to-deny-applications-w
ith-reconrobotics>.

==> + FCC: ARRL COMMENTS ON FCC 5 MHZ PROPOSALS

On July 13, the ARRL filed its comments in response to the FCC's
Notice of Proposed Rulemaking (NPRM) in ET Docket No. 10-98. The NPRM
was issued in response to an ARRL Petition for Rule Making -- RM-11353

-- filed in October 2006. In its 2006 Petition, the ARRL had sought modest improvements in operating privileges in the so-called "60 meter" band, which presently consists of five channels on which General, Advanced and Amateur Extra class licensees may use upper sideband (USB) emission and no more than 50 W effective radiated power (ERP) relative to a dipole antenna. Amateur use of these five channels is on a secondary basis and must not cause harmful interference to authorized stations in the mobile and fixed services. US amateurs were first authorized to operate on 60 meters in 2003-- thanks to agreement by the Interdepartment Radio Advisory Committee of the National Telecommunications and Information Administration -- that with such limits, amateur use would be compatible with federal government requirements. Read more here <http://www.arrl.org/news/arrl-comments-on-fcc-5-mhz-proposals>.

==> + FCC: FCC DENIES PETITIONS ON CALL SIGN USAGE, EXPANDED PRIVILEGES

On August 9, the FCC denied two Petitions for Rule Making: one to prohibit what the petitioner called "the false or unauthorized use of an Amateur Radio call sign," and one to expand privileges on the 15 meter phone band for General and Amateur Extra class licensees. Read more here <http://www.arrl.org/news/fcc-denies-em-petition-em-s-on-call-sign-usage-expanded-privileges>.

==> + AUTHORITIES BELIEVE GARY HAAS, N5VGH, AND WIFE KILLED BY ESCAPED CONVICTS

The remains of Gary Haas, N5VGH, and his wife Linda of Tecumseh, Oklahoma, were found in a charred camper on a remote ranch in eastern New Mexico on the morning of Wednesday, August 4. Authorities believe they were killed by convicts, along with an accomplice, who had escaped from an Arizona prison on July 30. Authorities said that the Haas' bodies and camper were found by a rancher on his property, not far from Santa Rosa, one of the New Mexico cities that the couple frequented; their truck was found in Albuquerque, 100 miles away. Read more here <http://www.arrl.org/news/authorities-believe-gary-haas-n5vgh-and-wife-killed-by-escaped-convicts>.

==> ON THE AIR: ROOKIES TO RAID THE AIRWAVES FOR SECOND SSB ROOKIE ROUNDUP

With the rip-roaring success of the first-ever ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> this past April -- modeled on the popular Novice Roundups from a decade or two ago -- the ARRL is pleased to announce that a second Rookie Roundup is coming this Sunday, August 15 from 1800-2359 UTC. You don't have to be a rookie to participate. For the purpose of the Rookie Roundup, a "rookie" is defined as someone who has been licensed for three years or less, regardless of license class. If you received your license in 2008, 2009 or 2010, you are eligible to compete as a rookie. Non-rookies are encouraged to work the rookies and be an Elmer to those just starting out. It is an immediate,

hands-on way to teach good operating practices to those just getting started. Read more here <http://www.arrl.org/news/rookies-to-raid-the-airwaves-for-second-ssb-rookie-rounduphttp:/www.arrl.org/news/rookies-to-raid-the-airwaves-for-second-ssb-rookie-roundup>.

==> ON THE AIR: "DARK TIME" IS THE RIGHT TIME FOR THE PERSEIDS

<http://www.arrl.org/images/view/News/perseidmap_strip.jpg> The last time the annual Perseids meteor shower happened during a run of moonless nights -- known by astronomers as "dark time" -- was in 2007; there was a new moon on August 10, so this is a prime time to view a spectacular sky show. Not only are the meteors fascinating to watch, they also leave short-lived streams of ionized gas in their wake. As hams have known for years, these meteor trails are excellent reflectors of radio waves. Read more here <http://www.arrl.org/news/dark-time-is-the-right-time-for-the-perseids>.

==> + ON THE AIR: INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 2010

Almost 300 lighthouses in more than 40 countries and territories -- from Argentina to Wales -- will be on the air for 2010 International Lighthouse/Lightship Weekend (ILLW <http://illw.net/>), organized by Scotland's Ayr Amateur Radio Group (AARG <http://www.gm0ayr.org/>). The event, held for the 12th year in a row, takes place Saturday, August 21 0001 UTC through Sunday, August 22 2359 UTC. While not a contest, the ILLW is more of a QSO Party and Amateur Radio demonstration. The ILLW aims to raise public awareness of lighthouses and lightships and the need for their preservation and restoration, promote Amateur Radio and foster international goodwill. Stations at more than 40 US lights are expected to be on the air for the event, and several stations will identify with special event call signs. Participating lighthouse/lightship stations do not have to be inside the structure or on the vessel itself; a Field Day-type setup at or adjacent to the light is sufficient. More information about the event, including a registration form <http://illw.net/index.php?option=com_content&view=article&id=49&Itemid=56> and list of all lights scheduled to be on the air <http://illw.net/index.php?option=com_content&view=article&id=48&Itemid=55>, is available on the ILLW Web site <http://illw.net/>. The ILLW also has a Facebook page <http://www.facebook.com/pages/ILLW/108422039190274>.

==> + DAYTON HAMVENTION® COMMITTEE ANNOUNCES 2011 THEME

When the Dayton Hamvention <http://www.hamvention.org/>® opens May 20, 2011 for its 60th consecutive year, its theme -- Global Friendship -- will reflect an important part of ham radio, said 2011 Hamvention General Chairman Michael Kalter, W8CI: "The theme emphasizes how the technology continues to bond Amateur Radio operators from all over the world." The 2011 Dayton Hamvention runs May 20, 21 and 22 at Hara Arena, just outside Dayton in Trotwood, Ohio.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week:

- August 20 -- NCCC Sprint Ladder
- August 14 -- Feld Hell Sprint
- August 14-15 -- Maryland/DC QSO Party; WAE DX Contest (CW)
- August 15 -- ARRL Rookie Roundup (SSB)
<http://www.arrl.org/rookie-roundup>
- August 16 -- Run for the Bacon QRP Contest
- August 18 -- QRP Fox Hunt

Next week:

- August 20 -- NCCC Sprint Ladder
- August 21-22 (local time) -- ARRL 10 GHz and Up Contest
<http://www.arrl.org/10-ghz-up>
- August 21-22 -- SARTG WW RTTY Contest; North American QSO Party (SSB)
- August 21-23 -- New Jersey QSO Party
- August 25 -- SKCC Sprint; QRP Fox Hunt

All dates, unless otherwise specified, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1722 - August 13 2010

Amateur Radio Newsline report number 1722 with a release date of
Friday, August 13 2010 to follow in 5-4-3-2-1.

The following is a QST. Authorities across the West search for the
killers of a ham radio operator and his wife in rural New Mexico. Also
the FCC refuses to make the unauthorized use of a ham radio call a
form of identity theft or to expand voice privileges on 15 meters.
Find out the details on Amateur Radio Newsline(tm) report number 1722
coming your way right now.

RADIO CRIME: POLICE IN SOUTHWEST SEARCH FOR MURDERERS OF HAM OPERATOR
ANDHIS WIFE

Authorities across the Western United States and Canada are searching
for an escaped convict and his accomplice who may have been involved
in the brutal murder of Gary Haas N5VGH and his wife Linda. This
after their bodies were found in their burned out travel trailer in
Santa Rosa, New Mexico. Amateur Radio Newsline's Bill Pasternak,
WA6ITF, has the latest on this developing story:

--

The badly burned skeletal remains of a couple believed to be Gary, N5VGH,
and Linda Haas were found by a rancher in a charred trailer near Santa
Rosa, New Mexico, on Wednesday, August 4th. State Police have confirmed
that an Oklahoma couple by that name owned the trailer as well as a pick-up
truck that was later found abandoned in Albuquerque.

New Mexico State Police Major Robert Shilling said on Saturday, August 7th
that 45 year old John McCluskey has been linked through forensic evidence
to the couple's remains. Shilling declined to provide specifics and would
not say whether police think the other two people McCluskey is believed to
have been traveling with, Tracy Province and Casslyn Mae Welch, are also
tied to the killings.

Province was captured on August 9th in Wyoming. Also arrested was Claudia
Washburn, who is the mother of John McCluskey. She was taken into custody
in Jake's Corner, Arizona on allegations that she provided financial and
other types aid in the flight of her son, as well as Province, and Welch.

With Province now behind bars, most involved in the search believe that McClusky and Welch are hiding out in the Yellowstone Park area of Montana or Wyoming or may have even crossed into Canada. But in a bizarre twist, U.S. Marshals for Arizona say the escaped inmate and his fianc&#65533;e may be as far away as Arkansas. Authorities say that a couple who robbed a store in Gentry, Arkansas on Wednesday morning, August 11th fit the description of John McCluskey and his fianc&#65533;e, Casslyn Welch. Gentry is in northwest Arkansas, near Bentonville, where Welch's mother lives. Police are reportedly trying to obtain surveillance video from the robbery. No matter where they are, McCluskey and Welch are considered to be armed and extremely dangerous.

The two victims, Gary and Linda Haas were from Tecumseh, Oklahoma. Gary Haas and was believed to be a member of Tecumseh Amateur Radio Club.

According to a search warrant affidavit obtained by The Oklahoman newspaper, a relative told authorities that the Haas were traveling to Colorado for their annual camping trip. The relative told police they typically camped in state parks and they would often stay near Santa Rosa.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More on this story as soon as news updates are made available.

RADIO LAW: FCC SAYS NO TO PART 97 ID THEFT RULES CHANGE REQUEST

The FCC has dismissed a request from a California ham who wanted to make the unauthorized use of a ham radio call sign a form of identity theft covered under Part 97 of the the Amateur Service rules.

Back in November of 2009, Eric Hilding, K6VVA, of Morgan Hill, had filed a petition for rulemaking that requested Part 97 be amended to prohibit the false or unauthorized use of an amateur radio call sign. According to the dismissal order, the petition primarily expressed concern about the misappropriation of call signs on internet bulletin boards.

In his petition Hilding stated that this should be considered a form of identity theft. He proposed that Part 97 be amended to prohibit any misrepresentation or unauthorized use of someone else's amateur call sign over the public airwaves, on Internet packet cluster system postings, cellular or non-cellular telephone connections, electronic based communications or print media formats of any other nature.

But in dismissing Hilding's rules change request the FCC stated that Part 97 regulates only the Amateur Radio service. As such and that controlling other forms of communications would be beyond the scope of Part 97. Also, since Part 97 already prohibits amateur stations from transmitting false identification, the FCC concludes that the rules already in place address

the misuse of amateur call signs to the appropriate extent, and that Hilding's petition presents no grounds for amending it. (FCC)

**

RADIO LAW: FCC TURNS DOWN PETRION TO EXPAND VOICE PRIOVELEGES ON 15 METERS

The Federal Communications Commission has turned down a request from a New York ham to expand the spectrum available on 15 meters for phone operation.

In his December 2009 petition to the regulatory agency, Richard Ebeling, K2UTC, of White Plains had
proposed that the segment of the 15 meter amateur service band authorized to General Class and Amateur Extra Class licensees for voice emissions be increased by seventy-five and fifty kilohertz, respectively. In his petition Ebeling primarily argued that the frequency segment that General Class licensees may use for phone emissions in the 15 m band should be returned to what it was prior to the Commission's Incentive Licensing decision in 1967, which he believed unfairly disadvantaged General Class licensees.

But in its August 9th dismissal order the FCC noted that it had recently extended the spectrum amateur stations could use for voice communications in various amateur bands. In particular, the spectrum that General Class licensees may use for phone emissions in the 15 meter band was increased by twenty-five kilohertz. The FCC noted that Ebeling's Petition did not that action, or otherwise present evidence that the current amount of spectrum in the 15 meter band available for voice communications is inadequate. (FCC)

**

RADIO LAW: ARRL FILES MOTION TO DENY LICENSES FOR RECON ROBOTICS ROBOTS IN AMATEUR 70 CM BAND

The ARRL is again saying no to sharing the amateur radio spectrum with public safety robots. On August 4th the League filed a Petition to Deny Applications with the FCC to reject 68 pending Public Safety Pool license applications associated with the ReconRobotics Video and Audio Surveillance System.

Each license application is accompanied by a waiver request to permit operation of the devices in the 433 to 445 MHz band. The applications were coordinated by APCO International Inc Licensing Services and would allow the use of the Recon Scout product currently being marketed by ReconRobotics pursuant to an FCC waiver. APCO International Inc Licensing Services is the frequency coordinator for the public safety land mobile radio services --

Dan Henderson, N1ND, is the ARRL's Regulatory Information Manager. He says that while several issues factor into the League's Petition to Deny these applications, most notable is that the Commission has not acted on an earlier ARRL Petition for Reconsideration in WP Docket 08-63, which has

been pending since March of this year. Henderson sat that petition raises issues that should be addressed prior to any action on the individual applications. He says that granting applications based on the Docket 08-63 waiver, which is not final, would be premature.

Henderson goes on to note that there is the potential for significant interference from these devices to licensed operations in the amateur 70 cm band. Therefore the ARRL urges the FCC to take thoughtful and expedient action on our Petition for Reconsideration. (ARRL)

RADIO LAW: MIDWEST CITY RESCINDS VIOLATION NOTICE ISSUED TO LOCAL HAM

A follow-up to the story of the ham in Midwest City, Oklahoma who had been sent a notice by the town last June asserting that he was in violation of a local ordinance regarding radio frequency interference. That ham, now identified as David Box, K5DBX, has been posting on the situation to QRZ.com, and the latest is he reports is good but not great.

The good part is that on the evening of August 4th, Box says that he received an email from Midwest City and the office of its City Manager, that retracted the Notice and Order left at his address in June. The bad news is that the city has decided to retain the ordinance as written.

Box says that he has provided to the city, what he considers to be a more suitable solution through redrafting the ordinance to bring it into compliance with the Communications Act, rather than direct conflict with it. He says that he will have to see how the city will responds and address this portion of the matter.

By way of background, you may remember that two weeks ago we reported that ARRL General Counsel Christopher D. Imlay, W3KD, had written to Midwest City's political leaders. Imlay letter stated categorically that the city had absolutely no legal ground on which to enact or enforce its ordinance. He went on to state that Midwest City's ordinance 27-3(9), which purports to regulate RFI is preempted on its face by federal oversight and is therefore the city's ordinance is null and void. He also expressed his hope that it will not be necessary to submit the Midwest City ordinance to the FCC by way of a Request for a Declaratory Ruling but warned that would be the ARRL's planned course of action unless the ordinance is rescinded.

So far Midwest City has refused to comply with Imlay's demand to withdraw the RFI ordinance. But in his letter retracting the citation issued to

Box, Midwest City Assistant City Attorney Randal Homburg says that in the event there are future complaints from any citizen about a neighbor's use of these licensed devices, the city will direct the complaining party to file their complaints with the FCC. (K5DBX via QRZ.com, ARNewsline(tm), ARRL)

**

RADIO POLITICS: ARRL BOD MEETING HIGHLIGHTS

Some highlights from the recent ARRL Board of Directors Meeting held in Windsor, Connecticut. Of major concern to ham radio was a report from General Counsel Chris Imlay, W3KD, that the recently released National Broadband Plan could affect the amateur spectrum near 2.3 GHz. In hisd report W3KD noted that nothing is sacred and even spectrum occupied by the Department of Defense is being challenged.

On a more positive note, ARRL Legislative Consultant John Chwat reported that his office had received more than 2400 letters from amateurs supporting HR 2160 and S 1755. He noted that there are only a few more weeks left in the 111th Congress and that the ARRL must continue efforts its efforts to have the House consider these bills. He also reported on the progress of legislation concerning the tax deduction for personal vehicle mileage on behalf of charitable organizations and the ARRL's efforts to avoid impact on mobile operating in distracted-driving legislation.

The complete Minutes of the 2010 Second Meeting of the ARRL Board of Directors are available on the ARRL Web site. Its at www.arrl.org. (ARRL)

**

RADIO LAW: MONTGOMERY ALABAMA BANS NON EMERGENCY MOBILE COMMS

Hams operating mobile in Montgomery, Alabama, have won a rather narrow partial exclusion to the city's tough new distracted driver law, but only during emergencies. This after the Montgomery City Council passes an ordinance making hand-held cell phone use, including texting while driving a secondary offense.

Once the distracted driving ordinance takes effect in the coming weeks, a driver would have to violate one of the primary rules of the road, such as speeding or running a stop sign while using a cellphone before he or she could be cited for distracted driving.

The ordinance does allow for some exceptions. These include someone using their cell phone to report a traffic accident or a crime. Emergency personnel, employees of utility companies and an operator of an amateur radio are also excluded from the new ordinance, but only as long as their communications devices are being used during an actual emergency.

Whats not clear is whether the new ordinance applies only to cellular and texting devices or to other two way radio gear as well. In other words, would charting on your local repeater with a mic in your hand while driving

be considered a distracted driving practice and subject to the new law? And if it does, how would a police officer be able to determine if the ham radio was or was not of an emergency nature let alone what constitutes an emergency in any given instance. (montgomeryadvertiser.com)

RADIO ACCIDENTS: HIGH WINDS FELL WWVA TOWERS

One of the nations legendary AM broadcast stations was taken off the air on Wednesday, August 4th by the fury of Mother Nature. At about around 4 in the afternoon all three of Wheeling West Virginia's WWVA broadcast towers were knocked down due to severe storms and winds in excess of 70 mph. Weather experts say wind speeds at the top of the 400 foot towers could have been in excess of 100 mph at the time of the incident.

WWVA first began broadcasting in at 2:00 a.m. on December 13, 1926 using a home-built 50-watt transmitter in the basement of the home of inventor John Stroebel. One week earlier, the Federal Communications Commission had granted a broadcast license on 860 kHz to the radio station WWVA. In May 1941, the FCC moved WWVA to 1170 kHz, and in August of that same year, granted the ultimate power for AM stations of 50,000 watts and making it the most powerful AM station in the entire state of West Virginia.

In reality, the stations three tower directional array is located in near-by St. Clairsville, Ohio with its studio in Wheeling. According to a statement on the stations website, engineering crews are working to get some temporary antennas in place as soon as possible, so the station can return the programming to the 1170 signal. In the meantime, WWVA's programming can be heard on the 1400 kHz signal of its sister station WBBD which normally plays Adult Standards.

WWVA is currently owned by Clear Channel Communications. Images of the fallen array are on line at tinyurl.com/ towersdown (WWVA.com, Wikipedia)

THE SOCIAL SCENE: SWODXA DINNER MOVES TO NEW LOCATION FOR 2011

Turning to the ham radio social scene, 'Southwest Ohio DX Association president Don DuBon, N6JRL, has announced that 26th annual DX Dinner will be held on Friday, May 20, 2011in conjunction with Dayton Hamvention. The new venue for this longtime gathering will be the Dayton Marriott located at 1414 S. Patterson Boulevard. DuBon says that the Marriott has been recently remodeled and has a much larger capacity than the previous location. More information is on-line at www.SWODXA.org. (OPDX)

**

THE SOCIAL SCENE: THIRD ANNUAL ASIA PACIFIC DX CONVENTION NOV. 5 - 7

The 3rd Asia Pacific DX Convention or APDXC will be held at the Osaka International House in Osaka, Japan, between November 5th and the 7th. Presentations will be conducted in English and will include

discussions on some recent DXpeditions along with technical discussions. There will also be an opportunity to join a tour to visit the Icom factory and participate in a technical session led by the Icom High Frequency radio design team. Program details and updates will be posted on line at www.apdxc.org as they become available. (OPDX)

**

RADIO BUSINESS: CQ VHF MAGAZINE INTRODUCES NEW WEB DESIGN

And continuing its company-wide update of its magazine websites, CQ Communications, Inc. has announced the launch of a new and easier-to-navigate website for CQ VHF magazine. Like the recently updated sites for WorldRadio Online and Popular Communications, the new CQ VHF site features a cleaner look and a streamlined user interface to make it quicker and easier for visitors to find what they are looking for.

The CQ VHF Website update coincides with posting of the highlights for the Summer 2010 issue. Current highlights include sample pages in full-color layout. This to give prospective readers the ability to see what the magazine itself looks like in print. Also on the updated site are segments of previous issues reaching back to 2006.

CQ VHF is a quarterly magazine edited by Joe Lynch, N6CL devoted to "Ham Radio Above 50 MHz." First published in 1996, it combines articles designed for newcomers with historical and technical features best appreciated by more experienced VHF operators. You can browse the new web layout at www.cq-vhf.com. (CQ Publishing)

CHANGING TECHNOLOGY: NZ ATV TO BE FORCED TO GO DIGITAL

Digital Amateur Television is coming to New Zealand, but not necessarily because the Kiwi ham community wants to make the change. Jim Meachen, ZL2BHF, is here with the details:

--

Hams down here in New Zealand will soon be forced to go digital if they wish to continue Amateur Fast Scan Television operations. This after our nations government regulators announce that all analogue modulated TV transmissions in the VHF and UHF broadcast bands, which include Channel 39 used by ham

radio, will close down in March 2015, or at some earlier date. At that time the upper end of the New Zealand UHF television allocation will be cleared of television, so that the vacated spectrum can be used for next-generation mobile communications.

One consequence of these decisions is that the existing television transmissions will need to convert to digital so as to fit into about half of the present spectrum, requiring that their transmission parameters need to be more closely defined than at present. For the Amateur Television service this means that each Radio License for analogue-modulated TV needs to be replaced by a Spectrum License for analogue-modulated TV. As part of the process, our government telecommunications regulator has cancelled all of the existing Radio Licenses for Channel 39 TV Repeaters. Operators of Channel 39 TV Repeaters need to close them down to avoid receiving an Infringement Notices from the regulatory agency.

Those wishing to operate their analogue-modulated Channel 39 ATV repeaters between now and the 2015 Digital TV Switch-Over, will be required to apply for a Spectrum License. However this Spectrum License for analog ATV transmitters will only exist until the Analogue shut down date. Ham Radio access to New Zealand Channel 39 which runs from 614 to 622 MHz was made by footnote to the nations telecommunications regulations many years ago when a chunk of the 432 MHz band was taken from the amateur radio service.

For the Amateur Radio Newsline, Im Jim Meachen, ZL2BHF, in Auckland

--

At airtime, its not known how many of the nations Amateur Television Repeaters will apply for a new Spectrum License to at least temporarily keep their analog systems operational and on the air. (NZART, ZL2BHF)

HAM RADIO IN SPACE: AO-51 BACK IN SERVICE AFTER OUTAGE

Turning to ham radio space related matters, AMSAT Vice-President of Operations, Drew Glasbrenner, KO4MA, reports that after a brief outage aboard AO-51 reported on Saturday, July 31 that the ham radio satellite had been restored to service. The 145.92 slash 435.300 repeater was set to run with the 67 Hz tone required to activate the satellite. Power output was reported as 740 milliwatts. (ANS)

**

HAM RADIO IN SPACE: AMSAT UK SPACE COLLOQUIOM VIDEOS ON-LINE

Videos of the presentations given at the recent 25th AMSAT-UK International Space Colloquium are now available on the web courtesy of the British Amateur Television Club. This includes a short video produced by the BATV group showing how club members go about covering events such as the colloquium using a lot of pro-sumer grade audio and video gear to bring you close to broadcast quality pictures and sound. These productions can be viewed and download them at www.batc.tv. Simply click on the 'Film

Archive' icon and then select an 2010 AMSAT video. (GB2RS, Southgate)

**

WORLDBEAT: EUROPE HAMS TOLD TO LISTEN FOR CHURCHERS ON 10 METER FM

Amateurs and SWL's across Europe are being asked to keep an ear on or about 28.265 FM. This for transmissions believed to be coming from churches with transmitters capable of delivering a signal strength well over S-9. Reception reports and all other information should be sent to the IRTS Intruder Watch Coordinator Ger McNamara, EI4GXB. His e-mail address is ei4gxb (at) gmail (dot) com. (IRTS)

**

THE CONTREST CORNER: ICOM UK TO HOST CONTEST UNIVERSITY UK IN OCTOBER

From the radiosports desk cones word that Icom UK will again be sponsoring Contest University UK on Saturday October 9th, This, in conjunction with the 2010 RSGB Convention, which will be held at the new venue of Horwood House near Milton Keynes.

Now in its 3rd year, Contest University UK is based on the highly successful international format that has seen many radio amateurs throughout the world learn about this exciting facet of amateur radio from experienced practitioners. As such it's a place where European hams can learn all the skills and secrets to start their journey in becoming a contester, and learn some of the secrets to stay ahead of competitors.

If you have any questions regarding Contest University UK, please contact course director Mark
Haynes, M0DXR atby e-mail to mark.haynes (at) yahoo (dot) co (dot) uk. (GB2RS)

DX

In DX, word that YJ0VK will be the call of the upcoming DXpedition to Vanuatu. The team is made up of four Australian hams who will be operating from August 27th through to September 2nd. on the High Frequency bands from Vanuatu's main Island of Efate. Special attention will be paid to the WARC bands. More information along with QSL routing is available on line at yj0vk.vkham.com

FK8IK, will be on the Chesterfields Islands as part of a scientific expedition through August 19th. Look
for him to be active during his spare time on 80 through 10 meters using CW with 100 watts into various dipoles. QSL only via his home address of P.O. Box 14639, 98803 Noumea, New Caledpnia.

EA4DB is reportedly operating from the Seychelles as S79DB. Modes used are CW, SSB, RTTY and PSK on 40 through 10 meters. QSL to his home call either direct or electronically via Logbook to the World or eQSL.

IW0QO, is working from portable 9A from Losinj Island. He should be there through August 18th. QSL via his home callsign either direct or via the bureau.

DK2MT plans to be active stroke F from Oleron Island until the 20th August. If you make contact. QSL via his home DK2MT direct or via the bureau.

Lastly, W2GD, will be active from Aruba as P40W between November 22nd and December 1st. His operation will include the CQWW DX CW Contest on November 27th and 28th as a Single-Op All-Band entry. Operations outside of the contest will be on 160, 30, 17 and 12 meters as time permits. QSL via Logbook of the World or direct to N2MM. Logs will be loaded on Logbook of the World on his return to
the USA.

THAT FINAL ITEM: FIRST TUBSAT TO BE MUSIC SAT

National Public Radio says that one of the first of the do it yourself low orbit satellite kits from Interorbital Systems has been purchased by professional astronomer. Alex Antunes says that he will use it to create natures own music from space.

As reported a few weeks ago here on Amateur Radio Newsline, California-based Interorbital Systems, is offering a personal satellite kit for $8000 called TubeSat that includes a ride into space. Now in an N-P-R interview Antunes says that the sun interacts with the Earth's magnetic field in the ionosphere and causes all sorts of activity. He says that his goal is to use his satellite to put something in orbit to convert that interaction directly to sound data so we can hear it.

The first TubeSats along with an amateur radio CubeSat are currently slated to launch on an Interorbital Neptune 30 rocket from Tonga at the end of this year. You can listen to the NPR interview with astronomer Alex Antunes at tinyurl.com/musicsat (NPR)

Read what others are saying about Checkmate!

"You have got to be the biggest butt fucking moron in this place.
You use socks and then admit to it? What the fuck is the point?"

-Wildhare, dazed and confused

"You can sit there all you want and spit out all the denial you can
muster, it still doesn?t change the fact that you are the current
king shit of the puppeteers in this group."

-Ragnar, blinded by the light

>to do with OS/2, dizzy?

Classic erroneous presupposition.

>1444> You don't feel that you've done anything for OS/2, tholen?
>
>Non sequitur.

Incorrect.

>Your question was about where OS/2 would be, dizzy,
>not about whether I've done anything for it.

Err, "where would it be" as in it's status in the world, tholen.

Shirley, you're not kooky-enough to think this is about a physical
location?

Of course, we know that your kooky tholing, your ridiculous
interpretations and accusations and evasions, are not bound by reason
or logic, don't we tholen?

>Having memory problems, dizzy?

Not at all, but what does your question have to do with OS/2, tholen?

Perhaps, instead of just tholing, you could explain how your
activities here advance the OS/2 cause, tholen.

>1444> Perhaps you feel that your kooky tholing has mitigated any
>1444> good you've done?
>
>Just because I've endured your kooky postings doesn't mitigate
>anything, dizzy.

Suffering from reading comprehension problems, tholen? It's your
kookery, and how it might affect your advocacy of OS/2, that is at
issue, here.

>1444> The only thing obvious was that your answer would be kooky,
>1444> tholen.

>
>Interesting that you recognize that your effect on where OS/2
>would be is "kooky", dizzy.

I am not responsible for your decision to kook-out when you reply to
me (and others), tholen.

dizzy writes:

1445> Newsgroups: rec.radio.amateur.policy,comp.os.os2.advocacy

1445> tholen tholed:

What was allegedly endured while writing, dizzy?

1445> Classic erroneous presupposition.

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, dizzy?

1445> Incorrect.

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, dizzy?

1445> Err, "where would it be" as in it's status in the world, tholen.

And its status in the world would be the same as without you, dizzy.
Still suffering from reading comprehension problems, dizzy? How
many more times will I need to answer the question before it finally
sinks in, dizzy?

1445> Shirley, you're not kooky-enough to think this is about a
physical
1445> location?

Who is "Shirley", dizzy? There is nobody in this newsgroup using
that alias. Or are you suffering from attribution problems, dizzy?

1445> Of course, we know that your kooky tholing,

All readers of the newsgroup have had to endure your kooky postings
for years, dizzy. Over 1400 of them and you're still going strong
with your kooky postings.

1445> your ridiculous interpretations and accusations and evasions,

What does your classic erroneous presupposition have to do with OS/2,
dizzy?

1445> are not bound by reason or logic,

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, dizzy?

1445> don't we tholen?

What does your question have to do with OS/2, dizzy?

1445> Not at all,

Then why are you having trouble remembering your question and
the answer to it already provided, dizzy?

1445> but what does your question have to do with OS/2, tholen?

You should know, dizzy, given that it was your question and my
answer to it that you forgot. Having trouble remembering what
your question had to do with OS/2, dizzy? Still having memory
problems, dizzy?

1445> Perhaps, instead of just tholing,

I can't stop enduring your kooky postings until you stop making
your kooky postings, dizzy.

1445> you could explain how your
1445> activities here advance the OS/2 cause, tholen.

The same way your activities here advance the OS/2 cause, dizzy.
How long will it be before you forget that I've answered your
latest question about OS/2, dizzy?

1445> Suffering from reading comprehension problems, tholen?

What does your ridiculous question have to do with OS/2, dizzy?

1445> It's your kookery,

I flatly deny making your postings, dizzy.

1445> and how it might affect your advocacy of OS/2, that is at
1445> issue, here.

The same way it might affect your advocacy os OS/2, dizzy.
How long will it be before you forget that I've addressed your
latest issue about OS/2, dizzy?

1445> I am not responsible for your decision to kook-out when you
reply to
1445> me (and others), tholen.

What does your classic erroneous presupposition have to do with
OS/2, dizzy? Rather ironic that you should talk about kook-outs
considering the over 1400 incidents of your own, dizzy.

And it is no wonder that the mainstream, leftist press has not reported that a New York businessman has proposed building a gay bar across the street from the proposed muslim center.
The imam who wants to build this new center said that he disapproves of such a plan because having a gay bar across the street would "offend the sensibilities" of the muslims.

TROY — Amateur radio enthusiasts are abuzz on the airwaves over a traffic ticket Steve Bozak received Sunday in Troy as he talked to his buddies over the very same frequency.

Bozak, who owns an antenna company and has been using so-called “ham” radios for 34 years, was pulled over at the intersection of 15th and Hoosick streets while on his way to breakfast with fellow enthusiasts of the technology. He was slapped with a ticket for talking on a cell phone while driving, and he said Officer Mark Millington dismissed his claims that the radio was not in fact a telephone.

“He assured me that I could not be speaking on that cell phone while I was driving,” said Bozak, who lives in Clifton Park. “I mentioned to him politely that it wasn’t a cell phone but an amateur radio. He assured me that it was all the same.”

The section of New York’s vehicle and traffic law Bozak was cited for violating, 1225-c, requires a phone to be “in the immediate proximity” of the driver’s ear. It defines the types of communication devices it applies to as ones “interconnected to a public switched telephone network … provided by a commercial mobile radio service.”

On its face, the statute does not appear to refer to devices like a ham radio, which transmits its signal across the same airwaves as devices used by emergency personnel to communicate with each other and with dispatchers.

Such radios do not require the user to place the device to his or her ear — they are typically played over speakers — and need only be held while the user is actually speaking.

New York is among eight states with a law banning the use of cell phones while driving. Washington’s law specifically excludes ham operators, who must first be licensed by the government to use the airwaves.

Bozak, who became licensed in 1976, said he believes the bulk of users have the devices in their vehicles. He said many are up in arms over the ticket, and some were audible on a scanner Wednesday voicing their displeasure over their radios — many of them while driving.

“I don’t know how many cops I’ve been around in how many different states, but nobody ever said a word to me,” said one man whose job takes him on the road.

Ultimately, a Troy City Court judge will decide whether the ticket issued to Bozak is acceptable under the state's law.

Sgt. Terry Buchanan, the Police Department's spokesman who worked traffic patrols for years, said he doesn't recall this issue coming up in the past. He said the department would have no comment on the matter because it is still pending in court.

Bozak is scheduled to appear on June 23, and he said more than a dozen fellow radio enthusiasts plan on being there with him.

He faces a $100 fine, according to the statute.

"I'll have my day in court, and we'll see how it goes," he said. "But I certainly have every intention of pushing this politely, and through the right methods, to get it resolved."

The date may be pushed back because Bozak has requested a supporting deposition from Millington, who is typically assigned to Troy's public schools and rarely works traffic patrol.

Bozak wants Millington to detail what happened and explain how he was breaking the law.

"He's going to have to prove that I was on a cell phone, which is going to be hard to do," he said. "I wasn't on a cell phone."

Dave Canfield can be reached at 270-1290 or by e-mail at dcanfield

Dude, don't you think it's about the same thing?

Right's right and wrong is wrong. If he was distracted then he shouldn't be
on the radio.

I pull over or use a speakerphone. So should everyone!!

He was slapped with a ticket for talking on a cell phone while driving, and he said Officer Mark Millington dismissed his claims that the radio was not in fact a telephone.

He assured me that I could not be speaking on that cell phone while I was driving, said Bozak, who lives in Clifton Park. I mentioned to him politely that it wasnt a cell phone but an amateur radio. He assured me that it was all the same.

The section of New Yorks vehicle and traffic law Bozak was cited for violating, 1225-c, requires a phone to be in the immediate proximity of the drivers ear. It defines the types of communication devices it applies to as ones interconnected to a public switched telephone network provided by a commercial mobile radio service.

On its face, the statute does not appear to refer to devices like a ham radio, which transmits its signal across the same airwaves as devices used by emergency personnel to communicate with each other and with dispatchers.

Such radios do not require the user to place the device to his or her ear they are typically played over speakers and need only be held while the user is actually speaking.

New York is among eight states with a law banning the use of cell phones while driving. Washingtons law specifically excludes ham operators, who must first be licensed by the government to use the airwaves.

Bozak, who became licensed in 1976, said he believes the bulk of users have the devices in their vehicles. He said many are up in arms over the ticket, and some were audible on a scanner Wednesday voicing their displeasure over their radios many of them while driving.

�I don�t know how many cops I�ve been around in how many different states, but nobody ever said a word to me,� said one man whose job takes him on the road.

Ultimately, a Troy City Court judge will decide whether the ticket issued to Bozak is acceptable under the state�s law.

Sgt. Terry Buchanan, the Police Department�s spokesman who worked traffic patrols for years, said he doesn�t recall this issue coming up in the past. He said the department would have no comment on the matter because it is still pending in court.

Bozak is scheduled to appear on June 23, and he said more than a dozen fellow radio enthusiasts plan on being there with him.

He faces a $100 fine, according to the statute.

�I�ll have my day in court, and we�ll see how it goes,� he said. �But I certainly have every intention of pushing this politely, and through the right methods, to get it resolved.�

The date may be pushed back because Bozak has requested a supporting deposition from Millington, who is typically assigned to Troy�s public schools and rarely works traffic patrol.

Bozak wants Millington to detail what happened and explain how he was breaking the law.

�He�s going to have to prove that I was on a cell phone, which is going to be hard to do,� he said. �I wasn�t on a cell phone.�

TROY Amateur radio enthusiasts are abuzz on the airwaves over a
traffic ticket Steve Bozak received Sunday in Troy as he talked to his
buddies over the very same frequency.

"Bozak is scheduled to appear on June 23..."

Uh, dummy? This is seven weeks later.

[full snip]

I've been stopped and ticketed numerous times in NYC when
using a transceiver.

I appealed the tickets, bringing along a copy
of my ham ticket.

Usually the judge dismissed them.

Roger Wiseman has recently filed a civil suit against an adult book store that is across the river from his abode on Glen Dale Avenue.

The crux of the lawsuit is that Roger purchased, in good faith, a reproduction vinyl likeness of Pamela Anderson and that the seller maintained that the reproduction would "meet his every fantasy."

Roger brought the $300 likeness home and proceeded to ply her with candles, wine, and song.

Roger became disgruntled when he realized that "Pamela's" oral orifice was much too large to accommodate his miniscule member and, enraged that he had been "ripped off", Roger returned the likeness the following morning.

He demanded his money be returned in full.

The proprietor told Roger that there was no money back guarantee and that he was not going to see a refund.

Roger has since contacted an attorney in hopes of obtaining a settlement.

>
>So since you have to hold it to use the speakerphone, how does a cop
>know if I'm talking on it not using the speakerphone or if I'm talking
>on it using the speakerphone???

Talking on a cell phone while driving is distracting. Hands-free
is not an excuse - and it's not safer. There have been studies to
demonstrate this. If hands-free operation of a cellphone is legal
and handsful operation is not, it's because lawmakers are either
idiots or they want to continue talking on their cell phones while
driving. Try brain-free cellphone operation (it's called putting
the cell phone on "silent ringing" (*NOT* vibrate) and letting voice
mail take messages which you can handle when you reach your destination
or stop for gas or a restroom break).

>I'm very sure the New York cops would still give me a ticket for using
>a speakerphone since it's not hands free.
>
>And why is a speakerphone considered safer when you still have to hold
>it???

Hold it or not hold it, it's still not safe if it's a cellphone.

>I'll tell you why. It's safer because it's just like a microphone. The
>same thing on ham radios and cb radios.

I suspect the nature of the conversation has a lot more to do with
why ham radios and cb radios are safer, if, in fact, that's true.
I don't think there have been any studies investigating this for
ham radios and cb radios.

>I don't use my cellphone either way while driving, yet. I did buy a
>hands-free device for mt cellphone, but you have to use your hands way
>more often for those than you do for either of the previous two ways.
>So why are those considered more safer when you have to reach over and
>push a LOT more buttons than you would just calling normally on your
>cellphone or using the speakerphone, and then after pushing a LOT
>moree buttons whilw using the "handsfree cellphone device" , you also
>have to use your hands to press the syop button on your cellphone to
>hang up your cellphone to avoid being charged for minutes you're nor
>using after the call is over.

>
>How is that any more safer???

Handsfree on cell phones is not safer and it should be illegal to use it while driving.

Some cell phones with bluetooth allow you to originate a phone call with your cell phone in your hip pocket (so you can't press *ANY* buttons on the phone, or get it out of your pocket without removing your seat belt) by pushing a button on your earpiece, speak the name of who you want to call (this required voice training ahead of time), talk, then push a button on your earpiece to hang up. This is not safer, but it's a much better approximation to real hands-free.

The cell phone law is specific to cell phones. However..

New York State has a law that does not allow you to use a hand-held mobile telephone while you drive. If you use a hand-held mobile telephone while you drive, except to call 911 or to contact medical, fire or police personnel about an emergency, you can receive a traffic ticket and pay a maximum fine of $100 and mandatory surcharges and fees of $80.

Ham radio and CB users are charged with..

Reckless driving if they intefere with other drivers.

"Reckless driving tickets in New York are quite serious for the following reasons:

* They are criminal (misdemeanor) charges where technically you could be sentenced to jail
* They carry five points on your New York driver license
* A conviction will likely result in your auto insurance rates being increased
* Substantial fines will be imposed

The good news is that reckless driving tickets in New York City are not heard at the Traffic Violations Bureau. Therefore, a favorable outcome via a plea bargain can often be negotiated to avoid a criminal record, lessen points and keep your auto insurance from being raised. Dismissal of these tickets is also possible when there is a defect in the original ticket filed with the court."

Then they should also be arresting all the truckers, all the taxi
drivers, all the schoolbus drivers, and arresting all the police
officers for "reckless driving" because they were talking on their two
way radios while driving.

And the New York state law you quoite conflicts with federal law and
conflicts with the purpose of federal law. Here is the text of federal
law ewhich should show you the intention of federal law and the New
York state law you quote conflicts with that federal intention.

I have capitalzed some relevant parts.
:

[e]ven where Congress has not completely displaced state regulation in
a specific area, state law [may be] nullified to the extent that it
actually conflicts with federal law. Such a conflict arises when
"compliance with both federal and state regulations is a physical
impossibility,"...or when state law "stands as an obstacle to the
accomplishment and execution of the full purposes and objectives of

Congress."
Furthermore, "[f]ederal regulations have no less preemptive effect than federal statutes."

▪ 9. The amateur service is regulated extensively under Part 97 of the Commission's Rules, 47 C.F.R. Part 97. As we have stated in the past:
[T]here is...a strong federal interest in promoting amateur communications. Evidence of this interest may be found in the comprehensive set of rules that the Commission has adopted to regulate the amateur service.
Those rules set forth procedures for the licensing of stations and operators, frequency allocations, technical standards which amateur radio equipment must meet and operating practices which amateur operators must follow. We recognize the Amateur Radio Service as a voluntary, noncommercial communication service, particularly with respect to providing emergency communications. Moreover, the Amateur Radio Service provides a reservoir of trained operators, technicians and electronic experts who can be called on in times of national or local emergencies. By its nature, the Amateur Radio Service also provides the opportunity for individual operators to further international goodwill.

This federal interest in the amateur service is also reflected in Section 97.1 of our rules, 47 C.F.R. § 97.1, which provides that the amateur service exists to "continu[e] and exten[d]...the amateur's proven ability to contribute to the advancement of the radio art." This regulatory purpose is consistent with the Communications Act requirement that "[i]t shall be the policy of the United States to encourage the provision of new technologies to the public."

▪ 10. The strong federal interest in the preservation and advancement of the amateur service is also demonstrated by Congress's recent recognition of the goals of the amateur service in a "Sense of Congress" provision in which Congress strongly encouraged and supported the amateur service. Congress therein directed all Government agencies to take into account the valuable contribution of amateurs when considering actions affecting the amateur radio service.
WE BELIEVE THAT THE STRONG FEDERAL INTEREST IN SUPPORTING THE EMERGENCY SERVICES PROVIDED BY AMATEURS CANNOT BE FULLY ACCOMPLISHED UNLESS AMATEUR OPERATORS ARE FREE TO OWN AND OPERATE THEIR STATIONS TO THE FULLEST EXTENT PERMITTED BY THEIR LICENSES AND ARE NOT UNREASONABLY HAMPERED IN THEIR ABILITY TO TRANSPORT THEIR RADIO TRANSMITTING STATIONS ACROSS STATE AND LOCAL BOUNDARIES FOR PURPOSES OF TRANSMITTING AND RECEIVING ON AUTHORIZED FREQUENCIES. Indeed, as a result of advances in technology making smaller, lighter weight radios commercially available, the Commission has expressly amended its rules to facilitate and encourage unrestricted mobile amateur operations. As we noted in a recent rule making proceeding to modify the rules governing the amateur radio service,
In the age of the microprocessor and the integrated circuit [amateur]

equipment is highly portable. It is common for amateur operators to carry hand-held transceivers capable of accessing many local repeaters in urban areas and also capable of reasonably good line-of-sight communication. It appears that the concept of fixed station operation no longer carries with it the same connotation it did previously. For this reason, we propose to delete current rules that relate to station operation away from the authorized fixed station location.
As a consequence of these changes, the rules now expressly authorize amateur service operation "at points where the amateur service is regulated by the FCC," that is, at fixed and mobile locations throughout the United States. Furthermore, the Commission's Rules do not in any way prohibit an amateur service transceiver from having out-of-band reception capability.

▪ 11. Against this background, WE CONCLUDE THAT CERTAIN STATE AND LOCAL LAWS, AS DESCRIBED BELOW, CONFLICT WITH THE COMMISSION'S REGULATORY SCHEME DESIGNED TO PROMOTE A STRONG AMATEUR SERVICE. Scanner laws that prohibit the use of transceivers that transmit and receive amateur frequencies because they also receive public safety, special emergency or other radio service frequencies frustrate most legitimate amateur service mobile operations through the threat of penalties such as fines and the confiscation of equipment. As noted by ARRL, virtually all modern amateur service equipment in use today can receive transmissions on the public safety and special emergency frequencies at issue, and THE MAJORITY OF AMATEUR STATIONS ARE OPERATED IN A MOBILE FASHION. Consequently, the mobile operations of the vast majority of amateurs are affected by such laws. In addition, the record statements by amateurs that the costs would be substantial to modify existing transceivers are unchallenged.THE SCANNER LAWS, THEN, ESSENTIALLY PLACE THE AMATEUR OPERATOR IN THE POSITION OF EITHER FOREGOING MOBILE OPERATIONS BY SIMPLY AVOIDING AVOIDING ALL USE OF THE EQUIPMENT IN VEHICLES OR OTHER LOCATIONS SPECIFIED IN THE LAWS, OR RISKING FINES, OR EQUIPMENT CONFISCATION. THIS VERY SIGNIFICANT LIMITATION ON AMATEURS OPERAATING RIGHTS RUNS COUNTER TO THE EXPRESS POLICIES OF BOTH CONGRESS AND THE COMMISSION TO ENCOURAGE AND SUPPORT AMATEUR OPERATIONS, INCLUDING MOBILE OPERATIONS, AND IMPERMISSABLY ENCROACHES ON FEDERAL AUTHORITY OVER AMATEUR OPERATORS. IT CONFLICTS DIRECTLY WITH THE FEDERAL INTEREST IN AMATEUR OPERATORS BEING ABLE TO TRANSMIT AND RECIEVE ON AUTHORIZED AMATEUR SERVICE FREQUENCIES.

▪ 12. For these reasons, we find it necessary to preempt state and local laws that effectively preclude the possession in vehicles or elsewhere of amateur service transceivers by amateur operators merely on the basis that the transceivers are capable of reception on public safety, special emergency, or other radio service frequencies, the reception of which is not prohibited by federal law. We find that, under current conditions and given the types of equipment available in the market today, SUCH LAWS THAT PREVENT AMATEUR OPERATORS FROM USING THEIR MOBILE STATIONS TO THE FULLEST EXTENT PERMITTED UNDER THE COMMISSION'S RULES AND THUS ARE IN CLEAR CONFLICT WITH FEDERAL

OBJECTIVES OF FACILITATING AND PROMOTING THE AMATEUR RADIO SERVICE. We recognize the state law enforcement interest present here, and we do not suggest that state regulation in this area that reasonably attempts to accommodate amateur communications is preempted. This decision does not pertain to scanner laws narrowly tailored to the use of such radios, for example, for criminal ends such as to assist flight from law enforcement personnel. We will not, however, suggest the precise language that must be contained in state and local laws. We do find that state and local laws must not restrict the possession of amateur transceivers simply because they are capable of reception of public safety, special emergency or other radio service frequencies, the reception of which is not prohibited by federal law, and that a state or local permit scheme will not save from preemption an otherwise objectionable law. Finally, we note, as stated by APCO in comments filed previously in this proceeding, that any public safety agency that desires to protect the confidentiality of its communications can do so through the use of technology such as scrambling or encryption.

V. CONCLUSION

▪ 13. We hold that state and local laws that preclude the possession in vehicles or elsewhere of amateur radio service transceivers by amateur operators merely on the basis that the transceivers are capable of the reception of public safety, special emergency, or other radio service frequencies, the reception of which is not prohibited by federal law, are inconsistent with the federal objectives of facilitating and promoting the amateur radio service and, more fundamentally, with the federal interest in amateur operator's being able to transmit and receive on authorized amateur service frequencies. We therefore hold that such state and local laws are preempted by federal law.

▪ 14. Accordingly, IT IS ORDERED that the request for a declaratory ruling filed by the ARRL IS GRANTED to the extent indicated herein and in all other respects IS DENIED.

FEDERAL COMMUNICATIONS COMMISSION

William F. Caton
Acting Secretary

2> the precise language that must be contained in state and local
laws.
2> We do find that state and local laws must not restrict the
possession
2> of amateur transceivers simply because they are capable of
reception
2> of public safety, special emergency or other radio service
2> frequencies, the reception of which is not prohibited by federal
law,
2> and that a state or local permit scheme will not save from
preemption
2> an otherwise objectionable law. Finally, we note, as stated by APCO
in
2> comments filed previously in this proceeding, that any public
safety
2> agency that desires to protect the confidentiality of its
2> communications can do so through the use of technology such as
2> scrambling or encryption.

2> V. CONCLUSION

2> ? 13. We hold that state and local laws that preclude the
possession
2> in vehicles or elsewhere of amateur radio service transceivers by
2> amateur operators merely on the basis that the transceivers are
2> capable of the reception of public safety, special emergency, or
other
2> radio service frequencies, the reception of which is not prohibited
by
2> federal law, are inconsistent with the federal objectives of
2> facilitating and promoting the amateur radio service and, more

2> fundamentally, with the federal interest in amateur operator's
being
2> able to transmit and receive on authorized amateur service
2> frequencies. We therefore hold that such state and local laws are
2> preempted by federal law.

2> ? 14. Accordingly, IT IS ORDERED that the request for a declaratory
2> ruling filed by the ARRL IS GRANTED to the extent indicated herein
and
2> in all other respects IS DENIED.

2> FEDERAL COMMUNICATIONS COMMISSION

2> William F. Caton
2> Acting Secretary

What does any of that have to do with OS/2, radioguy?

3> Newsgroups:
rec.radio.amateur.policy,comp.os.os2.advocacy,alt.usenet.kooks,rec.knives,alt.alien.vampir
e.flonk.flonk.flonk

3> Again, any cop who writes a ham radio operator a "distracted
driving
3> ticket" for ttalking on a ham radio while mobile is a cop who is
3> violating federal law and in violation of federal law.

3> What gives the cop the right to commit federal crimes??? If anyone
3> else committed a federal crime, the cops and judges sure would put
3> them in jail in a hurry, so why can a cop do it? Answer: He legally
3> can't.

3> e]ven where Congress has not completely displaced state regulation
in
3> a specific area, state law [may be] nullified to the extent that it
3> actually conflicts with federal law. Such a conflict arises when
3> "compliance with both federal and state regulations is a physical
3> impossibility,"...or when state law "stands as an obstacle to the
3> accomplishment and execution of the full purposes and objectives of
3> Congress."
3> Furthermore, "[f]ederal regulations have no less preemptive effect
3> than federal statutes."

3> ? 9. The amateur service is regulated extensively under Part 97 of
3> the
3> Commission's Rules, 47 C.F.R. Part 97. As we have stated in the
past:
3> [T]here is...a strong federal interest in promoting amateur
3> communications. Evidence of this interest may be found in the
3> comprehensive set of rules that the Commission has adopted to
3> regulate
3> the amateur service.
3> Those rules set forth procedures for the licensing of stations and

3> operators, frequency allocations, technical standards which amateur
3> radio equipment must meet and operating practices which amateur
3> operators must follow. We recognize the Amateur Radio Service as a
3> voluntary, noncommercial communication service, particularly with
3> respect to providing emergency communications. Moreover, the
Amateur
3> Radio Service provides a reservoir of trained operators,
technicians
3> and electronic experts who can be called on in times of national or
3> local emergencies. By its nature, the Amateur Radio Service also
3> provides the opportunity for individual operators to further
3> international goodwill.

3> This federal interest in the amateur service is also reflected in
3> Section 97.1 of our rules, 47 C.F.R. § 97.1, which provides that
the
3> amateur service exists to "continu[e] and exten[d]...the amateur's
3> proven ability to contribute to the advancement of the radio art."
3> This regulatory purpose is consistent with the Communications Act
3> requirement that "[i]t shall be the policy of the United States to
3> encourage the provision of new technologies to the public."

3> ? 10. The strong federal interest in the preservation and
advancement
3> of the amateur service is also demonstrated by Congress's recent
3> recognition of the goals of the amateur service in a "Sense of
3> Congress" provision in which Congress strongly encouraged and
3> supported the amateur service. Congress therein directed all
3> Government agencies to take into account the valuable contribution
of
3> amateurs when considering actions affecting the amateur radio
3> service.
3> WE BELIEVE THAT THE STRONG FEDERAL INTEREST IN SUPPORTING THE
3> EMERGENCY SERVICES PROVIDED BY AMATEURS CANNOT BE FULLY
ACCOMPLISHED
3> UNLESS AMATEUR OPERATORS ARE FREE TO OWN AND OPERATE THEIR
STATIONS
3> TO THE FULLEST EXTENT PERMITTED BY THEIR LICENSES AND ARE NOT
3> UNREASONABLY HAMPERED IN THEIR ABILITY TO TRANSPORT THEIR RADIO
3> TRANSMITTING STATIONS ACROSS STATE AND LOCAL BOUNDARIES FOR
PURPOSES
3> OF TRANSMITTING AND RECEIVING ON AUTHORIZED FREQUENCIES. Indeed,
as
3> a
3> result of advances in technology making smaller, lighter weight
3> radios
3> commercially available, the Commission has expressly amended its
3> rules
3> to facilitate and encourage unrestricted mobile amateur operations.
3> As
3> we noted in a recent rule making proceeding to modify the rules

3> governing the amateur radio service,
3> In the age of the microprocessor and the integrated circuit
[amateur]
3> equipment is highly portable. It is common for amateur operators to
3> carry hand-held transceivers capable of accessing many local
3> repeaters
3> in urban areas and also capable of reasonably good line-of-sight
3> communication. It appears that the concept of fixed station
operation
3> no longer carries with it the same connotation it did previously.
For
3> this reason, we propose to delete current rules that relate to
3> station
3> operation away from the authorized fixed station location.
3> As a consequence of these changes, the rules now expressly
authorize
3> amateur service operation "at points where the amateur service is
3> regulated by the FCC," that is, at fixed and mobile locations
3> throughout the United States. Furthermore, the Commission's Rules
do
3> not in any way prohibit an amateur service transceiver from having
3> out-
3> of-band reception capability.

3> ? 11. Against this background, WE CONCLUDE THAT CERTAIN STATE AND
3> LOCAL LAWS, AS DESCRIBED BELOW, CONFLICT WITH THE COMMISSION'S
3> REGULATORY SCHEME DESIGNED TO PROMOTE A STRONG AMATEUR SERVICE.
3> Scanner laws that prohibit the use of transceivers that transmit
and
3> receive amateur frequencies because they also receive public
safety,
3> special emergency or other radio service frequencies frustrate most
3> legitimate amateur service mobile operations through the threat of
3> penalties such as fines and the confiscation of equipment. As noted
3> by
3> ARRL, virtually all modern amateur service equipment in use today
can
3> receive transmissions on the public safety and special emergency
3> frequencies at issue, and THE MAJORITY OF AMATEUR STATIONS ARE
3> OPERATED IN A MOBILE FASHION. Consequently, the mobile operations
of
3> the vast majority of amateurs are affected by such laws. In
addition,
3> the record statements by amateurs that the costs would be
substantial
3> to modify existing transceivers are unchallenged.THE SCANNER LAWS,
3> THEN, ESSENTIALLY PLACE THE AMATEUR OPERATOR IN THE POSITION OF
3> EITHER
3> FOREGOING MOBILE OPERATIONS BY SIMPLY AVOIDING AVOIDING ALL USE OF
3> THE

3> EQUIPMENT IN VEHICLES OR OTHER LOCATIONS SPECIFIED IN THE LAWS, OR
3> RISKING FINES, OR EQUIPMENT CONFISCATION. THIS VERY SIGNIFICANT
3> LIMITATION ON AMATEURS OPERAATING RIGHTS RUNS COUNTER TO THE
EXPRESS
3> POLICIES OF BOTH CONGRESS AND THE COMMISSION TO ENCOURAGE AND
SUPPORT
3> AMATEUR OPERATIONS, INCLUDING MOBILE OPERATIONS, AND IMPERMISSABLY
3> ENCROACHES ON FEDERAL AUTHORITY OVER AMATEUR OPERATORS. IT
CONFLICTS
3> DIRECTLY WITH THE FEDERAL INTEREST IN AMATEUR OPERATORS BEING ABLE
TO
3> TRANSMIT AND RECIEVE ON AUTHORIZED AMATEUR SERVICE FREQUENCIES.

3> ? 12. For these reasons, we find it necessary to preempt state and
3> local laws that effectively preclude the possession in vehicles or
3> elsewhere of amateur service transceivers by amateur operators
merely
3> on the basis that the transceivers are capable of reception on
public
3> safety, special emergency, or other radio service frequencies, the
3> reception of which is not prohibited by federal law. We find that,
3> under current conditions and given the types of equipment ...
3> in
3> the market today, SUCH LAWS THAT PREVENT AMATEUR OPERATORS FROM
USING
3> THEIR MOBILE STATIONS TO THE FULLEST EXTENT PERMITTED UNDER THE
3> COMMISSION'S RULES AND THUS ARE IN CLEAR CONFLICT WITH FEDERAL
3> OBJECTIVES OF FACILITATING AND PROMOTING THE AMATEUR RADIO SERVICE.
3> We
3> recognize the state law enforcement interest present here, and we
do
3> not suggest that state regulation in this area that reasonably
3> attempts to accommodate amateur communications is preempted. This
3> decision does not pertain to scanner laws narrowly tailored to the
3> use
3> of such radios, for example, for criminal ends such as to assist
3> flight from law enforcement personnel. We will not, however,
suggest
3> the precise language that must be contained in state and local
laws.
3> We do find that state and local laws must not restrict the
possession
3> of amateur transceivers simply because they are capable of
reception
3> of public safety, special emergency or other radio service
3> frequencies, the reception of which is not prohibited by federal
law,
3> and that a state or local permit scheme will not save from
preemption
3> an otherwise objectionable law. Finally, we note, as stated by APCO

3> in
3> comments filed previously in this proceeding, that any public
safety
3> agency that desires to protect the confidentiality of its
3> communications can do so through the use of technology such as
3> scrambling or encryption.

3> V. CONCLUSION
3>
3> ? 13. We hold that state and local laws that preclude the
possession
3> in vehicles or elsewhere of amateur radio service transceivers by
3> amateur operators merely on the basis that the transceivers are
3> capable of the reception of public safety, special emergency, or
3> other

It should be self-evident to even a child that in this day and age, walking into an airport wearing a shirt festooned with wires, batteries and blinking lights is an extremely BAD idea. Have you never heard of suicide bombers? The fact that the shirt is actually a star trek product is irrelevant. How is the TSA supposed to know at first glance that the shirt is "an official Star Trek product" and not some kind of bomb vest?

Yeah, 25 years ago, nobody would have cared, but circumstances have changed. There are appropriate places to wear such a shirt, but the security line at an airport is most definitely NOT one of those places.

You could go to a toy store and buy a legally-marketed, legally-purchased toy plastic gun, but what do you think would happen if you walked into an airport, or a bank, or a police station with that (admittedly legal) toy gun in your hand? You'd be damn lucky not to get your head blown off on the

spot - and anyone idiotic enough to do such a thing would deserve it if that happened.

It's appalling that you're so stupid that somebody actually has to explain this to you. You have about as much common sense as a pile of rocks.

9> Thats easy Tholen. One just waits in the men's restroom at the
9> Institute for Astronomy.

There is no such institute in the town of Tholen in The
Netherlands, Kd8ctl.

9> Then one sticks their cock thru the hole in
9> the stall wall.

What does your classic erroneous presupposition have to
do with OS/2, Kd8ctl?

9> When one feels another's mouth on their cock then one
9> knows that they are, in fact, receiving oral sex from Tholen.

How does one have oral sex with a town in The Netherlands,
Kd8ctl?

9> What does your ridiculous question have to do with OS/2, Tholen?

I didn't ask any ridiculous question, Kd8ctl, but the question I
did ask has "OS/2" right before the question mark. Suffering from
reading comprehension problems, Kd8ctl?

Hey, Toad, I heard that the inmates in the Taylorville city jail used
YOU as their own personal "doll" before your parents could post your
bail.

.....

Roger knows full what that is like and sympathizes.
When Roger got out of the Glendale jail his butthole was so stretched that
he couldn't fart. He just went fffffft.
Or maybe that happened because Roger spent so much time at the Shipwreck
Lounge with his Lavender Lads.

3007. Re: "Todd" is very stupid and projecting after his jail stay recently so Roger Wiseman goes off teh deep end again!

==> + AMATEUR RADIO AND SCOUTING: K2BSA -- AMATEUR RADIO FUN IN THE
WARM VIRGINIA SUN

<http://drsamgray.smugmug.com/Hobbies/k2bsa-video-tour/13114388_jqU7z#9529642
70_SurNs>
The 2010 National Scout Jamboree -- celebrating the 100th anniversary
of the Boy Scouts of America -- was held July 26-August 4 at Fort AP
Hill in Virginia. According to ARRL Rocky Mountain Division Director
and K2BSA Station Coordinator/Manager Brian Mileshosky, N5ZGT, ham
radio was a big part of the event that attracted more than 43,000
participants from across the nation and around the world. Read more
here
<http://www.arrl.org/news/k2bsa-amateur-radio-fun-in-the-warm-virginia-sun>.

==> + FCC: ARRL AMENDS PETITION TO DENY TO INCLUDE 16 ADDITIONAL RECON
SCOUT APPLICATIONS
```

On August 16, ReconRobotics -- in response to the ARRL's Petition to Deny Applications , filed with the FCC on August 4 -- filed an Opposition to Petition to Deny with the FCC, arguing that the ARRL's Petition is "frivolous." The ARRL's Petition asked the FCC to deny 68 pending Public Safety Pool license applications associated with the ReconRobotics Video and Audio Surveillance System, specifically the Recon Scout device. The Salina (Kansas) Police Department had asked the FCC for a waiver to operate the Recon Scout in the band 433-445 MHz. The FCC returned the waiver request to Salina, noting that the frequency band requested was not consistent with the waiver Order that requires that the first unit licensed to an eligible entity operate in the 436-442 MHz band. Read more here <http://www.arrl.org/news/arrl-amends-em-petition-to-deny-em-to-include-16-additional-recon-scout-applications>.

==> + ON THE AIR: 2010 FIELD DAY LOGS POSTED

The 2010 Field Day logs received list has been posted <http://www.arrl.org/logs-received>. It includes all logs received -- applet, non-applet e-mail and paper. Any changes/corrections/missing inquires should be sent to ARRL Field Day Manager Dan Henderson, N1ND, via e-mail <fdinfo@arrl.org>.

==> + HINTS AND KINKS: LOOP AND HOOK SKYHOOK

Randy Quinton, WQ7Q, of Sammamish, Washington, sent us this idea for a quick emergency antenna. Contact Randy via e-mail <quinton.rhq@comcast.net> for more information

An emergency flexible antenna can greatly extend the performance of a handheld transceiver. The best attachment point to hang the antenna always seems just out of reach. This simple wire hook made from a coat hanger makes it easy to hang and retrieve the antenna.

Using about 18 inches of wire, bend a hook to match the attachment point. Below the hook, form a loop to which the antenna line is tied. Below the loop, bend a downward pointing V-shaped pin with a little elbow on the side to prevent the pin from slipping completely inside the lifting tube (see Figure 1). The hook is lifted by a tube or tube section attached to a pole. Tension on the antenna wire keeps the pin in the tube until the antenna has been placed. The antenna is retrieved by reversing the process (see Figure 2).

Quinton said he keeps a loop and a short section of PVC pipe with tape around in his emergency kit, using it to turn a broom or branch into a lifting pole. As always, don't hang an antenna on electrical wires or anyplace in the vicinity of power lines.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail <h&k@arrl.org> or to ARRL Headquarters, Attn: "Hints and Kinks," 225

Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> + ON THE AIR: EXPANDED RESULTS FOR ARRL INTERNATIONAL DX SSB CONTEST NOW ONLINE

Expended results for the ARRL International DX SSB Contest are now available on the ARRL Web site <http://www.arrl.org/contest-results-articles>. Find close to 100 pages packed with results from around the world and your ARRL Division, including line scores and lots of photos, graphs and charts. You can also read all of the interesting Soapbox comments from the participants and review the Top 10 in every category, tracked since the top of Solar Cycle 23. There were lots of new records set in this contest -- come see how an active Sun affects an all-band DX contest!

==> + TECHNOLOGY: ARRL, TAPR ANNOUNCE 29TH ANNUAL DIGITAL COMMUNICATIONS CONFERENCE

Aficionados of digital communications are gearing up for the 29th annual ARRL/TAPR Digital Communications Conference, September 24-26 near Portland, Oregon. The ARRL/TAPR DCC is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications. Read more here <http://www.arrl.org/news/arrl-tapr-announce-29th-annual-digital-communications-conference>.

==> + SOLAR UPDATE

Tad "For shame the Sun will never show himself <http://www.vcu.edu/engweb/transcendentalism/authors/thoreau/thoreaupoems.html#rain>"
Cook, K7RA, reports: Sunspot numbers and solar flux declined this week, with the average daily sunspot numbers down nearly 17 points to 36.1, and the average daily solar flux down nearly 1 point to 83.6. In the previous week, average daily sunspot numbers had risen nearly 33 points to 53. New sunspot groups appeared on August 11, 13 and 16, but on Tuesday and Wednesday (August 17-18), total sunspot area was one-fifth what it was on August 16, less than one-seventh the area on August 14, and less than one-fourteenth the area of August 12. On August 12, 14, 16 and 18, the daily sunspot number was 50, 31, 39 and 23. Projections for solar flux over the next 10 days -- August 19-28 -- are 81, 80, 80, 80, 81, 82, 82, 85, 84 and 82. Predictions for planetary A index over those same days are 5 on August 19-23, 12 on August 24, 8 on August 25 and 5 on August 26-28. Geophysical Institute Prague predicts quiet conditions for August 20-22, quiet to unsettled August 23 and unsettled August 24-26. Look for more information -- including a look at some mail from readers and an article suggesting a theory on what may be responsible for this long solar minimum -- on the ARRL Web site on

Friday, August 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Henry David Thoreau's The Summer Rain <http://www.vcu.edu/engweb/transcendentalism/authors/thoreau/thoreaupoems.html#rain>.

==> THIS WEEK ON THE RADIO

This week:

- August 20 -- NCCC Sprint Ladder
- August 21-22 (local time) -- ARRL 10 GHz and Up Contest <http://www.arrl.org/10-ghz-up>
- August 21-22 -- SARTG WW RTTY Contest; North American QSO Party (SSB)
- August 21-23 -- New Jersey QSO Party
- August 25 -- SKCC Sprint; QRP Fox Hunt

Next week:

- August 27 -- NCCC Sprint Ladder
- August 28-29 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party; YO DX HF Contest; SCC RTTY Championship
- September 1 -- QRP Fox Hunt

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Indeed throw it away and get yourself a brand new "10 meter" rig from
http://sales.kb9rqz.com !! We'll even throw in a free clip-N-peak,
which will have you ready to go on 11 meters (CB) right out of the
box. Forget about 4 watts. Some of my rigs swing over 100 watts !! So
get kelp !!!

Hacksaw, the tool of professionals. Boltcutters work on the cheap SS
whips, but a good spring steel whip can divit bolt cutters. A carbide
cutting disk in a dremel tool or grinder is another option.

For those "tool challenged" a hacksaw blade with several wraps of duct
tape around one end will work.

Regards,
JS

Amateur Radio Newsline(tm) Report 1723 - August 20 2010

Amateur Radio Newsline report number 1723 with a release date of Friday, August 20 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Pakistan lead relief efforts in the wake of monsoon flooding, a cooling system failure on the International Space Station has impacted ARISS operations, unlicensed consumer devices come to the 70 centimeter repeater input subband in New Zealand and researchers say to be careful using green lasers. Find out why on Amateur Radio Newsline(tm) report number 1723 coming your way right now.

RESCUE RADIO: PAKISTANI HAMS IN HUMINATERIAN FLOOD RELIEF EFFORT

The Pakistan Amateur Radio Society in association with Islamabad Jeep Club and Pakistan Academy of Family Physicians are leading a humanitarian relief effort in the wake of massive flooding in that nation. Amateur Radio Newsline's Burt Hicks, is here with the details:

--

Monsoon rains have hit Pakistan the past few weeks followed by disastrous floods the likes of which have not been seen in some regions for the last eight decades. Communications is at a premium with cellular and wire line telephone service out as a result of the storms. Restoration of cellular service and landlines phones could take months.

In order to address the communication outage, the Pakistan Amateur Radio Society better known as PARS, working in association with Islamabad Jeep Club and Pakistan Academy of Family Physicians. Together they have begun a series of relief activities by providing communications as well as food, tents and medical support to the flood effected areas.

PARS and the Islamabad Jeep Club have so far dispatched five relief teams. One is catering to the communications needs of northern cities by linking Islamabad with Peshawar, Nowshera and Charsadda. The other would connect the central Pakistani cities of Sargodha, Lahore and Faisalabad and Multan. The other three are assigned to emergency supply preparation and delivery to those in outlying areas.

PARS has already installed 2 meter repeater at one emergency location but its signal is fairly weak in the areas where its most needed. Plans are to relay it into remote regions using a cross-band linked system if equipment can be found or donated to make it happen. This says PARS would result in effective communication through the use hand-helds rather then reliance on base stations where electric mains service is spotty and intermittent.

If you have any spare gear that can be used in this relief effort, you can contact PARS president Nasir Khan AP2NK by e-mail to ap2nk dot nasir at gmail dot com.

For the Amateur Radio Newsline, I'm Burt Hicks in Los Angeles.
--

These floods have impacted millions of Pakistanis who need help from the international community. More on this aspect of the story is on-line at tinyurl.com/36nqfzv (PARS, W7VOA)

**

HAM RADIO IN SPACE: ISS COLLING SYSTEM AFFECTS ARISS CONTACTS

A cooling system failure on the International Space Station has impacted ARISS operations. On August 11th, NASA astronauts successfully completed the second of three to four space walks in an effort to replace a faulty ammonia pump module on the International Space Station's truss. One that has forced cutbacks in other word abroad the orbiting outpost including time that astronaut hams are spending on the air.

Since July 31st the space station has been operating at half its usual cooling capacity utilizing the one remaining cooling pump. This forces the astronauts to power down equipment to prevent overheating on the ISS.

As this newscast is prepared, it has already taken almost 16 hours space walks or E-V-A's for astronauts to remove and replace the failed cooling pump in an effort to bring the ISS back to full capacity. As a result, ARISS ham radio operations which include both voice and packet have been given a low priority until the problem is resolved.

Back at Johnson Space Center in Houston, Texas, Space Station Program Manager Michael Suffredini says that a third space walk was planned to install the replacement and a fourth likely will be needed to put the defective pump into its storage place. These may have taken place by the time this newscast goes to air.

Attempts are being made to carry out scheduled ARISS contacts, but with the understanding that they may be cancelled at the last minute.

(NASA NEWS, ARISS, ANS, VOA)

**

RADIO RULES: NZ MED CREATES 70 CM REPEATER INTERFERENCE

The New Zealand Ministry of Economic Development has relaxed the conditions of use of unlicensed Short Range Devices in a key ham band. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Auckland with the latest:

--

The new conditions or rules were put in place without any consultation with our national society the NZART. They permit the use of walkie-talkies, wireless headphones, wireless audio senders and other such consumer gear in the input band of most of nations 70 centimeter amateur repeaters.

The previous rules had permitted the same 433.05 to 434.79 MHz frequency range but with an output power limited to 25 milliwatts and restricted the use to Telemetry and Tele-control modes that had far shorter transmissions. The new devices now given access to 433.05 to 434.79 MHz typically have very annoying, long duration transmissions causing significant interference to licensed amateur radio operations.

It should be noted that all of the New Zealand National System repeaters use input frequencies above 434.79 MHz and are not affected by the change. Those owned and operated by individual Kiwi hams operating with input channels below 434.79 MHz are the ones suffering from access by these consumer electronic devices.

From down-under in Auckland, New Zealand, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

As if this were not enough, there is also a new allocation in New Zealand from 3.640 to 4.040 MHz for Auditory Aids. These hold the potential to interfere with amateur signals in the amateur 75 and 80 meter bands. (Adapted from NZART News)

**

PROPAGATION: HERE COMES THE SUN

Some good news on the propagation front. Better days may be on their way.

Researchers at Boston University's Center for Space Physics have announced they have what they term as sub-visual evidence that a new cycle of solar wind activity around Earth is finally starting. This based on observations of recent appearances of aurora near the North Pole accompanied by dimmer glows well south of that.

What has fascinated space scientists in recent years is the delayed onset of such effects this time around. Typically, the Sun has an activity cycle of about 11 years, with flares, C-M-E's and ejection of electrically

charged particles called the Solar Wind. These cause changes in the Earth's magnetic field or magnetosphere that produce luminous auroral emissions in the northern most latitudes high in the Earth's atmosphere.

Such effects are subdued during so-called solar minimum years such as the case in 1996 to 1997. They are also very prominent in solar maximum years as they were in 2001 to 2002.

According to this cycle, called Cycle 24, a new wave of solar activity had been expected to start last year but the Sun remained dormant. This had some solar observers predicting that we might be headed for a historic solar minimum. Now the Boston group says there are finally signs of the new cycle 24 appearing and you can read more about it at tinyurl.com/34bk2pp. (World Science Net)

RADIO SAFETY: UNIDENTIFIED MAN FALLS FRIM HAM TOWER

The Southwest Riverside News Network reports that a man who may be an amateur radio operator was taken to a hospital after he fell about 25 feet off a ham radio transmitting tower in Ocean Beach, California on August 8th. According to a police report., the unidentified man hit his back and head when he fell around 3:30 p.m.. Officer Jane Jacobsen said the man was breathing when officers and paramedics arrived but the extent of his injuries were not immediately known. The news story did not say if the person who fell was the towers owner or someone hired to work on it. (Riverside Net News)

**

PUBLIC SERVICE: BICYCLE TOUR OF NJ NEEDS MORE HAMS

The Newark Amateur Radio Society in New Jersey says that it needs at least 33 additional volunteer ham radio operators to provide communications for the upcoming Bicycle Tour of Newark. The event takes place on Saturday, September 18th running from 7:00 AM to 3:00 PM Eastern U-S time. In case of rain, a back-up date of Saturday, September 25th has been set.

The Bicycle Tour of Newark is comprised of both 5 mile and a 25-mile courses. The staging area for the event is downtown Newark and there will be a designated parking area for those who bring vehicles. Public transportation is by New Jersey Transit trains from New York's Pennsylvania Station.

If you have the day free and wish to volunteer please contact Leon Grauer, N0TAZ by re-mail to n0taz (at) NewarkAmateurRadio (dot) com. (QRZ)

**

RESCUE RADIO: BROADCAST STATIONS ENCOURAGED TO JOIN DIRS

The FCC Media Bureau is encouraging broadcasters to register and participate in its Disaster Information Reporting System or DIRS. According to Doug Lung writing TV Technology Magazine, registered users input data on the status of their broadcast facilities, communications links, generator fuel and other items. They also provide emergency contact information the FCC can use to contact them to assist with disaster recovery and assistance from the FCC's federal partners.

Lung notes that updates are easy to do using the DIRS website, but he encourages stations with group management or sister stations outside the disaster area to consider having someone outside listed as a D-I-R-S participant. This, so the engineer within the disaster area doesn't have to struggle to find a working Internet connection. Rather the engineer at the affected station can quickly update that person, who could then update the DIRS website and handle inquiries. (RW)

**

COMMUNICATIONS LAW: FCC GREEN-LIGHTS CERTAIN MOBILE-ONLY TV RECEIVERS

The FCC has conditionally approved a request from Dell Computer, LG Electronics USA and Hauppauge Computer Works. This, to permit the importation and sale in the United States of television receivers designed for mobile use that exclude analog and, in some cases, standard non-mobile digital reception capability.

In granting the joint request the FCC said that it concludes that a waiver is in the public interest. This is because it would facilitate the introduction of television receivers with Mobile DTV tuners that are designed to be used in motion.

But the regulatory agency did add one proviso to the grant. It is requiring the three companies to clearly disclose to consumers that a specific device does not have the capability to receive analog signals, and, where applicable, standard non-mobile digital signals. (FCC, CGC)

**

FUTURECOMM: BROADBAND ADOPTION FALLING IN USA

Adoption of broadband by citizens of the United States has slowed dramatically this year, and a majority believes that making high-speed Internet access affordable should not be a major government priority. This, according to a study by the Pew Research Center's Internet & American Life Project.

The research found that two-thirds of Americans currently use broadband at home, a number that's statistically the same as a similar Pew study

conducted the same time in 2009. The research firm last year found 63% of Americans were broadband adopters.

The study also found that the majority of Americans did not believe high-speed Internet access to everyone in the United States should be a top priority for the federal government. Fully 53% of Americans said affordable broadband access should not be attempted by government or was simply not too important of a priority. More is on-line at tinyurl.com/24dqcmb (Information Week OnLine)

**

RADIO BUSINESS: SANGEAN SIDESTEPS PORTABLE HD RADIO INTRO

Radio World reports that Sangean now says it is not planning to introduce a portable HD Radio that was to have included analog AM in the U.S. this year. Responding to a question from the newsletter, a Sangean spokesman said the company decided not to go ahead with production of the DT-600 HD. The Sangeen representative could not say why but did add that Amazon dot com is not accepting pre-orders for the unit.

IBiquity had a prototype of the unit in its booth at winter Consumer Electronics Show and also at the spring National Association of Broadcasters shows both held earlier this year in Las Vegas. The multicast-capable unit was also designed to support program associated data services and feature iTunes tagging via a USB port. (RW)

**

RADIO BOOKS: NEW AM RADIIO LOG FROM THE NATIONAL RADIO CLUB

And this one for SWL's or hams who enjoy medium wave DXing. Word from Wayne Heinen, N0POH, that the new 31st edition of the National Radio Club's AM Radio Log is hot off the press and ready to be shipped.

The AM Radio Log is a source for information on AM Radio Stations in the United States and Canada. The latest edition contains 278 pages of data and cross references, and 18 pages of instructions in 8-1/2" x 11" size, 3-hole punched, U.S. loose leaf format. This publication fits nicely into a 1" three-ring binder and for the visually handicapped the print may be read by most standard O C R systems.

According to Heinen. there have been nearly 10,000 updates since last year's 30th Edition of the log. Additional reference lists include call letters of FM simulcasts, listings of regional groups of stations in the groups section, and a cross reference of those stations that are licensed to use In Band On Channel digital audio.

To find out more or to order a copy of you very own, simply take your web browser to www.nrcdxas.org.
(W8HDU)

**

THE SOCIAL SCENE: RESERVATIONS UP AT RSGB CONVENTION

Turning to the ham radio social scene, word from the United Kingdom that the early bird savings available for the RSGB Convention bookings have been extended until September 1st. The Radio Society of Great Britain says that while reservations are up on last year but this is no problem as the Horwood House near Milton Keynes is a larger venue.

The RSGB Convention takes place between the 8th and 10th of October. There will be a wide variety of talks and lectures over the weekend as well as displays and demonstrations of the latest gear. More information on this UK ham radio show is on-line at www.rsgb.org.uk/rsgbconvention. (RSGB)

**

THE SOCIAL SCENE: FIRST NORTH CORK RALLY SEPTEMBER 19

If you are planning to be in Ireland this fall you might want to attend the first ever North Cork Radio Group Rally and Electronics Fair at the Blarney Golf Resort, Tower on Sunday September 19th. Doors open to the public at 11.30 a.m. local time and the rally will run until about 5pm. Among the equipment dealers on hand will be South East Communications, Long Communications and JBT Trading. Further details about this event is on line at www.northcorkradiogroup.com. And for those of you not aware the term rally is the same as we call a hamfest on this side of the great Atlantic pond. (IRTS News)

**

NAMES IN THE NEWS: CHARLIE HELLMAN, W2RP, ON THE AIR AT AGE 100

And a word of congratulations to Charlie Hellman, W2RP, of Hastings On Hudson, New York. This on having hit the grand old age of 100.

Alan Brennglass, K2ACB, says over eHam dot net that he recently spoke to Charlie on the air. At that time he learned that W2RP got his first license in 1925 at age 15.

In honor of reaching this milestone of life, his family threw a nice party for him and the QCWA sent him a beautiful plaque for this honor. Charlie told K2ACB that he had been inactive on the High Frequency bands for several months but is now back on the, especially on 20 meters. (K2ACB, eHam)

COMMUNICATIONS RESEARCH: SOME FIREFLIES DO GLOW TO MATE

For decades, scientists have speculated about why some fireflies exhibit synchronous flashing in which large groups produce rhythmic, repeated flashes in unison. At times enough to light up an entire forest at once. Now, the first experiments on the function of this phenomenon suggest that synchronous flashing preserves female fireflies' recognition of suitable mates.

To reach this conclusion, researchers collected females of the synchronous species from the Smoky Mountains National Park in Tennessee. In the laboratory, they exposed the females to groups of light-emitting diodes meant to mimic male fireflies. Each individual LED produced the species-specific pattern of flashes for type of fly but the experimenters varied the degree to which the flashes were in synch with one another.

Their conclusion is that Fireflies which are actually a type of beetle produce bioluminescence as a mating tool. One in which males display a species-specific pattern of flashes while cruising" through the air looking for females. These patterns consist of one or more flashes followed by a characteristic pause, during which female fireflies, perched on leaves or branches, will produce a single response flash if they spot a suitable male.

Of the roughly 2,000 species of fireflies around the world, scientists estimate that only about 1 percent synchronize their flashes over large areas. The results of this novel communications item was reported in the July 9 issue of Science. (Adapted from Science Daily)

**

INTRUDER WATCH: 6 METER QRM LINKED TO EAST EUROPE TV

Talk about a strange and unwanted 6 meter beacon. The IARU Region 1 Monitoring System reports on a humming noise in the 50 MHz band that sounds like a defective power supply. Its most often heard during Sporadic-E openings and turn out to be carriers from East-European TV transmitters.

Wolfgang Hadel, DK2OM, was the one who actually found the carrier. Using a Wavecom 61 monitor DK2OM also located the related audio portion of the transmissions in wideband FM 5 MHz higher in frequency. (IARUMS)

**

HAM RADIO IN SPACE: PACESAT PROJECT ANNOUNCED IN TIWAN

Yet another new ham radio satellite is on the drawing boards. A team from the Taiwan Department of Aeronautics and Astronautics and the Department of Electrical Engineering at the National Cheng Kung University has announced a CubeSat development project named Platform for Attitude Control Experiment or PACEsat for short. This cubesat will feature three-axis stabilization utilizing a miniature momentum wheel and magnetic coils. Attitude determination will use a three-axis magnetometer, a three-axis gyro, and coarse sun sensors. Temperature sensors will monitor the thermal environment inside the satellite.

The new bird is designed for a 600 km near-circular orbit with a 98 degree inclination. Mission lifetime is planned to be 2 months. Frequencies discussed in the satellite design documentation include 145 MHz for uplink and downlink communication and 433 MHz CW and AX.25.

Technical details on PACEsat can be found on-line at tinyurl.com/2evtd7a (ANS)

**

HAM RADIO IN SPACE: SA AMSAT CUBESAT PROJECT REMAINS NAMELESS

A planned South African ham radio satellite is still in search of a name. The South Africa AMSAT committee has reviewed all the names proposed for its new CubeSat project but found none of those proposed suitable for the project. As a result, the committee decided to hold the naming of the project until the payloads have been finalized.

The committee has however narrowed down the options for a satellite payload to one of two. The first is centered around a payload that would promote satellite use by radio amateurs in South Africa and the second is a project of a scientific nature that would also have appeal to the education sector. A decision on both a name and a final mission purpose will be made at a later date. (SARL)

**

QSL CORNER: HOW TO QSL CYPRESS DX STATIONS

The QSL Bureau of the Cyprus Amateur Radio Society says that it is receiving large numbers of QSLs that cannot be delivered to the intended recipient. This is because that station has a QSL manager outside Cyprus.

According to 5B4AHJ who is the society's QSL Bureau Manager, the problem is threefold. Those generating the QSLs are not bothering to check to see if the station has a manager. And, even if a manager's call is written on the QSL, many QSL Bureaus are still sending the QSL to Cyprus. Lastlt. QSLs for calls 5B DXcalls are being sent to Cyprus when either they should be sent to the operators QSL manager, or in the absence of a manager, they should be sent to the bureau for the home call.

5B4AHJ says that he has produced a list of stations with foreign managers for Cypress stations. It's on line at tinyurl.com/cypruscalls. (OPDX)

**

DX

In DX, word that VK6LC will be will be operational as XV2LC through September 10th from Ho Chi Minh City and as XV4LC from the Mekong Delta. Listen out for him primarily on CW with some SSB. QSL via VK6LC.

IZ4AKS will be active stroke 3B9 from Rodriguez Island from August 28th through September 4th. His operation will be holiday style on 40 through 10 meters SSB with the possibly of some RTTY and CW as well. QSL direct only to IZ4AKS at his Callbook address.

IK2NCJ will be active as D4C from Sao Vicente Island near Cape Verde until August 26th. QSL either via CT1ESV to the bureau, or direct to IZ4DPV or electronically using Logbook of the World.

GJ7DNI will be driving across France in a 1959 Commer camper van and will be working holiday style on the 40 and 80m bands between through August 30th. He will be running only 100 watts so you will have to listen out carefully for hi. If you do make contact please QSL as directed on the air.

Lastly, the "Buddies in the Caribbean" DXpedition group which specializes in 100 watt or less radios and the Buddipole portable antenna systems will be back on the Island of St. Lucia from December 8th to the 13th. The group says that it wants to demonstrate what it terms as "Ultralite DXpeditioning" from the islands magnificent "vista" locations. This, by operating a field portable battery-only radio with back-packable and lightweight antennas from St. Lucia's beaches or scenic mountain tops.. There will also be three villa stations in operation on 160 on 10 meters using CW, SSB, and RTTY. QSL via Logbook of the World, eQSL, or mail to the individual operator's home call sign with a self addressed stamped envelope.

(Above from various DX news sources)

**

THAT FINAL ITEM: GREEN LASERS CAN BE AN EYE HAZARD

And finally this week, green laser pointers have become a popular consumer item by delivering light that's brighter to the eye than red lasers. But stories have been circulating on the Web about the potential hazards of some inexpensive models. Now, a team led by physicist Charles Clark at the National Institute of Standards and Technology has put some numbers to the problem. Amateur Radio Newsline's Jim Davis has more:

--

Late last year, the research team from the National Institute of Standards and Technology purchased three low cost green laser pointers advertised to have a standard power output of 10 milliwatts. Scientific measurements showed that one unit emitted dim green light but delivered infrared levels of nearly 20 milliwatts. That's a level said to be powerful enough to cause retinal damage to an individual before he or she is aware of the invisible light. The National Institute of Standards and Technology researchers repeated the tests with several other laser pointers and found similarly intense infrared emissions in some but not all units.

So why the disparity? The researchers believe that the problem stems from inadequate procedures in manufacturing quality assurance. They note that inside a green laser pointer, infrared light from a semiconductor diode laser pumps infrared light at a wavelength of 808 nanometers into a special transparent crystal lens causing a conversion to even deeper in the infrared, at 1064 nanometers. This light then passes through another crystal of potassium titanyl phosphate which emits light of half the wavelength at 532 nanometers which is the familiar color of the green laser

pointer.

But say the researchers, if the crystal is misaligned, little of the 1064 nanometer energy is converted into green light, and most of it comes out as infrared. Excess infrared leakage can also occur if the coatings at both ends of the crystal that act as mirrors for the infrared laser light are too thin.

The NIST team says this problem could be solved by incorporating an inexpensive infrared filter at the end of the laser, which could reduce infrared emissions by 100 to 1000 times depending on quality and cost. Although these filters exist in modern digital cameras and more expensive green laser pointers, they often are left out of the inexpensive models.

The bottom line. The research team says to never point a laser pointer at anyone for any reason.

Im Jim Davis, W2JKD.

--

The researchers that conducted this project are all members of the Joint Quantum Institute. This is , a collaboration between the National Institute of Standards and Technology and the University of Maryland. (Science OnLine)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita, California, 91350

Before we go, just a reminder that Saturday and Sunday, August 21st and 22nd is the 2010 Huntsville Hamfest at the Von Braun Center in downtown Huntsvills. Several Newsline staffers including our producer Bill Pasternak, WA6ITF and this reporter will be there to present the 2010 Young Ham of the Year Award to Cody Anderson, KI4FUV. The presentation will take place at around 2 P,M. on Saturday on the front podium of the main exhibit hall. If you are at the Huntsville Hamfest, please join us in honoring this fine young man for his contributions to our great hobby.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Shows what you know Fatass.
Roger doesn't have any blogs, pizza boy.

Roger is too busy earning a living and bettering himself unlike you who
lives in a HUD hovel and delivers pizzas.
Did you ever pass the code test Fatass?
Do you know what a woman is for, Fatass?
I do. Unlike you Roger is not a pathetic 41 year old virgin.
Roger doesn't need a woman when he can jack off in his greasy little hand
and lick his fingers afterwards.

> tinyurl.com/24dqcmb (Information Week OnLine)
>

I think there are several reasons for this:

1) all the early adopters and middle adopters are already on-line.

2) The people left are ones who aren't interested in the world around
them.
They don't read newspapers, magazines, or use other information
sources.
The internet is just another media source that doesn't interest
them.

3)Broadband internet access is just too expensive.
Broadband Cable internet access requires you to buy Cable TV,
before you can get cable broadband access.
In many cases this doubles Internet access costs.
For example, I have to buy Cable TV at $58.95/month and cable
broadband costs $49.00 more, plus if i don't get
POTS ($18.00) "bundled" with

cable service; the Cable TV the Cable access would be $64.95 plus
$54.95 for Internet.

4) In many residential areas DSL in not available.
Residential areas are too far from the phone company connect
point.

5) In many areas "broadband" just isn't.
My ISP says I have a 5Mb connection. There are so many other users on
the same cable line that my effective speed is 384Kb.
Why pay for service that you aren't getting?

==> + PUBLIC SERVICE: PAKISTANI AMATEURS TEAM UP TO PROVIDE
COMMUNICATIONS, RELIEF SUPPORT FOR FLOOD VICTIMS

According to the Pakistan Amateur Radio Society (PARS) -- that
country's IARU Member-Society -- radio amateurs in Pakistan have teamed
up with the Islamabad Jeep Club and Pakistan Academy of Family
Physicians to provide relief activities in those areas of Pakistan
devastated by floods. The groups will supply food, tents and medical
support to the northern flood affected areas of Nowshera, Charsadda and
central Sargodha districts.

"The cellular services are down and so is the landline," the PARS
Web site reports. "Last week, the joint team carried out a survey in
the north and the center of the country, and to its dismay, the
situation isn't promising. Restoration of cellular services and
landlines could take months."

On August 21, hams reached the town of Dharkhanawala, looking to set up
communications, but had to turn back because the equipment had not
```

arrived; however, teams were able to distribute food in Dharkhanawala and Chauki Darab. Read more here <http://www.arrl.org/news/pakistani-amateurs-team-up-to-provide-communications-relief-support-for-flood-victims>.

==> ARRL WEB SITE: USING THE "YOUR FAVORITES" FEATURE AND RETRIEVING FORGOTTEN PASSWORDS

By ARRL News Editor S. Khrystyne Keane, K1SFA

Since we introduced the new ARRL Web site this past April, we have received inquiries on how to retrieve forgotten passwords, as well as how to use the "Favorites" function -- a "bookmark" feature -- on the new site.

Have you forgotten your password? You can easily retrieve it by clicking on the "Forgot Password? <http://www.arrl.org/forgot-password>" link, located directly under the log-in box at the top of the page (see photo <http://www.arrl.org/images/view/News/ForgotPassword.JPG>). You can either request to receive a temporary password via e-mail (you must use the e-mail you originally used to register for the previous ARRL Web site), or you may retrieve a temporary password immediately by providing your user name (for hams, this is usually your call sign) and your ARRL member ID number (you can find this on your QST mailing label). You must also provide either your call sign or your last name. Click here <http://www.arrl.org/forgot-password> to receive a temporary password. First time Web users can get an online user name and password by clicking in the "Register" link, located next to the "Forgot Password?" link.

Once you have successfully logged in to the Web site, you will see a drop-down box that says "Your Favorites" right underneath your name (see photo <http://www.arrl.org/images/view/News/YourFavorites.JPG>). Now navigate to any page on the ARRL Web site. Would you like to find it in just one step the next time you need it? The "Your Favorites" feature will do just that! When you are on the desired page, just click on the "Your Favorites" drop-down

menu, click "Add to Favorites" then click the "Go" button. Now you have stored that Web page as one of your favorites; each time you wish to go to that page, you can just access it through the "Your Favorites" drop-down menu (see photo <http://www.arrl.org/images/view/News/YourFaveSignIn.JPG>).

If you have any questions or concerns about the new ARRL Web site, please direct them to Katie Glass, our Digital Content Manager. You can send them via e-mail <kglass@arrl.org> or call Katie directly at (860) 594-0250.

==> + ARRL ELECTIONS: SUMMER SECTION MANAGER ELECTION RESULTS

Southern Florida and Oklahoma will have new Section Managers starting in October, and the incumbent Section Manager of Ohio was re-elected in the summer Section Manager election cycle that concluded on Tuesday, August 24; election ballots were counted August 24 at ARRL Headquarters. Terms for new Section Managers will begin on October 1, 2010. Read more here <http://www.arrl.org/news/summer-section-manager-election-results>.

==> + THE DOCTOR IS IN: SWR

Bil Paul, KD6JUI, of Dixon, California, wrote to the ARRL's Doctor, noting that he noticed when he was tuning for optimal background noise while in receive mode, it came close to -- but didn't match -- the dial positions for minimal SWR while transmitting. He asked which of the two antenna tuner dial settings would result in the most transmitted energy while in transmit mode. He also wants to know if minimal SWR always indicates the most transmitted energy going to the antenna system.

Here's what the Doctor had to say:

In answer to the first question, by setting the antenna tuner to an SWR of 1:1, you have transformed the impedance at the bottom of your antenna feed line to 50 ohms, just what your transceiver is designed to deliver its rated power into. If your receiver input impedance were exactly 50 ohms, then that setting would likely also be the position that would yield maximum receiver noise. As it happens, there is no such guarantee that the input impedance of the receiver will be exactly 50 ohms. Although it should be pretty close, a slight change may yield a stronger signal into the receiver.

Regarding the second question, the transceiver is rated to provide its design output power into 50 ohms, usually within a specified SWR range. As was pointed out by Eric Nichols, KL7AJ, in a QST article last year ["Keeping Current with Antenna Performance," Feb 2009, pages 34-36], an SWR of 1:1 does not generally result in the maximum power output. By building a transmission line current meter, such as described by Eric, or later by Paul Danzer, N1II ["A Simple Transformer to Measure Your Antenna Current," Sep 2009, page 35], you can actually tune the antenna tuner to get the highest output. This corresponds to the maximum current into the antenna, which may occur at some setting different from either of the above.

Be careful, though: If you exceed the maximum rated SWR, the resulting voltages or currents in the final amplifier or output filter of the transceiver will exceed design specs and damage may result. The likely small increase in transmitted power is likely neither worth the trouble nor the risk, in my opinion.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to The Doctor, ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> SUPPORT ARRL: ARRL ENCOURAGES MONTHLY GIVING

The ARRL Development Office is dedicated to raising funds for those programs not funded entirely by member dues. Whether your interest is focused on protecting Amateur Radio operating frequencies, expanding ARRL's national initiative promoting science and math education, or securing the future of the W1AW, The Hiram Percy Maxim Memorial Station, your financial support is vital.

"Now it's easier than ever to make a commitment to ARRL," said ARRL Chief Development Officer Mary Hobart, K1MMH. "By contributing as little as $10, $20 or $100 per month, you can be part of a strong financial forecast for those programs that are at the heart of our service." More and more ARRL members are taking advantage of this option to contribute to the Diamond Club, the Spectrum Defense Fund, the Education & Technology Fund and the W1AW Endowment Fund. Read more here <http://www.arrl.org/news/arrl-encourages-monthly-giving>.

==> + ARRL VEC VOLUNTEER EXAMINER SESSION PARTICIPATION WEB PAGE RETURNS

If you're an ARRL Volunteer Examiner (VE <http://www.arrl.org/become-an-arrl-ve>) who is interested in seeing how many ARRL exam sessions you've taken part in, you can find the answer on the VE Session counts <http://www.arrl.org/ve-session-counts> Web page. On this page, you'll be able to access a list that shows the total number of exam sessions that each ARRL VE has conducted. The listings are listed first by state and then in alpha-numeric call sign order (call area number, then suffix letters). The state where an individual VE record is located is based on the VE's official address on file with the ARRL Volunteer Examiner Coordinator. Only currently accredited ARRL VEs will be displayed on the Web page. ARRL VEC Manager Maria Somma, AB1FM, said she is "thrilled" that the enhanced page now includes the VEs name, as well as the call sign and session participation total: "Incorporating the name field in the lists added a higher level of authentication when determining a VE's accreditation status and participation. We applaud the volunteers whose dedication and service make the VE program successful. Your hard work and contribution of countless hours of your time helps ensure the future of Amateur Radio. Your efforts matter and we thank you. Our VEs should be very proud of their accomplishments."

==> + SOLAR UPDATE

Tad "Shadows stalled against the pitiless scope of the Sun <http://poems.com/poem.php?date=14818>" Cook, K7RA, reports: This week saw three days -- August 21-23 -- with no sunspots, and the average daily sunspot numbers for the week -- August 19-25 -- declined more than 28 points to 8, compared to the previous week. The average daily solar flux was down five points to 75.3. The last period of three days or more of no sunspots ended on May 20, 2010, around 100 days ago. Sunspot group 1100 disappeared on August 21, only to return August 25. In this case, the sunspot group didn't transit the non Earth-facing

side of the Sun, but it just faded from view, returning just as it is about to rotate off of the Sun's western limb. Sunspot group 1101 appeared on August 24, and on August 25, it had grown to three times its initial size. Daily sunspot numbers for August 24-25 were 11 and 23. Remember: the sunspot number is not the same as the number of sunspots. The smallest non-0 sunspot number is 11. Each spot gets 10 points for being a sunspot group and one point for containing one sunspot. The sunspot number of 23 on August 25 represents two sunspot groups, at 10 points each, one containing one sunspot (1 point) and the other containing two sunspots (2 points). On August 25, it appears that a new smaller sunspot may be emerging between the eastern horizon and sunspot group 1101. A stiff solar wind from a coronal hole increased geomagnetic activity. The planetary A index for August 21-25 was 3, 4, 7, 18 and 20. Thursday's projection shows this decreasing, with the planetary A index on August 26-28 at 15, 10 and 8, followed by a quiet reading of 5 for the next three weeks. Solar flux for the same period is expected to be 75 for August 26-31, then 76 and 80 for September 1-2, and 85 on September 3-5. Several weeks from now is the fall equinox, which is a good time for HF propagation. The autumnal equinox will be at 0309 UTC on September 23, 2010. Look for more information on the ARRL Web site on Friday, August 27. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Melissa Green's August <http://poems.com/poem.php?date=14818>.

==> + ON THE AIR: ARRL EME CONTEST COMING SEPTEMBER 4-5

The 2.3 GHz+ version of the ARRL EME Contest <http://www.arrl.org/eme-contest> will be 0000 UTC September 4 through 2359 UTC September 5. The objective is to work as many stations in as many different 2 degrees • 1 degree grid squares as possible via the Earth-Moon-Earth path on any authorized amateur frequency above 2.3 GHz. Two other EME contests are scheduled for October: the 50-1296 MHz version will be October 2-3 and October 30-31. See the ARRL Contests page <http://www.arrl.org/contests> for more information.

==> + SILENT KEY: ORNITHOLOGIST ARLO RAIM, KB9LLF (SK)

Arlo Raim, KB9LLF, of Danville, Illinois, was killed by a southbound Canadian National freight train on the morning of Friday, August 20. He was 67. Raim had been in Pratt's Wayne Woods Forest Preserve -- part of the Forest Preserve District of DuPage (Illinois) County -- to monitor the effect of increased train traffic on cardinals. "He was one of, if not the best, bird tracker in the world," said Dr Mike Ward, Coordinator of the Critical Trends Assessment Program at the Illinois Natural History Survey and one of Raim's supervisors. "He used radio telemetry to track animals as varied as peregrine falcons, coyotes, turtles and northern cardinals." According to Ward, Raim's most noteworthy research may have been the 2002 tracking that showed crows changed roosts every two days, a discovery that shed light on why West

Nile virus is able to spread so rapidly. Read more here
<http://www.arrl.org/news/ornithologist-arlo-raim-kb9llf-sk>.

==> THIS WEEK ON THE RADIO

This week:

- August 27 -- NCCC Sprint Ladder
- August 28-29 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party;
YO DX HF Contest; SCC RTTY Championship
- September 1 -- QRP Fox Hunt

Next week:

- September 4 -- Russian RTTY WW Contest; Wake-Up! QRP Sprint; AGCW
Straight Key Party
- September 4-5 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
All Asian DX Contest (Phone); Colorado QSO Party; Brazil Independence
Day BPSK31 CDX Contest
- September 5 -- WAB 144 MHz QRP Contest (Phone)
- September 5-6 -- Tennessee QSO Party
- September 6-7 -- Michigan QRP Labor Day CW Sprint
- September 7 -- ARS Spartan Sprint
- September 8 -- QRP Fox Hunt
- September 8-9 -- CWops Mini-CW Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> UPCOMING EVENTS

- August 27-29 -- ARRL New England Division Convention
<http://www.boxboro.org/>, Boxboro, Massachusetts
- September 17-19 -- ARRL Southwestern Division Convention
<http://www.sandarc.net/Convention2010/index.html>, San Diego,
California
- October 15-17 -- ARRL Pacific Division Convention
<http://www.pacificon.org/>, San Ramon, California

Amateur Radio Newsline(tm) Report 1724 - August 27 2010

Amateur Radio Newsline report number 1724 with a release date of Friday, August 27 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The last suspects in the murder of Gary Haas, N5VGH, and his wife Linda are captured, more on ham radios role in the wake of massive flooding in Pakistan, India gives its hams access to 6 meters, baby monitors purchased in the United states are causing havoc to two way radio communications across Japan and Cody Anderson, KI4FUV is presented the 25th annual Amateur Radio Newsline Young Ham of the Year Award at the Huntsville Hamfest. Come join in the celebration on Amateur Radio Newsline(tm) report number 1724 coming your way right now.

(Billboard Cart Here)

**

RADIO CRIME: ALLEGED MURDERERS OF N5VGH AND HIS WIFE CAPTURED

The last two of three alleged killers of Gary Haas, N5VGH, and his wife Linda have been captured in Arizona. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with the details:

--

Authorities in Arizona say it was the suspicions of a forest ranger about an unattended campfire and a vehicle backed into trees which helped lead to the arrests of John McCluskey and Casslyn Welch.

They say the two were hiding out in a campground southeast of the Sunrise Ski Resort in Apache County, Arizona, when the ranger made the discovery and called federal authorities.

After checking the license plate of the car, authorities found it matched a vehicle missing from Santa Rosa, New Mexico and suspected McCluskey and Welch were responsible for the theft.

Investigators say the car came from an area where authorities discovered the bodies of Gary Haas and his wife in a burned-out trailer.

In charging documents released by the U.S. Attorney's office in New Mexico, graphic details of events leading up to the couple's murder were spelled out.

Investigators say McCluskey, Welch, and another man, identified as Tracy Allen Province carjacked the couple's pickup truck and their camper trailer on Aug. 2 at a rest area off Interstate 40 in Quay County, New Mexico.

Authorities allege the trio forced the couple to drive to an area between Tucumcari and Santa Rosa, New Mexico where they stopped. It was there, investigators say, McCluskey took the couple at gunpoint to the camper trailer and shot them, killing both.

With the bodies still in the camper, the fugitives drove to a remote area of Guadalupe County in New Mexico where they unhitched the camper trailer and set it on fire with the couple's bodies still inside. The burned out trailer with the couple's remains inside was found August 4th.

That led to a massive manhunt for McCluskey, Province and Welch. It is believed Welch helped McCluskey and Province and another inmate, Daniel Renwick to escape from a private prison in Arizona.

Renwick split from all of them right away and was captured in Colorado a few days after the breakout.
Province then split from the couple and was captured in Wyoming on Aug. 10.
McCluskey and Welch, who were first cousins and fianc&#65533;es, remained on the lam for another nine days.

All are jailed in lieu of very high bail and facing a host of serious charges ranging from kidnapping to murder.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

--

If found guilty at a federal trial, McCluskey, Province and Welch would face either life in prison without the possibility of parole or death by lethal injection. (ARNewsline(tm) from US Marshall's Office Press Release)

HAM HELP: ASSISTANCE ASKED TO FIND MISSING ARIZONA HAM

Police and family members are asking for the public's help to locate David Wile, KE7SWL, of Glendale Arizona. Wile was last seen on Saturday, August 21st at around 11:30 a.m. at his home near 43rd and Maryland Avenues in Glendale.

David Wile, KE7SWL, is a white male, 30-years old, 5 feet 10 inches tall, weighing between 180 and 190 pounds, with brown hair and brown eyes. ABC 15 dot com says that his silver 2003 Honda Accord, with Arizona license plate 505 VGA, is also missing.

KE7SWL's brother is Alun Wile. He told ABC 15 dot com that he became worried after David missed a competition that he was scheduled to attend on Saturday at Paragon Dance Studio in Tempe, Arizona.

Anyone with information on David Wile's where-abouts is asked to contact the Glendale Arizona Police Department. A photo of David Wile is on-line

at tinyurl.com/37tcdu8 (KE7JDO, AMC15.com, QRZ.com)

**

RESCUE RADIO: HAM HELPS HAM IN ARKANSAS ROAD ATTACK

Whether it was road rage or an attempted robbery nobody is quite sure. But on the morning of August 22nd, David Terrell, N5YLG, was driving on Interstate 30 between Texarkana, Texas, and Malvern Arkansas when someone rammed the rear of his car two or three times. Terrell works for a drug company delivering to nursing homes and hospitals. Luckily his company car is a retired police cruiser that had the speed to outrun the would-be attackers.

At the time of the skirmish, Terrell was in an area where there is no cell phone coverage. However he was able to contact Timothy Leet, K5RQO through the 147.120 repeater in Benton Arkansas. Leet, who is a former emergency dispatcher was able to make phone contact with the Arkansas State Police and Clark County Sherriff's office. Working with the sheriff, he was able to coordinate an intercept to assist N5YLJ. Authorities located Terrell and found that was alright except for some aches and pains. At airtime, the person or persons who rammed Terrell's car are still at large. (KC5JUQ)

RESCUE RADIO: HAM RADIO CONTINUES TO ASSIST IN PAKISTAN FLOODING

Ham radio continues as a lifeline in the flooding situation in Pakistan. WIA newsman Jim Linton, VK3PC, has the latest:

--

The medical and food support being provided to the many people affected by the flood disaster in Pakistan affecting six million people is being assisted by the combined efforts of radio amateurs, a group of four wheel drive enthusiasts.

Around a quarter of the country has been affected by the floods over the last three weeks that were triggered by intense summer monsoon rainfall swelling the Indus River into Pakistan's worst ever flood.

The United Nations estimates 20 million have been affected in Khyber-Pakhtunkhwa, Punjab and Sindh provinces and 1600 lives lost.

One of those involved with the Pakistan Amateur Radio Society emergency communications effort is Asad Marwat, AP2AUM. He reports that more than 20 hams are keeping lines of communications open and the plan is to increase this to 30 in a week's time.

With both landlines and mobile phone services failed in the flood affected areas, he said that most of the radio traffic is through a 2-metre band repeater which is now linked to two homebrewed 2m/70cm cross-band repeaters or translators extending coverage area.

PARS has teamed up with the Islamabad Jeep Club which is a group with members who own and drive 4WD sport utility vehicles. Their expertise in driving on most difficult terrains is proving to be of great assistance to deliver essential relief supplies and medical help immediately after the flood. They are also working in collaboration with the Pakistan Academy of Family Physicians.

I'm Jim Linton, VK3PC

--

Word is that ham radio operations in support of flood relief efforts will be ongoing for the foreseeable future. (WIA News)

WORLDBEAT: UK REGULATOR OFCOM WILL STILL PROTECT THE HAM BANDS

Some good news on the interference mitigation front for hams in the United Kingdom. The Radio Society of Great Britain has obtained clarification from telecommunications regulator Ofcom about the changes in responsibilities for interference investigation.

In a nutshell. the position of Ofcom is that the British Broadcasting Corporation is now responsible for investigating interference affecting domestic UK television and radio broadcast reception. The Ofcom website provides some initial advice to those experiencing problems with TV and radio reception and a link to the BBC to report interference and request assistance.

However, and this is very important to UK hams. Ofcom remains responsible for investigating interference to the amateur service, and to broadcast services originating outside the UK.

Ofcom tells the RSGB that its website is undergoing significant changes, but that the new site will make clear the division of responsibilities. It will also include a web form for reporting interference to the amateur service. In the meantime, the web form for reporting cases of abuse on amateur frequencies can also be used for reporting interference, for example from BPL related devices.

As reported several weeks ago, an initial news release from Ofcom had stated it was turning interference mitigation over to the BBC. Because of the incomplete wording in the release, many hams in nthe British Isles were fearful that protecting the amateur bands from interference would no longer be an Ofcom responsibility. However, Ofcom now says this is not the case.

**

RESTRUCTURING: INDIA GIVES ITS HAMS 6 METERS

Hams in India have been granted a new allocation on 6 meters. According to the Ohio Penn DX Newsletter, the new allocation permits F1B, F2B, F3E, F3C modes from 50 to 54 MHz using 25 watts maximum power. Modes overlooked or purposely not allowed are CW, SSB and several others popular on the VHF and

UHF bands.

In addition to the new 6 meter allocation, India's licensing structure has now been restructured with only two classes of license. These are the Restricted and the General and both will be issued with either a 20 years or lifetime license term. (VU2PTT, OPDX)

WITH NEWSLINE: THE 2010 YHOTY AWARD PRESENTED TO CODY ANDERSON KI4FUV

Saturday, August 21st was a special day for 17 year old Cody Anderson, KI4FUV, when he was presented the 25th annual Amateur Radio Newsline Young Ham of the Year Award. The ceremony took place before a packed house at the 2010 Huntsville Hamfest and was emceed by Amateur Radio Newsline's producer Bill Pasternak, WA6ITF. He enumerated some of the points that the judging committee considered in selecting Cody Anderson for the award:

--

WA6ITF: "He answers calls with the Harriman Fire Department as a volunteer Explorer, and with as much concern for life and property as the paid staff, and serves his fellow man with concern and passion.

His nominator sums it up this way: 'Cody is a mature and outstanding young man who demonstrates unselfish work for his community and for others, and is truly an ambassador of amateur radio and its role in public service.' "

--

But it was Rich Moseson, W2VU, of corporate underwriter CQ Magazine who told the crowd of Cody Anderson's life saving action:

--

W2VU: "His radio club had sponsored a CPR class and he took the class. And just a couple of months later he was out providing communications for a race when a runner who had just passed his check point collapsed and went into cardiac arrest. Cody, after calling for help on his radio, along with another runner, performed CPR until the Paramedics got there. Due to their efforts and the quick radio response, that runner recovered completely."

--

And with all these accolades, Cody Anderson's acceptance speech was what those who know this amazing 17 year old have come to expect:

--

KI4FUV: "I would just like to say that I appreciate Amateur Radio Newsline, Yaesu and CQ Magazine for all that they have done for me, and I'm just honored to receive the award and I appreciate it."

--

In addition to a plaque from Amateur Radio Newsline, Cody received several gifts from the awards corporate underwriters. Vertex Standard gave Cody his trip to the Huntsville Hamfest along with a Yaesu FT-817ND back-packer transceiver. Heil Sound provided Cody with an ultra-lightweight mic and earphone boomset. CQ awarded Cody with an expense paid week at Spacecamp Huntsville that KI4FUV generously donated back to the Spacecamp Scholarship Office. This so that it can be used to provide tuition to Spacecamp to some needy youngster at some future date.

Also present at the ceremony were two former Young Ham of the Year recipients. Christopher Arthur, NB4V and Andrea Hartlage, KG4IUM, had words of praise for Cody and we will have that part of the story in next weeks Amateur Radio Newsline report. Meantime, our thanks to Chairman Charlie Emmerson, N4OKL and his staff at the Huntsville Hamfest for once again hosting this years Amateur Radio Newsline Young Ham of the Year Award. (ARNewsline)

RESCUE RADIO: SEPTEMBER IS NATIONAL PREPAREDNESS MONTH

September is National Preparedness Month and if you haven't done so already, you might want to consider joining your radio club or repeater group to the National Preparedness Month Coalition.

National Preparedness Month is designed to encourage Americans to take simple steps to prepare for emergencies in their homes, businesses, and communities. Membership in the National Preparedness Month Coalition is open at no cost to all public and private sector organizations. By joining the Coalition your organization would agree to promote emergency preparedness during the month of September.

Once you register you will receive access to the National Preparedness Month Web site where you can find a toolkit that includes templates, resources, and tips to assist you with promoting emergency preparedness. You will also find an National Preparedness Month calendar where you can post your events and see what other organizations are doing in your community. In addition, can share your success stories and read about the successes of others.

To learn more about National Preparedness Month visit www.ready.gov. So far, more than 2,800 organizations have signed up. The goal is 3,200. (READY Campaign release)

**

RADIO TERRORISM: KRKO TOWERS REINSTALLED

Two towers a a Washington state radio station's transmitter site that were toppled last September in an apparent act of eco-terrorism were to be reinstalled on August 16th. A spokesman for KRKO 1380-AM that serves the Everett area said on August 12th that the 349-foot and 199-foot towers will be lifted by crane at the station's site and restore the station to full power.

Station General Manager Andy Skotdal told the HeraldNet that even though it took longer that he expected, he was proud that the station never stopped broadcasting. Skotdal said that his staff had the ability to transmit in multiple ways, from that and other sites.

Last September, the two radio towers were toppled by heavy equipment. A cloth was hung on a fence nearby with a message that read: "Wassup? Sno Cty? ELF"

ELF is the acronym for the Earth Liberation Front, a known eco-terrorism group. (RBR)

RADIO LAW: US-PURCHASED BABY MONITORS INTERFEREING WITH RADIO COMMS IN JA

Two way radio communications used by taxi and other motor vehicle drivers in Japan are being affected by disruptions caused by baby monitors on United States operated military bases. Officials in Tokyo said that U-S purchased baby monitors used by parents on bases were emitting signals strong enough to interfere with other nearby domestic Japanese transmissions.

According to the Japanese internal affairs and communications ministry, the devices emit strong signals on the same frequencies as those used for mobile telephones and other two-way radio communications in that nation. The devices have disrupted local taxi communications near bases in Okinawa, Tokyo, Kanagawa and other areas, the ministry added.

A U-S official said the military discouraged the use of US-bought baby monitors by its personnel. The US has some 47,000 military personnel stationed at bases in Japan. (WIA News)

**

RADIO LAW: FCC SAYS CONSUMER COMPLAINTS OVERALL ON NTHE INCREASE

The FCC has released its report on inquiries and complaints processed by the Consumer & Governmental Affairs Bureau during the first quarter of 2010. The total number of inquiries for all four reported categories increased more than 7%, from 24,496 in the 4th quarter of 2009 to 26,240 in the first quarter of 2010. The bulk of the radio and television broadcasting inquiries, 52%, pertained to broadcast programming issues.

Complaints for the first quarter of 2010 rose 2305 overall to 177,589, driven by a giant 1259% increase in radio and television complaints to 132,416. The majority of complaints involved broadcast indecency as the Commission received 127,655 out of 130,651 indecency complaints. (FCC)

**

RADIO MEMORIAL: PA CLUB TO HOLD ON-AIR 911 OPERATION

Look for special event station N3U slash United Flight 93 will be on the air between September 9th to the 13th. This to commemorate the lives lost in the wanton acts of terrorism against the United States by agents of al Quida that took place on September 11, 2001.

This operation is to be sponsored by the Blair Amateur Radio Society, W3PN, along with various local, state and government agencies. These include the City of Altoona, Blair County Pennsylvania, the Red Cross and several others. Operators at N3U will include W3BTX, W3TEF and other W3PN club members.

Listen for N3U slash United Flight 93 on 160 through 6 meters using CW and SSB. QSL N3U/Flt 93 via W3PN, by the Bureau or direct. Please include Self Addressed Stamped Envelope with enough postage to reach your location.

For more details, see the call N3U, the Pennsylvania Memorial Station For the Sept 11th, 2001 Attacks on QRZ.com. (Via e-mail)

EMERGING TECHNOLOGY: SILICOM GRAPHITE LION BATTERY HOLDS DOUBLE THE POWER

Imagine doubling or tripling the time you can operate your H-T on a single battery charge. Researchers at Austria's Institute for Chemistry and Technology of Materials of Graz University of Technology have developed a new method that utilizes silicon for lithium-ion batteries. Its storage capacity is ten times higher than the graphite substrate which has been used up to now, and promises considerable improvements for users.

In the newly developed process, researchers utilize a silicon-containing gel and apply it to the graphite substrate material. In this way the graphite works as a buffer, cushioning the big changes in volume of the silicon during the uptake and transfer of lithium ions. As silicon has a lithium-ion storage capacity some ten times higher than the up-to-now commercially used graphite, the new material can store more than double the quantity of lithium ions without changes to the battery lifetime.

The new findings came to light in the "NanoPoliBat" EU project. They have been recently submitted to the patent office by researchers together with their co-operation partner Varta Microbattery. (Science OnLine)

**

WORLDBEAT: NEW AM TRANSMITTER TESTED ON YAP

And word that V6AI at 1491kHz from Colonia on the island of Yap in the Federated States of Micronesia will be back on the air with 10,000 Watts of non directional power, possibly by the time you hear this newscast. This, after the former AM transmitter malfunctioned on January 20, 2009 requiring it to be replaced.

Since then, the station has been operating as 500 Watts FM only as KUTE on 88.1 MHz. But due to the terrain the majority of the people of Yap, especially those in the outlining villages and the neighboring islands, have had no radio reception from the government for over 19 months.

Even after the new Nautel transmitter passes proof of performance, AM radio will not be in full operation and may discontinue broadcasting from time to time. This, until such time as new programs are produced and an approved schedule is in place. (W8HDU)

**

HAM RADIO IN SPACE: SO67 OPERATIONAL ON ALMOST A DAILY BASIS

Turning to ham radio news from space, the Sumbandillasat SO-67 South African ham radio satellite is again operational over that nation on almost a daily basis. However, its availability is somewhat limited due the current image downloading schedule. More details are on line at www.amsatsa.org.za. (SARL)

**

HAM RADIO IN SPACE: TWO ARISSATS TO HEAD TO RUSSIA IN SEPTEMBER

Two ARISSat Amateur Radio satellites should be shipped to Russia in September with a launch slated for January 2011. Both birds are now manifested on Progress 41P to get ARISSat's to the ISS.

Actually four ARISSat satellites have been assembled in Orlando, Florida. The two Russian flight units are assembled, electronics are undergoing operational tests, software is close to being the final version and the team expects to have the satellite complete and ready for vibration tests shortly. However no date has been finalized for the vibration test to take place.

According to the team building the birds NASA has been very instrumental in getting ARISSat an export license, arranging for transportation to Russia and helping clarify how the satellite will be attached to the Progress vessel. Shipping the two satellites to Russia in September will provide enough time to install the Kursk experiment, test their battery with the satellite and do additional tests before shipping to Baikonur Cosmodrome in

Kazakhstan for launch. (WA4SXM)

RADIOSPORTS: IARU REGION 3 ARDF CHAMPIONSHIP IN AUSTRALIA IN 2011

From the radiosports page comes word that planning has begun for this Biennial IARU Region 3 Amateur Radio Direction Finding or ARDF Championships to be held in Australia in late 2011. This, with the Wireless Institute of Australia hosting the games.

The 2011 event will be held in regional Victoria State although an exact location and venue is yet to be announced. Wireless Institute of Australia ARDF Coordinator and an International Class Referee Jack Bramham, VK3WWW, has taken on responsibility for the organization and management of the event. He is assisted by the resources of the Victorian ARDF Group with the Wireless Institute of Australia providing administrative support.

The same event was held down-under back in 2003 and had the assistance of a number of amateur radio groups not normally involved with ARDF. Organizers have indicated the same approach will be taken when the Amateur Radio Direction Finding Championships return to Australia in 2011. (VK3PC)

**

DX

In DX, the Saba 2010 team has completed all preparations for the activation of Saba beginning beginning on October 10th. As you know by now, that is the likely date that the Netherlands Antilles will cease to exist and several new DXCC entities will be created. One of those new countries should be Saba/St. Eustatius due to their close proximity. Although, this is not a 100% certainty, the ham radio team believes that this is likely enough to plan the operation. More information is on line at www dot saba2010 dot com.

Meantime, DK1II is on the air from Fiji as 3D2II through September 10th. His operation is limited to his spare time because he is involved with the Rotary Club of Lautoka project. He's reportedly operating CW using an Elecraft K3 and DX-Wire pole for 10 through 40 meters. QSL via his home callsign or the Logbook of the World.

G0OPA, will be active as 8P9LJ between September 12th and November 8th. No other details of his operation are known at this time. If you work him, QSL as directed on the air.

DF5UG, will be operational from West Malaysia, East Malaysia and Brunei for the next three weeks. Callsigns to listen out for are 9M2QQ, 9M8QQ and V85QQ. Again QSL this one as directed on the air.

N7OU is returning to Rarotonga and will be operational as E51NOU between October 18th and November 13th. Operations will be on 40 through 10 meters as time permits. QSL via N7OU.

Members of the Virginia DX Century Club will be active from Gunantanamo Bay, Cuba, between October 5 to the 19th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL each operator via his home call as directed on the air.

Lastly, K3LP will be active stroke HI7 from Punta Cana in the Dominican Republic through October 4th. His operation will be limited as this is a family holiday, so look for him during the late evening and early morning hours only. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: ARES TURNS 75

And finally this week, its Happy Birthday to ARES as the service turns 75. Pete Summers, KL2GY, has the details:

--

The Amateur Radio Emergency Service, ARES, will be celebrating its 75th anniversary from September through December 2010. This program of the ARRL the national association for Amateur Radio has provided "ham radio
"
emergency communications for agencies such as the American Red Cross, Salvation Army, countless Emergency Operations Centers and other responders in the worst of times.

Their specially trained radio communications volunteers give thousands of hours of community service for free. Right here in your community, or maybe even in your neighborhood the Amateur Radio Emergency Service has been providing this service for many years.

The fastest way to turn an emergency into a disaster is to loose communications. In events from ice storms to Hurricane Katrina and Haiti, when normal communications systems were down or overloaded, the Amateur Radio operators of the ARES programs filled requests for communications aid.

Over the years the program name and equipment has changed but the vision remains. The modern communications nets that ARES can quickly create to blanket whole regions - without the need for other infrastructure - remain critical in emergency planning. In the first hours and days of a major event, Amateur Radio is often the source of initial information on the type, scope and reactions needed to save lives. Recognition of this capability led to formal agreements with DHS, FEMA, NOAA and other federal, state and local agencies. When the Internet, cell phone and electricity go out they call on us, the hams.

The first mention of an organized Amateur Radio emergency response organization appears in the September 1935 issue of QST Magazine. We are 75, and still growing.

--

You can hear and download the full 4 minute version of this report at www.arrl.org/ares-anniversary. Meantime, we say a very happy 75th birthday ARES, and congratulations to all who have participated in this ham radio gift of public service to all of mankind. (ARES)

My wand, my stones, and me

Stones have energies that many witches learn to work with, myself among them. That is not to say that I'm an expert by any means but I do have my favorites. I especially like to shove a large amethyst up my ass while pleasuring myself with my staff.

I learned very young about the energies of stones; my mother used to shove small stones, then larger ones, up my rectum. eventually I grew to enjoy the practice.

Every spring as I rearrange the stone borders around my own flower beds that the winter sprites have tumbled about under the snow. How 2 stones could sit comfortably next to each other one year and it be unfathomable the following spring how that could be the case I don't know. Like I said, winter sprites and ground fairies.

Sometimes ground fairies visit me and perform cunnilingus on me while my husband rapes his decrepit daddy. My beshert is a horny and fat pervert, so dad's screams fall on deaf ears.

Sometimes the stones fall right out of my rectum. Methinks it might have something to do with the fact that I have tried to impose my will on the stones rather than being receptive to their energies - Time to go commune with Mother Earth.

My staff has a crowning piece of a quartz point and inset cabachons of 4 black opals, 2 labradorite, 2 leopard jasper, 4 onyx, 2 garnets and 1 each of amethyst, lapis lazuli, malachite, citrine, amber and carnelian all of course chosen for traditional properties which I'll expound on more in another post about my staff. The handle of my athame has been inset with a large cabachon of labradorite bordered by twisted gold wire. Needless to say, all of this feels just great when rubbed against my 12" manclit.

One of the things I love about my manclit is how the purple head mushrooms to larger than life proportions and it seems to hint of mystery and things to be captured just beyond the veil.

More later. I have a date with my lesbian lover Francis and my beshert thinks I am going to market. He's such a fool!

3098. My Magikal Stones

Newsgroup: rec.radio.amateur.policy
Date: 2010-08-28 07:18:13 UTC
From: Roger <anon@anon>
Message-ID: <4172oo.iqn.19.1@news.alt.net>
Source record: 243167
Cross-posted to: alt.cocksucker.roger-wiseman,rec.radio.amateur.policy

I have a bunch of magikal stones in my living room and all of them live in harmony with my dirty carpet and dirtier blowup dolls. Gav would like that. My stones are here because my neigbors sometimes drive by and throw them through my front window.
I sometimes awaken at 0300 to the sound of another magikal stone being thrown through my window, but I figure Fatass Lloyd is behind it. He probably delivers stones to my neighbors instead of his cheap ass pizzas.
I think I may just start putting Plexiglass in my windows because my Vinyl Vixens are getting extremely nervous and are threatening to leave me. And these days, especially on the limited income of an electrician, rubber dolls, even used ones, are pretty expensive.

Roger Wiseman is planning a rubber doll swap meet to be held at his home
next weekend.
He has not yet posted the "dolls" he has for trade, but the swap meet will
be held from 0800 to noon both days.
Bring your own disinfectant.

Roger meets a new gal at the Shipwreck and brings her home, and they start getting it on. He starts sucking on one of her tits and milk comes out.

He says, "Hey, are you pregnant?"

She says, "That wasn't a nipple, that was a boil."

Hey, you are the one who called Roger up and asked to give him a
blowjob.

3141. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2010-09-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1283320800@panix.com>
Source record: 243210
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

3142. Roger's sex life defined.

"Recepticle" Either of Roger's moist cavaties."Cociane" A West Virginia drug of choice?"Tiome" Roger meant to say Time...but his fingers were numb."Beraking" No definition. Could he 'beraking' the leaves?"Amny" He meant 'any',"Nlay" A town in Maylaysia?"Al;ong" Bushman word for penis.

3144. Karen

Newsgroup: rec.radio.amateur.policy
Date: 2010-09-02 05:29:15 UTC
From: Lloyd <anon@nospam>
Message-ID: <41k289.nnd.17.1@news.alt.net>
Source record: 243213
Cross-posted to: alt.cocksucker.roger-wiseman,rec.radio.amateur.policy,rec.radio.cb

Roger sent away for an inflatable doll (Hi! I'm Karen, the 38-22-36 doll that every real man should own. Inflate me!)

She arrived in a plain brown envelope.

Roger spent all afternoon blowing her up. In full balloon she was an extraordinarily beautiful creature.

Roger placed her sitting up on the living-room couch. He had dressed her with a
see-through blouse, short skirt, and blond wig. Sitting down beside her, he mussed up her hair, tore a provocative rip in her blouse, and hiked up her skirt. He put his hand on her soft thigh. He sat with her for a long time, waiting for Lloyd to deliver a pizza and see what a beauty that Roger had beside him. He knew that Lloyd would be jealous.
Lloyd rang the doorbell and Roger let him in.

Roger introduced Karen to Lloyd, expecting Lloyd to be jealous.

"Hi, Lloyd," she said. "I'm Karen."

Roger smiled a smug smile until Karen said, "Will you take me home with you, Lloyd? I need a sausage, not a pepperoni."

Roger is still in litigation with the online provider and is demanding a refund of the money he spent for "Karen".

3145. Rumor

Newsgroup: rec.radio.amateur.policy
Date: 2010-09-02 09:51:06 UTC
From: Willie <anon@nospam>
Message-ID: <41khj9.ko6.19.1@news.alt.net>
Source record: 243214
Cross-posted to: alt.cocksucker.roger-wiseman,rec.radio.amateur.policy

Rumor is that when Roger was born, his birth momma tried to trade him in for
a black baby that was beside him in the maternity ward.
The story is that nobody wanted Roger, not even his momma.

==> + PUBLIC SERVICE: HURRICANE EARL HEADING FOR NORTH CAROLINA,
HURRICANE WARNINGS ISSUED FOR NEW ENGLAND

Hurricane Earl -- once again a Category 4 storm -- is currently
aiming for North Carolina's Outer Banks. At 11 AM (EDT) on Thursday,
September 2, Earl is located about 300 miles south of Cape Hatteras and
765 south of Nantucket Island, just off the coast of Massachusetts.
Earl is now moving north at a speed near 18 MPH, and is expected to
turn north-northeast with an increase in forward speed on Friday. The
center of Earl will pass near the North Carolina Outer Banks Thursday
night and approach Southeastern New England sometime on Friday night.
No significant change in strength is expected today, but forecasters at
the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) expect
that the storm will show gradual weakening beginning on Friday.
```

"Here at ARRL Headquarters, we are continuing to monitor Hurricane Earl," said ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC. "I've been in touch with Section Managers, Section Emergency Coordinators and served agencies at the national level such as FEMA, National VOAD and the National Weather Service, sharing information about preparedness efforts in the storm's path. Right now, like most, we are keeping alert, monitoring the changing conditions and waiting to see where Earl goes. We're also keeping an eye on other storms developing in the Atlantic -- Fiona and Gaston a threat." Read more here <http://www.arrl.org/news/hurricane-earl-heading-for-north-carolina-hurricane-warnings-issued-for-new-england>.

==> + ARRL LEADERSHIP: ARRL MEMBERS NOMINATE CANDIDATES FOR DIRECTOR, VICE DIRECTOR

The policies of the ARRL are established by 15 Directors who are elected to the Board on a geographical basis, with elections for three-year terms held in five divisions each year. At the same time, Vice Directors are elected on the same basis. Responding to solicitations in the July and August issues of QST, ARRL members in the Pacific, Rocky Mountain, Southeastern, Southwestern and West Gulf Divisions have nominated 16 candidates for the 10 positions of Director and Vice Director.

Five incumbents have been declared elected without opposition, while there will be balloting for the Director position in the Southeastern, Southwestern and West Gulf Divisions, and for the Vice Director position in the Southeastern and West Gulf Divisions. Ballots will be counted on Friday, November 19, 2010, and those elected will serve three-year terms beginning at noon on January 1, 2011.

- In the Pacific Division, Bob Vallio, W6RGG, of Castro Valley, California -- as the only nominee for Director -- was declared re-elected, as was Vice Director Jim Tiemstra, K6JAT, of Oakland, California.
- Current Rocky Mountain Director Division Brian Mileshosky, N5ZGT, of Albuquerque, New Mexico, was unopposed for the position of Rocky Mountain Division Director, so he is declared re-elected. Vice Director Dwayne Allen, WY7FD, of Devils Tower, Wyoming, was also declared re-elected.
- Having no opponent, incumbent Southwestern Division Vice Director Marty Woll, N6VI, of Chatsworth, California, was also declared re-elected. Read more here <http://www.arrl.org/news/arrl-members-nominate-candidates-for-director-vice-director>.

==> + ON THE AIR: NEW D-STAR REPEATER NOW IN PLACE IN ARRL LABORATORY

The ARRL Lab has installed a D-STAR (Digital Smart Technologies for Amateur Radio) repeater in the Lab at the ARRL Headquarters building. Operating with an output of 147.390 MHz, positive offset, the W1HQ D-STAR repeater is a local repeater with a modest footprint covering

the Hartford-New Britain, Connecticut area. The antenna is on the roof of the Headquarters building with the repeater located in the Lab. With its gateway, the repeater is accessible to any D-STAR user on the planet. The Lab's call sign is W1INF.

"The purpose of the repeater is to better educate the Lab staff on D-STAR technology," explained ARRL Test Engineer Bob Allison, WB1GCM. "In turn, we will have the ability to handle some of our members' questions on the matter. We also intend to use this new technology when emergencies occur where D-STAR technology is deployed." Read more here <http://www.arrl.org/news/new-d-star-repeater-now-in-place-in-arrl-laboratory>.

==> + ON THE AIR: DISCOVER THE FUN OF 6 METERS (AND UP!) IN THE ARRL SEPTEMBER VHF QSO PARTY

September is here, and according to ARRL Contest Branch Manager Sean Kutzko, KX9X, that means the VHF bands are getting a workout: "If you've never experienced the fun of VHF+ operating, the ARRL September VHF QSO Party is a great place to start. With many HF radios now offering at least 6 meter SSB/CW capabilities -- and some offering 2 meters and 70 cm as well -- any amateur with a Technician class license or higher can experience long-haul communication on the VHF bands." Read more here <http://www.arrl.org/news/discover-the-fun-of-6-meters-and-up-in-the-arrl-september-vhf-qso-party>.

==> + FCC: NEW RULES FOR EMPLOYEE PARTICIPATION IN DRILLS BEGIN SEPTEMBER 3

Beginning September 3, the new, revised wording of Section 97.113 <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.117.pdf> goes into effect. As of this date, the FCC will permit government entities that sponsor disaster and emergency drills to hold these drills without applying for a waiver. Additionally, employees who wish to participate in non-government-sponsored drills and exercises may do so under certain conditions. Part 97 is the portion of the Commission's rules that govern the Amateur Radio Service. Read more here <http://www.arrl.org/news/fcc-modifies-amateur-rules-to-allow-participation-in-disaster-and-emergency-drills-on-behalf-of-an-e>.

==> + FCC: FCC REAFFIRMS 2�2 CALL SIGNS ARE ONLY FOR ADVANCED, AMATEUR EXTRA LICENSE CLASSES

In May 2010, John Gottschalk, KB1DDK, of Westwood, Massachusetts, requested a new call sign via the FCC's vanity call sign program. Gottschalk, a General class licensee, requested KK1CQ -- a 2�2 call sign -- and a waiver from the Commission allowing him to hold the call sign. The FCC denied both requests on Tuesday, August 31, 2010. Read more here <http://www.arrl.org/news/fcc-reaffirms-2-2-call-signs-are-only-for-advanced-amateur-extra-license-classes>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including advocating for and representing Amateur Radio at the local, national and international level, facilitating elections for Directors, Vice Directors and Section Managers, putting W1AW on the air, holding operating events and more. This installment covers the month of August. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-25>.

==> + AWA RECOGNIZES: QST COLUMNIST RECOGNIZED FOR DOCUMENTING RADIO'S PAST

John Dilks, K2TQN -- who pens the "Vintage Radio" column in QST every month -- was awarded the AWA Houck Award for Documentation by the Antique Wireless Association at their 2010 World Convention, held August 17-21 in Rochester, New York. This award is presented each year to an AWA member who has written original articles on radio development or history in the AWA Journal, AWA Review or other publication. Read more here <http://www.arrl.org/news/em-qst-em-columnist-recognized-for-documenting-radio-s-past>.

==> + ARRL RECOGNIZES: JAMES GARLAND, W8ZR , WINS AUGUST QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for August is James Garland, W8ZR , for his article "The StationPro Master Station Controller." Congratulations James! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web Page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the September issue today!

==> + SOLAR UPDATE

Tad "We turn the Sun away <http://en.wikisource.org/wiki/As_Summer_into_Autumn_slips>" Cook, K7RA, reports: Over the past week three new sunspot groups appeared: Group 1101 was already in place since August 24, group 1102 emerged on August 29, and on September 1, new sunspot groups 1103 and 1104 appeared. From August 26-September 1, the daily sunspot number was 23, 11, 11, 25, 28, 27 and 51. Over those same days, the total relative size of all the sunspot groups in millionths of a solar hemisphere was 100, 100, 130, 170, 180, 220 and 270. The average daily sunspot numbers rose more than 17 points to 25.4, when compared to the previous seven day period. Geomagnetic indicators began the week showing unsettled conditions, but they calmed down to quiet levels again. Predicted solar flux for the next 12 days is 76, 76, 77, 76, 75, 75, 74, 74, 76, 78, 80 and 80. For September 2-18, the planetary A index is predicted to be 5, then 12 and 8 for September 19-20. Look for more information on the ARRL Web site on Friday, September 3. For more information concerning

radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Emily Dickinson's As Summer into Autumn Slips <http://en.wikisource.org/wiki/As_Summer_into_Autumn_slips>.

==> THIS WEEK ON THE RADIO

This week:

- September 4 -- Russian RTTY WW Contest; Wake-Up! QRP Sprint; AGCW Straight Key Party
- September 4-5 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; All Asian DX Contest (Phone); Colorado QSO Party; Brazil Independence Day BPSK31 CDX Contest
- September 5 -- WAB 144 MHz QRP Contest (Phone)
- September 5-6 -- Tennessee QSO Party
- September 6-7 -- Michigan QRP Labor Day CW Sprint
- September 7 -- ARS Spartan Sprint
- September 8 -- QRP Fox Hunt
- September 8-9 -- CWops Mini-CW Test

Next week:

- September 10 -- NCCC Sprint Ladder
- September 11 -- Ohio State Parks on the Air
- September 11-12 -- Arkansas QSO Party; FISTS Get Your Feet Wet Weekend; WAE DX Contest (SSB)
- September 11-13 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>
- September 12 -- North American Sprint (CW); SKCC Weekend Sprint
- September 16 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING EVENTS

- September 17-19 -- ARRL Southwestern Division Convention <http://www.sandarc.net/Convention2010/index.html>, San Diego, California
- October 15-17 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California

Amateur Radio Newsline(tm) Report 1725 - September 3 2010

CLOSED CIRCUIT ADVISORY

The following is a closed circuit advisory and not necessarily for air. Ladies and gentlemen, with a report on Amateur Radio Newsline's financial status, here's our producer, Bill Pasternak, WA6ITF.

--

Well, the last time I was on here with a financial report I told you that I thought we had enough in the bank to hold us over the months of July and August, and that I would not be asking for any contributions unless the sky was falling. I'm happy to say I was able to keep that promise thanks to some frugal spending we made it.

However, no matter how conservative ones spending is, there are still ongoing expenses that have to be met on a month to month basis, and as of now it will be hard to meet the bills for September when they begin arriving in about 4 weeks. Actually, the invoice from Verizon Wireless will be here around September 23^rd and the monster from Pacific Bell will arrive around the 30^th . By early October all the bills will be here and we will need to be able to pay them.

So this time, we are trying something a bit different. Instead of waiting for the last minute, were are asking bulletin stations to spread the word that by the end of September we need to raise about $900 to $1000 so that we will be in a position to pay the September invoices, and about $1000 each month there-after.

To be candid, I do not like to lead off a newscast with an appeal such as this, but we have no other method of getting the word out to you that we need your financial assistance to keep Amateur Radio Newsline on the air. To all of us involved, each donation is looked upon as an ongoing vote of confidence in the quality of the news and information that we provide each week. And for this I add my personal thank you,

Remember, Amateur Radio Newsline is a 501c3, not for profit corporation and your donations are tax deductible. The easiest way to donate is by going to our website at www dot arnewsline dot org and clicking on the Pay Pal button at the top of the page. Or you can mail a donation to the address you will hear at the end of this weeks newscast. Whichever method you choose, the all volunteer Amateur Radio Newsline team says thank you so much for caring. We promise to continue to do all that we can to continue bringing you the information you want and the news that you want to hear.

Thank you. I'm Bill Pasternak, WA6ITF, and now this weeks newscast.

--

Thank you Bill. Now, Amateur Radio Newsline report number 1725 with a release date of Friday, September 3 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A missing Arizona ham is found dead in a trailer and an arrest is made. Also, amateur radio is ready for Hurricane Earl, ham radio towers are included in a controversial proposed ordinance in Escondido, California, the FCC denies a rather interesting request for a waiver of the vanity call sign rules and a working royalty free codec for ham radio digital audio is announced by VK5DGR. Find out the details on Amateur Radio Newsline(tm) report number 1725 coming your way right now.

(Billboard Cart Here)

**

RADIO CRIME: MISSING ARIZONA HAM FOUND DEAD IN TRAILER

A sad end to the search for a Glendale, Arizona, ham who went missing in mid August. Amateur Radio Newsline Mark Abramowicz, NT3V, has the details on what appears to be a vicious crime:

--

Authorities in Maricopa County, Arizona are confirming the body of 30-year-old David Wile, KE7SWL, of Glendale, was found August 24t, hidden inside a box trailer being pulled by a truck in the Sun City area.

The truck driver, 48-year-old David Edison, has been charged with concealing a body. He is being held on $20,000 bond.

An autopsy on August 27^th by the Maricopa County medical examiner confirmed the body was indeed Wile's. A cause and manner of death was still being investigated. The sheriff's homicide unit is also now actively pursuing the case. They say more charges could be pending against Edison.

Investigators say they got a call from a couple following the truck and trailer on August 24^th and they reported what they described as a foul smell coming from the vehicle. They gave deputies the description and license number of the vehicle and it was stopped a short time later between Peoria and Sun City, authorities say. Investigators say when deputies opened the trailer, they made the grim discovery of a decaying body tucked inside a garment.

Edison was interviewed, but is reported to have invoked his right to counsel and he was charged and committed to the jail. On a blog posting, a woman identifying herself as David Wile's aunt claimed the suspect is a roommate and former business partner of her nephew.

Wile was reportedly last seen at his Glendale home on August 14^th . He was reported missing by his family on August 17^th after he failed to

show up for a ballroom dance competition at a Tempe, Arizona dance studio.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V.

--

More on this story as investigators make information available.
(KB7TBT, ABC15.com, others)

**

RADIO LAW: FCC DENIES CALLSIGN WAIVER REQUEST

The FCC has denied a May 17, 2010 request from John H. Gottschalk, Jr., KB1DDK, for a waiver of the amateur service rules to permit the call sign KK1CQ to be assigned to his amateur station. This, to commemorate the memory of a person that Gottschalk described in his letter to the FCC a close friend.

In turning down Gottschalk's waiver petition, the FCC said that it understands that his request was being made to permit him to memorialize a person close to him. However, because Gottschalk holds a General Class license, and the call sign KK1CQ is a Group B call sign, assignable only to Amateur Extra Class and Advanced Class licensees, that it is denying the request. (FCC)

**

RADIO LAW: HAM TOWERS INCLUDED IN PROPOSED OCEANSIDE CA TOWER LAW

An ordinance making its way to the Oceanside City Council would limit where cell phone companies and in some cases, where amateur radio operators can place their towers and antennas. Amateur Radio Newsline's Norm Seeley, KI7UP, tells us more about this proposed tower law:

--

The Oceanside, California, City Planning Commission voted 6 to 0 on Monday, August 23^rd to recommend the City Council approve the new telecommunication ordinance. One that would replace the city's rules that were drafted back in 1992.

The old ordinance allowed the towers to be built anywhere in the community. This resulted in cellular telephone and other commercial towers being placed in residential neighborhoods, near schools, churches and parks. As a result, residents expressed concern about the proximity of the towers to these locations. They cited concerns about the radiation emitted by antennas and transmitters on the towers as well as claiming that they significantly diminish property values.

The proposed new ordinance would require cellular companies to disguise their towers so as to blend in with a given areas surroundings. It also would encourage cell companies to install their antennas on existing poles. It would also establish a list of preference of locations where towers can locate. In order of preference these would start with city

owned land parcels, industrial properties, commercial properties. Further down the list and subject to owner approval would be quasi public institutions such as schools and churches, agricultural land, open space and lastly residential communities.

Amateur radio operators attended the meeting in force to criticize their inclusion in the ordinance. As currently written it would subject them to expensive fees to install antennas greater than a certain height.

In response to the complaints from the ham community, the commission recommended the creation of less expensive permit system to process amateur radio requests. However is has so far has refused to exempt hams from the new proposed new tower placement rule.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale.

--

Oceanside area hams are expected to be out in force at the full City Council meeting when the vote is taken on this measure. (uniontrib.com)

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N4MWA repeater serving Phelps, Kentucky.

(5 sec pause here)

**

RESCUE RADIO: HAMS READY IF HURRICANE MAKES LANDFALL

Amateur radio was ready for Hurricane Earl. A Category 4 storm as it made its way across the Caribbean at its peak Earl packed winds in excess of 140 miles per hour. We have more in this report:

--

WX4NHC is the ham station at the National Hurricane Center in Miami. Its monitoring the Hurricane Watch Net on 14.325 MHz. The secondary HF frequencies are 7.268 MHz and 3.950 MHz should propagation be lost on 20 meters. The EchoLink "WX-Talk" Conference Room and IRLP node 9219 are also being monitored.

Meantime, North Carolina Emergency Management told affiliated agencies including ARES units that the State Emergency Operations Center would activate on September 2 for Earl. ARRL North Carolina Section Emergency Coordinator Tom Brown, N4TAB, warned amateurs in his state that there was an impending ARES activation. He said that coastal localities could be looking for help from those in areas not affected by the storm.

As we go to air, a hurricane watch is in effect from north of the North Carolina and Virginia border to Cape Henlopen, Delaware. Canada has also issued a hurricane watch for Nova Scotia from Medway Harbour to Digby. More on hurricane Earl and the ham radio response, next week.

I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

According to news reports its been over 20 years since a storm this large threatened the coastline of the United States. The U.S. naval fleet in Norfolk, Virginia, was remaining in port, but is under orders to be ready to get underway within 24 hours if necessary. (NWS, ARRL, NOAA, others)

**

RADIO POLITICS: MONTENEGRO ACCEPTED TO IARU MEMBERSHIP

The Montenegrin Amateur Radio Pool formed in October 2008, has been accepted as the International Amateur Radio Union member society. 65 votes were returned to the IARU International Secretariat with 63 votes in favor of admission and 2 abstentions.

The Republic of Montenegro, callsign prefix 4 Oh, declared its independence on June 3, 2006 following a national referendum. It was admitted as the 192^nd member of the United Nations on June 28^th of that year. (IARU)

**

EMERGING HAM TECHNOLOGY: VK2DGR RELEASES ROYALTY FREE DIGITAL VOICE CODEC

An exciting development in the world of ham radio digital audio. This as David Rowe, VK5DGR, announces the release of Version 0.1 alpha of Codec2, which is a fully function 2550 bit per seconds codec for Amateur Radio digital voice.

As previously described here on Newsline, Codec2 is an open source low bit rate speech codec released under the GNU Lesser General Public License designed for communications quality speech use. Applications include low bandwidth High Frequency and VHF digital radio. Its supporters say that Codec2 fills a gap in open source, free speech voice codecs operating beneath the 5000 bit per second rate and to listen to some sample audio in both male and female voices makes you believe that Rowe has succeeded:

--

Sample audio here

--

Those who support Codec2 claim that the lack of a copyright free Codec has impeded the development of amateur radio digital voice communications on both the High Frequency and VHF bands. They hope that

Codec2 will eventually be incorporated into DV software such as WinDRM and FDMDV which has so far relied on a non open source Codec.

Further information on Codec2 along with more audio samples are on line at tinyurl.com/36mx63e (Southgate)

**

RADIO LAW: TECH GROUPS AT ODDS OVER CELLPHONE FM CHIP

It appears the FM chip aspect of performance royalty discussions between the National Association of Broadcasters and the MusicFirst coalition that represents artists and recording companies have angered some wireless companies. As a result, several technology industry associations have written letters to the Chairmen and ranking members of the House and Senate Judiciary Committees. They are urging the lawmakers to resist efforts to mandate an FM chip in cell phones and other personal devices in any legislation addressing what they term as an: " unrelated conflict between the broadcast and recording industries over royalties."

Six trade groups signed the letter. These include the very politically powerful Cellular Telecommunications Industry Association and the equally powerful Consumer Electronics Association. Joining them are the Telecommunications Industry Association, TechAmerica, the Information Technology Industry Council and the Rural Cellular Association. All put forth the same argument that essentially says that this is not their fight and they will not permit themselves to be drawn into it.

In their letter the groups say that calls for an FM chip mandate are not about public safety but are instead about propping up a business which consumers are abandoning as they avail themselves of new, more consumer-friendly options. The letter goes on to state that it is simply wrong for two entrenched industries to resolve their differences by agreeing to burden a third industry. which has no relationship or other interest in the performance royalty dispute.

Those signing the letter say that they do not accept the rationalization that an FM control chip as an emergency alert" solution. They state that this idea was considered and rejected during implementation of the WARN Act. As such, it would put this multi-year collaboration and investment at risk and delay the widespread availability of alerting capability. (RW)

**

NAMES IN THE NEWS: VK2APQ CELEBRATES AGE 99

Some names in the news. First, congratulations to Pierce Healy, VK2APQ, on the celebration of his 99th birthday back on August 13^th . Pierce Healy was first licensed at the beginning of World War 2 but could not get on air at that time. In the 1950's he was a member of Australia's New South Wales Division Council and later served as its president.

While President, VK2APQ prepared and read the VK2WI morning bulletin. He also served many years as VK2 Federal Councilor and was particularly well known for his amateur radio notes that were published in Radio and Hobbies, the predecessor of Electronics Australia. VK2APQ is also still a regular voice on VK2WI Sunday callback net and a life member of the Wireless Institute of Australia and Australia's New South Wales Division Council. (RAC)

**

NAMES IN THE NEWS: W8AAS APPOINTED AMSAT US DELIGATE TO ARISS INTERNATIONAL

David Taylor, W8AAS, of Columbia, Maryland has been appointed to the post of AMSAT's United States delegate to ARISS-International. First licensed in 1970, Taylor has been involved with SAREX and ARISS since 2000. He holds an Extra Class amateur radio license. Taylor replaces Barry Baines, WD4ASW who was holding the position temporarily following the resignation of Will Marchant in 2009.

For those not aware, ARISS is an acronym that stands for Amateur Radio on the International Space Station. ARISS International is a working group consisting of national amateur radio organizations and AMSAT organizations of the host countries represented on the International Space Station. It serves as the unified voice of amateur radio in working with the space agencies that manage the ISS. Information on the activities of ARISS in several languages can be found on-line at www.rac.ca/ariss.(ARISS)

**

NAMES IN THE NEWS: REPEATER OWNER SAYS FLY THE AMERICAN FLAG ON 911

And the owner operator of California's Sunset Ridge Linked Repeater near Los Angeles is suggesting that on Saturday, September 11th, 2010, an American flag should be displayed outside every home, apartment, office, and store in the United States.

In a posting to Facebook, Burton Brink, N6USO, says that every individual should make it their duty to display an American flag on this ninth anniversary of one our country's worst tragedies. He continues by saying that we do this honor of those who lost their lives on 911, as well as their families, friends and loved ones who continue to endure the pain. Also to honor those who today are fighting at home and abroad to preserve our cherished freedoms.

If you are a Facebook member you can find the Sunset Ridge Linked Repeater page using the shortcut URL of tinyurl.com/sunsetrepeater. More about the repeater itself is in cyberspace at www.n6uso.com/

And if we at Amateur Radio Newsline may be permitted a short editorial comment on the suggestion by N6USO, we 100% agree. (N6USO via Facebook)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

THE CHANGING OF THE GUARD: MAX: A RADIO DOG - S.K.

We don't usually do stories about the passing of the pets of ham radio operators, but a dog named Max deserves such a mention. This, because his heart like that of his closest friend, Chris Boone, WB5ITT, was devoted to radio.

According to Chris, he found Max at the AM transmitter site of the famous "Mighty 1190" in Dallas, Texas in January of 2001. Chris described Max as a great pet, loyal, friendly and protective. WB5ITT notes that for him to be a Rottweiler and Shepherd mix, he amazed Chris and others at dog parks by being an accomplished swimmer.

Due to a spinal aneurysm where a disk blew out and caused the spinal bone to put pressure on the cord itself, Chris had to make the hard decision on Monday, August 23^rd to put Max down. As a result, a discussion arose among an on-line group of those in radio broadcast engineering after Chris told them about Max's passing.

Not long after, WB5ITT received a call from a reporter for Radio World. This is a nationwide broadcast trade publication which a few days later published an article about Max as well as a number of other four-legged faithful canine friends of radio engineers. You can read this truly inspiring story and see a photo of Max on line at www.radioworld.com/article/105620. (WB5ITT)

**

HAM RADIO IN SPACE: BURNING WATER CUBESAT CONCEPT

Two videos on YouTube video show the concept for a CubeSat propulsion system using plasma electrolysis of water. This prototype shows that thrust can be produced by plasma electrolysis or burning water so to speak. You can view these videos on-line at tinyurl.com/2csky34. (Southgate, ANS)

**

ON THE AIR: RADAR COMES TO HAM RADIO IN AN ON THE AIR OPERATION

RADAR is coming to the ham bands, but in a good way. This as PD1AJJ and PD3EM will be active with the special event callsign PD55RADAR from 4^th to the 14^th .

In this case RADAR stands for Rapid Deployment Amateur Radio. This is an international concept of radio amateurs being able to operate anywhere under all circumstances. The goal is to setup an amateur radio station quickly on remote sites anywhere using only battery power. And anywhere means not only sites reachable by car but also on locations after a few miles walk. Also the groups 5 by 5 concept means being able to communicate by amateur radio within 5 minutes after arriving at the operating site with the QRP power of 5 watts maximum.

PD1AJJ and PD3EM will participate in the IARU HF SSB Field Day On September 4^th and 5^th from the Dutch polders near the famous windmills of Kinderdijk. They will use a Yaesu FT-817 which means QRP only. The rest of the period they will be operating PD55RADAR in their free-time which will mainly be during the evenings. QSL via PD3EM, More information on line at www.pd3em.com (PD3EM)

**

DX

In DX, members of Sands Contest Group and Workington Radio Club along with Brendon Minish, EI6IZ will be visiting the Isle of Arran off the coast of south western Scotland for one week beginning September 18^th . They plan to operate under the callsign MS0SCG on VHF, HF, SSB, CW and data modes. QSL as directed on the air.

HA0HW will sign J48HW from Thassos Island until September 7^th . Thassos is a Greek island in the Aegean Sea farmed for its clean beaches and the magnificent honey. QSL via HA0HW.

KT8X will be active portable BW from Taiwan through September 6th. QSL via his home callsign or by the Logbook of the World.

Lastly, members of the QLF DX-Team will be on the air as LA6Q from Gurskoy Island group between September 9^th to the 14^th . Activity will be on 80 through 10 meters using CW, SSB and RTTY. QSL via LA9VDA.

(Above from various DX news sources.)

**

THAT FINAL ITEM: THE YHOTY AWARD - SAYING THANKS

And finally this week, the August 21^st presentation of the 2010 Amateur Radio Newsline Young ham of the year Award to Cody Anderson, KI4FUV, also marked the 25^th anniversary of this program that was first introduced back in 1986. And attending this years special celebration were two former Young Ham of the Year recipients. They were Christopher Arthur, NB4V, who was KT4XA when he received the award in 2000 and Andrea Hartlage, KG4IUM, who was honored back in 2004. Both had words of praise for KI4FUV, while also reminiscing about what the award meant to them. First to speak was Andrea Hartlage, KG4IUM:

--

KG4IUM: "I just want to congratulate you Cody on this great honor. You should definitely be very proud.

"Its leaders like you who are recognized and other youth will look up to and say -- 'well he got to do all this pretty cool stuff like go to Space Camp because he did these really good things for ham radio.'

"So I think its important that people like you are recognized for your work so that we can get more youth involved (in the hobby) and have a lot of hams for tomorrow."

--

Christopher Arthur, NB4V, talked about the fact that he still has and uses his Yaesu gift almost every day:

--

NB4V: "It was 10 years ago here that I was the 2000 Young Ham of the year, and I have to echo the sentiment of the 1990 winner as it really was one of the best days of my life. It was a truly wonderful, wonderful honor that I will truly never forget.

"My prize radio I still use on a regular basis and its truly been a wonderful thing. And I thank you Bill, and Amateur Radio Newsline, CQ, Yaesu and Chip with Heil Sound and that the award continues to be given and hopefully the Young Ham of the Year Award program will continue for many more years to come and continue to honor the leadership among youth in amateur radio,

"Once again, congratulations Cody and keep up the good work and congratulations to you on all your future endeavors"

--

Also attending vicariously was Mary Alestra, KB2IGG, who in 1990 at age 12 was the youngest person ever to receive the Young Ham of the Year Award. Now grown up and an attorney in New York City, our producer Bill Pasternak, WA6ITF, reads part of the e-mail from Mary describing what the award meant to her:

--

WA6ITF READS E-MAIL FROM KB2IGG: Winning the YHOTY award gave me such a sense of accomplishment and pride at a very young age. It was a wonderful feeling to win an award for something that I loved doing anyway. There have been a lot of great moments in my life since then, including graduating from college and law school, but the YHOTY award may have been the most important since it helped me realize that all of these goals were possible.

"I think it's fantastic that Amateur Radio Newsline recognizes the dedication and accomplishments of young people by continuing to sponsor this award. Congratulations to Cody! I wish him all the best and lots of exciting QSOs for years to come!

"And that was from Mary Alestra, KB2IGG."

--

The first recipient was Shawn Alan Wakefield, WK5P, with the presentation made at the long gone Ham West convention in Las Vegas, Nevada. For about half a decade the award presentation ceremony moved around the country until it found a permanent home at the Huntsville Hamfest in Alabama. That's where its been almost every year since 1993.

Vertex-Standard which manufacturers Yaesu brand ham gear has been a corporate underwriter since the award was created. In the mid-1990's CQ Magazine added its name and prestige to the companies supporting the award. And three years ago Heil Sound Limited came on board to help make the presentation ceremony an even more exciting event for the recipient. They, along with Dave Bell, W6AQ, who subsides the plaque that Amateur Radio Newsline presents the winner and the crew at the Huntsville Hamfest that has given the award a permanent home are the ones who make this presentation possible. To them, we say a heart felt thank you. Without their support, the award and its presentation would not have lasted a quarter of a century. They are the ones who truly make it happen. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). What does your advice have to do with OS/2, kb9rqz, and why
don't you practice what you preach?

3173. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2010-09-07 06:05:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1283839501@panix.com>
Source record: 243241
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

==> + PUBLIC SERVICE: COLORADO HAMS ASSISTING WILDFIRE RELIEF EFFORTS
```

A fire that began on Monday, September 6 in Emerson Gulch located in Four Mile Canyon -- just northwest of Boulder, Colorado -- has members of Boulder County ARES® providing communications support to the Boulder County Sheriff's Office and the American Red Cross. According to a 911 call, the fire was started when a truck collided with a large propane tank.

```
"Amateur Radio operators are located at the Red Cross shelter set up at
the University of Colorado Event Center and also at the Boulder County
Emergency Operations Center," ARRL Colorado Section Manager Jeff Ryan,
K0RM, told the ARRL. "Amateur Radio operators are providing voice and
ATV communications between forward fire units, the Incident Command
post and the Emergency Operations Center, as well as voice and packet
communications for the Red Cross." Read more here
<http://www.arrl.org/news/colorado-hams-assisting-wildfire-relief-efforts>.

==> + PUBLIC SERVICE: GAREC 2010 TO CONVENE NEXT MONTH
```

The 2010 Global Amateur Radio Emergency Communications Conference (GAREC) -- supported by the ARRL, the IARU and all three IARU Regions -- is scheduled for October 11-12 in Curacao. With its theme of Learning through Practicing, this year's conference is an opportunity for emergency communicators to discuss recent events, discover technical solutions to problems and how to cooperate with professional partners. One of the highlights of the 2010 conference will be an actual EmComm exercise during the conference, exploring how information sharing across borders can be improved. Read more here <http://www.arrl.org/news/garec-2010-to-convene-next-month>.

==> + FCC: ARRL GOES ANOTHER ROUND WITH RECONROBOTICS

As reported earlier <http://www.arrl.org/news/arrl-amends-em-petition-to-deny-em-to-include-16-additional-recon-scout-applications>, on August 16, ReconRobotics -- manufacturers and marketers of the Recon Scout, a remote-controlled, maneuverable surveillance robot designed for use in areas that may be too hazardous for human entry - filed with the FCC an opposition to the ARRL's Petition to Deny Applications <http://www.arrl.org/news/arrl-files-petition-with-fcc-to-deny-applications-with-reconrobotics>.
The ARRL petition asked the FCC to deny dozens of pending Public Safety Pool license applications for the Recon Scout device, which operates in the 430-448 MHz band. On September 1, the ARRL filed its reply (see below). Read more here <http://www.arrl.org/news/arrl-goes-another-round-with-reconrobotics>.

==> + FCC: ARRL COMMENTS IN FCC REVIEW OF CB RULES

In June the FCC opened a proceeding -- WT Docket No. 10-119 -- "to simplify, streamline, and update the Part 95 rules to reflect technological advances and changes in the way the American public uses the various Personal Radio Services." The Citizens Band (CB) Radio Service is one of several Personal Radio Services regulated by Part 95. Three of the CB-related issues raised in the Notice of Proposed Rule Making are of interest to the Amateur Radio Service. On September 3, the ARRL filed comments limited to these issues. Read more here <http://www.arrl.org/news/arrl-comments-in-fcc-review-of-cb-rules>.

==> + FCC: ARRL SEEKS TO PROTECT 2304 MHZ OPERATION

In May, as a partial implementation of its National Broadband Plan, the FCC adopted amendments to its rules for Wireless Communications Services in the 2.3 GHz band to permit mobile broadband services, in addition to fixed services, in the bands 2305-2317.5 and 2347.5-2360 MHz. The Report and Order in WT Docket No 07-293 was published in the Federal Register on August 2, 2010, triggering a 30 day window for petitions for reconsideration. On September 1 the ARRL filed a Petition for Clarification or Partial Reconsideration, asking the FCC to "clarify, or partially reconsider a single aspect" of its Report and Order. Read more here <http://www.arrl.org/news/arrl-seeks-to-protect-2304-mhz-operation>.

==> + COMING UP IN QST: TAKE A LOOK AT THE OCTOBER ISSUE!

In the October issue of QST, DX is! This issue is chock-full of articles all about DX, DXing and DXers. This issue -- our first-ever DX issue -- is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at one of the ARRL Homebrew Challenge winners and an abundance of articles relating to DXing -- the upcoming issue of QST has something for just about everyone.

Located off the shore of Ontario in the southwestern portion of Hudson Bay -- only a few kilometers southeast of Manitoba -- East Pen Island is one of several uninhabited Canadian arctic islands in Nunavut, Canada. In April, Cezar Trifu, VE3LYC, reached East Pen (NA-231) via sled and activated the much-needed entity, making almost 2700 QSOs. But as the weather unexpectedly turned warmer, quickly thawing the ice, Trifu knew he was in trouble. "Stranded on East Pen: SOS de VY0V" is his nail-biting account of how he got VY0V on the air -- and himself off the island. Join Bill Vanderheide, N7OU, as he takes "Slow Boat to Tokelau," where just getting to this remote New Zealand territory is a story in itself.

For less than $32, David W. Cripe, NM0S, built a 40 meter band 50 W linear amplifier for his 5 W voice and CW 40 meter transceiver that he built in the ARRL's first Homebrew Challenge, taking the prize (along with Donald W. Huff, W6JL) for the lowest cost entry in the ARRL's Homebrew Challenge II. Find out how to build this nifty amp in his article "Homebrew Challenge II Co-Winner -- The Lowest Cost Entry."

ARRL News Editor S. Khrystyne Keane, K1SFA, writes of the ARRL Board of Directors 2010 Second Meeting, held in July in Windsor, Connecticut. She also profiles eight deserving hams whom the Board recognized and honored for their contributions to the Amateur Radio Service. ARRL's Amateur Radio on the International Space Station (ARISS) Program Manager Rosalie White, K1STO, takes a look at a Utah elementary school where a dedicated principal and an enthusiastic teacher sparked a fire of interest in Amateur Radio with their students, incorporating it into its curriculum in "ARISS Scores an A+ at Midvalley Elementary."

The October issue of QST features three product reviews this month. Assistant Manager of ARRL's Membership and Volunteer Programs Department Norm Fusaro, W3IZ, takes a look at the RF Concepts Alpha 9500 linear amplifier. "The Alpha 9500 is worthy of its place at the top of the Alpha product line," he reports. "Once configured for your station, automatic tune-up is effortless and nearly instantaneous. It will operate at 1500 W output for long periods with no apparent effort and is ready to serve in the most demanding amateur applications." QST Contributing Editor Gary Pearce, KN4AQ, reviews the Yaesu FT-7900R dual band mobile transceiver, saying that this radio "includes excellent receiver performance, a wide range of features and relatively simple operation in a sturdy package." Lastly, ARRL Technical Advisor Bruce Prior, N7RR, checks out the Small Wonder Labs Retro-75 AM transceiver Kit, "an economical and fun alternative for anyone looking to build a

low power transceiver for a mode other than CW."

Of course, there are the usual columns you know and expect in the October QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your October issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ON THE WEB: FINDING YOUR SECTION INFORMATION

When ARRL members log on to the ARRL Web site, their ARRL Section information automatically appears right below the "Your Favorites" drop-down menu. By clicking on the "Section News" link (see the red arrow below), you can then conveniently go directly to your Section page for news and events in your Section, as well as find contact information for your Section Manager and the Section Cabinet.

When your Section Manager has important news to share, you will see an alert on your homepage, located below the Section News.

If you're looking to get in touch with your Section Manager or another Section official, go to www.arrl.org/sections <http://www.arrl.org/sections> where you can find Sections listed by state and by ARRL Division. You can sign up for news alerts from your Section Manager or Division Director using the "Edit Your Profile" link.

==> + MARS: NEW INTERIM CHIEF TAKES OVER AIR FORCE MARS

The Air Force Military Auxiliary Radio System (AFMARS) organization has a new interim Chief. Outgoing USAF MARS Chief Allen Eiermann, K3LSR, retired at the end of May and was replaced by Technical Sergeant Jason Sandifer. Sandifer is a systems manager stationed at the Air Force Network Integration Center (AFNIC) at Scott Air Force Base in Illinois, just outside St Louis, Missouri. AFNIC is the headquarters of the national Air Force MARS organization. Read more here <http://www.arrl.org/news/new-interim-chief-takes-over-air-force-mars>.

==> + SOLAR UPDATE

Tad "The sultry suns of summer came <http://www.worldburnsclub.com/poems/translations/john_barlecorn.htm>" Cook, K7RA, reports: The average daily sunspot number for the week rose nearly 13 points to 38.3, and the average daily solar flux was up more than four points at 78.4. On September 2, one new sunspot group emerged -- numbered 1105 -- joining sunspot groups 1101, 1102 and 1103. On September 4, group 1102 faded away, then 1101 and 1103 vanished on September 6. Group 1105 is currently going over the western side of the Sun, but a new spot seems to be emerging in the northeast. The current prediction from the US Air Force and NOAA shows a rising solar flux, 76 on September 9-10, 77 on September 11, 78 on September 12-13, 79 on

September 14-15 and peaking at 80 on September 16. After that, a decline in solar flux is predicted. Look for more information on the ARRL Web site on Friday, September 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Robert Burns' John Barleycorn <http://www.worldburnsclub.com/poems/translations/john_barlecorn.htm>.

==> ARRL INTRODUCES FIRST CHALLENGE COIN

This month, the ARRL and the Amateur Radio community celebrate the 75th anniversary of the Amateur Radio Emergency Service®, or ARES®. To help commemorate this milestone, the ARRL has introduced an anniversary Challenge Coin. The die-struck, 1.5 inch brass coin depicts the ARES® 75th anniversary logo in gold with red, white and blue color fill, while the reverse shows the ARRL diamond logo against a hemisphere of the world.

Around the perimeter of the ARES® logo are the words Ready, Resilient and Responsive. "These words represent the critical need that ARES® activities have provided, and will continue to provide into the future," said ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC. "The Challenge Coin honors the service of ARES® volunteers and all Amateur Radio operators who respond to the call of public service. We hope ARES® volunteers will enjoy the honor of having the first Challenge Coin issued by the ARRL." Read more here <http://www.arrl.org/news/arrl-introduces-first-challenge-coin>.

==> THIS WEEK ON THE RADIO

This week:

- September 10 -- NCCC Sprint Ladder
- September 11 -- Ohio State Parks on the Air
- September 11-12 -- Arkansas QSO Party; FISTS Get Your Feet Wet Weekend; WAE DX Contest (SSB)
- September 11-13 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>
- September 12 -- North American Sprint (CW); SKCC Weekend Sprint
- September 16 -- NAQCC Straight Key/Bug Sprint

Next week:

- September 17 -- NCCC Sprint Ladder
- September 18 -- Connecticut QSO Party; Feld Hell Sprint
- September 18-19 -- ARRL 10 GHz and Up Contest (local time) <http://www.arrl.org/10-ghz-up>; South Carolina QSO Party; Washington State Salmon Run; QCWA Fall QSO Party; QRP Afield; Scandinavian Activity Contest (CW); SRT HF Contest (SSB)
- September 19 -- North American Sprint (SSB); BARTG Sprint 75
- September 20 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint

(local time)
- September 22 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. RESCUE RADIO: HAMS READY TO ASSIST AFTER QUAKE HITS IN NEW ZEALAND

Ham radio was ready to respond when a massive earthquake hit near the
city of Christchurch, New Zealand, on Saturday, September 4th. Jim
Linton, VK3PC, has more:

--

So far AREC (Amateur Radio Emergency Communications) volunteers have not
been required in any major way to assist, following the earthquake that
hit Christchurch in New Zealand. The magnitude 7.1 earthquake occurred
at 4.36am local time Saturday 4 September, while most people were asleep
in their homes. The result was extensive building damage in New
Zealand?s second largest city, Christchurch, with only two people
seriously hurt and no one reported trapped or missing.

AREC Deputy Director, Geoff Chapman ZL3PX who lives in Christchurch,
said that while AREC was at the Civil Defence Headquarters, there has
been no requirement for it to pass any emergency traffic. That is due to
restoration of telephone and power to the majority of the affected
areas. While water and sewerage systems have been affected there has
been no reported major loss of roads or bridges. However AREC is ready,
as the situation could worsen with the weather bureau issuing a warning
of very strong winds with gusts up to 130km/h and heavy rain posing new
threats to already damaged buildings. Adding to the danger are numerous
aftershocks with authorities advising that these will continue for many
days or weeks.

The quake is New Zealand's most damaging since the one which hit Napier
(Hawke's Bay) in February 1931, that saw radio amateurs extensively

provide emergency communications. That led to the formation by the IARU national radio society, the New Zealand Amateur Radio Transmitters (NZART) of what is today known as AREC.

Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee.

--

The New Zealand Ministry of Civil Defense and Emergency Management said the prime concern was ongoing aftershocks with a number of tremors between magnitude 3.2 and 5.4 that have been recorded. Meantime, an ongoing search of the rubble of quake-damaged buildings in Christchurch has not turned up trapped residents, officials said on Monday September 6th. (VK3PC)

**

RESCUE RADIO: UPDATE ON HAM RADIO AID TO PAKISTAN

The Pakistan Amateur Radio Society reports that a cross-band emergency repeater is set to provide the first communications of its type to the flood hit Swat Valley. This, by linking it to the rest of the country through a chain of 2 meter repeaters.

According to Pakistan Amateur Radio Society emergency communications organizer Asad Marwat, AP2AUM, notes that the linking of so many repeaters will cause a squelch tail delay. However given the circumstances and lack of proper equipment, AP2AUM says it will be more than acceptable.

Meantime, a convoy of radio amateurs is relocating a repeater already installed at Changla to the Malakand Heights. This is so it can be linked into the emergency communications system. Meantime, AP2AUM says that a team of radio amateurs will be transporting VHF base station with a high gain antenna via helicopter and subject to the availability of a 12 volt car battery all should be up and running shortly.

A massive flood disaster has ravaged Pakistan for over a month and shows no signs of easing. As a result, the Pakistan Amateur Radio Society continues to work in partnership with Islamabad Jeep Club members and the Pakistan Academy of Family Physicians to provide support for those affected. Some 30 radio amateurs are involved in providing emergency communications in response to the disaster that so far has affected an estimated 20 million people and claimed 1500 lives. (PARS)

**

RESCUE RADIO: TALIBAN THREATENS OUTSIDE RESPONDERS IN PAKISTAN

And in a related development, news reports say that the revolutionary extremist Taliban group has hinted it may launch attacks against foreigners helping Pakistan, saying their presence was unacceptable. The militant group has attacked aid workers in the country in the past, and

an outbreak of violence could complicate a relief effort that has already struggled to reach the 8 million people who are in need of emergency assistance.

The United Nations said it would not be deterred by threats of violence. However, a spokesman for the World Health Organization told the BBC that relief and aid work in certain areas was already being affected by security concerns.

For those not aware, the Taliban is a Wahhabi Islamist political movement that governed Afghanistan from 1996 until it was overthrown in late 2001. It has regrouped and since 2004 has become a strong insurgency movement fighting a guerrilla war against the governments of Afghanistan, Pakistan, and the NATO led International Security Force in the area. (Published news reports)

**

RESCUE RADIO: DIRS DEACTIVATES AS HURRICANE EARL FADES

Back in the United States, the Public Safety and Homeland Security Bureau of the Federal Communications Commission has announced the deactivation of the Disaster Information Reporting System in regard to Hurricane Earl. Communications providers are advised not to submit additional information related to the effects of Hurricane EARL through Disaster Information Reporting System until further notice.

For those not aware, Disaster Information Reporting System is a voluntary web-based system that communications providers, including wireless, wireline, broadcast, and cable providers can use to report communications infrastructure status and situational awareness information during times of crises. (FCC)

**

RESCUE RADIO: HAMS ASSISTING AT COLORADO WILDFIRE

The ARRL reports that hams are providing some of the communications at a wildfire just northwest of Boulder, Colorado.

Amateur Radio operators are located at the Red Cross shelter set up at the University of Colorado Event Center and also at the Boulder County Emergency Operations Center. They are reportedly providing voice and ATV communications between forward fire units, the Incident Command post and the Emergency Operations Center. Hams are also providing voice and packet communications for the Red Cross.

At airtime news reports say that the fire has consumed over 8000 acres. More on this story is on the ARRL website at www.arrl.org.

**

RESCUE RADIO: SOUTH AFRICA'S HAMNET SEVERS LINKS WITH IRESC

South Africa's amateur radio emergency communications organization HAMNET has decided to sever its ties with the International Radio Emergency Support Coalition which is also known as IRESC. Hamnet's move follows what its leadership describes as mounting concerns over the direction and leadership of IRESC.

Hamnet's National Director is Francois Botha, ZS6BUU. He told the Southgate News that his organization had no choice but to take this step. He claims that this happened after many of its current officers were dismissed or resigned due to discontent at the way the IRESC was being run.

According to Botha, HAMNET has already been approached by another organization who he says really has an international feel and flavor about them and who are very open to ideas and suggestions. ZS6BUU says that once the two groups solve some software problems and establish some on-line links set up, an announcement will be made.

But in a public response to Botha, The IRESC's Salvatore Torres, W0CST, has issued a statement that takes Issue with ZS6BUU. In it Torres says that IRESC has revoked Francois Botha, ZS6BUU and three other Officers for violation of bylaws and interfering with present operations.

Torres claims that Botha has communicated false and misleading information regarding IRESC. He also says that his organization has e-mails and others information to certify its position but will not play that card as wit has more important matters at hand in the area of emergency communications needs.

Torres does end on a positive note. He says that the IRESC does not have any ill fillings toward Hamnet or the 4 former officers that were revoked. He says that IRESC thanks them for their service they have performed and wish them well.

More on HAMNET is on line on the South Africa Radio League's web page at tinyurl.com/25x59st. The International Radio Emergency Support Coalition cyberspace home is at www.iresc.net.

RADIO REPORTING: VE3JX WANTS STORIES ON YOUTH MENTORING FOR HIS QCWA WORLDRADIO COLUMN

Dave Hayes, VE3JX, who writes the QCWA column in WorldRadio online magazine says that he is looking for input from members regarding their involvement in youth oriented projects such as ham radio youth mentoring and education. To that end, Dave says that he would like to ask those chapters who have experience in this to relate them to him.

By way of example VE3JX cites among other activities, Chapter 151 in Alberta, Canada. Its members have gone to various schools and conducted live contacts with the astronaut and cosmonaut hams on-board the International Space Station. He also asks if other members or chapters have participated in the youth mentoring program sponsored jointly by the QCWA and Amateur Radio Newsline.

If you are a QCWA member and have experiences with any aspect of ham radio youth mentoring, please send your story along with any related photos to Dave. His e-mail is ve3jx (at) arrl (dot) net or ve3jx (at) rac (dot) ca. (VE3JX)

THE LAW: PATENT PENDING STIFILING TELECOMMUNICASTIONS INNOVATION

Some of the biggest players in the technology industry are complaining that the U.S. patent system is broken. This, by putting too many patents of dubious merit in the hands of people who can use them to drag companies and other inventors to court.

As a result, a growing number of inventors are taking part in an experimental program called Peer-to-Patent. Peer-to-Patent was launched in June of 2007 with the U.S. Patent and Trademark Office and backed by the technology industry that is intended to give both inventors and the public more of a voice in the system. The concept behind the program is to publish patent applications on the World-Wide-Web for all to see and let anyone with relevant expertise submit commentary to be passed along to the Patent Office.

By using the power of the Internet to tap the knowledge of the public, Peer-to-Patent hopes to locate hard-to-find prior evidence that an invention already exists or is obvious and therefore doesn't deserve a patent. The ultimate goal is to locate prior documentation that Patent Office examiners might not find on their own. This in turn could produce better patents by reducing ones granted on applications that aren't novel.

The U.S. Patent and Trademark Office employs more than 5,800 examiners with specialized expertise, but they are sifting through a mountain of applications. 467,243 patent requests were submitted in fiscal 2007, up from 237,045 in fiscal 1997. As a result, said Dave Kappos, vice president of intellectual property law for IBM, says that it is taking big technology companies with huge patent portfolios longer and longer to get applications through the system.

The Patent Office had a backlog of nearly 761,000 applications at the end of fiscal 2007 many dealing with emerging technology. At the same time applicants were waiting an average of two years and eight months for a final decision. That is especially hard for the telecommunications industry which is built on rapid innovation, short product life cycles and technology that can become quickly outdated. (Comm-Law Review)

HAM INDUSTRY NEWS: CQ MAGAZINE INTROIDUCES A NEW STREAMLINED WEBSITE

CQ magazine has launched what it calls a new and easy-to-navigate website. The updated cyberspace home for the magazine features a clean new look and a streamlined user interface which according to Editor Rich Moseson, W2VU, is a major step forward:

--

W2VU: "The main benefit of our new website is ease of navigation. We've had great things on there for years but they have been added piecemeal and they have built up ino a kind of a patchwork and its been hard to find things. Now, we've reorganized things and its all easy to find with much of it easy to get to with just one or two clicks."

--

The new site currently features links to special information for new and prospective hams as well as hamfest and special event listings. But that's not all:

--

W2VU: "We also have a couple of new features on the website such as the current issue highlights right on the front page; links to our other magazines and a direct link to our Facebook page as well."

--

Also on the site are easy links to the CQ Writer's Guide, award and contest information, a comprehensive links section, special information for new and prospective hams, and direct links to advertisers' websites. Callsign lookup and a link to the online CQ archive are also included.

The updating of the CQ website completes a company-wide website upgrade for all four magazines published by CQ Communications, Inc. The other three are Popular Communications, CQ VHF and WorldRadio Online magazines. The new CQ website may be found on-line at www.cq.amateur.radio.com. (CQ)

RADIO HONORS: ARRL INTRODUCES FIRST CHALLENGE COIN

To help commemorate the 75th anniversary of the Amateur Radio Emergency Service, or ARES the ARRL has introduced an anniversary Challenge Coin. This die-struck, 1.5 inch brass coin depicts the ARES 75th anniversary

logo in gold with red, white and blue color fill, while the reverse shows the ARRL diamond logo against a hemisphere of the world.

The ARRL's Emergency Preparedness and Response Manager is Mike Corey, W5MPC. He says that the Challenge Coin honors the service of ARES volunteers and all amateur radio operators who respond to the call of public service. Corey adds that the ARRL hopes that ARES volunteers will enjoy the honor of having the first Challenge Coin issued by the ARRL. More about the Challenge Coin is on-line at tinyurl.com/2bmbr4y (ARRL)

THE SOCIAL SCENE: AGILENT DONATES MAJOR PRIZE TO MICROWAVE UPDATE

Turning to the ham radio social scene, word that Microwave Update 2010, has received a donation from Agilent Technologies of a portable spectrum analyzer that will be given away sometime during the event in Cerritos. This years event is being sponsored by the San Bernardino Microwave Society on October 21st through October 24th at the Sheraton Cerritos Hotel, in the city of Cerritos, California. Early Bird Registration ends on September 30th. For more information take your web browser to www.microwaveupdate.org on the World Wide Web. (KH6WZ)

**

RADIO BUSINESS: NEWSPAPER SAYS BUSINESS WAS DOWN AT SHELBY

According to the Cleveland County Star on-line newspaper, while ham radio enthusiasts crowded North Carolina's Gaston County Park on Saturday, September 4th to attend the 2010 Shelby Hamfest, business at the event appeared to be down.

The newspaper quotes Scott Cole, who is the owner of Tower Electronics in Green Bay, Wisconsin who said business seemed off from years past. The story noted that Cole has been coming to the Hamfest for almost 20 years. He told the paper that it was likely a combination of the economy and that people were a little scared about the then approaching hurricane Earl.

But not everyone comes to a hamfest to buy and sell. Ham radio comradery is a big part of any event. In its report the newspaper noted that some of those attending came to socialize and in some cases to take an amateur exam to get their ham radio operator's licenses. One ham told the paper that it was not just the hamfest and flea market. He said that he comes to stay a few days to enjoy the area. The complete article is on line at tinyurl.com/2wopsfg (adapted from the Cleveland County Star)

**

THE SOCIAL SCENE: HAMFEST INDIA IN NOVEMBER

And the 19th annual Hamfest India will be held on November 13th and 14th in Pollachi city in India. The venue is the Pollach P.A.Educational Institution. More about this event is on-line at www.hamfestindia.com.

NAMES IN THE NEWS: K2TQN HONORED WITH AWA HOUCK AWARD

Some names in the news. First up is John Dilks, K2TQN, who writes the "Vintage Radio" column in QST magazine and who has been honored with the AWA Houck Award for Documentation by the American Wireless Association. This, at the organization's 2010 World Convention held back in mid-August in Rochester, New York.

This award is presented each year to an American Wireless Association member who has written original articles on radio development or history that has been published in the AWA Journal, AWA Review or another other publication. K2TQN began writing the Old Radio column in QST a decade ago in January of 2000. That column has since been renamed Vintage Radio. In its presentation the American Wireless Association noted that these monthly columns represent a remarkable range of topics and are based on great original research resources. (ARRL, others)

**

NAMES IN THE NEWS: AF MARS APPOINTS INTERIM CHIEF

And Air Force Military Auxiliary Radio System has a new Interim Chief. This with the announcement that Sergeant Jason Sandifer has replaced Allen Eiermann, K3LSR, in this position.

Sergent Sandifer is a systems manager stationed at the Air Force Network Integration Center at Scott Air Force Base located in Illinois. The Air Force Network Integration Center that has long been the headquarters of the national Air Force MARS organization. His appointment is expected to last until recruitment of a permanent new Air Force MARS Chief is completed. (Air Force MARS)

EMERGING TECHNOLOGY: AN UPDATE ON HOME 3D TELEVISION

Three dimension television in the average viewer's home is likely not around the corner. At least not as long as having to wear 3 D glasses are a part of getting the picture. Jim Davis, W2JKD, has more:

--

Years may pass before 3-D reception is widely adopted at home by the public, but 3-D's ultimate dominance seems assured. This according to the CGC Communicator broadcast industry newsletter that cites an article from IEEE Spectrum magazine gives fascinating technical details on 3-D Television. It also provides an important information update on the state of this technology. You can find it in cyberspace at tinyurl.com/3d-overview.

Meantime, two electronics giants are looking for a way to make 3-D television more appealing to the consumer market. Both Sony and Toshiba are independently working on 3-D television receivers that do not require the viewer to wear special glasses to obtain the 3-D effect/ Unfortunately, both high costs and a number of technical hurdles remain.

Im Jim Davis, W2JKD.

--

You can read where this research is headed by visiting tinyurl.com/3Dglasses-free. (CGC Communicator, IEEE Spectrum)

HAM RADIO IN SPACE: ISS ON THE AIR

Some news about manned amateur radio from space. This with news that Colonel Doug Wheelock, KB5BOC, has been very busy of late as NA1SS making random contacts from the International Space Station. Take a listen to this time compressed audio supplied to us by Scott Avery, WA6LIE:

--

Audio report only. Download the audio version of this weeks newscast to hear it.

--

Colonel Wheelock also had these words for students who might be listening to him:

--

Audio report only. Download the audio version of this weeks newscast to hear it.

--

This is not KB5BOC's first time on-orbit. In 2007 Colonel Wheelock served as a mission specialist as a part of the crew of STS-120. In completing his first space flight he logged over 362 hours in space, including 20 hours and 41 minutes of Extra Vehicular Activity during 3 spacewalks. Wheelock was launched to the ISS on June 15th. Together with fellow-astronaut Tracy Caldwell Dyson he undertook an 8hr 3min spacewalk to repair a failed ammonia pump module in early August. He is

due to return to Earth in November. (ANS)

ON THE AIR: HAM RADIO TO CELEBRATE BONAIRE BECOMING A DXCC ENTITY

On the air, the upcoming Bonaire DXpedition by a combined Dutch and American operating team plan to use the large antenna farm of Radio Netherlands. This, to deliver the world a truly whopping signal between October 10th and the 24th when they activate the island for the first time after it becomes a new DXCC entity.

Bonaire is currently part of the Netherlands Antilles which are scheduled to be dissolved as a unified political entity on October 10th. The five islands of the former Netherlands Antilles will each attain a new constitutional status within the Kingdom of the Netherlands, thus creating several new DXCC entities.

To commemorate the event, this group of dedicated radio amateurs will take to the High Frequency airwaves using the giant Radio Netherlands antenna system constructed on the island back in 1969. As of Tuesday, September 7th, a large shipment of equipment has been loaded into a sea container in Miami, Florida. The shipment consists of yagi antennas, masts, amplifiers, coax, bandpass filters, tuners and a wide variety of accessories. It was expected to set sail for Bonaire on Friday, September 10th.

You can keep track of the planning for the Bonaire DXpedition and vicariously join in on the festivities on line at the operations website. Its home in cyberspace is www (dot) bonaire2010 (dot) com. www (dot) bonaire2010 (dot) com. (QRZ DX)

**

DX

In DX, members of the Caracas DX Group will be active as YW5LF from the Los Frailes Islands between November 18th and the 22nd. QSL this operation via DM4TI.

VK2IR says through the Ohio Penn DX Newsletter that with the help of 3D2AA that he will be will be heading up a team of 10 operators to activate Rotuma in July 2011. VK2IR, says that further details of this operation will be forthcoming as plans progress.

K9LUK will be active stroke VK4 from North Stradbroke Island between October 8th and 16th. His operation will be sporadic, but look for him on 14.260 MHz as time permits. QSL via his home callsign.

G0OPA will be active as 8P9LJ from Holetown in St.James Parish on Barbados between September 12th and November 8th. His operation will be on all of the High Frequency bands. If you make contact, please QSL via his home callsign, either direct or via the bureau.

Lastly, MM0SSG is now active from Angola as D2SG. He's operating from a beach 1 mile from the capital Luanda and expects to be there for the next 6 months. Craig's operation is most days on 80 through 10 meters using CW, SSB and PSK31. QSL via GM4FDM.

(Above from various DX news sources)

-No-Archive: Yes

>>>You can be assured that all planned developments will contain antenna restrictions. It is in the land >>>developers best interest and makes sense. They do not want 100 ft. towers springing up. In fact, there is a >>>phrase about operating rf transmitters, excluding the obvious garage door openers etc. Is there room for >>>verticals and wire antennas? I would think the answer would be yes.

They don't even want antennas on vehicles. Not even if you're just visiting.

Before, I have had my vehivle towed for violating homeowner association rules and had to pay so much money to get it back out of impound, money that I couldn't afford to pay, which ruined my credit for the rest of my life. And I don't even live in a homeowner association. I was just visiting my mom there. And that place did not have a homeowner association when she moved into the trailer park. It was added later.

And when I visited at my uncle's house in a different city, the hoa complained to him about the CB antenna on the car in his driveeway, fined him, and said it would be towed away if they ever saw it there again.

He does NOT have a car with a CB antenna. That was MY car. So far, I have never ever signed any agreement with any homeowner association at all. I live on non-hoa non-CC&R land.

What gives you nazi hoas the right to tow MY LEGALLY REGISTERED CAR for violating hoa rules when I NEVER EVER SIGNED ANY fricking agreement with any one of you?

Just because I'm visiting one of my relatives, none of whom could find any place without a hoa attached to ity anymore.

And no you can not "just buy a house without any hoa or cc&Rs".

Several counties' laws through zoning law and other law now requires any non-hoa non-CC&R homes to have permanent CC&Rs requiring joining a hoa added to it before the owners of the non-CC&R non hoa houses are allowed to sell them.

So the very act of purchasing a non-hoa non-CC&R home automatically makes it a CC&R hoa home.

And besides, as I said, I don't live in a hoa cc&R home. I cirrently DO live in a non-hoa non-CC&R home.

So how is purchasing one, if I could, which I can't, because of the newer laws, solve that problem???

I was STILL towed for violating homeowner association rules of places I was visiting when I do NOT live in a homeiwner association and have NOT signed any agreements at all with any homeowner associations.

I have NEVER signed any agreements with the hoas who towed me.

The traler park did npt have a visitors parking area because the hoa owner of the trailer park required all visitors to park in the driveways of the person they were visiting.

My uncle's house did not have visitor parking area because it was his own driveway in his own house and that city has laws which say it is against the law ro park on the street at all, either side, no matter what time of day or night or what reason.

So it is now very very clear that the FCC has comitted the federal crime of fraud when they fraudently said that hams "can just operate mobile".

You can NOT operate mobile when your car keeps getting towed for violating the homeowner associations' rules of "no external antennas allowed on vehicles" and "no ham or cb antennas allowed on vehicles" when you DON'T EVEN BELONG to any hoa and NEVER SIGNED ANY agreement with any hoa at all.

Just because you're visiting family and friends who live in homneowners associations, the only places left anymore.

And no, you can't sue. 1. It costs much more to sue them for it than it does to pay to get your car out of impound for violating homeowner association rules that you never agreed to and that the homeowner association doesn't have to tell you what the rules are since you're a visitor instead of a resident."

And people have spent over twenty thousand dollars in legal fees just trying to defend their right to park in their own driveways when driveway parking was allowed but the rules of the two hoas in charge of the place conflicted with each other.

2. Most lawyers will not take such cases anymore because they will be disbarred for doing so, since it is a "conflict of interest" since most are now required by the counties,cities, and/or state to have agreements with the hoas and hoa developers to defend them.

3. There have been so many lawsuits brought against hoas that most courts are now refusing to hear the cases involving hoas unless they're sure they can rule in favor of the homeowners' associations and against the homeowners.

And in California, because of the number of hoa court cases filed, California, by law. ruled that all hoa disputes must now be settled only through arbitration and not in the courts because it was

overburdening the couyrt system.

I haven't even visited some of my family in years.

I'm sure their hoas would definitely tow my car and/or fined them or me for it ljust like all the other ones did.

And I can't afford such tow bills to get the car out of impound, or the fines.

Now the question is WHY did the FCC commit the federal crime of fraud by fraudently telling radio operators that they "can just operate mobile"? WHY ?????

And how do we operate out CB radios mobile when our cars keep getting towed and impounded by homeowners associations we never ever made ANY agreement at all with since we live in non-hoa non-CC&R houses?

And you don't even need an antenna on your car for it to happen. This issue is BIGGER than just radios.

It also happens if you just have "amateur radio plates" on your car without any antennas or radios at on or in your car.

Because homeowners associations don't like amateur radio locense plates on vehicles either, even if there's not any antenna or radio in the vehicle.

They also tow visitors for violating the homeowner association rules of what color car you are and are not allowed to have, what make and model of car you are and are not allowed to have, what type of vehicle you are and are not allowed to have.

What gives you nazi homeowner associations the right to tow my car and have it impounded just because it's blue, a color you don't allow under hoa rules, when I NEVER EVER SIGNED ANY agreement with you at all???????

Now there'sd even some municipalities requiring mandatory for homeowners to simultaneously join three homeowners associations for the same house!!!!!!!

Of course, the rules for each condlict with the other two.

One only allows your house to be painted blue because all the other colors are ugly and bring down property values while blue is a pretty color that brings up property values and the hoa rules specifically say "homes are not allowed to be painted any ugly color".

while the second hoa says houses are only allowed to be painted red because all other colors are ugly and bring down property balues while red is a pretty color that brings up property valuesd and the hoa rules specifically say "homes are not allowed to be painted any ugly color".

while the third hoa says "houses are only allowed to be painted green because all other colors are ugly and bring property values down while green is a pretty color that brings up property values and the hoa rules specifically say "homes are not allowed to be painted any color".

If I lived in a home requiring three hoas like many do now, which I don't, I would paint the one house red, blue, and green to follow all hoa rules except that wouldn't work either since doing so also violates all of the hoas' rules.

You CAN't paint it red while not painting it red, or paint it blue while not painting it blue or painting it green while not painting it green.

hmmm... Since I would be getting fined and the house having a lien put on it either way in that case, I may as well go all out and paint it all three colors that are both not allowed to have that color painted on it and required to be the ONLY color the house is allowed to be painted.

On second thought, in that case, I may as well go all the way and paint it in glow-at-night colors purple and pink with polka dots

My suggestion would be to send radioguy's comments to the shit file.
That he seems to have a lot of time on his hands to author these inane posts
is indicator enough that he lacks a personal life aside from Usenet.

That he crosssposts is yet another indicator that he relishes retorts.
The retorts give him a sense of self-importance.

==> + PUBLIC SERVICE: GET READY FOR THE 2010 SIMULATED EMERGENCY TEST
```

The 2010 ARRL Simulated Emergency Test is just around the corner and ARRL Field Organization leaders are planning an event that will actively involve members of the Amateur Radio Emergency Service ®, the Radio Amateur Civil Emergency Service, the ARRL National Traffic System and many other related groups that prepare for and respond to emergencies. Public service and emergency response agencies and organizations in your community, ARRL Section Leaders and/or local and state officials will also be invited to participate. You, too, are invited to be a part of this annual tune-up for emergency response. Read more here <http://www.arrl.org/news/get-ready-for-the-2010-simulated-emergency-test>.

```
==> + AMATEUR RADIO IN THE CLASSROOM: QST ARTICLE SPARKS NEW UNIVERSITY
PROGRAM

It all started with the June 2009 issue of QST. Larry Barr, K5WLF --
Planetarium Manager at Tarleton State University in Stephenville, Texas
```

-- was reading QST when he came across an article about exploring the basics of radio astronomy through a homebrew, easy-to-construct radio telescope. The article -- written by ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME -- showed how to turn an everyday satellite TV dish antenna into an instrument that can be used to not only broaden horizons and expand the understanding of our universe, but to marry the magic of Amateur Radio and astronomy.

Barr quickly got to thinking. He showed the article to his supervisor, Dr Shaukat Goderya, the Director of the Astronomy Education and Research Program at TSU. Barr and Goderya began brainstorming on how they could do something like that in the department. And thus began the latest research program in radio astronomy for the Tarleton Observatory. Read more here <http://www.arrl.org/news/em-qst-em-article-sparks-new-university-program>.

==> + REGULATORY: NEW YORK JUDGE DECLARES AMATEUR RADIO IS NOT A CELL PHONE

In many states and localities, it is illegal to talk on a cell phone (without a hands-free device) while behind the wheel. Doing so can result in a ticket and possibly a large fine. But on May 30, 2010, when a New York ham was talking on his mobile rig, he didn't think he was doing anything wrong. He wasn't, of course, but the New York State Police officer who pulled him over and cited him with a $100 fine didn't quite see it that way. Steve Bozak, WB2IQU, of Clifton Park, told the ARRL that when he was pulled over while driving to Troy -- about 16 miles away -- he assured the officer that he was not speaking on a cell phone, but on his Amateur Radio handheld transceiver. According to Bozak, the officer said "it was all the same to him." So Bozak -- with the assistance of his attorney, ARRL Volunteer Counsel (VC <http://www.arrl.org/volunteer-counsel-program>) Jeremy Rase, KC2JRD -- decided to fight the ticket in court. Read more here <http://www.arrl.org/news/new-york-judge-declares-amateur-radio-is-not-a-cell-phone>.

==> ON THE AIR: SPONSOR A PLAQUE FOR ARRL SWEEPSTAKES

When your dentist says you have plaque, that's bad. But when the ARRL November Sweepstakes contest results say you have a plaque, that's a cause for celebration! Plaques for Division and overall contest winners are an important part of the Sweepstakes tradition -- both for the winners and the plaque sponsors. The ARRL Sweepstakes depends on the generosity of plaque sponsors who honor both the winners and their sponsoring organizations. Read more here <http://www.arrl.org/news/sponsor-a-plaque-for-arrl-sweepstakes>.

==> + ON THE AIR: USA TO HOST 2014 WORLD RADIOSPORT TEAM CHAMPIONSHIP

In 1986, Ted Turner -- in reaction to the political troubles surrounding the Olympic Games of the 1980s -- created an international sports competition that he called the Goodwill Games. The first Games

were held in Moscow with more than 3000 athletes from 79 countries competing. Four years later, the Games moved to Seattle, Washington and it was at those Games that the first-ever World Radiosport Team Championship (WRTC) took place.

Besides athletics, the Goodwill Games focused on areas of cultural exchange, arts and other unique subjects, one of these being Amateur Radio -- and WRTC was born. Radio amateurs from around the world gathered in Seattle for an Olympic-style event, joining in competition and camaraderie. In 1996, WRTC moved to San Francisco, then Slovenia in 2000, Finland in 2002, Brazil in 2006 and Russia in 2010. Now 18 years later, WRTC returns to the USA. Read more here <http://www.arrl.org/news/usa-to-host-2014-world-radiosport-team-championship>.

==> ON THE WEB: INTERACT WITH OTHER ARRL MEMBERS -- ADD YOUR PROFILE TO THE WEB SITE

Do you want to find an old ham buddy or Elmer? Is the Jim Smith you knew as a kid the one in Kansas or the one in Oregon? How about interacting with other ARRL members who share your ham radio interests? Or maybe you're just looking for someone to connect with who is also just getting into the digital modes.

One of the features on the new ARRL Web site is Member Profile. You can post a list of your favorite Amateur Radio activities, as well as a description of how you got involved with Amateur Radio here. How your profile appears is under your control -- you can make your full profile available to all other ARRL members, or you can choose to hide certain information.

Adding your profile to the Member Directory allows your fellow ARRL members to connect with you outside of the ham bands. For example, you can then search for others who share your passion for DXing, contesting or EmComm.

Adding your profile is simple: Log in to the ARRL Web site, click on "Edit your Profile" link and select the "Edit Profile" screen.

You'll find the Permissions area just below the Profile Information section. You'll need to opt-in in order for your profile to be seen on the Web site.

==> + SOLAR UPDATE

Tad "Spread their wild hues to the sultry Sun <http://www.humanitiesweb.org/human.php?ID=3749&a=p&p=c&s=l>" Cook, K7RA, reports: The average daily sunspot numbers this week dropped nearly 23 points to 15.6, and geomagnetic indices were quiet. The average daily solar flux was 78.1, but the latest prediction from US Air Force and NOAA calls for rising solar flux values. The September 16-22 projection has solar flux values at 83, 85, 86, 86, 87, 88 and 88, which is well above last week's average. Solar flux hasn't been to

88 or higher since August 7 (90.5), and before that July 21 (89.1). The same forecast shows the planetary A index for the same period at 8, 8, 7, 5, 5, 15 and 15, indicating rising geomagnetic activity along with the increased solar activity. Geophysical Institute Prague predicts quiet to unsettled conditions September 17, quiet September 18-19, quiet to unsettled September 20 and unsettled conditions September 21-23. The autumnal equinox occurs Wednesday, September 22 at 11:09 PM EDT (0309 UTC on September 23). With the northern and southern hemispheres bathed in equal amounts of light, expect better worldwide HF propagation, although solar activity continues at a low level which does not support an MUF into the higher frequencies over most paths. Look for more information on the ARRL Web site on Friday, September 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Clare's June <http://www.humanitiesweb.org/human.php?ID=3749&a=p&p=c&s=l>.

==> + SILENT KEY: ARRL HONORARY VICE PRESIDENT HUGH TURNBULL, W3ABC (SK)

ARRL Honorary Vice President Hugh Turnbull, W3ABC, of Silver Spring, Maryland, died September 14 at age 93. Turnbull served the League as Atlantic Division Vice Director (1980-1982) and Director (1982-1996). The ARRL Board named him Vice President in 1996 and Honorary Vice President in 2000. Upon hearing of his death, ARRL President Kay Craigie, N3KN -- who served as Atlantic Division Vice Director during Turnbull's tenure as Director -- said: "Hugh's life was devoted to serving his country and Amateur Radio. Many times I heard him say that each of us should 'give something back' to ham radio. He was my first mentor in ARRL leadership, and it was my good fortune to have his example to learn from." Read more here <http://www.arrl.org/news/arrl-honorary-vice-president-hugh-turnbull-w3abc-sk>.

==> SUPPORT ARRL: ARRL TO AGAIN PARTICIPATE IN COMBINED FEDERAL CAMPAIGN

For the ninth year running, the US Office of Personnel Management has designated the ARRL to participate in the 2010 Combined Federal Campaign (CFC). This campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $140,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's effort to represent its members and all radio amateurs. Read more here <http://www.arrl.org/news/2010-marks-ninth-year-for-arrl-participation-in-combined-federal-campaign>.

==> THIS WEEK ON THE RADIO

This week:

- September 17 -- NCCC Sprint Ladder
- September 18 -- Connecticut QSO Party; Feld Hell Sprint
- September 18-19 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/10-ghz-up>; South Carolina QSO Party; Washington
State Salmon Run; QCWA Fall QSO Party; QRP Afield; Scandinavian
Activity Contest (CW); SRT HF Contest (SSB)
- September 19 -- North American Sprint (SSB); BARTG Sprint 75
- September 20 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint
(local time)
- September 22 -- SKCC Sprint

Next week:

- September 24 -- NCCC Sprint Ladder
- September 25-26 -- CQ Worldwide DX Contest (RTTY); Texas QSO Party
- September 25 -- AGCW VHF/UHF Contest
- September 27 -- QRP Homebrewer Sprint
- September 28 -- 222 MHz Fall Sprint (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS

- September 17-19 -- ARRL Southwestern Division Convention
<http://www.sandarc.net/Convention2010/index.html>, San Diego,
California
- October 15-17 -- ARRL Pacific Division Convention
<http://www.pacificon.org/>, San Ramon, California

1> Thats Gav, allright.

What does your URL have to do with OS/2, LeFlour? Must be pretty
lonely
over in your other newsgroups to motivate you to seek out other
newsgroups.
Yet another person has added an OS/2 newsgroup to the distribution of
an
thread that has no OS/2 content. Welcome to the trolls list, LeFlour.

OS/2 reminds him of Windows 3.x, maybe - but for IBM-PC DOS? A GUI for
people who can't us MS-DOS makes me want to vomit anyway.

--
Fearing his life, the grand architect Hiram Abiff yelled these three
words, so all could hear - Mahabone, Tubal Cain, and IAOM to the rogues.
With this the key to King Solomon's Temple had been given to all,
brothers or not.

What do your classic unsubstantiated and erroneous claims have
to do with OS/2, James?

4> Another failure to use "quotes" properly, or use a real news
reader,

What do your failures have to do with OS/2, James, and why are
you blaming your unsubstantiated and erroneous claims on quotes
and news readers?

4> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

4> Another failure to use "quotes" properly, or use a real news
reader,

What do your failures have to do with OS/2, James, and why are
you blaming your unsubstantiated and erroneous claim on quotes
and news readers?

4> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

4> Google is the Gigalo,

What does your classic unsubstantiated and erroneous clim have to
do with OS/2, James?

4> and you are it's Groupie,

How ironic, coming from someone using a gmail.com email address.

4> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

4> Another failure to use "quotes" properly, or use a real news
reader,

What do your failures have to do with OS/2, James, and why are
you blaming your unsubstantiated and erroneous claim on quotes
and news readers?

4> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

4> Google is the Gigalo,

What does your classic unsubstantiated and erroneous clim have to
do with OS/2, James?

4> and you are it's Groupie,

How ironic, coming from someone using a gmail.com email address.

What do your classic unsubstantiated and erroneous claims have
to do with OS/2, James?

5> Another failure to use "quotes" properly, or use a real news
reader,

What do your failures have to do with OS/2, James, and why are
you blaming your unsubstantiated and erroneous claims on quotes
and news readers?

5> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> The failer is all yours,

On what basis do you claim that you are mine, James?

5> and your groupie need to use a Gigalo,

How ironic, coming from someone using a gmail.com email address.

5> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> Your ability to copypasta impresses no one,

Classic ambiguity; are you talking about spaghetti, vermicelli,
rigatoni, or some other form of pasta, James? And what does your
non sequitur have to do with OS/2, James?

5> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> Your ability to copypasta impresses no one,

Classic ambiguity; are you talking about spaghetti, vermicelli,
rigatoni, or some other form of pasta, James? And what does your
non sequitur have to do with OS/2, James?

non sequitur have to do with OS/2, James?

5> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> Um, dipshit there is a difference between email and usenet

Irrelevant, given that I never claimed otherwise, James. The fact
of the matter is that gmail is part of Google, and you ironically
talked about some need to use a Gigalo, after claiming that
"Google is the Gigalo".

5> - or as you see it Gmail and Google Groups,

I see it as you using gmail, James, which is a part of Google.
"Google is the Gigalo", according to you, which means that you
have a need to use a Gigalo, which is ironic, considering your
remark "and your groupie need to use a Gigalo".

5> you Gigalo Groupie.

Projecting again, eh James?

5> Your ability to copypasta impresses no one,

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> Your fake prescription failed,

What does your classic erroneous presupposition have to do with
OS/2, James?

5> no E.D. drugs for you,

What does your experience with E.D. drugs have to do with OS/2,
James?

5> you limped dick Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> Your fake prescription failed,

What does your classic erroneous presupposition have to do with
OS/2, James?

5> no E.D. drugs for you,

What does your experience with E.D. drugs have to do with OS/2,
James?

5> you limped dick Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> No, why are you posting OS/2 crap to the A26 newsgroup,

The first posting in the "Gigalo Groupie" thread is from you, James,
so you're the one responsible for choosing the newsgroup
distribution. Take up the matter with yourself.

5> Gigalo Groupie.

Who is "Gigalo Groupie", James? There is nobody in this newsgroup
using that alias.

5> Your fake prescription failed,

What does your classic erroneous presupposition have to do with
OS/2, James?

5> no E.D. drugs for you,

What does your experience with E.D. drugs have to do with OS/2,
James?

--
Fearing his life, the grand architect Hiram Abiff yelled these three
words, so all could hear - Mahabone, Tubal Cain, and IAOM to the rogues.
With this the key to King Solomon's Temple had been given to all,
brothers or not.

6> What does your copy pasta have to do with A26.

Classic ambiguity; are you talking about spaghetti, vermicelli,
rigatoni, or some other form of pasta, James? And what does your
non sequitur have to do with OS/2, James?

6> Christmas Jew?

Who is "Christmas Jew", James? There is nobody in this newsgroup
using that alias.

Classic ambiguity; are you talking about spaghetti, vermicelli, rigatoni, or some other form of pasta, James? And what does your non sequitur have to do with OS/2, James? ANd who is "Christmas Jew", James? There is nobody in this newsgroup using that alias.

I see that you completely evaded the matter that you ironically need to use a Gigalo. You also evaded the matter than /dev/null isn't the same thing as alt.test, James. You also evaded the matter than you chose the newsgroup distribution for the "Gigalo Groupie" thread, and yet complained about one of the newsgroups in which it is appearing! Classic inconsistency.

3249. Re: Tholen the copypasta Gigalo Groupie / Christmas Jew.

Indeed we all felt teh same way right after teh first time we all
jacked together.
